Repair User Guide — Branch

Type 3: Not Under Warranty (With Serial No) — Quick Repair (Centre Repair)

Source: Odoo Tour Recorder export — `Tour/3E. Repair User Guide - Branch [ Not Under Warranty ( With Serial No ) - Quick Repair ].json`

Scenario: The product is out of warranty but has a serial number. It is repaired at the branch's service centre (**Centre Repair**) at the customer's cost: as a one-day **Quick Repair** the customer approves the quotation online and pays the full amount at once, after which the item is dispatched straight back.

Every screenshot below is a real capture from a single, clean, passing automated run — taken *before* each step's action, with the element to use framed in red.

1. Overview

This manual explains how to register and complete a **branch (Centre Repair)** repair for a customer's product whose **warranty has expired** and which has an existing **serial number**. The process starts with a Helpdesk ticket at the receiving branch, records the repair through a Field Service task, quotes the spare part for the customer's online approval, takes the full payment at once (Quick Repair, done in one day) and ends when the item is dispatched back to the customer.

Ticket stages covered

New | Diagnosis | Estimation Sent to Customer | Estimation Approval Received | Repair Started | Repair Completed | Handed Over to Customer

Before you start

- You have access to the Helpdesk, Field Service, Inventory and Accounting apps.
- The active company (top bar) is **Jinasena Agricultural Machinery (Pvt) Ltd.**
- The customer and the finished product (with its serial number, already sold through a sales order) already exist in Odoo.
- The item has been physically brought to the branch by the customer.

Example data used in this manual

Field	Value
Type	Repair - Not Under Warranty (With Serial No)
Return Receipt Location	BR-AM/Stock (Jinasena Ampara Branch)
Repair Reason	Difficult to start the engine
Job Location	Centre Repair
Customer	KURUNEGALA CASH CUSTOMER
Serial Number	0630_010 (Product [JMC6] Multi Chopper 6Hp (Tractor Type) is filled automatically)
Spare Part	[02BB 023] BALL BEARING 6202-2RS
Payment Journal	Commercial Bank
Payment	Full invoice amount at once (no deposit, no balance)

How to read each step

Navigation	Where you are in Odoo (app › menu › screen / dialog).
Action	What to click, select, or type.
Description	Why the step is needed and what happens.
Screenshot	The screen you are on *right before* performing the action, with the element to use framed in red.

Step summary

Section	Steps	Purpose
A	1–10	Open Helpdesk, create the ticket and classify it (type, locations, reason, customer) and select the serial number of the finished product.
B	11–13	Return the item into stock and validate the receipt.

C	14–15	Plan the intervention and create the Field Service task (Centre Repair: no factory leg).
D	16–28	The technician records the diagnosis, attaches a photo of the item and adds the spare part.
E	29–32	Open the quotation, send it to the customer by email and confirm it when the customer accepts.
F	33–39	Create and confirm the invoice and register the full payment at once (Quick Repair).
G	40–47	Validate the delivery of the repair part and complete the repair task.
H	48–50	Dispatch the repaired item straight back to the customer.

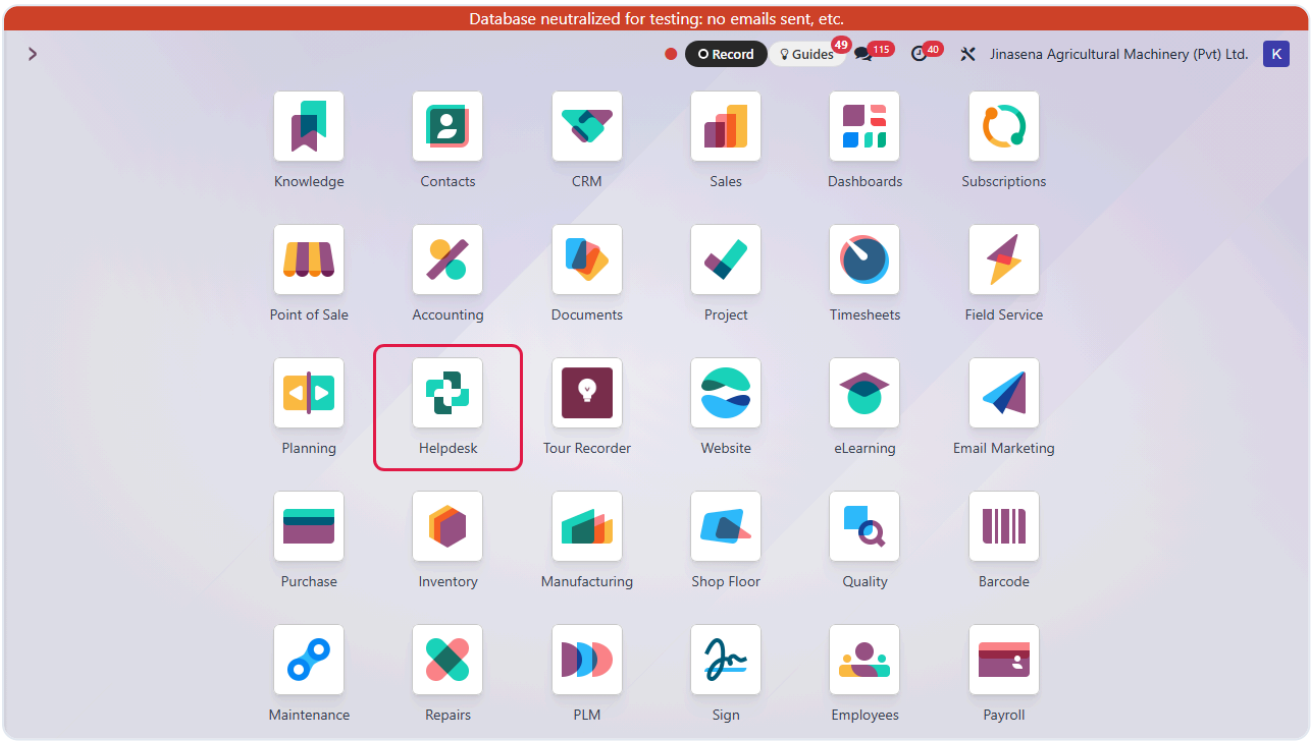

Section A — Create the Repair Ticket (Steps 1–10)

1 Open the HelpDesk app

Navigation Odoo Home → Apps

Action **Click the Helpdesk app icon on the home screen.**

Description Opens the Helpdesk Overview dashboard, showing every support team you have access to.

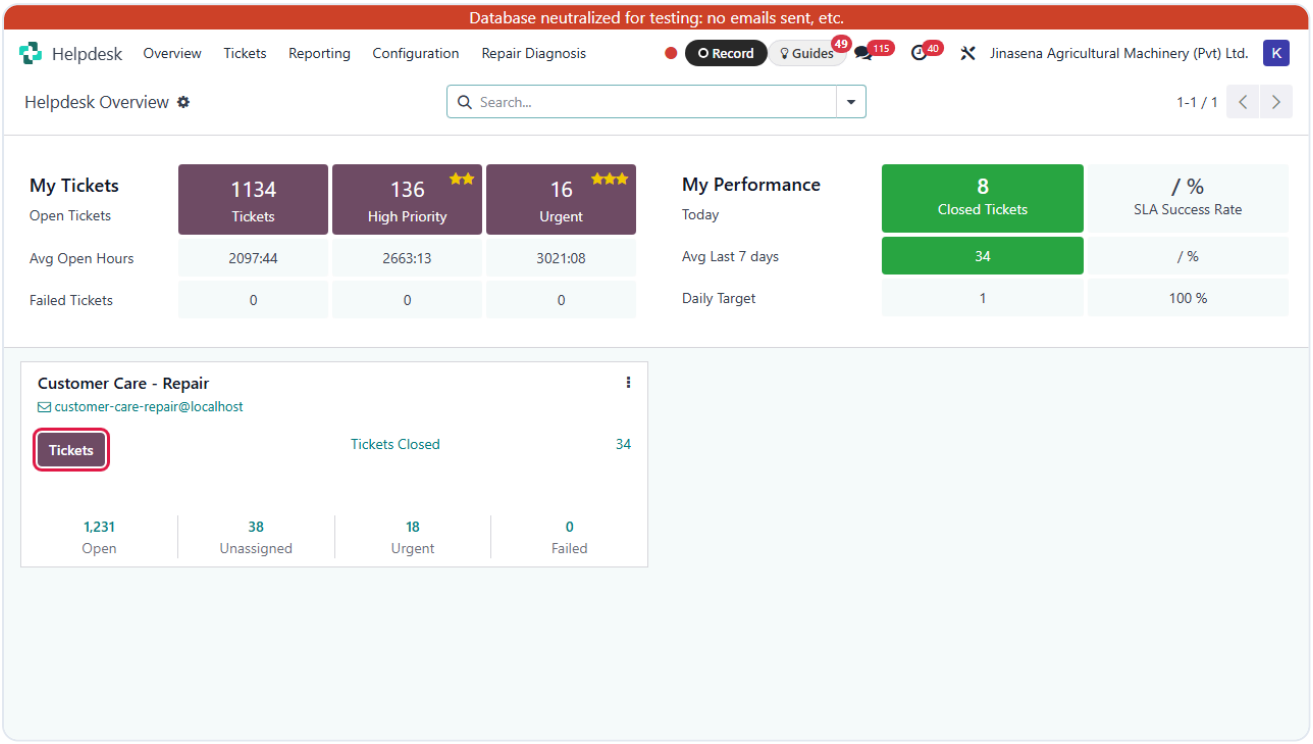

Odoo Apps home screen — Helpdesk app icon

2 Open the repair tickets

Navigation Helpdesk → Overview → Customer Care - Repair

Action **On the Customer Care - Repair team card, click Tickets.**

Description Displays the created tickets and their information.

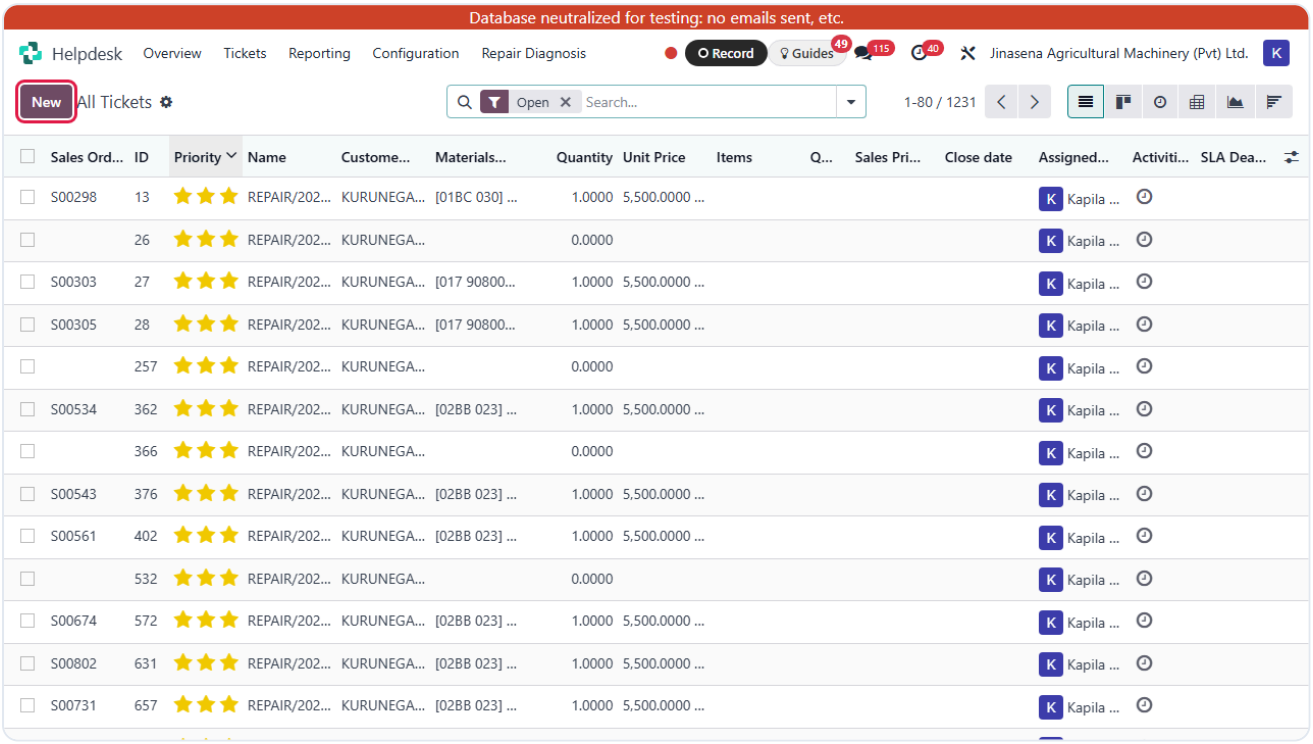

Helpdesk Overview — Tickets button on the Customer Care - Repair team card

3 Create a new ticket

Navigation Helpdesk → Customer Care - Repair (Tickets)

Action **Click New at the top-left of the ticket list.**

Description Opens a blank Helpdesk ticket form for the repair item received from the customer.

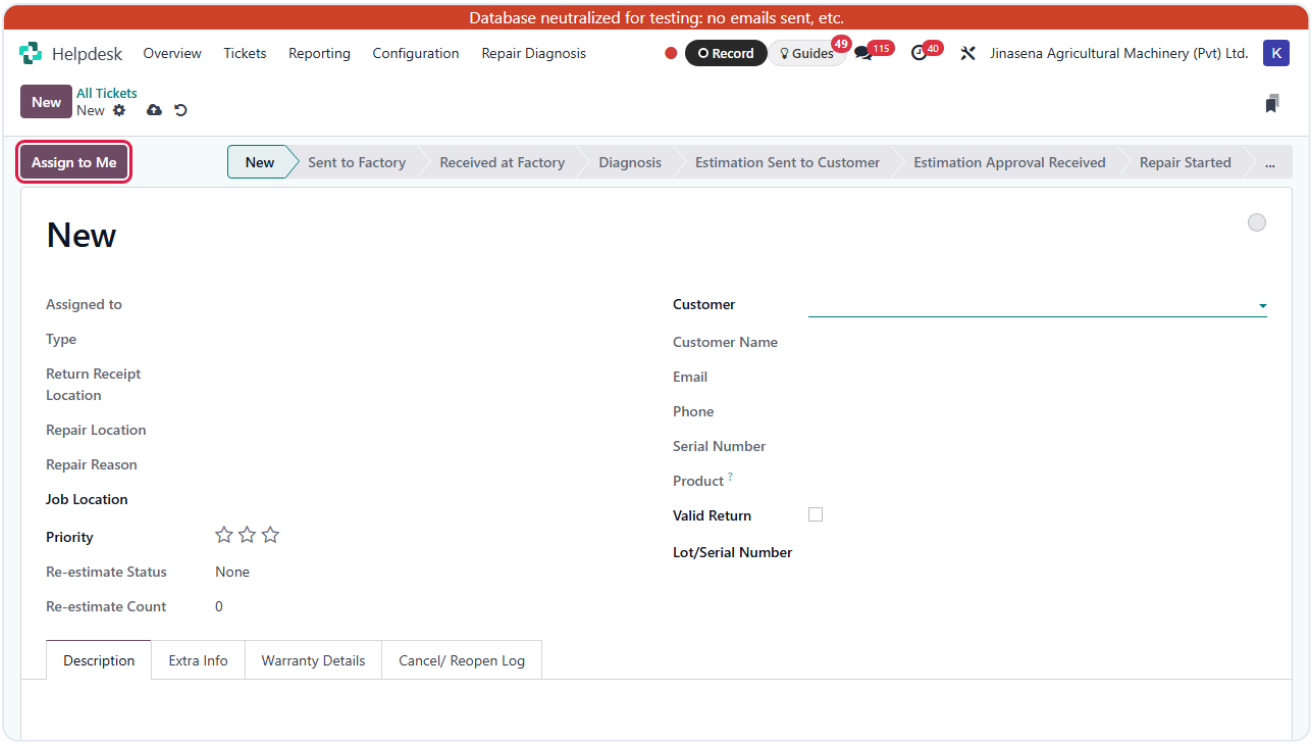

All Tickets list — New button

4 Assign the ticket to yourself

Navigation New ticket form

Action **Click Assign to Me in the status bar.**

Description Saves the ticket for the first time and assigns it to the current user. This also generates the ticket's sequence-based name (e.g. `REPAIR/2026/01649`) — the ticket has no user-editable title.

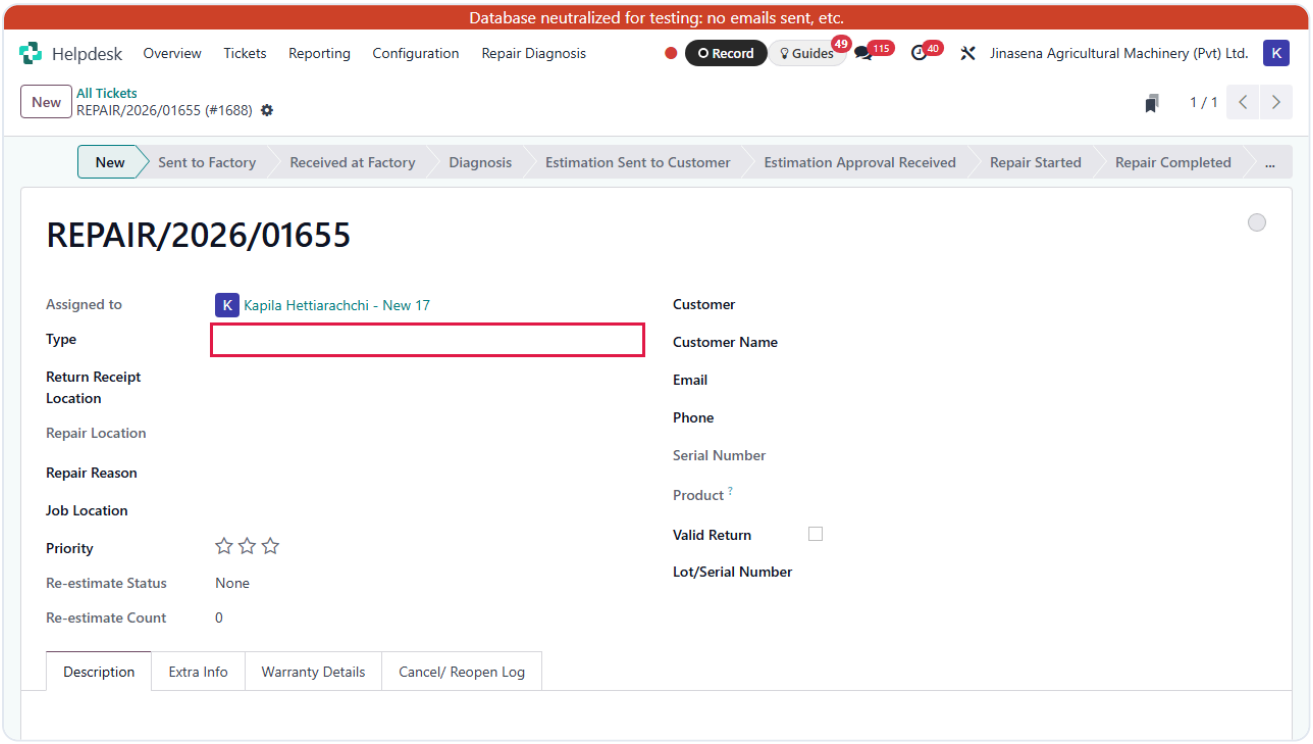

Blank new ticket form — Assign to Me button

5 Set the repair Type

Navigation Ticket form → Type field

Action **Click the Type field and select Repair - Not Under Warranty (With Serial No).**

Description Selects the flow for a product whose warranty period has expired but which has a serial number. For this type the item is identified by an existing **Serial Number**; there is no *Create Serial No* step.

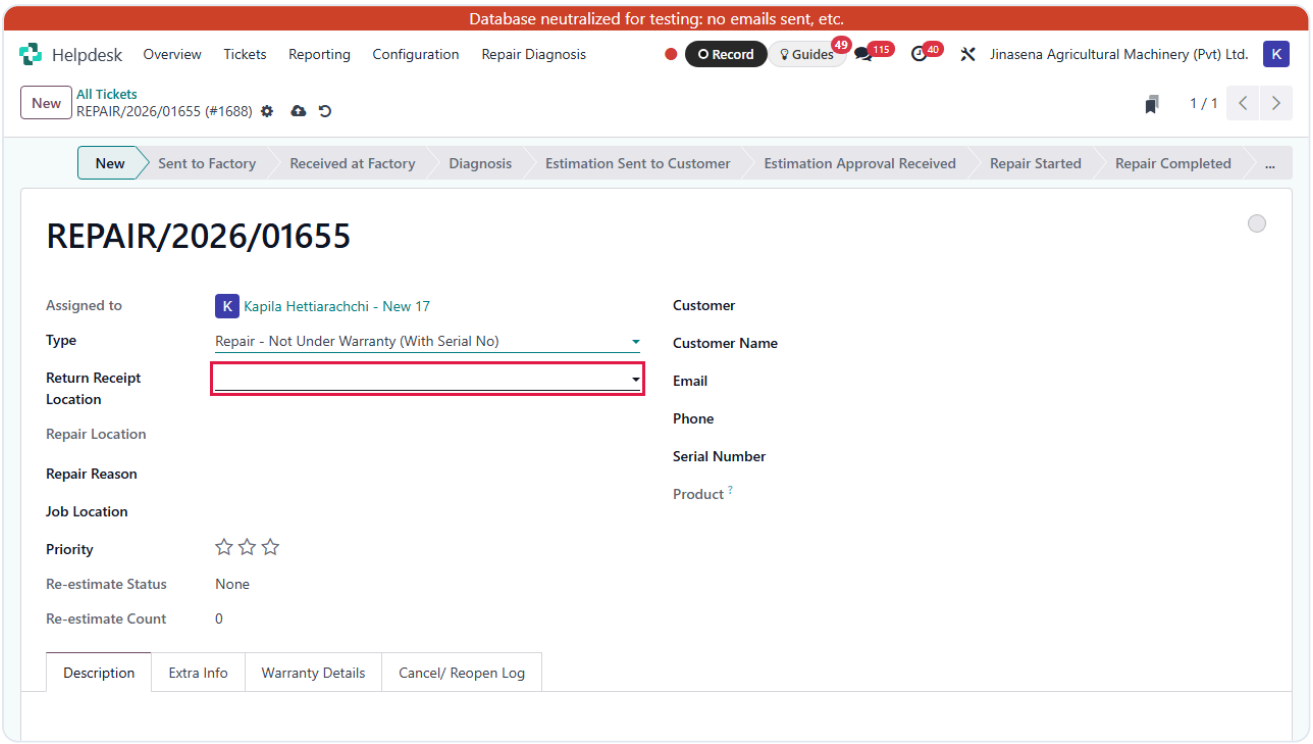

Ticket form — Type field

6 Set the Return Receipt Location

Navigation Ticket form → Return Receipt Location field

Action **Click Return Receipt Location and select the branch receiving the item (e.g. `BR-AM/Stock`, Jinasena Ampara Branch).**

Description Select the location where you would like to receive the product for repair.

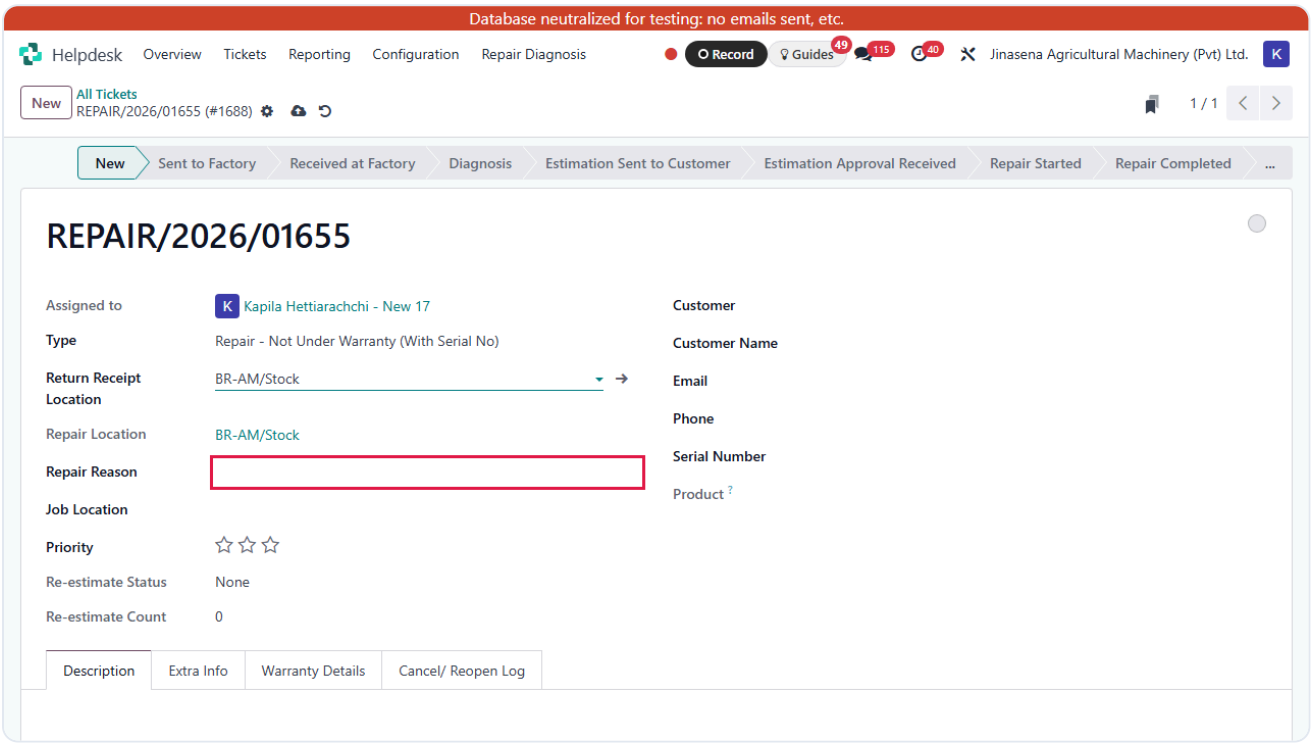

Ticket form — Return Receipt Location field

7 Select the Repair Reason

Navigation Ticket form → Repair Reason field

Action **Click Repair Reason and select the reported fault (e.g. `Difficult to start the engine`).**

Description A list of common errors is provided; select the ones that apply. This is a tags field.

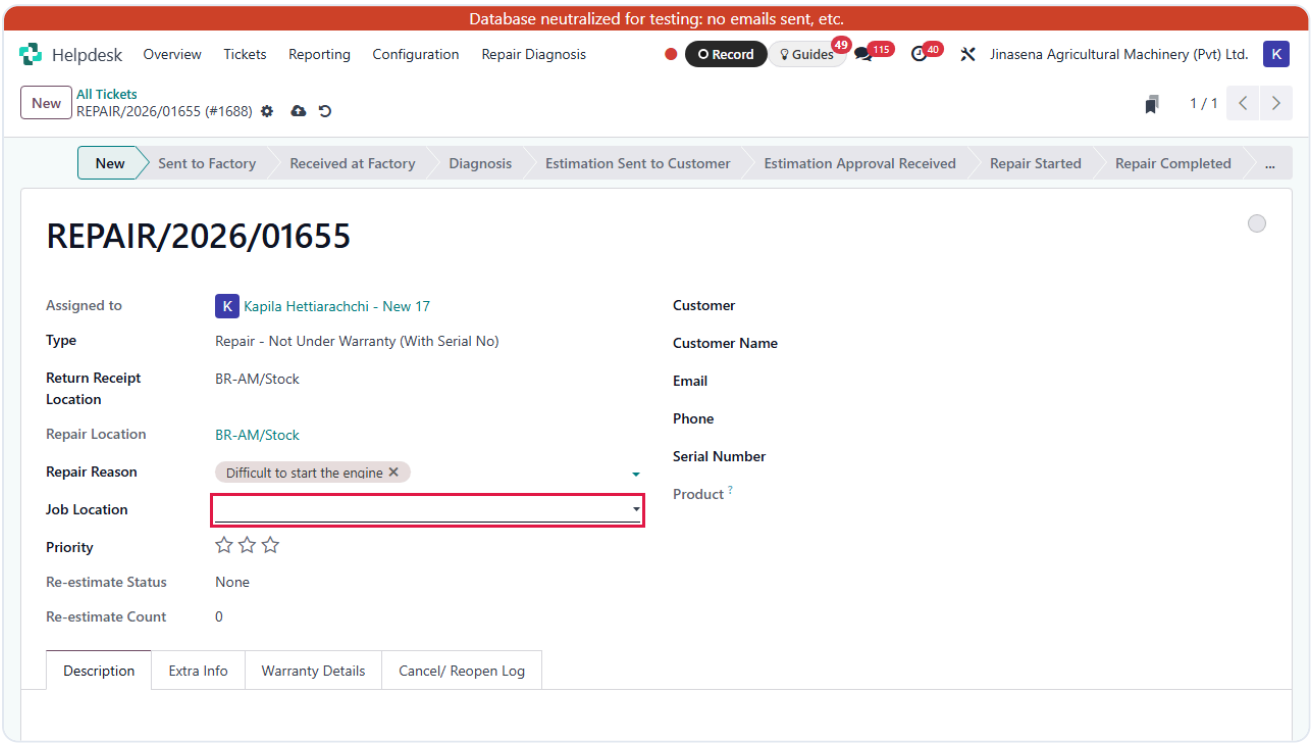

Ticket form — Repair Reason field

8 Select the Job Location

Navigation Ticket form → Job Location field

Action **In Job Location, select Centre Repair.**

Description Defines where the repair will be performed. **Centre Repair** means the repair is done at the branch's service centre, so there is no Send to Factory / Send to Sales Centre leg.

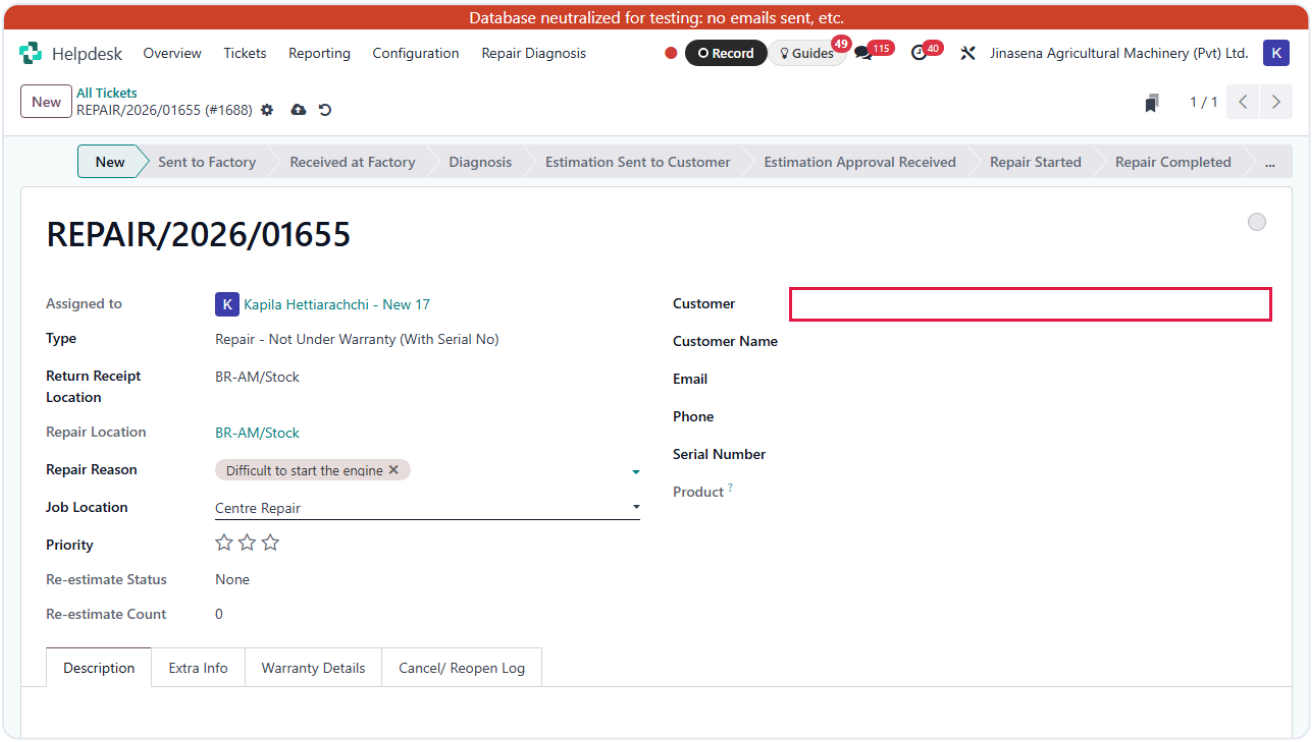

Ticket form — Job Location field

9 Select the Customer

Navigation Ticket form → Customer field

Action **Click Customer and select `KURUNEGALA CASH CUSTOMER`.**

Description Email and Phone are filled automatically from the customer record.

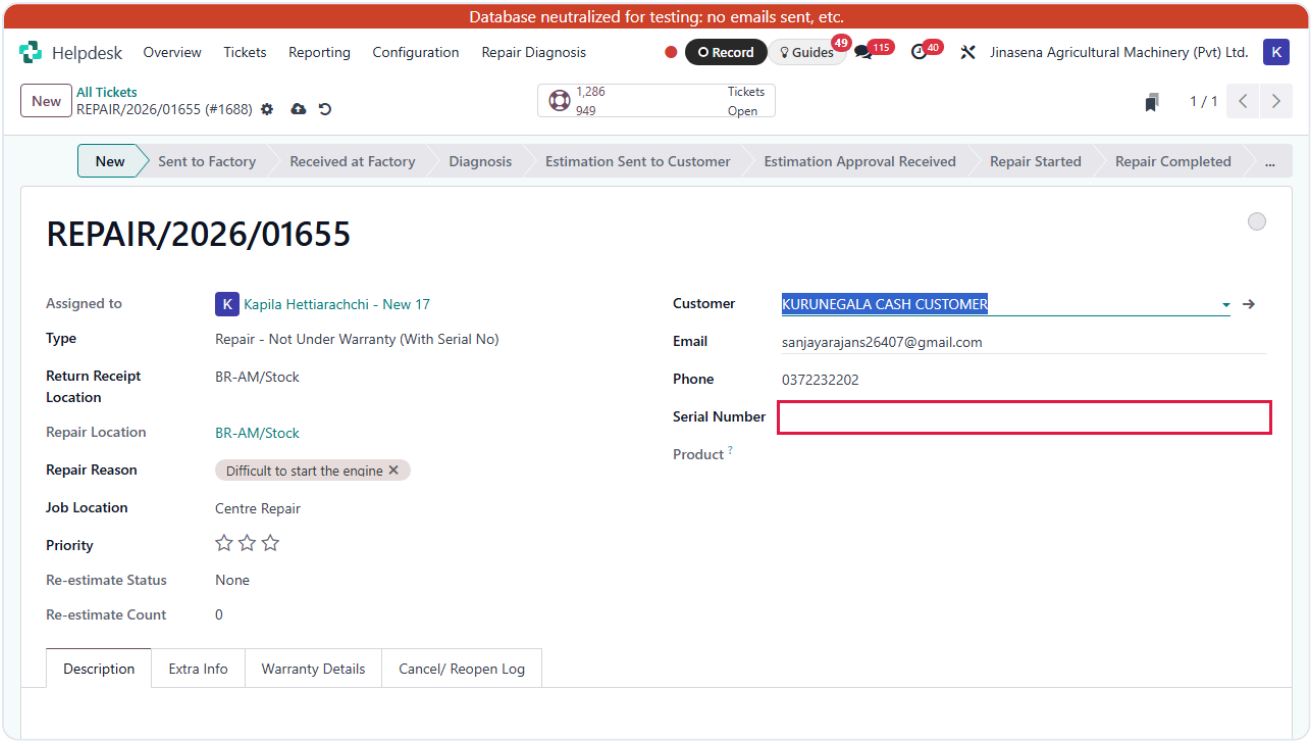

Ticket form — Customer field

10 Enter the Serial Number

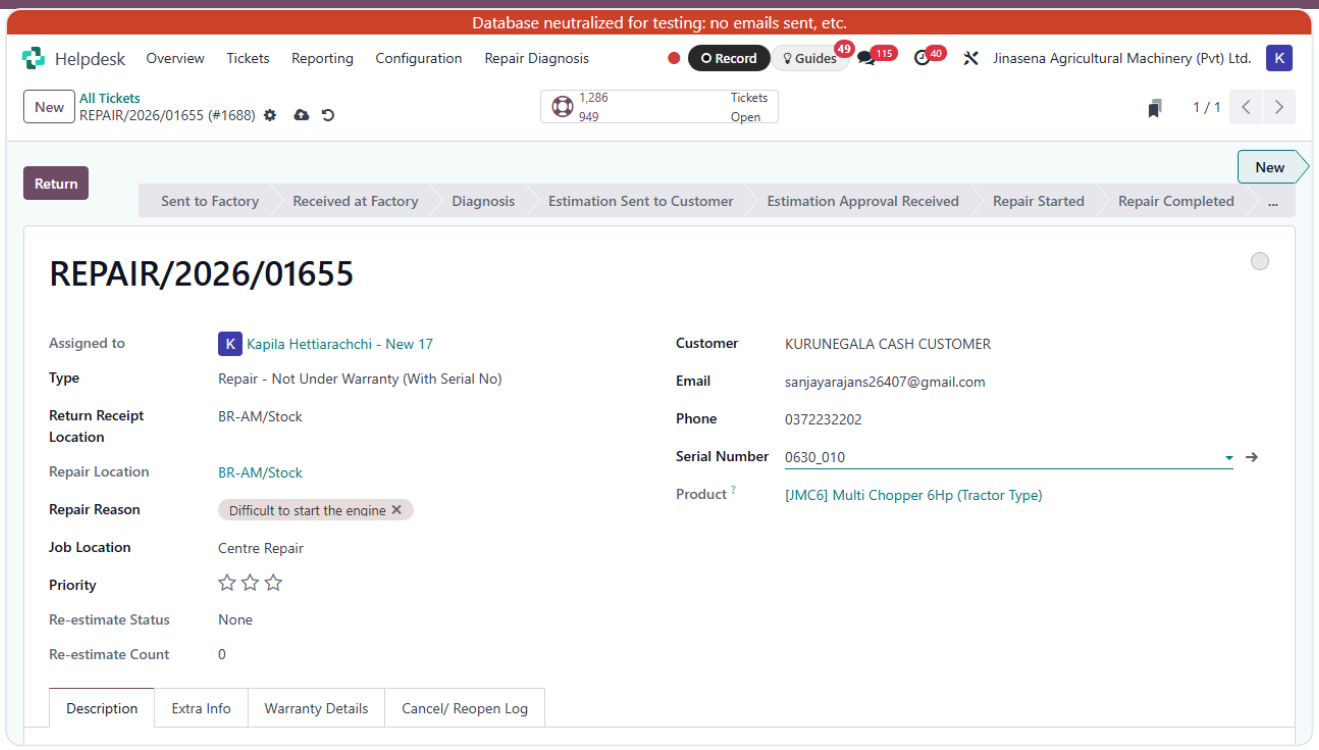

Navigation Ticket form → Serial Number field

Action **Click Serial Number, type the serial number of the finished product (e.g. `0630_010`) and select it from the list.**

Description Type the serial number corresponding to the finished product sold via a sales order and select it. Only serials already sold to a customer are offered. Selecting it fills in the **Product** and the **Sales Order** automatically (here `[JMC6] Multi Chopper 6Hp (Tractor Type)`), so there is no separate Product step.

Ticket form — Serial Number field

Ticket form — Serial Number entered, Product filled in

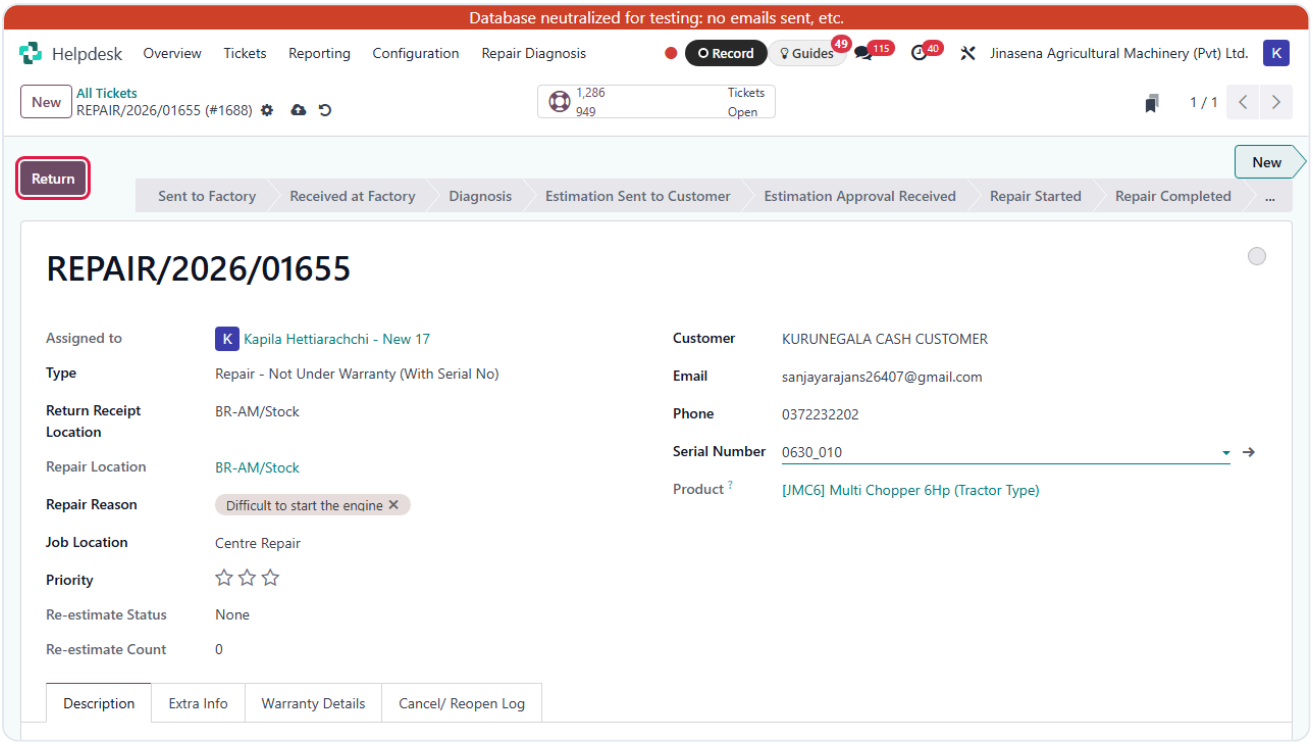

Section B — Receive the Item (Steps 11–13)

11 Return

Navigation Ticket form → status bar

Action **Click Return.**

Description Records the item being received from the customer: creates the Returned Picking (receipt) for the product. (The server also raises "You may only return Done pickings" after creating it; see the QA notes.)

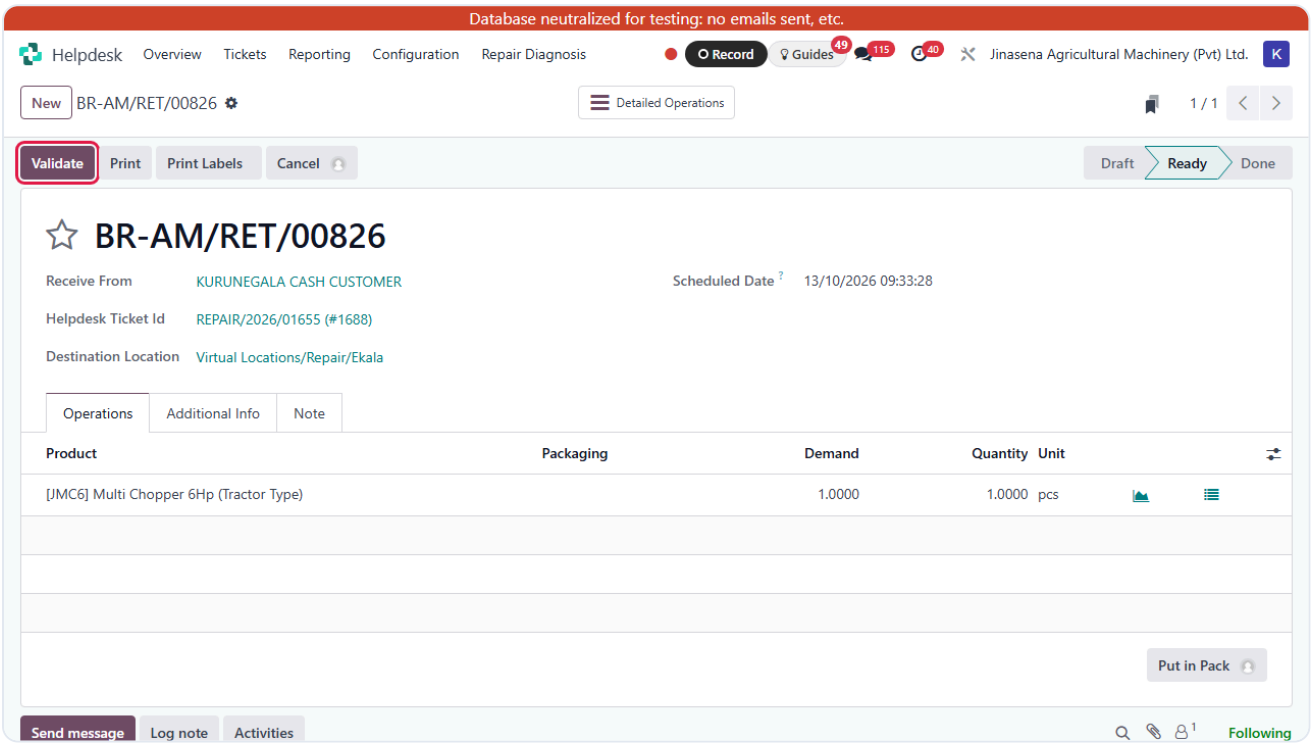

Ticket form — Return button

12 Validate the receipt

Navigation Transfer (Receipt) → header

Action **Click Validate.**

Description Validates the return operation: the item is received into stock and the transfer becomes *Done*. This is required before *Plan Intervention* appears.

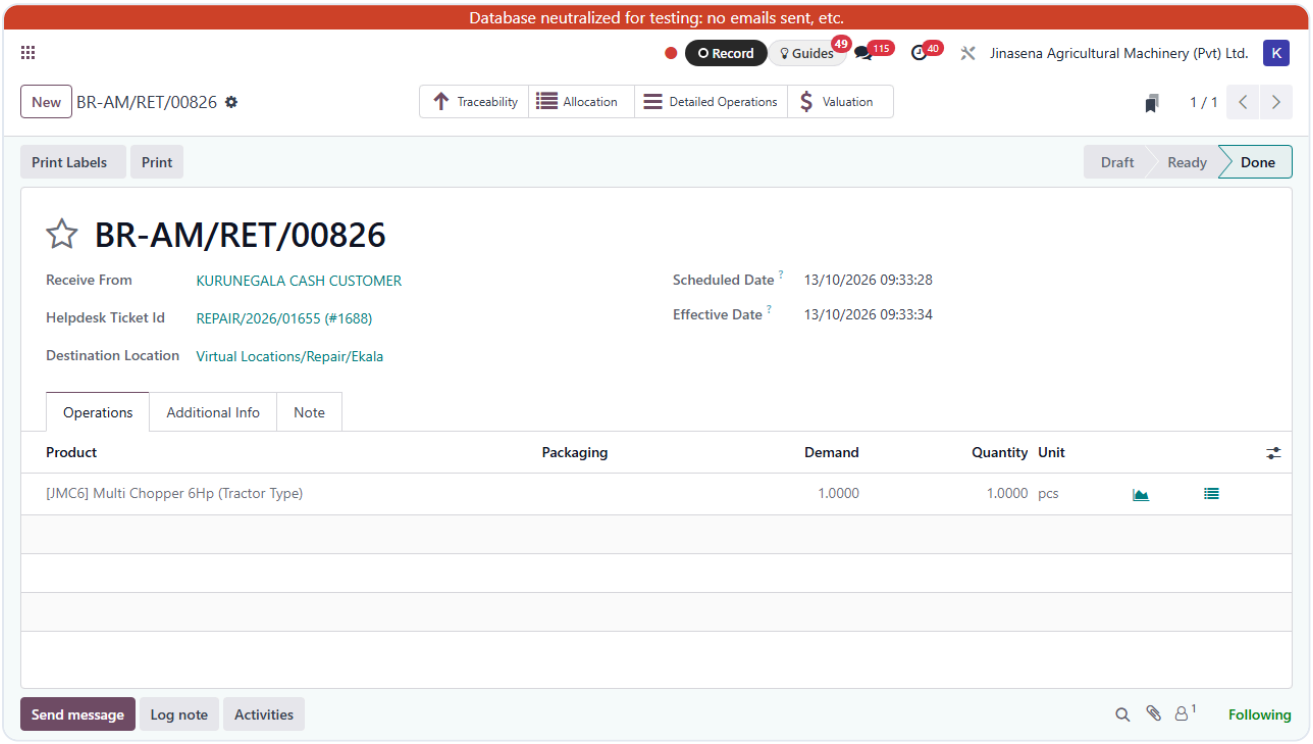

Transfer (Ready) — Validate button

13 Back

Navigation Transfer (Done)

Action **Click Back.**

Description Returns to the previous menu — the ticket view. The screenshot shows the receipt in the *Done* state; on this instance it opens as a full page, so there is no Back button to frame.

Transfer (Done)

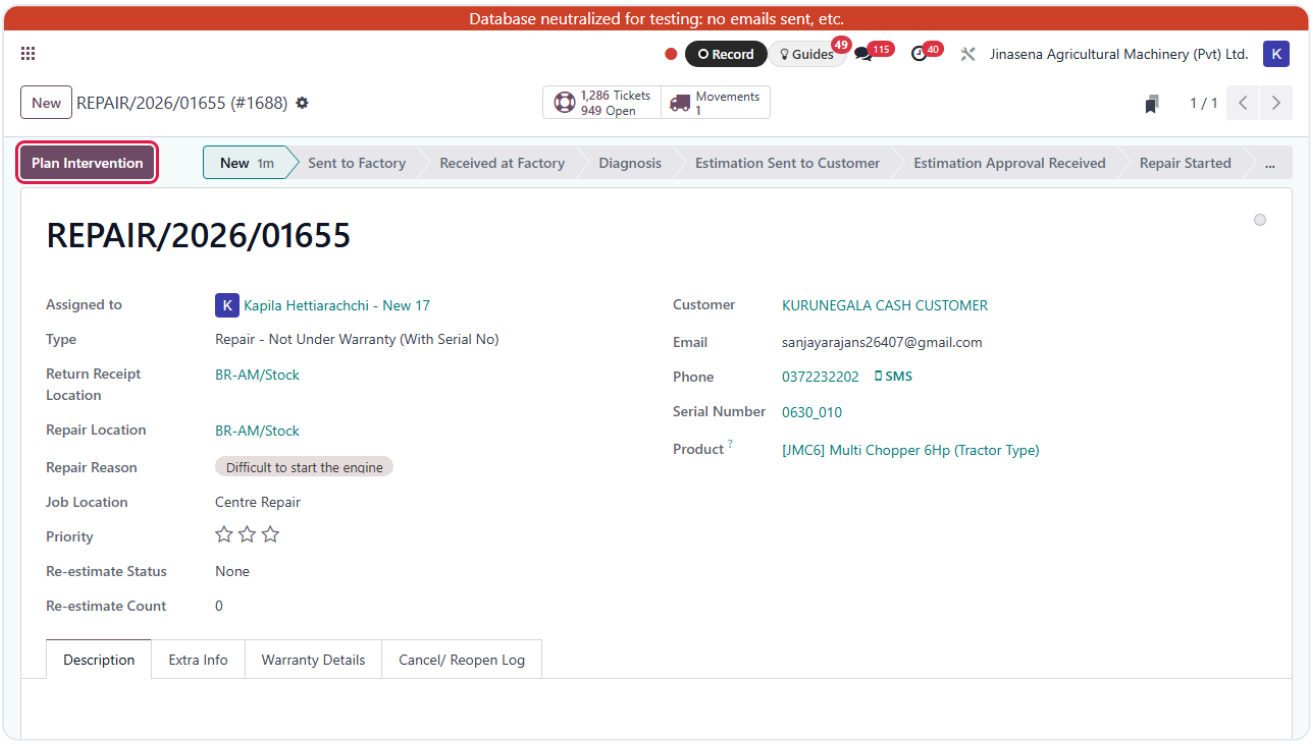

Section C — Plan the Task (Steps 14–15)

14 Plan Intervention

Navigation Ticket form → status bar

Action **Click Plan Intervention.**

Description To assign the job to a repair technician, create a Field Service task. With Centre Repair the ticket goes straight to Plan Intervention after the receipt is validated.

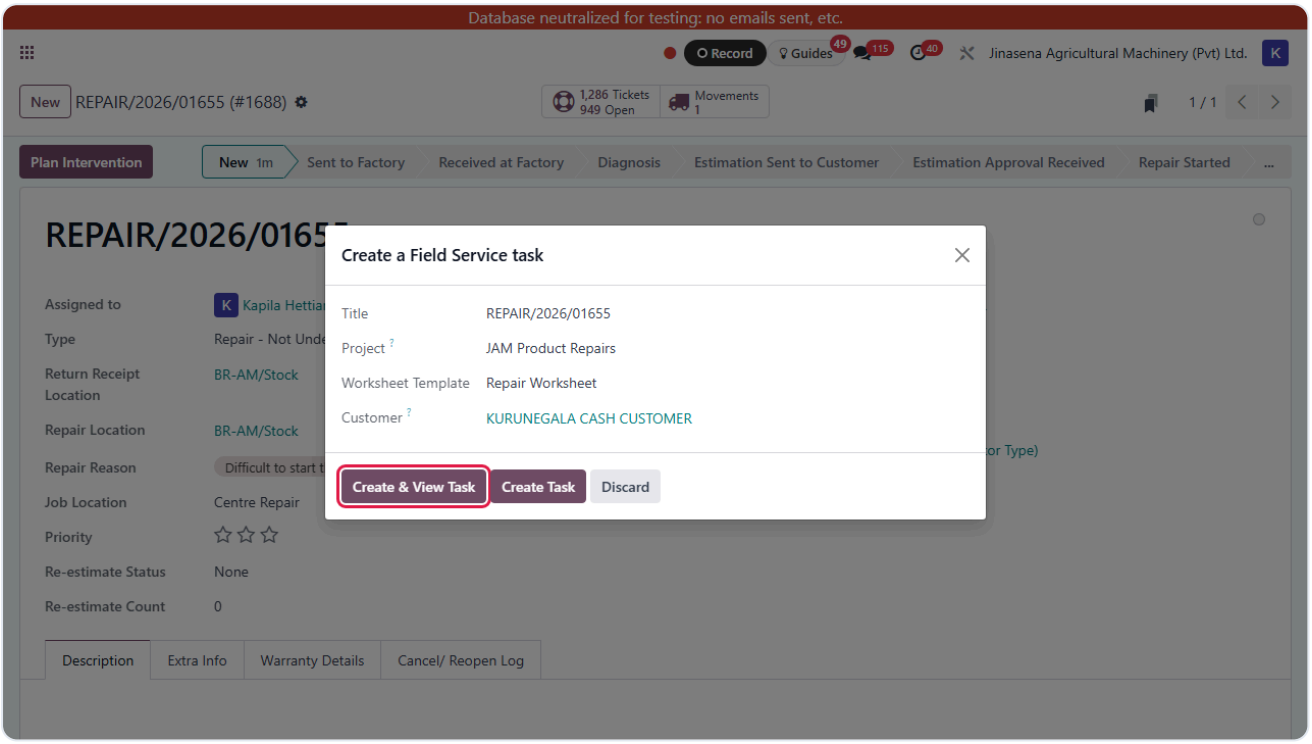

Ticket form — Plan Intervention button

15 Create & View Task

Navigation Create a Field Service task dialog

Action **Click Create & View Task.**

Description Creates the Field Service task and opens it so the technician can create and manage it.

Create a Field Service task dialog — Create & View Task button

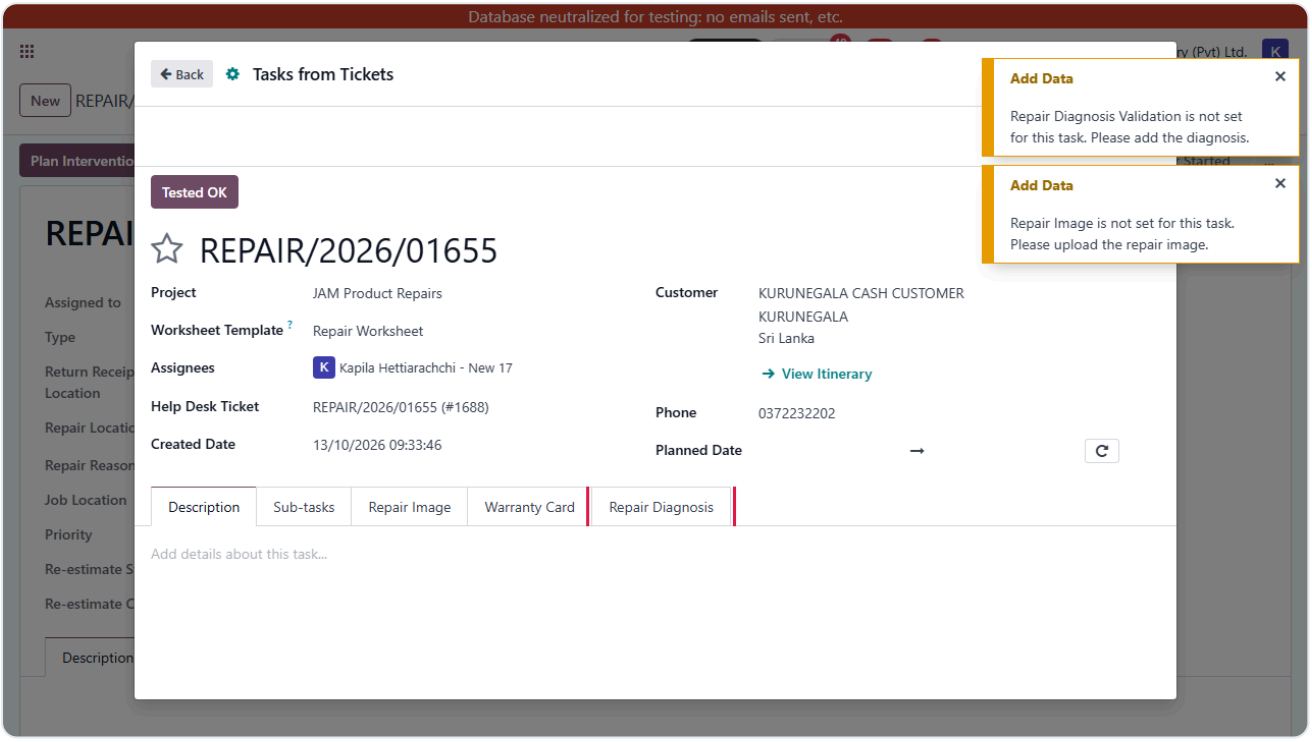

Section D — Diagnosis, Image and Parts (Steps 16–28)

16 Open the Repair Diagnosis tab

Navigation Task form → Repair Diagnosis tab

Action **Click the Repair Diagnosis tab.**

Description The technician checked the repair item and found the reason; record it in the diagnosis table.

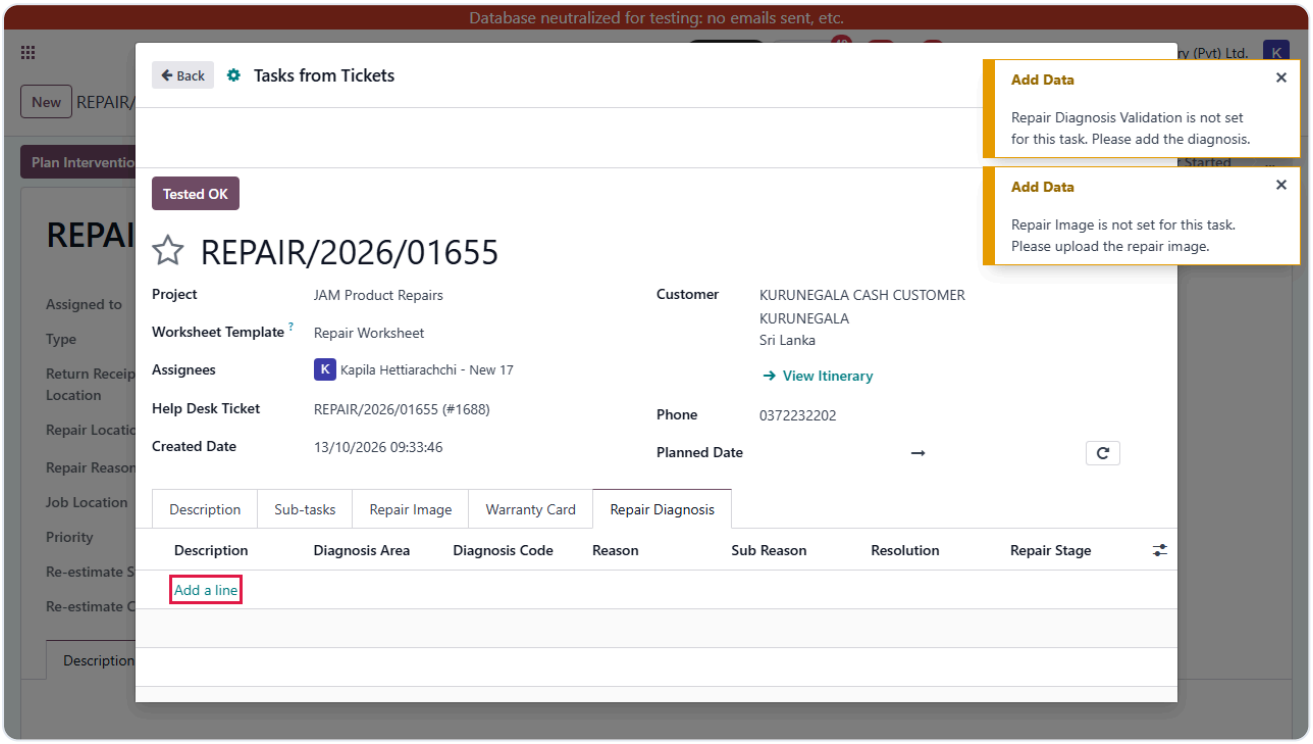

Task form — Repair Diagnosis tab

17 Add a line

Navigation Task form → Repair Diagnosis

Action **Click Add a line.**

Description Adds a new diagnosis line to fill in.

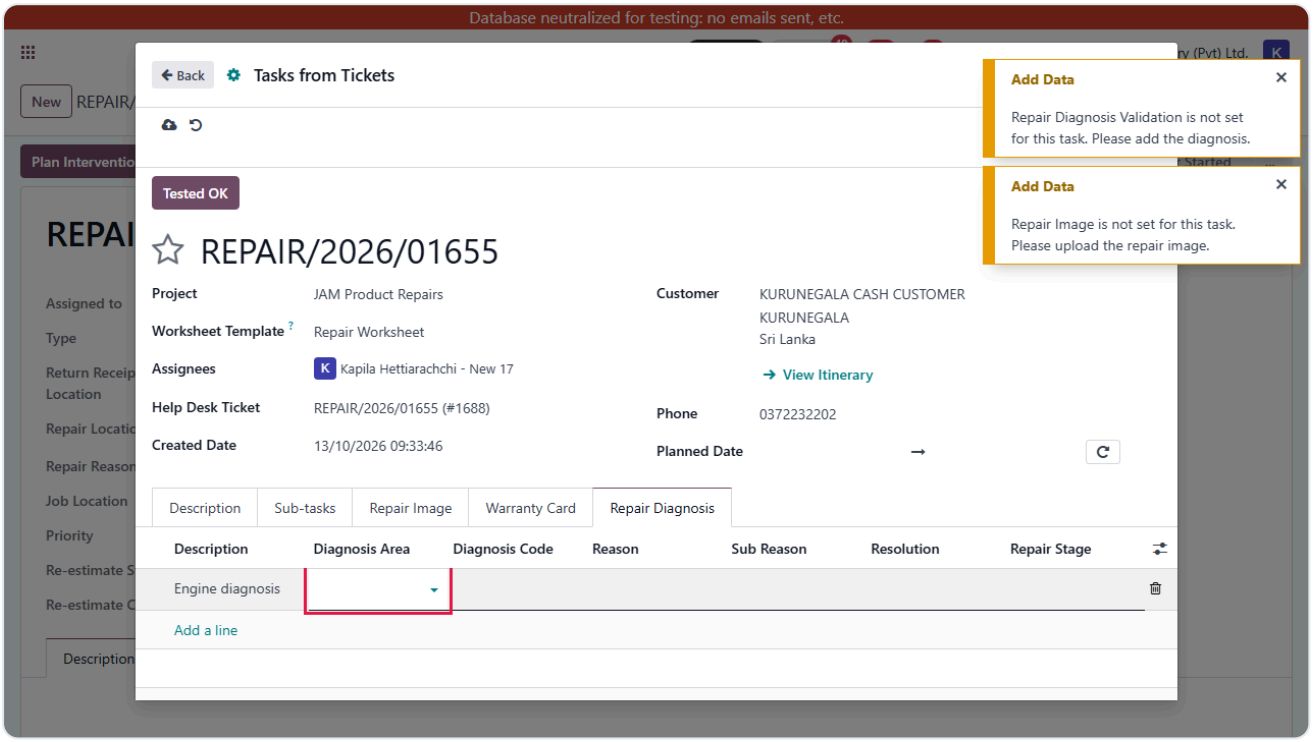

Repair Diagnosis tab — Add a line

18 Diagnosis Area

Navigation Repair Diagnosis → diagnosis line

Action **Click the Diagnosis Area cell and select `Burnt Part`.**

Description The area of the item where the fault was found.

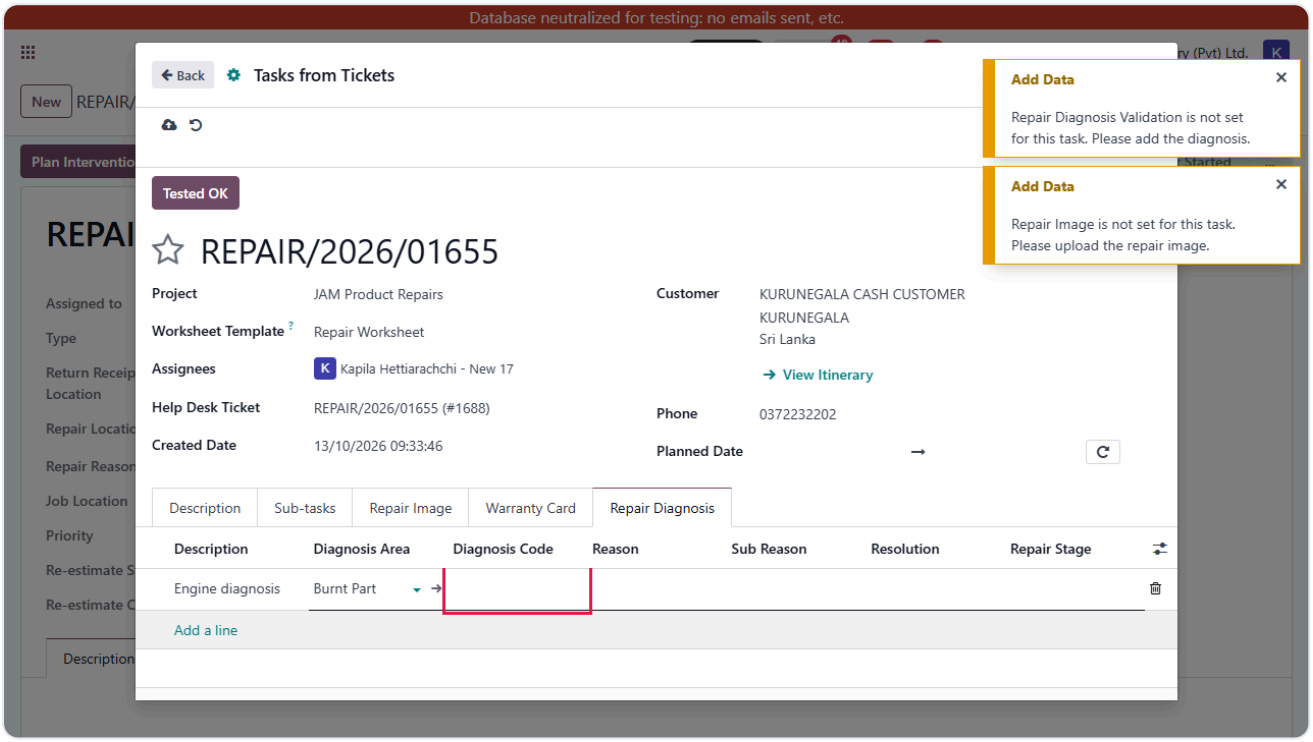

Diagnosis line — Diagnosis Area cell

19 Diagnosis Code

Navigation Repair Diagnosis → diagnosis line

Action **Click the Diagnosis Code cell and select `Base Plate`.**

Description The code of the faulty part.

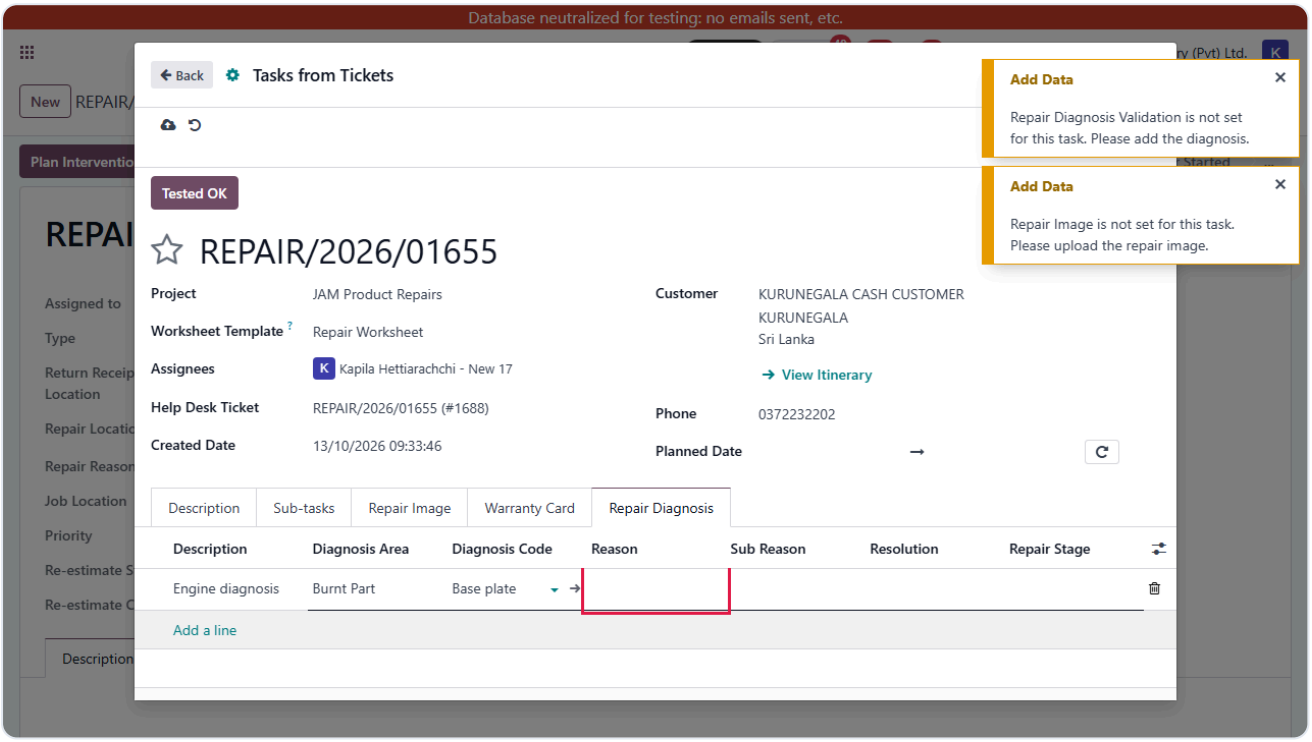

Diagnosis line — Diagnosis Code cell

20 Reason

Navigation Repair Diagnosis → diagnosis line

Action **Click the Reason cell and select `Internal`.**

Description The reason for the fault.

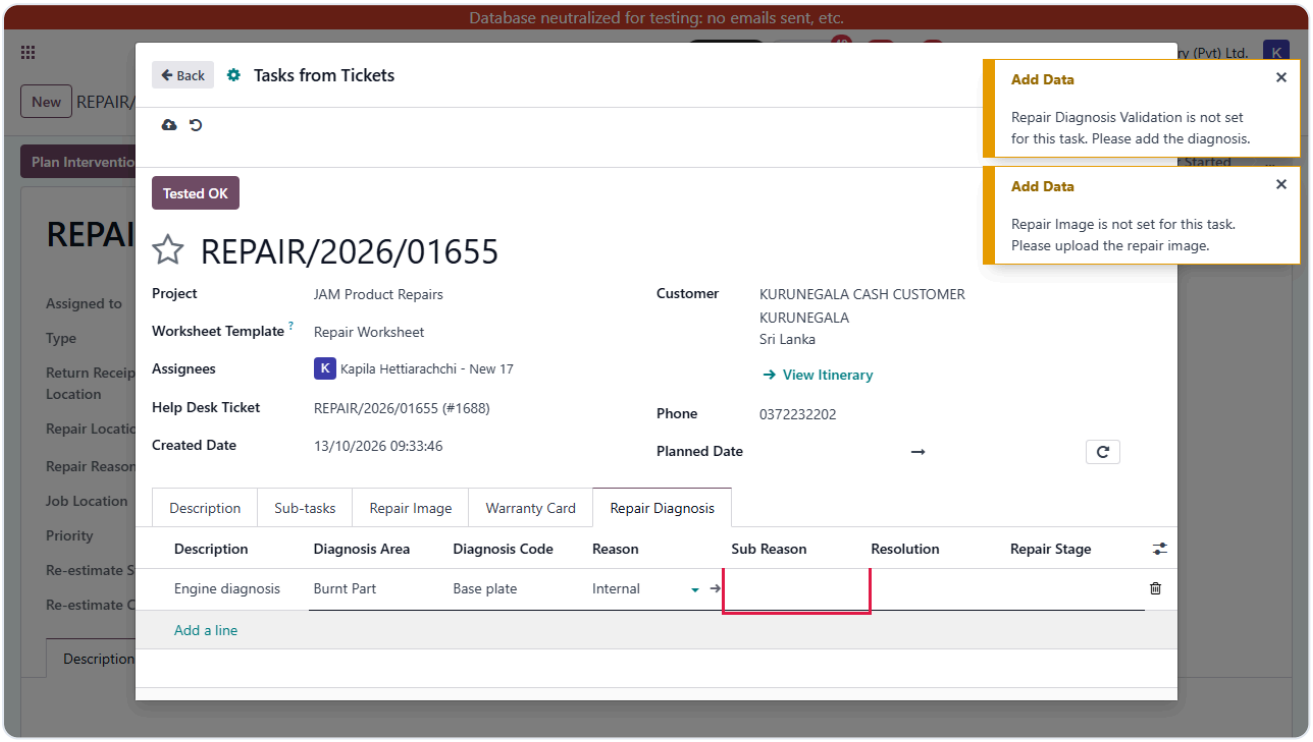

Diagnosis line — Reason cell

21 Sub Reason

Navigation Repair Diagnosis → diagnosis line

Action **Click the Sub Reason cell and select `Hi Voltage`.**

Description The detailed reason for the fault.

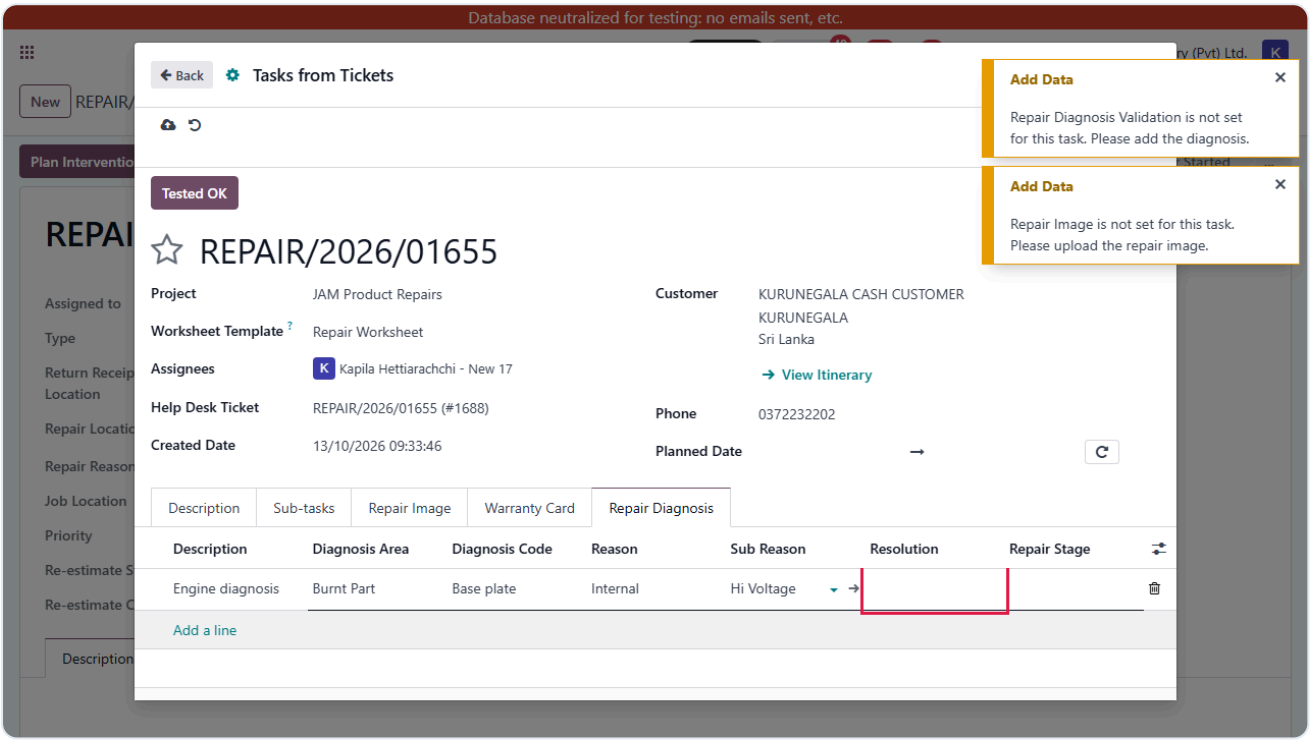

Diagnosis line — Sub Reason cell

22 Resolution

Navigation Repair Diagnosis → diagnosis line

Action **Click the Resolution cell and select `Reject`.**

Description The resolution decided by the technician.

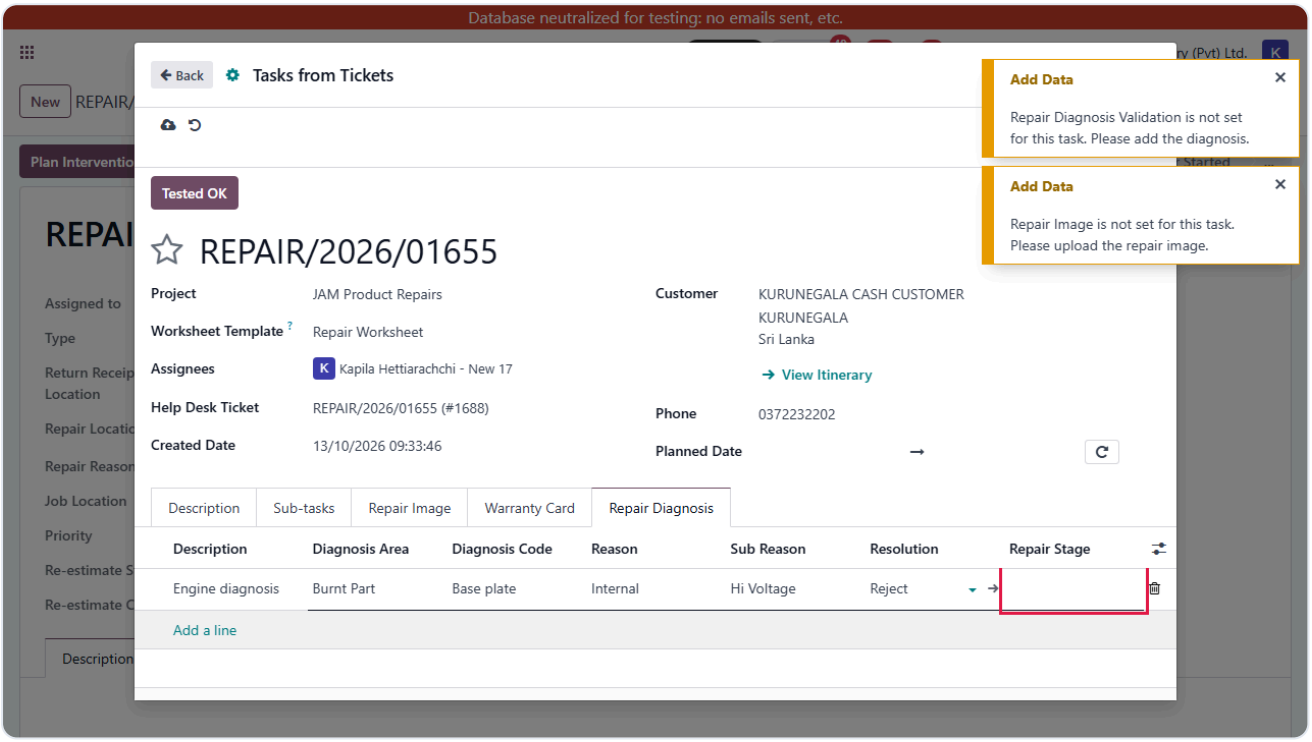

Diagnosis line — Resolution cell

23 Repair Stage

Navigation Repair Diagnosis → diagnosis line

Action **Click the Repair Stage cell and select `1-REP-REC`.**

Description The repair stage the item is at.

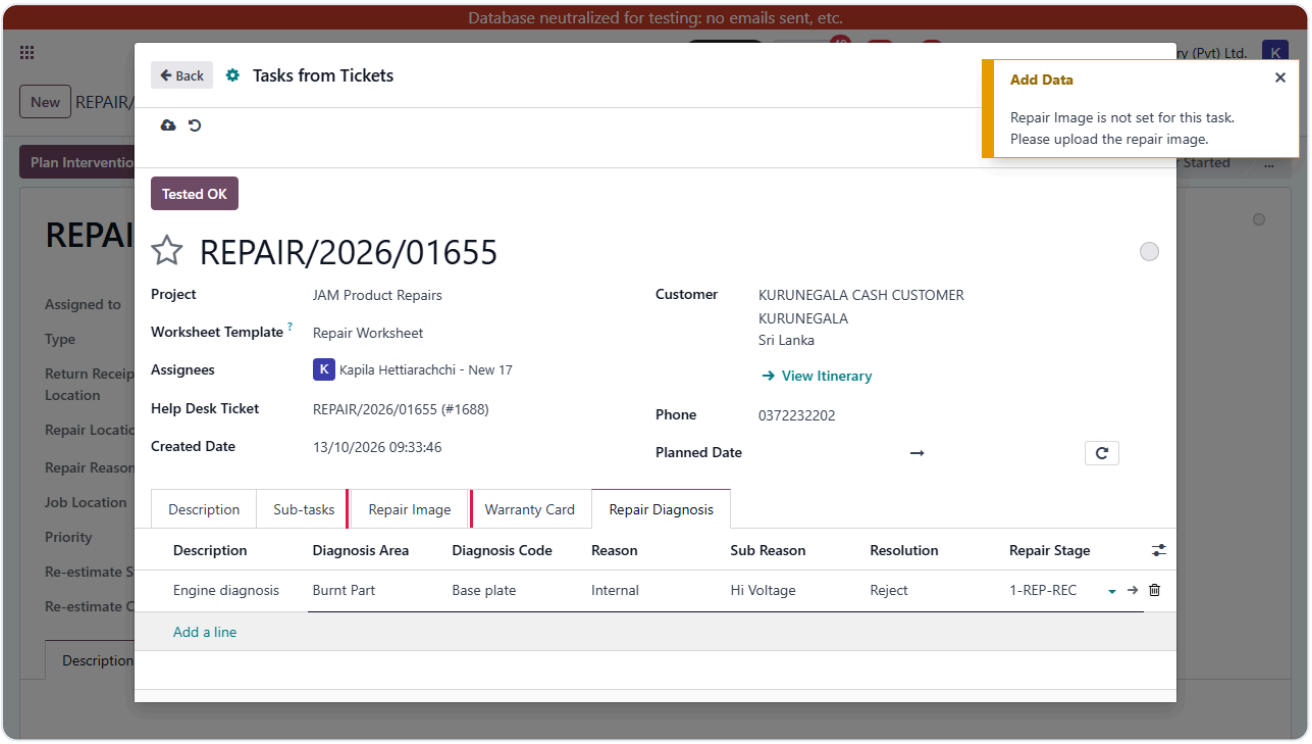

Diagnosis line — Repair Stage cell

24 Open the Repair Image tab

Navigation Task form → Repair Image tab

Action **Click the Repair Image tab.**

Description At least one image of the item being repaired must be included.

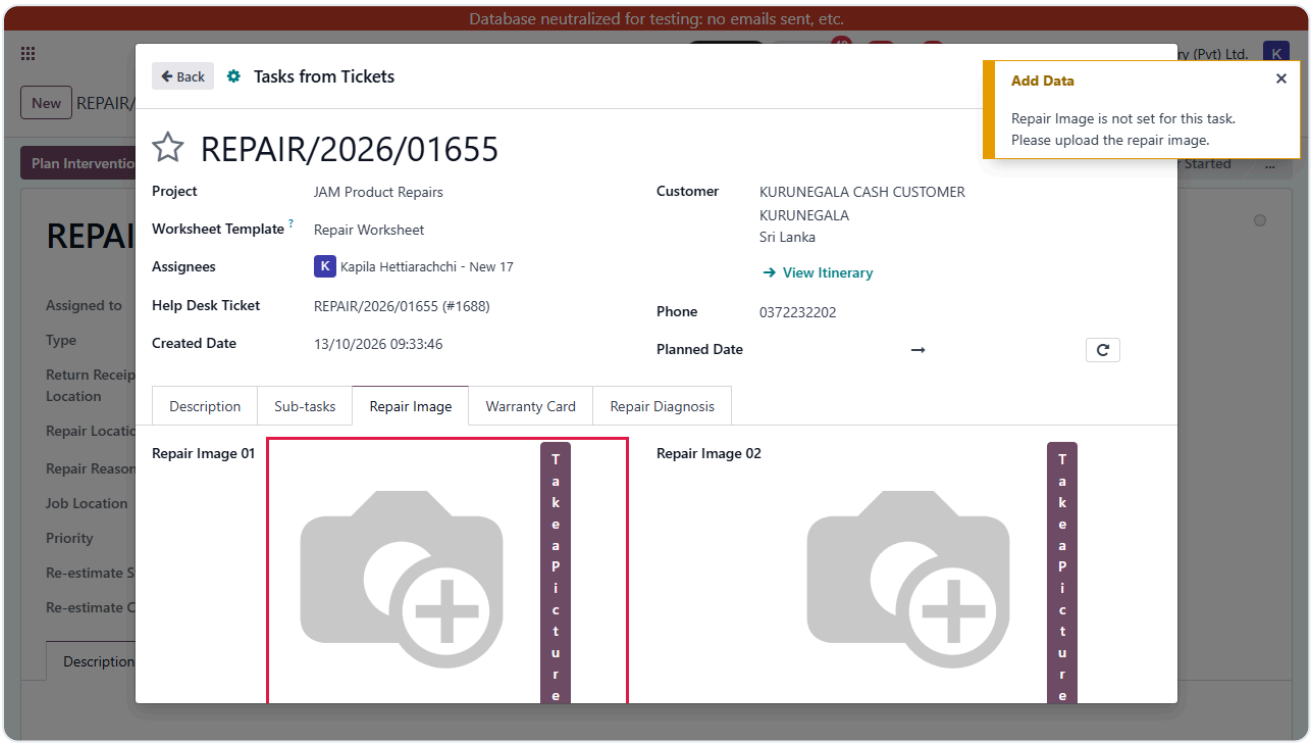

Task form — Repair Image tab

25 Take a Picture

Navigation Task form → Repair Image tab

Action **Click Take a Picture, then select the image file and click Open.**

Description Attaches the photo of the item to the task. Once Diagnosis and Image are both set, the **Products** button appears.

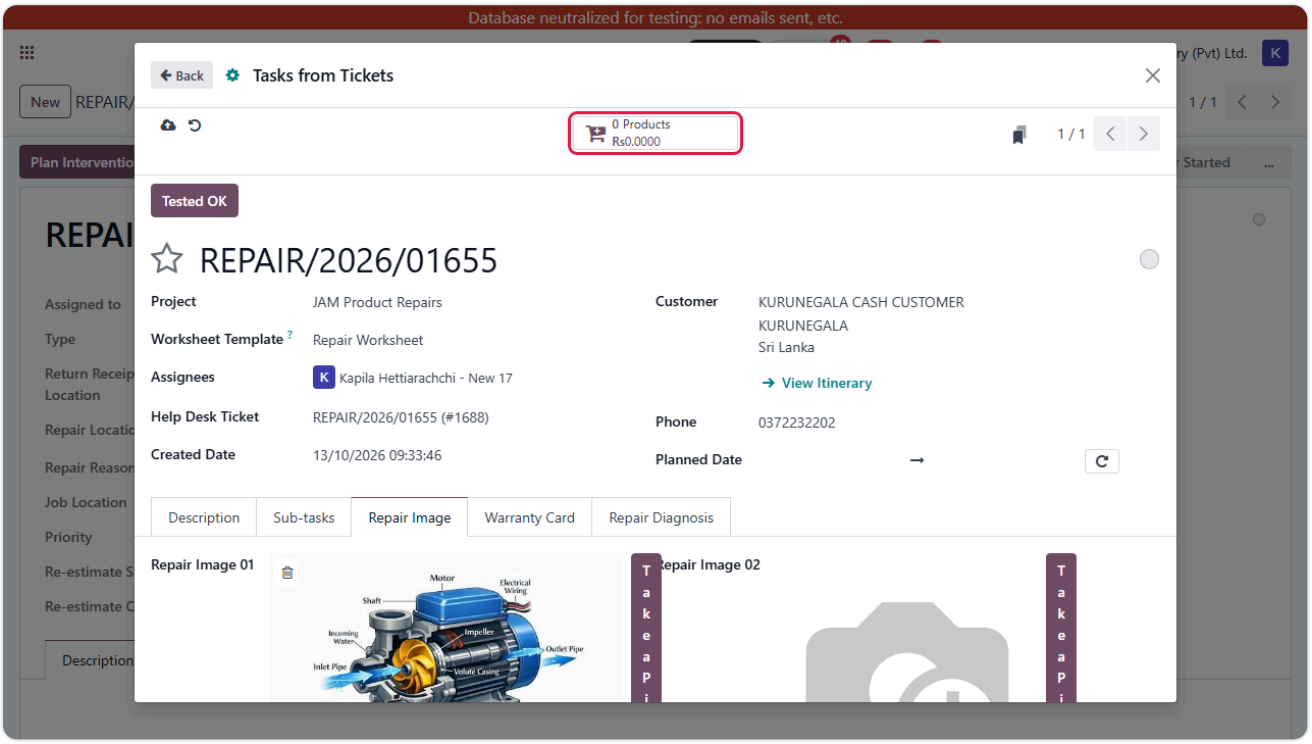

Repair Image tab — Take a Picture (Repair Image 01)

26 Products

Navigation Task form → button box

Action **Click Products.**

Description Opens the item master (product catalog) to select the items used to repair the product.

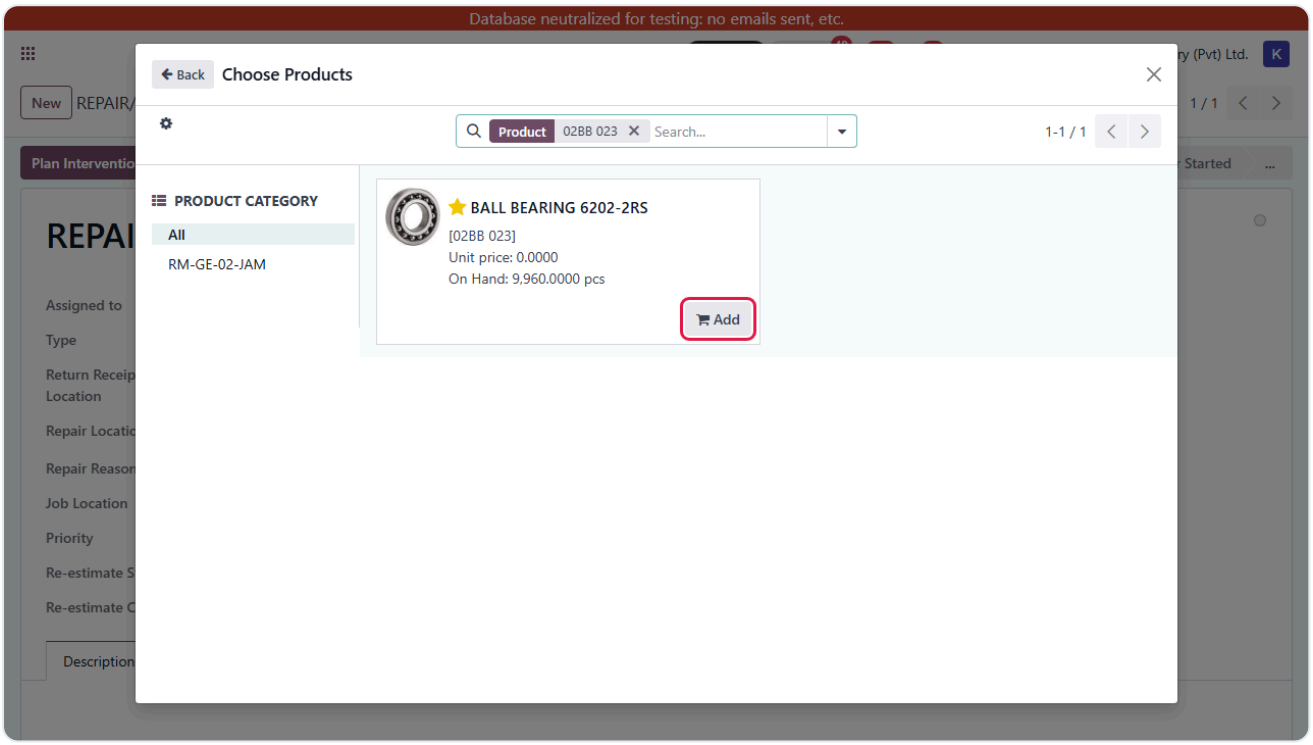

Task form — Products button

27 Add the spare part

Navigation Product catalog

Action **Find the part (e.g. `[02BB 023] BALL BEARING 6202-2RS`) and click Add.**

Description Adds the part with quantity 1 to the task; it becomes a line on the repair quotation. Select each required item and enter the quantity.

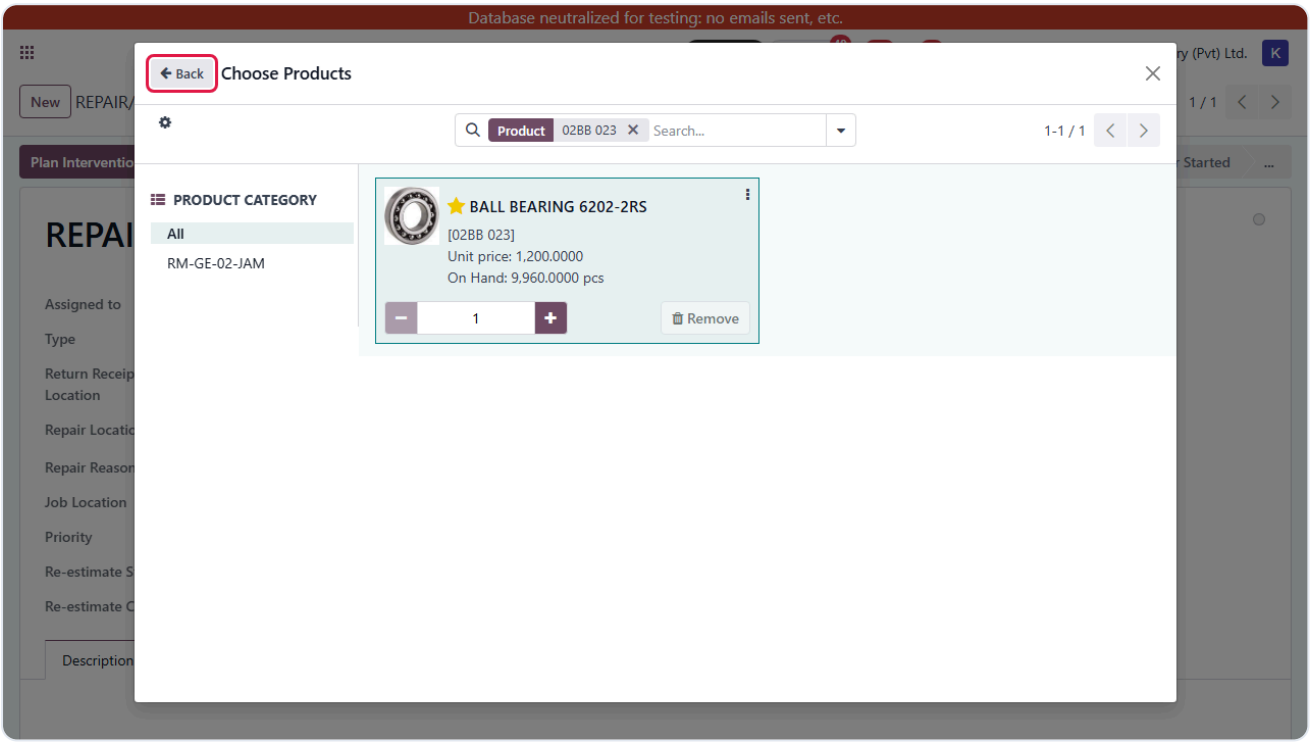

Product catalog — Add button

28 Back

Navigation Product catalog

Action **Click Back.**

Description Returns to the previous menu (the task).

Product catalog — Back button

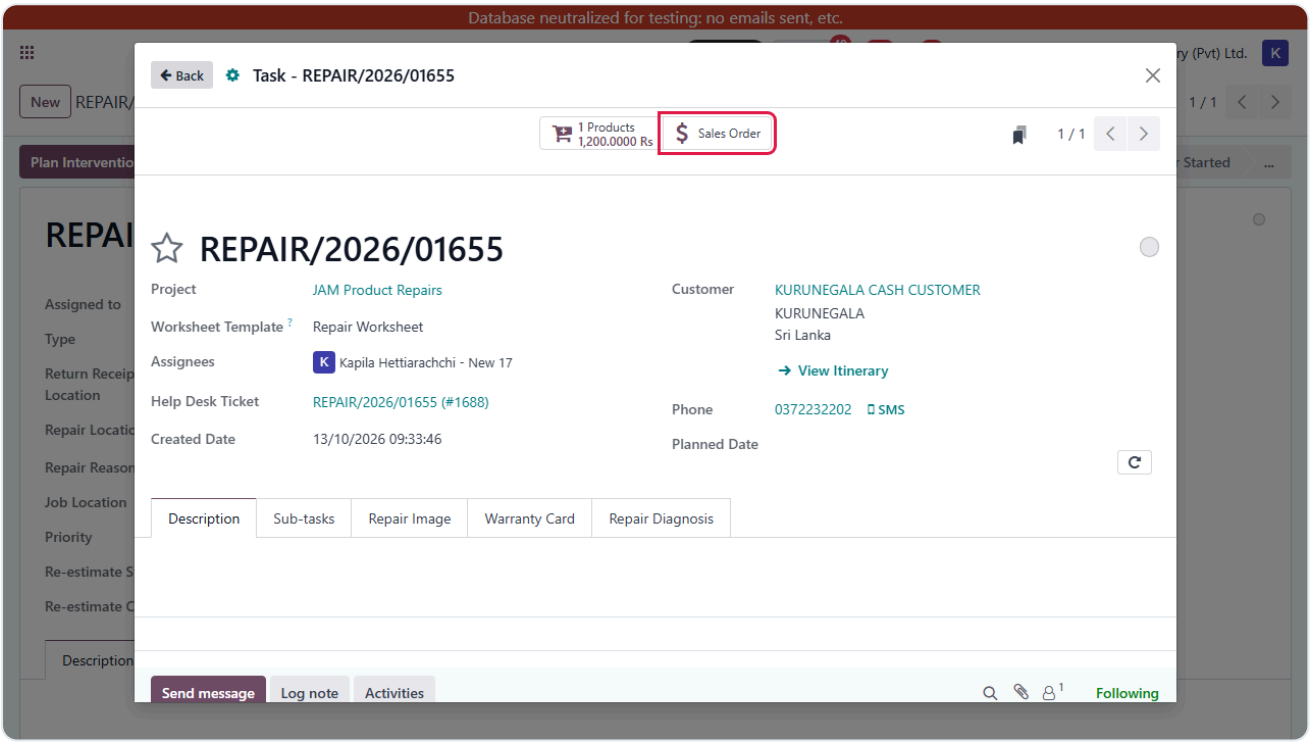

Section E — Quotation and Customer Confirmation (Steps 29–32)

29 Sales Order

Navigation Task form → button box

Action **Click the Sales Order button.**

Description Opens the quotation created from the parts added to the task.

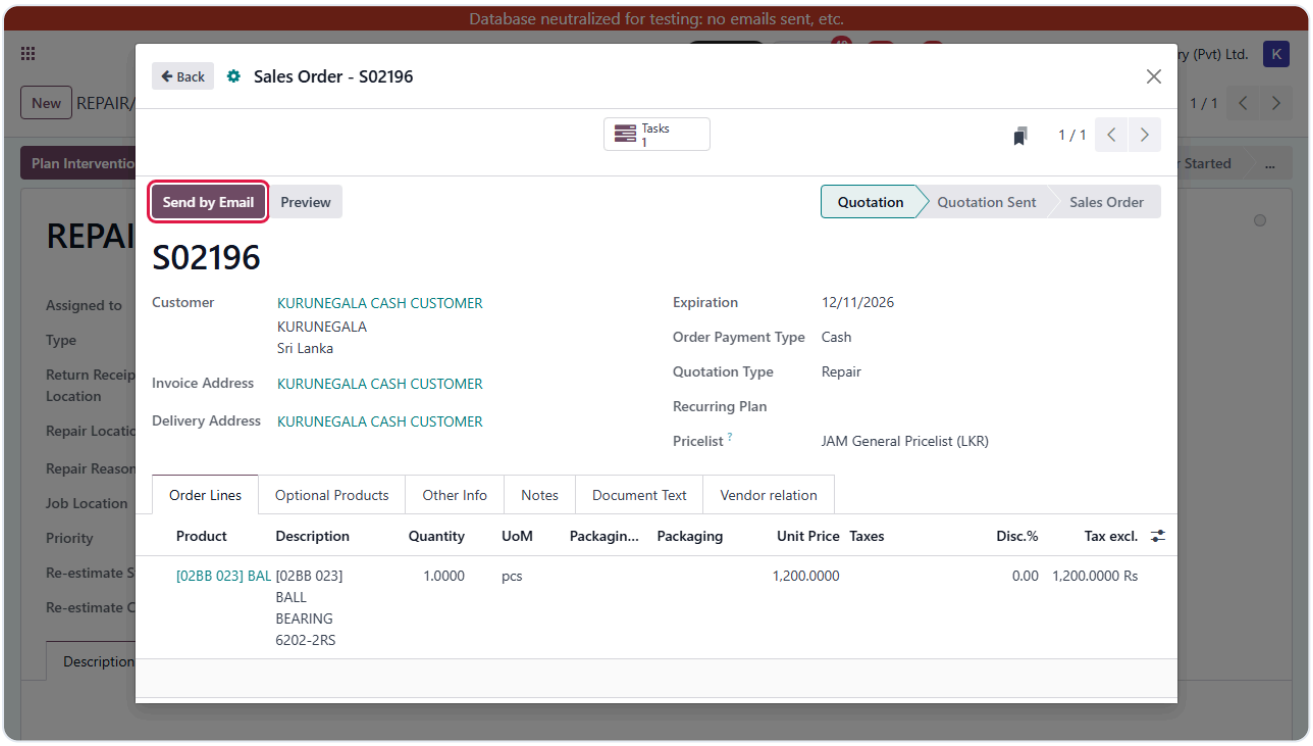

Task form — Sales Order button

30 Send by Email

Navigation Sales Order (Quotation)

Action **Click Send by Email.**

Description The quotation must be approved by the customer. This prepares the email containing the online quotation link.

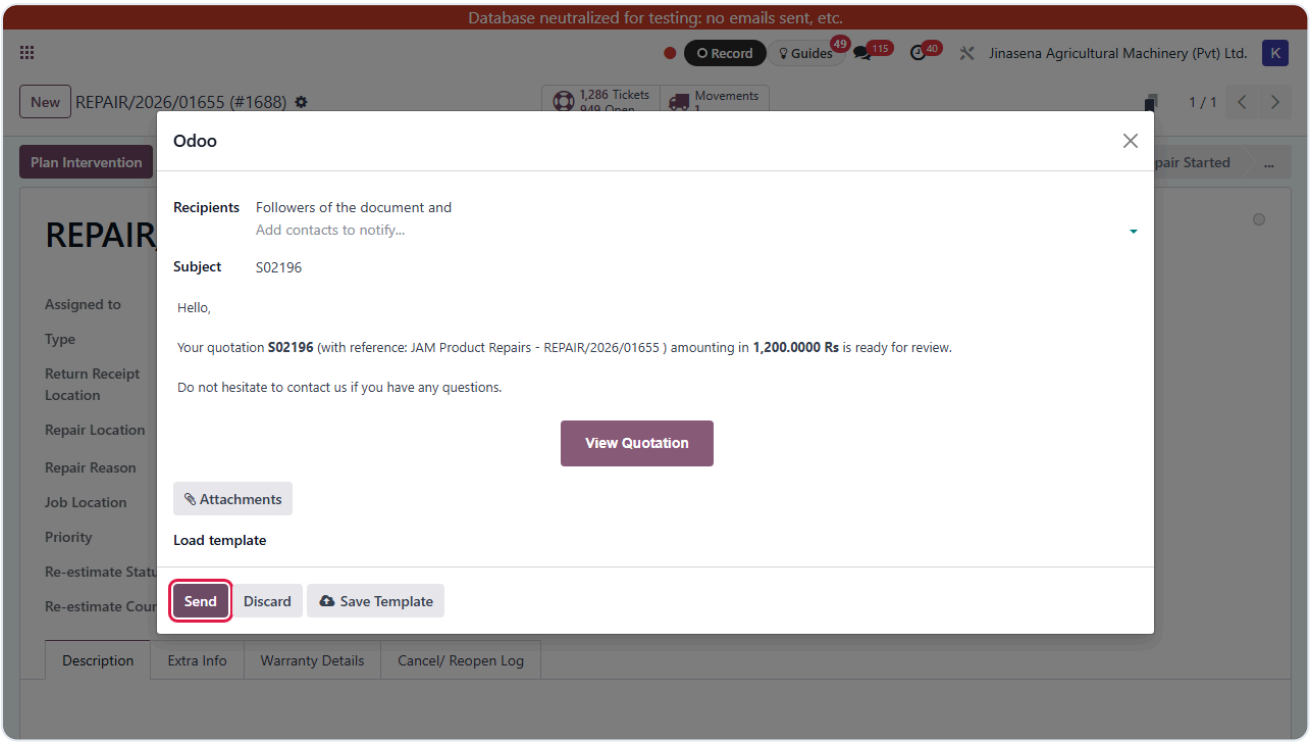

Quotation — Send by Email button

31 Send

Navigation Send email dialog

Action **Click Send.**

Description Sends the email and moves the quotation to *Quotation Sent*.

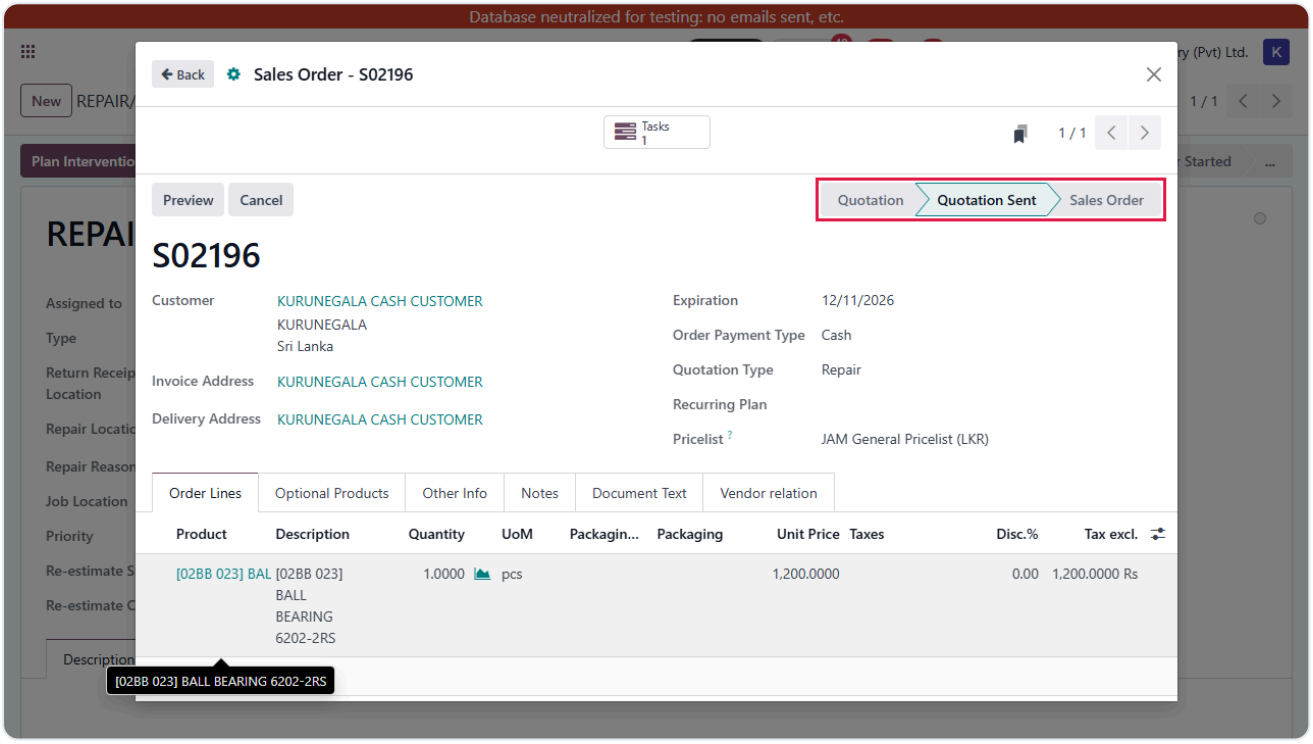

Send email dialog — Send button

32 Confirm the order

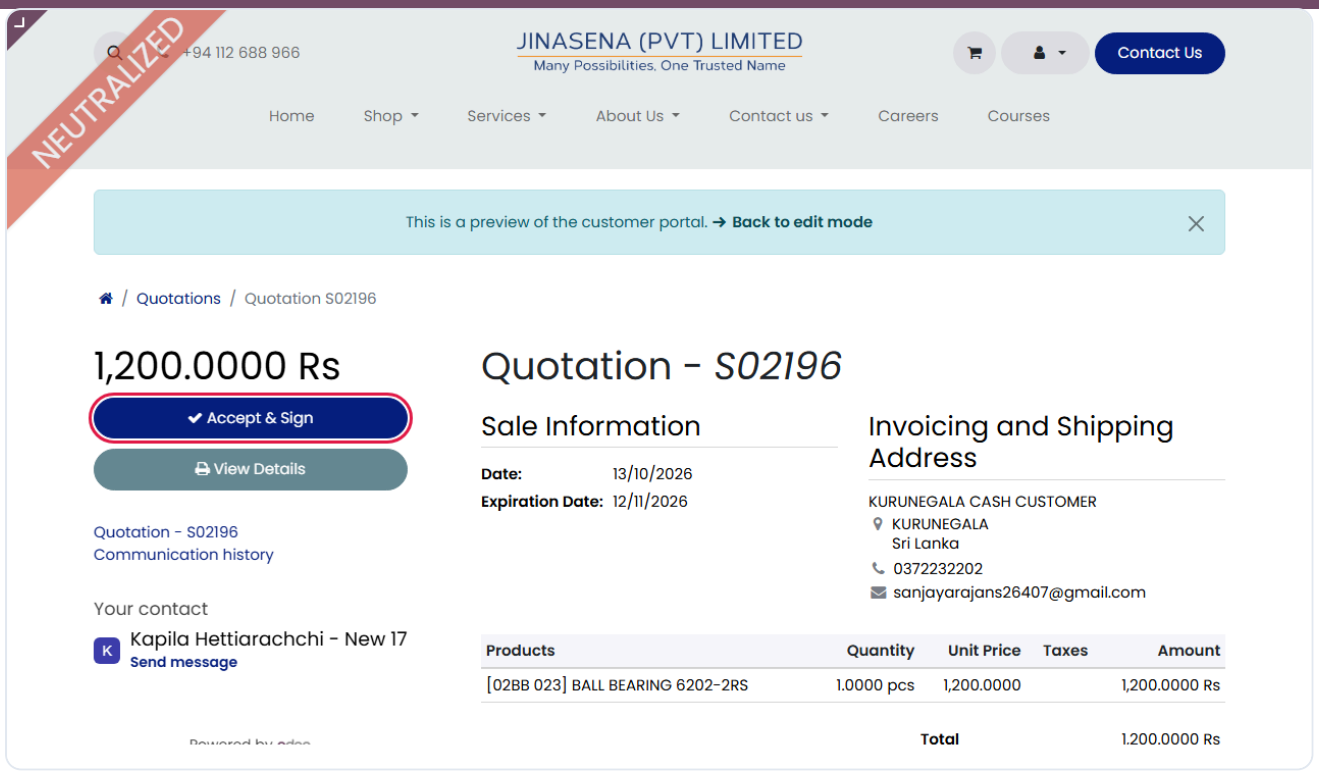

Navigation Sales Order (Quotation Sent) / customer portal

Action **The customer opens View Quotation from the email and clicks Accept & Sign, then Accept & Sign again in the signature pop-up.**

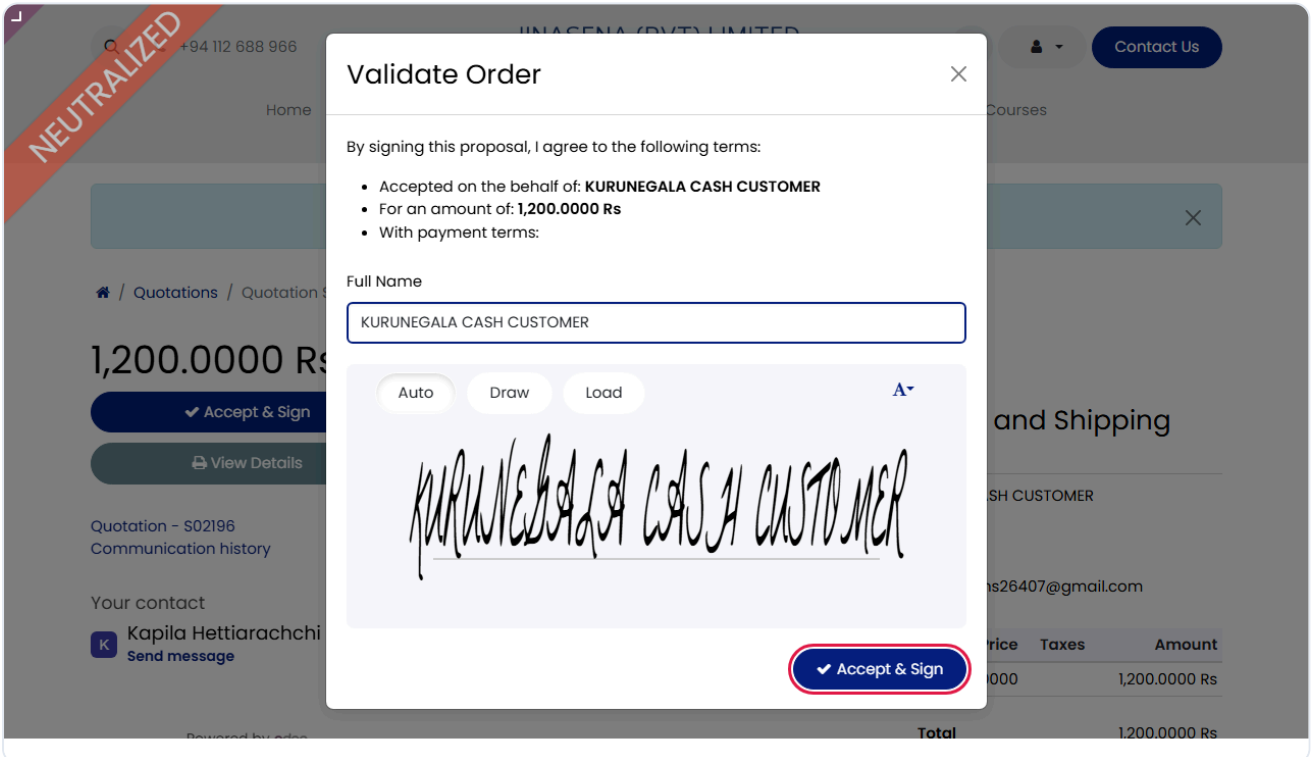

Description The order moves to *Sales Order* once the customer accepts; this activates the Confirm step of the quotation. On this instance the Confirm button itself is hidden in the back-office view once the email has been sent, so the customer's online acceptance (the real-world path) confirms the order.

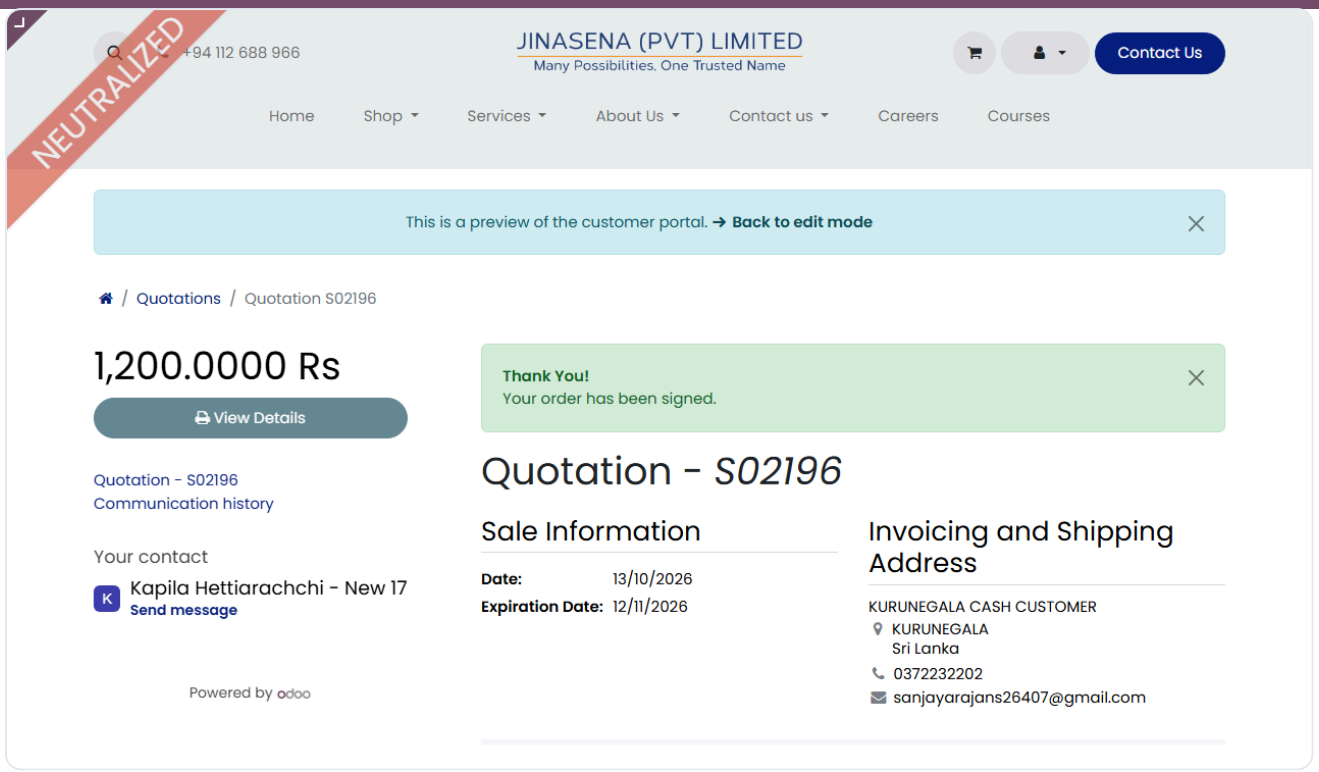

Quotation Sent — state before the customer accepts

Customer portal — quotation, Accept & Sign button

Customer portal — Validate Order signature pop-up, Accept & Sign button

Customer portal — order signed and confirmed

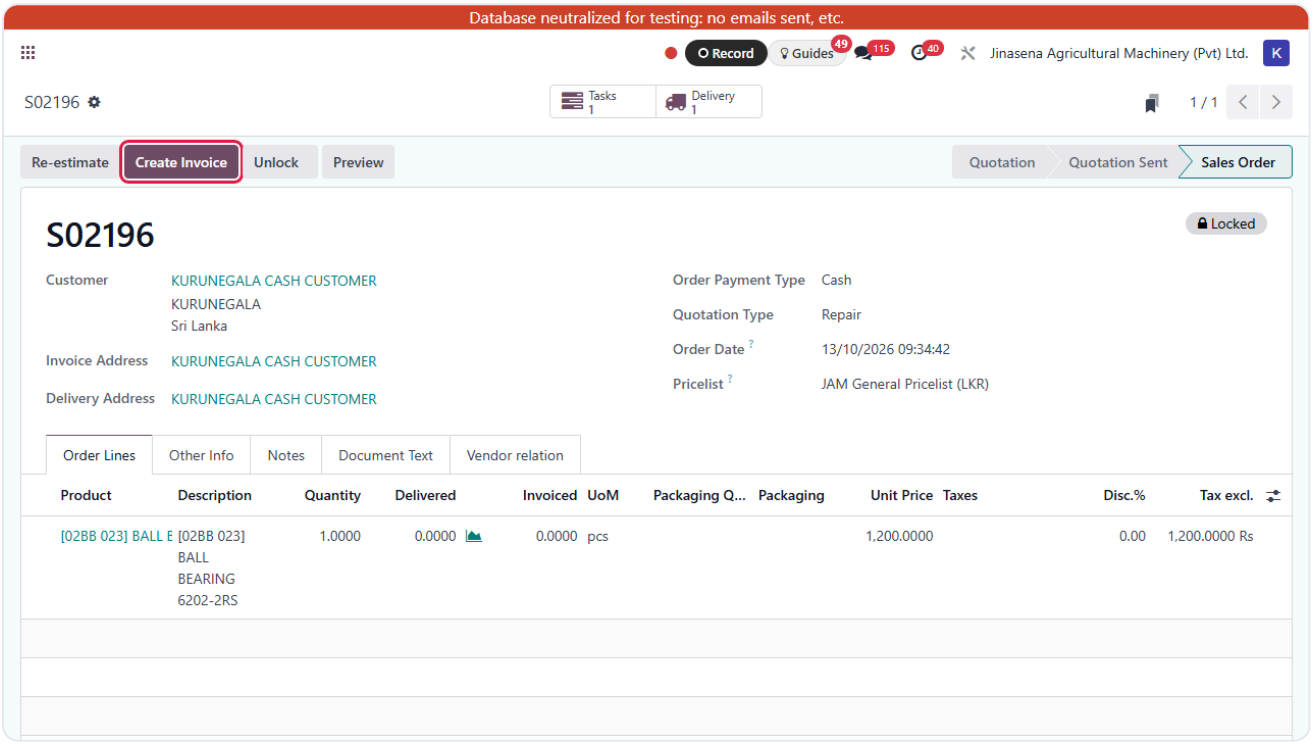

Section F — Full Payment (Steps 33–39)

33 Create Invoice

Navigation Sales Order (confirmed)

Action **Click Create Invoice.**

Description Company policy asks for an advance payment; for a Quick Repair (done in one day) the customer pays the full amount at once. This creates the draft invoice on which the payment is registered.

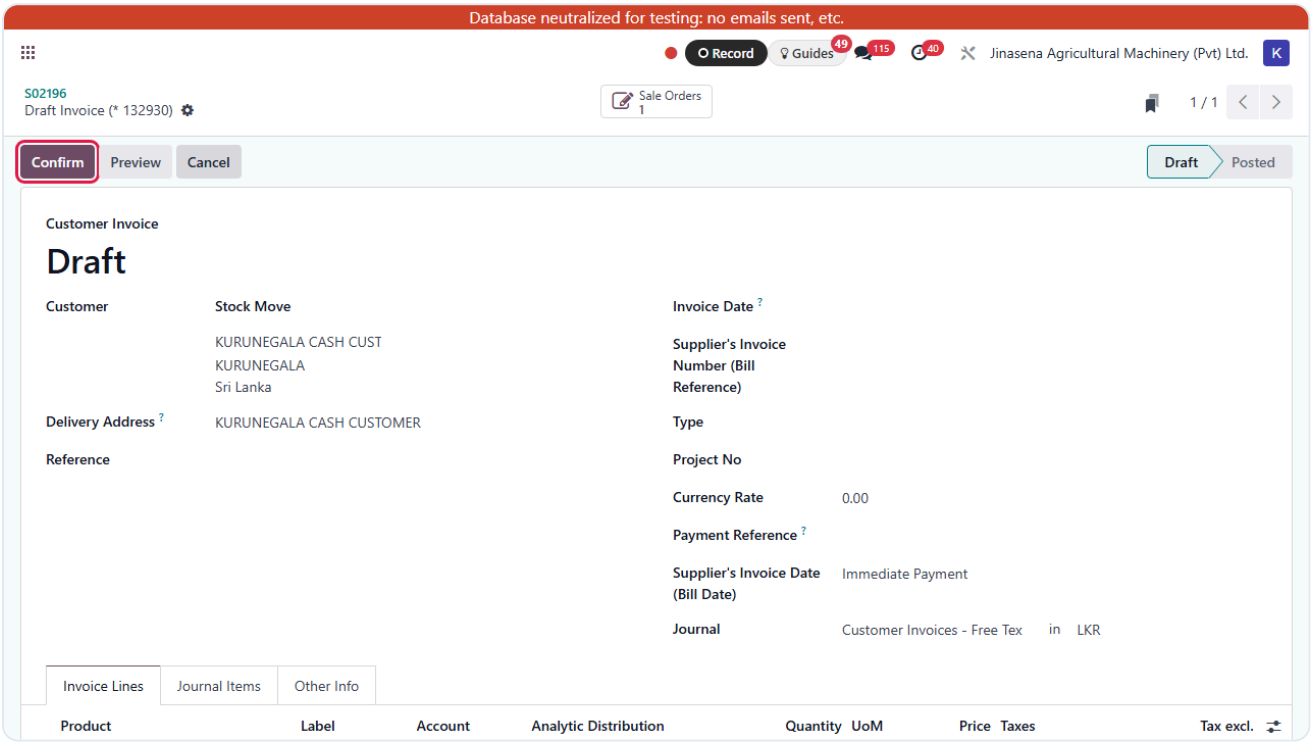

Sales Order — Create Invoice button

34 Confirm the invoice

Navigation Customer Invoice (Draft)

Action **Click Confirm.**

Description Posts the invoice so a payment can be registered against it.

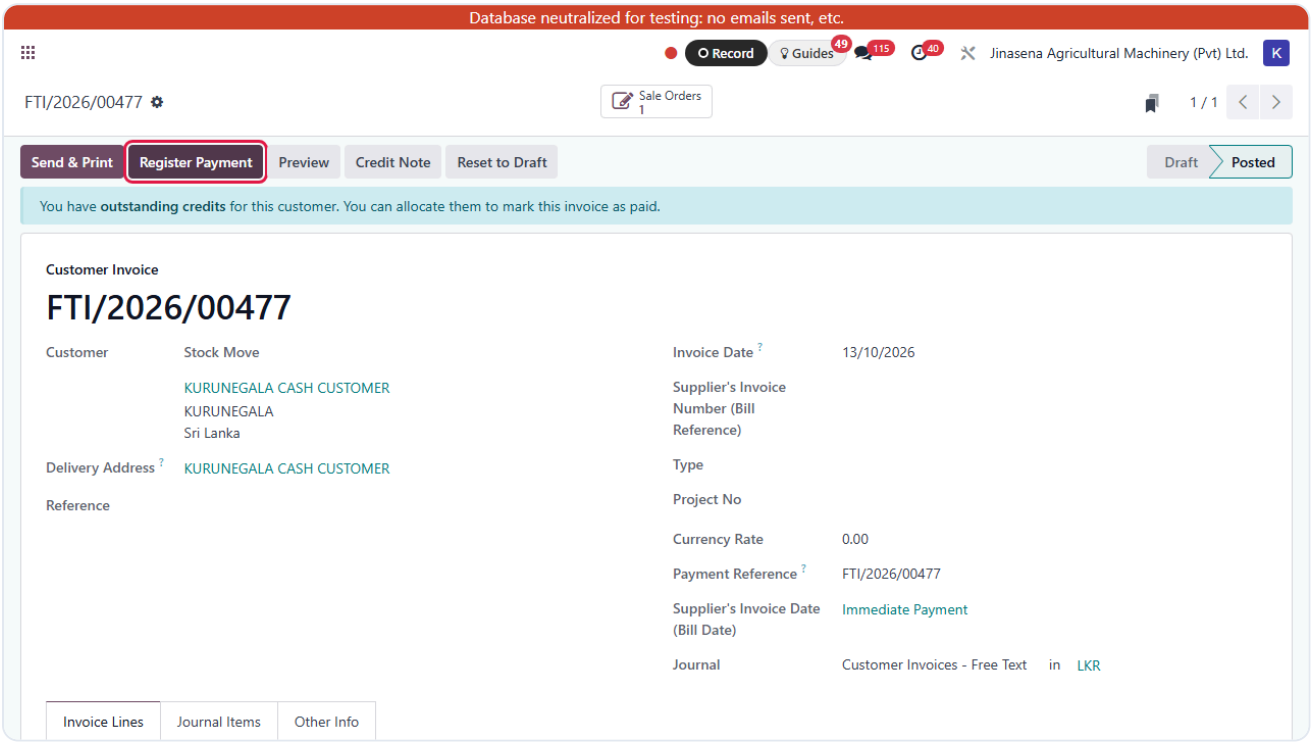

Draft invoice — Confirm button

35 Register Payment

Navigation Customer Invoice (Posted)

Action **Click Register Payment.**

Description Opens the payment wizard for the invoice.

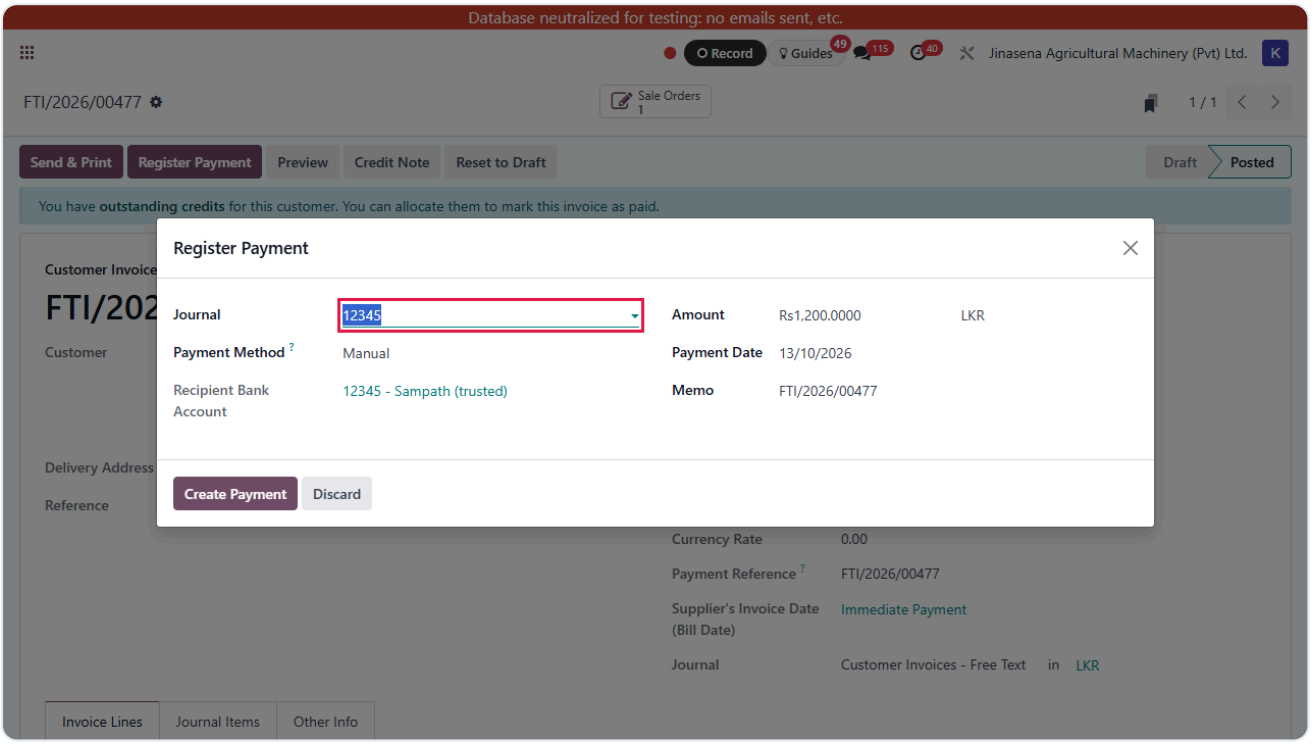

Posted invoice — Register Payment button

36 Select the Journal

Navigation Register Payment dialog

Action **Click the Journal field.**

Description Select the correct journal, i.e. how the money was received.

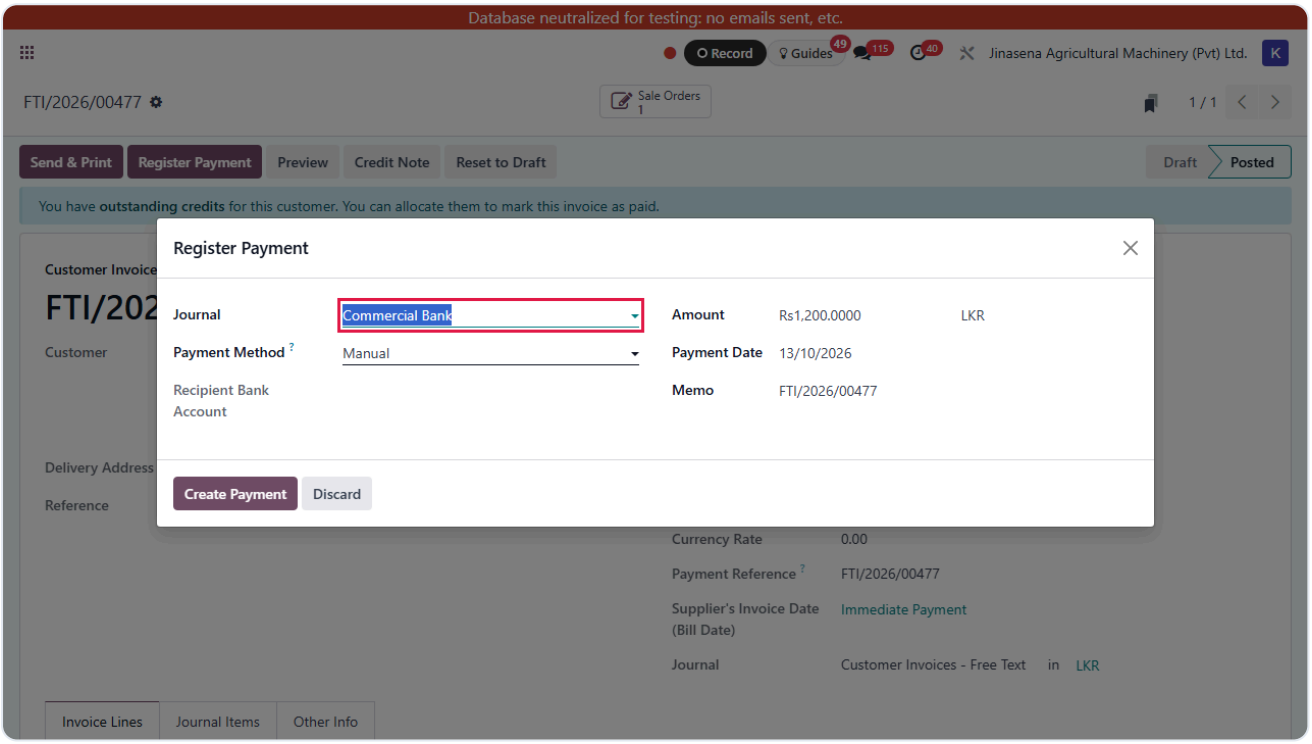

Register Payment dialog — Journal field

37 Journal and Amount

Navigation Register Payment dialog

Action **Select Commercial Bank. Leave the Amount as pre-filled — the full invoice total (e.g. `1,200.00`).**

Description Because the whole amount is paid, no Payment Difference remains and no balance has to be collected later.

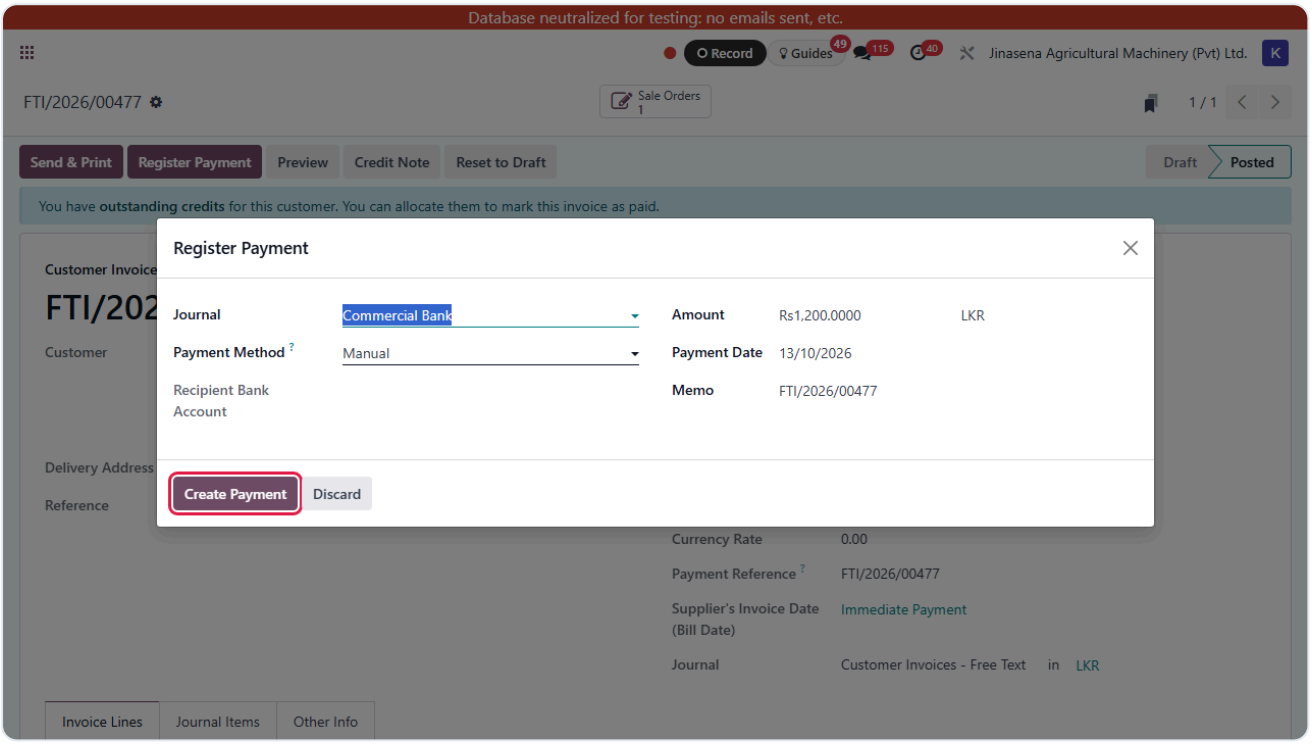

Register Payment dialog — Journal set to Commercial Bank, Amount = full invoice total

38 Create Payment

Navigation Register Payment dialog

Action **Click Create Payment.**

Description Creates the payment for the full amount. The invoice moves to *In Payment* (fully paid).

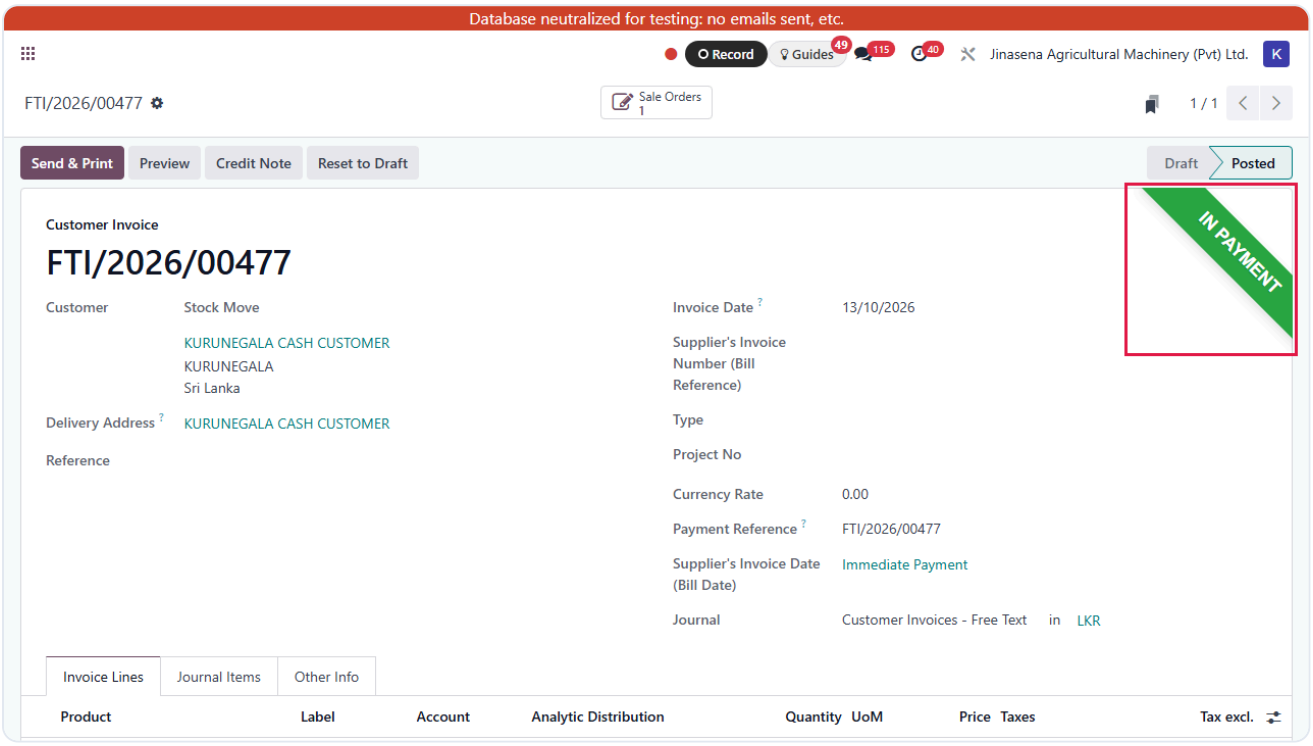

Register Payment dialog — Create Payment button

39 Close

Navigation Customer Invoice (In Payment)

Action **Click Close.**

Description Returns to the previous menu. The invoice shows the **In Payment** ribbon (the full amount is registered; no balance remains).

Invoice after the full payment — In Payment ribbon

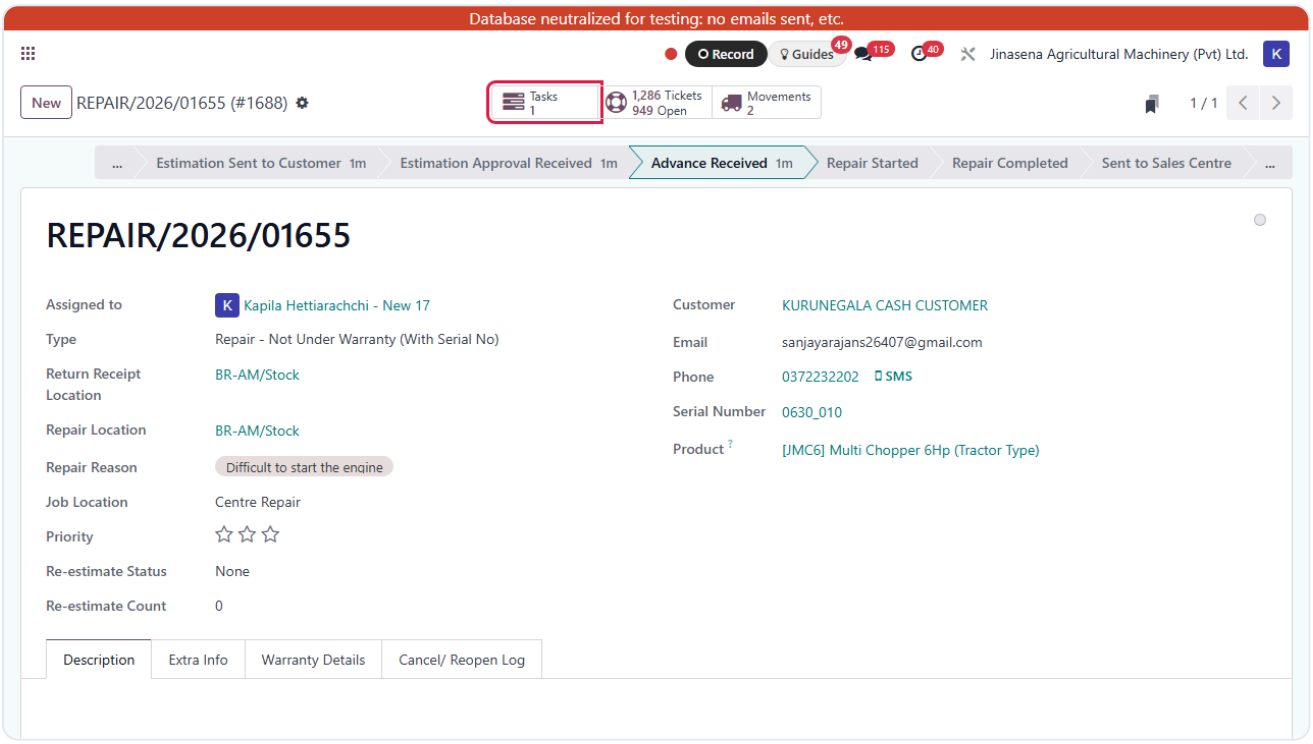

Section G — Delivery and Task Completion (Steps 40–47)

40 Tasks — back to the order

Navigation Ticket form → button box

Action **Click Tasks.**

Description Since the full payment has been received, go back to the sales order to complete the repair process.

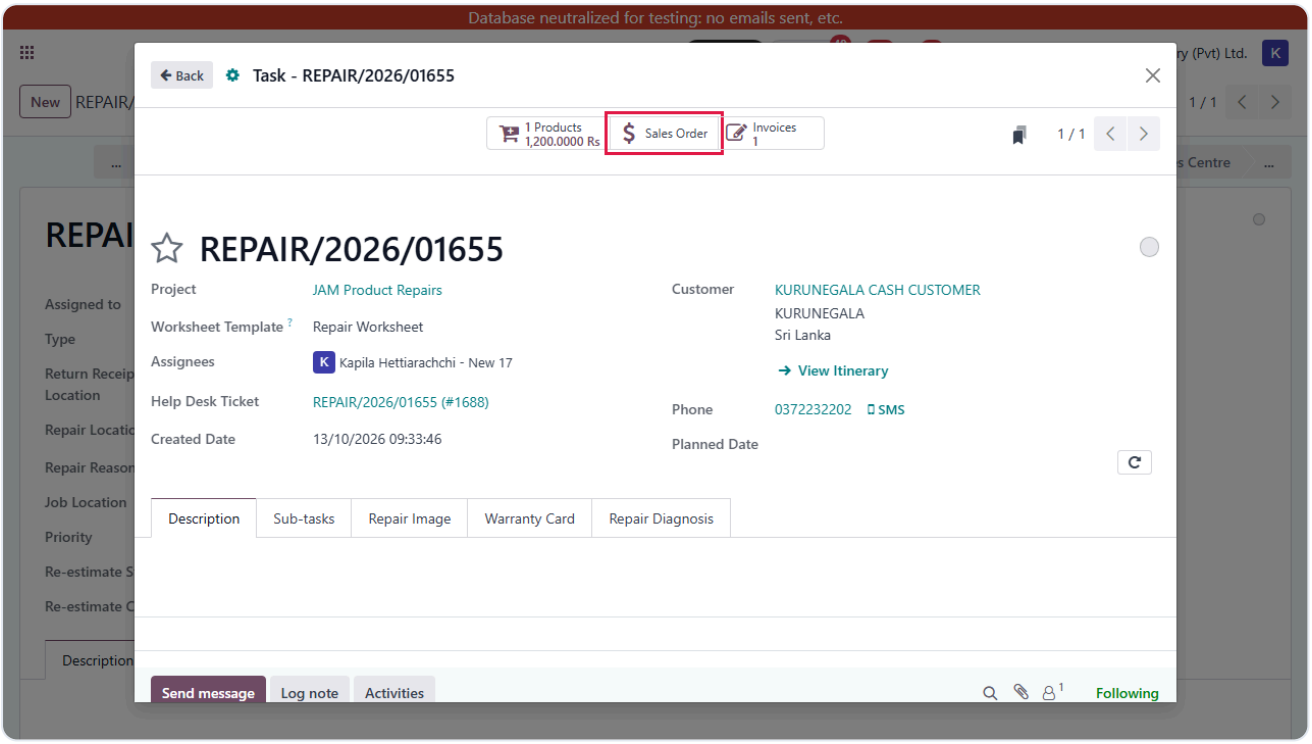

Ticket form — Tasks button

41 Sales Order

Navigation Task form → button box

Action **Click Sales Order.**

Description Opens the confirmed order.

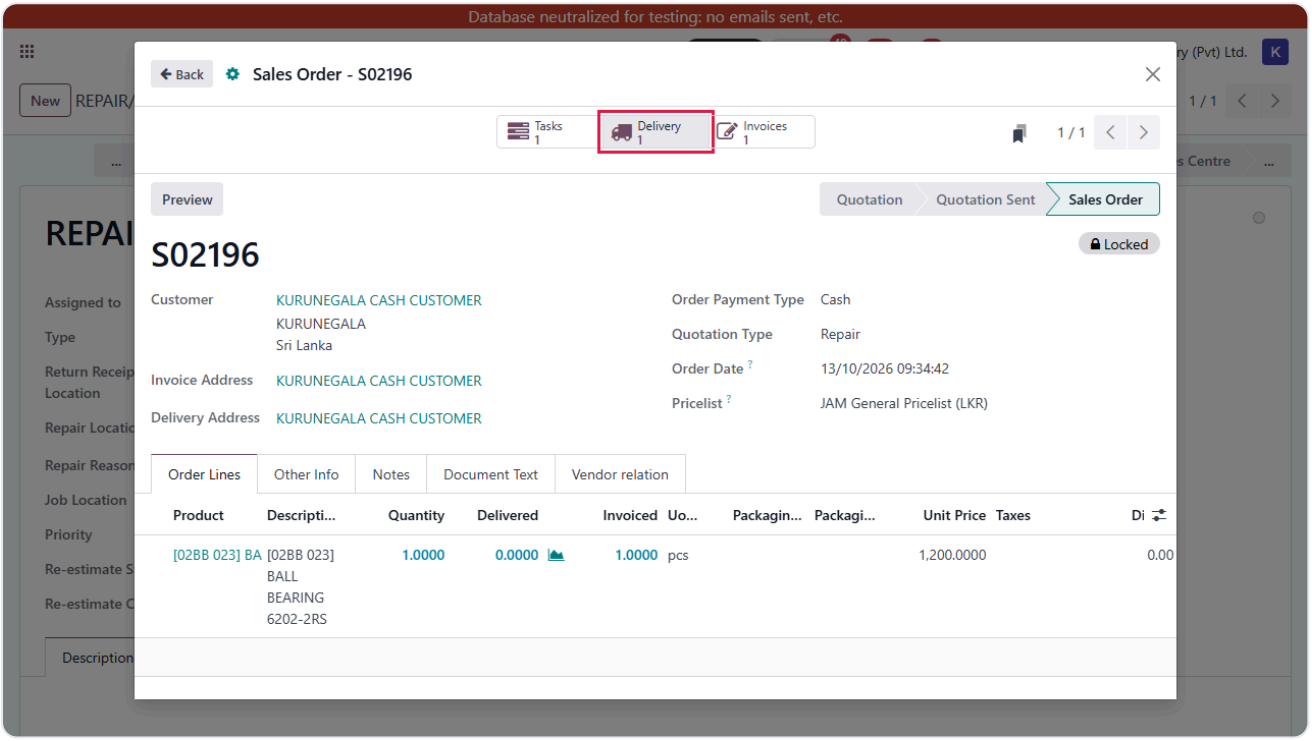

Task form — Sales Order button

42 Delivery

Navigation Sales Order → button box

Action **Click the Delivery button.**

Description Opens the delivery transfer of the order: the item used for the repair is consumed by the customer. On this run the order generated a single delivery transfer (`BR-AM/OUT/00766`) which opens directly; see the QA notes.

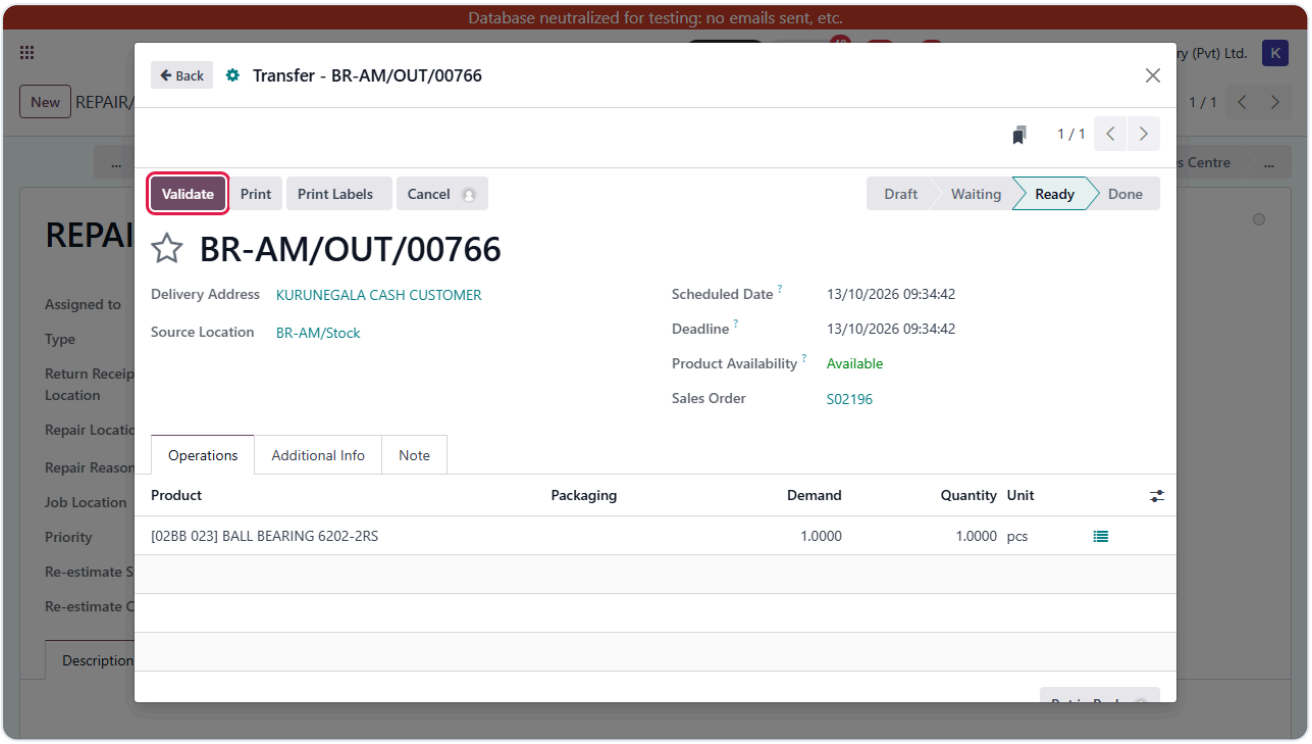

Sales Order — Delivery button

43 Validate

Navigation Transfer BR-AM/OUT/00766 (Ready)

Action **Click Validate.**

Description Completes the stock movement. The transfer becomes *Done*.

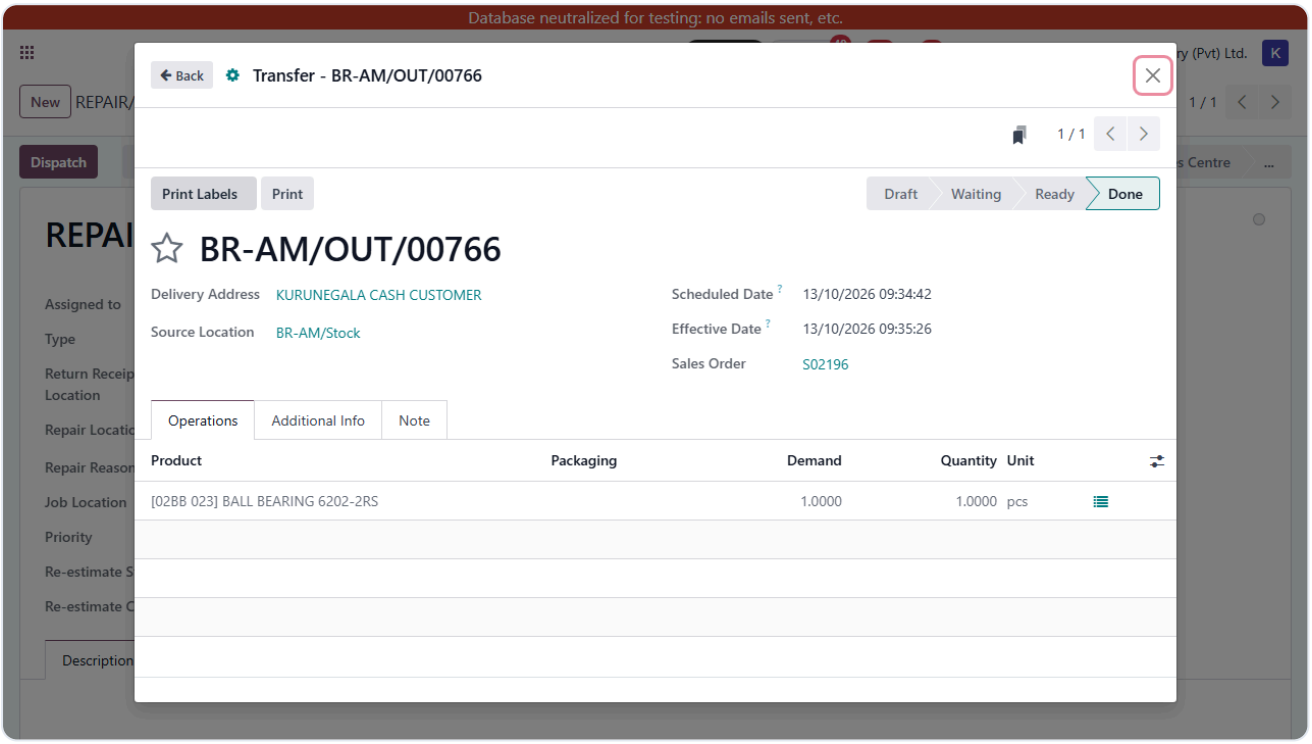

Transfer BR-AM/OUT/00766 (Ready) — Validate button

44 Close

Navigation Transfer BR-AM/OUT/00766 (Done)

Action **Click Close.**

Description Closes the transfer once it is *Done*.

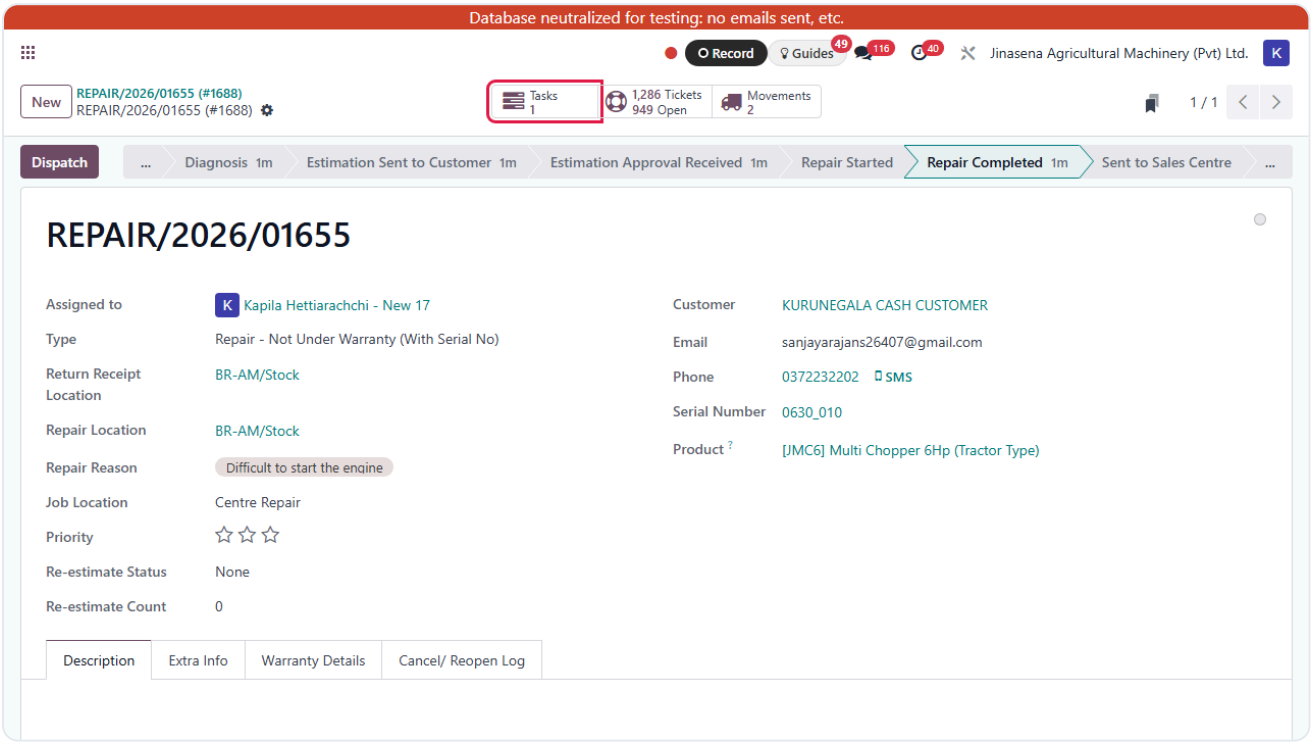

Transfer BR-AM/OUT/00766 (Done) — Close

45 Tasks

Navigation Ticket form → button box

Action **Click Tasks.**

Description Opens the task created for the repair.

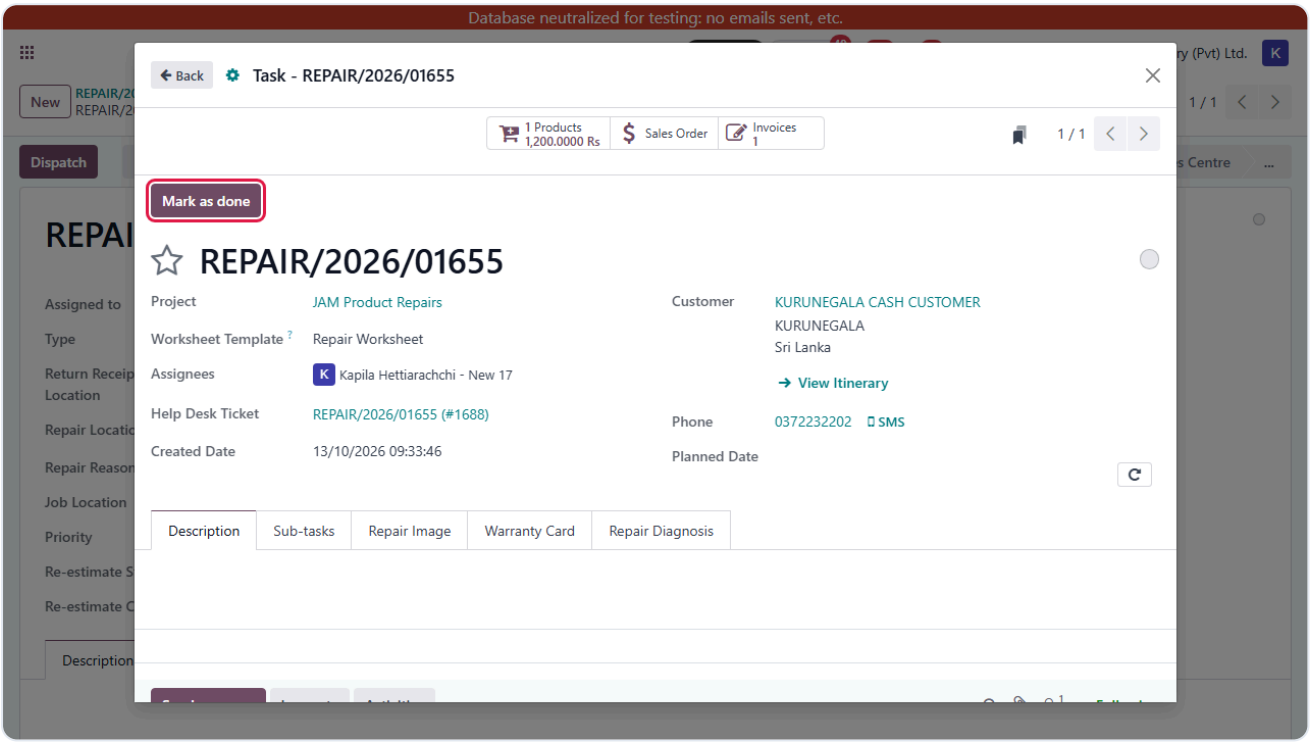

Ticket form — Tasks button

46 Mark as done

Navigation Task form → status bar

Action **Click Mark as done.**

Description The work on the originally created task has been completed; this ends the task.

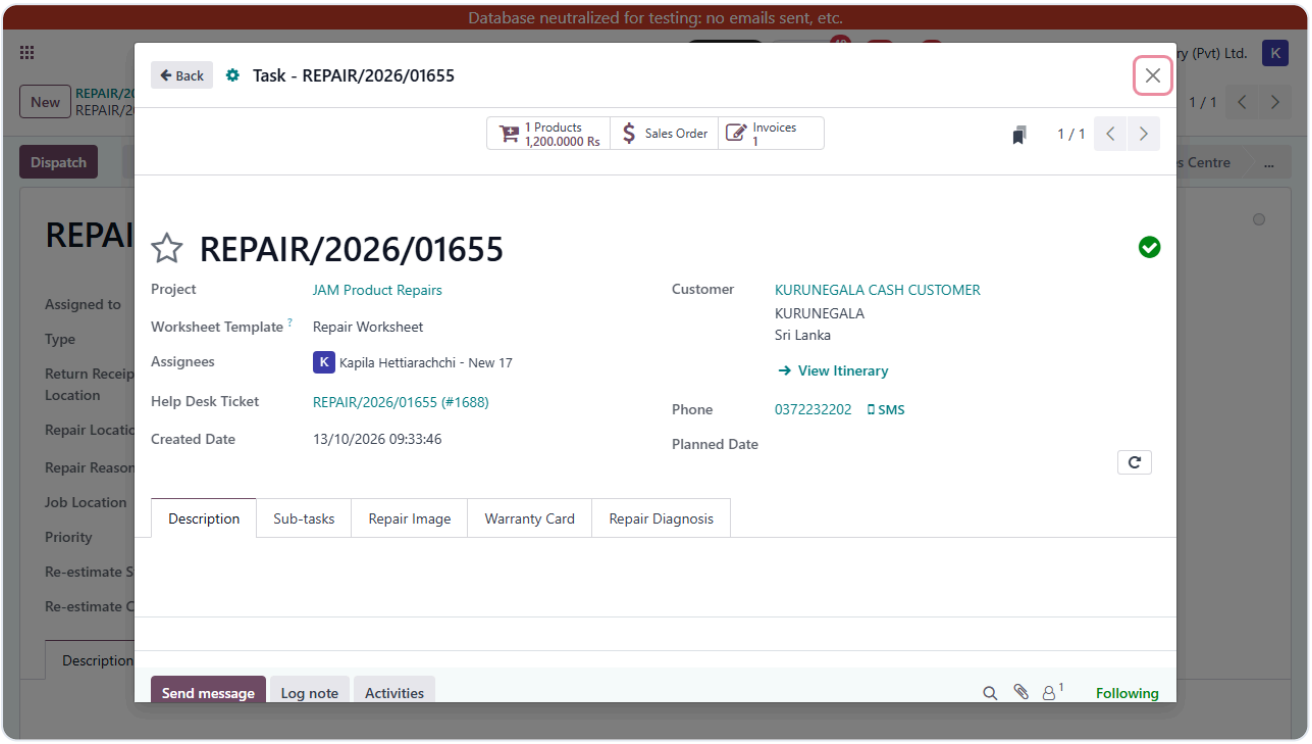

Task form — Mark as done button

47 Close

Navigation Task form (Done)

Action **Click Close.**

Description Returns to the ticket.

Task (Done) — Close

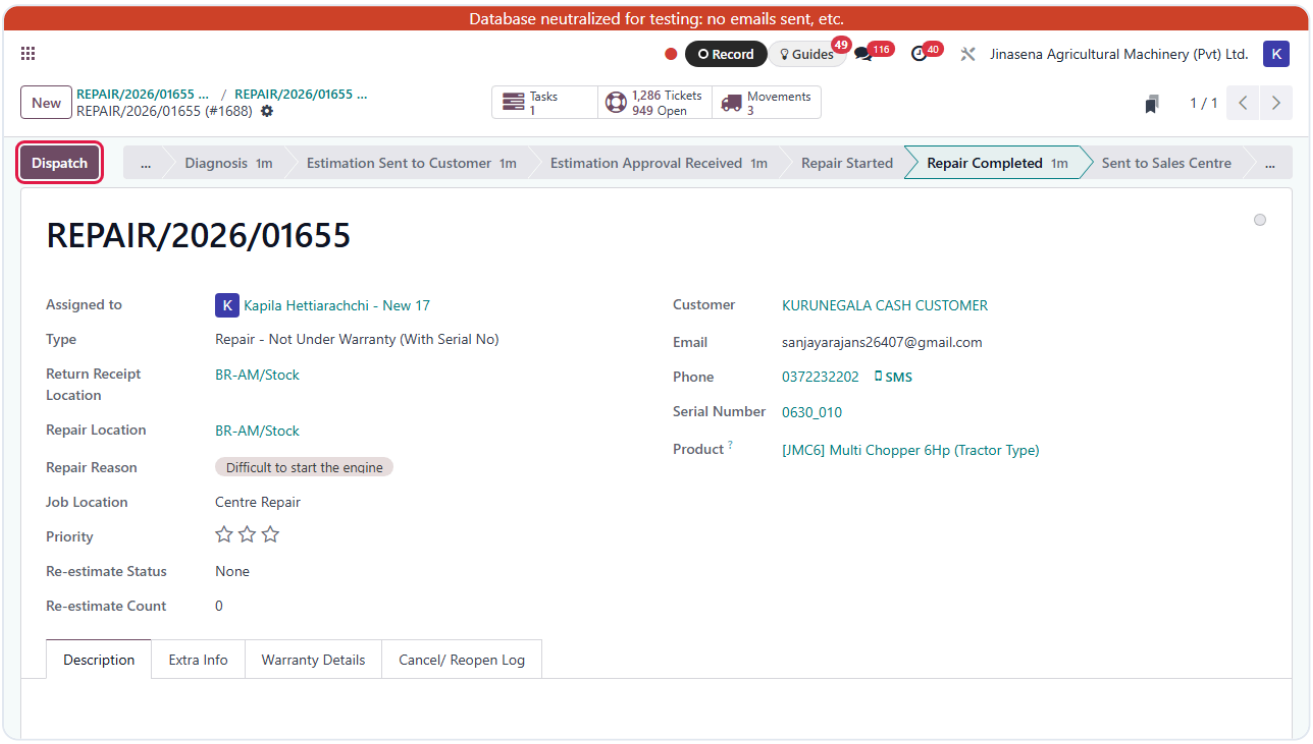

Section H — Dispatch (Steps 48–50)

48 Dispatch

Navigation Ticket form → status bar

Action **Click Dispatch.**

Description Processes the completed repair item back to the customer. The button appears once the task is done (you may need to refresh the page).

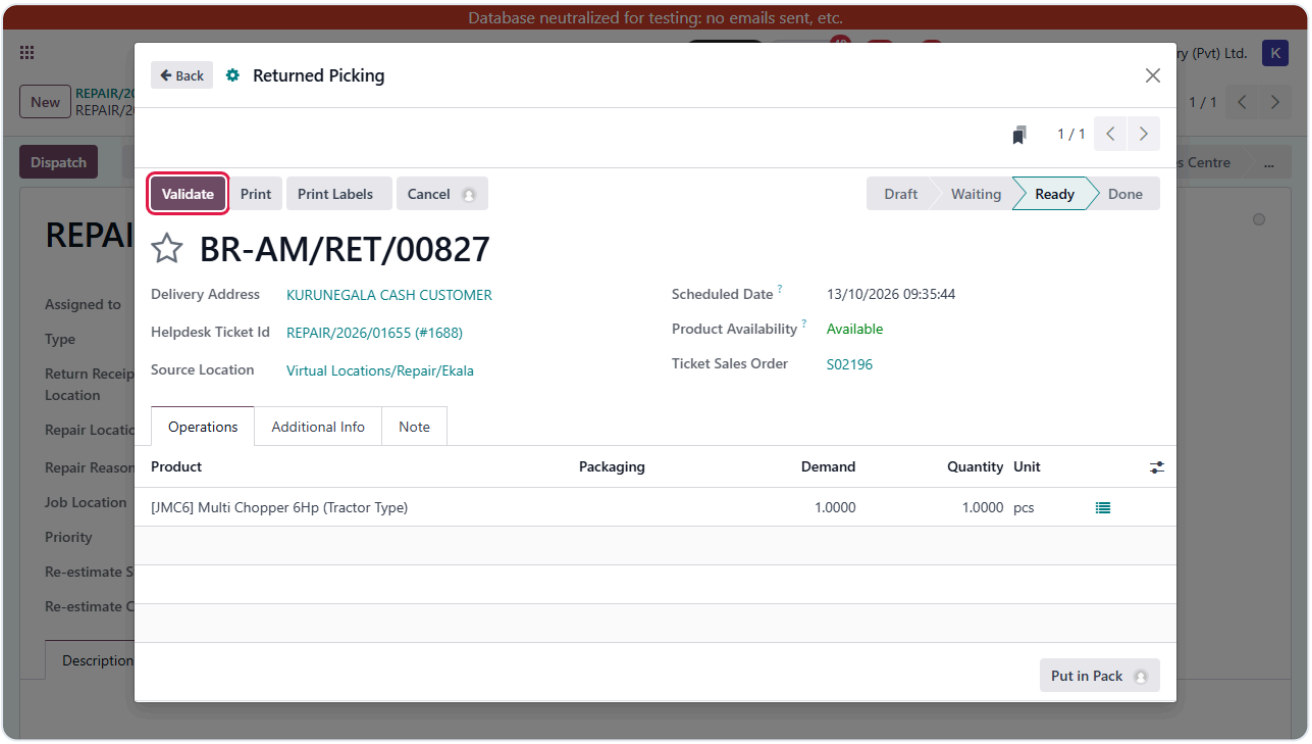

Ticket form — Dispatch button

49 Validate the dispatch

Navigation Returned Picking dialog → header

Action **Click Validate.**

Description Completes the outgoing transfer of the repaired item to the customer.

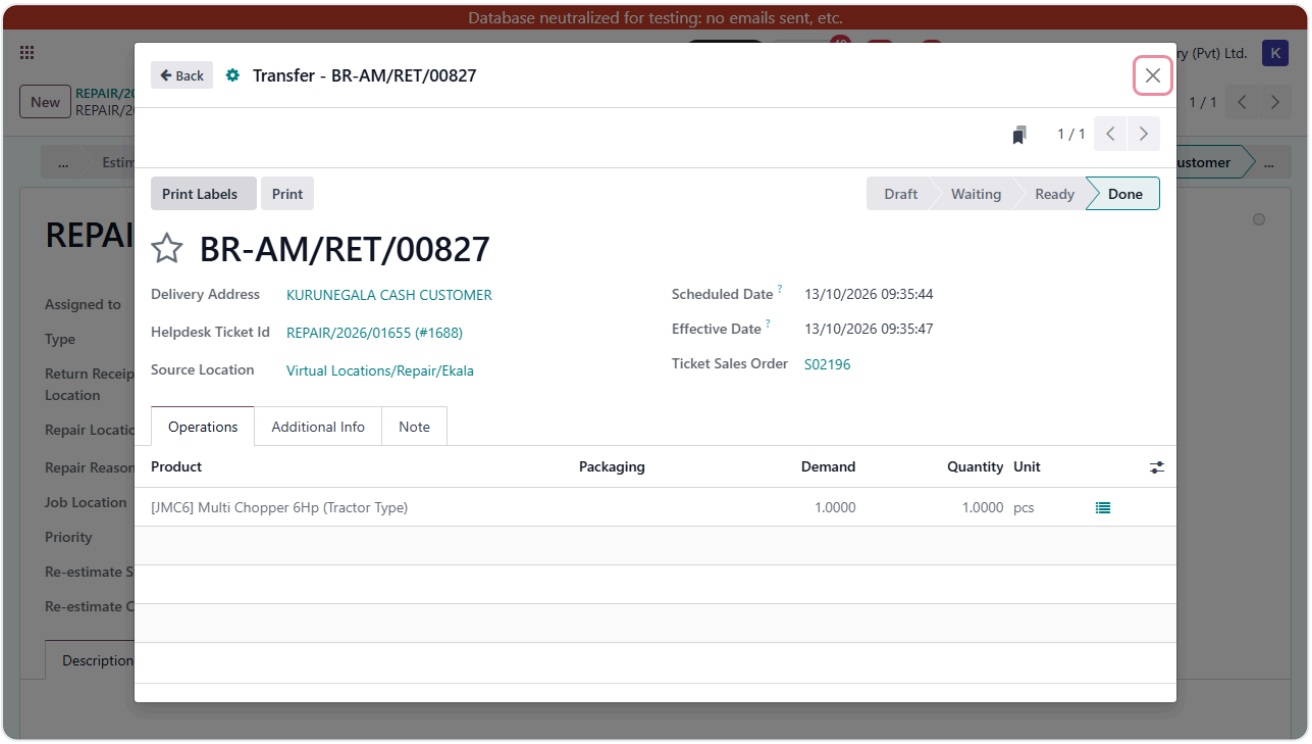

Returned Picking dialog (Ready) — Validate button

50 Close

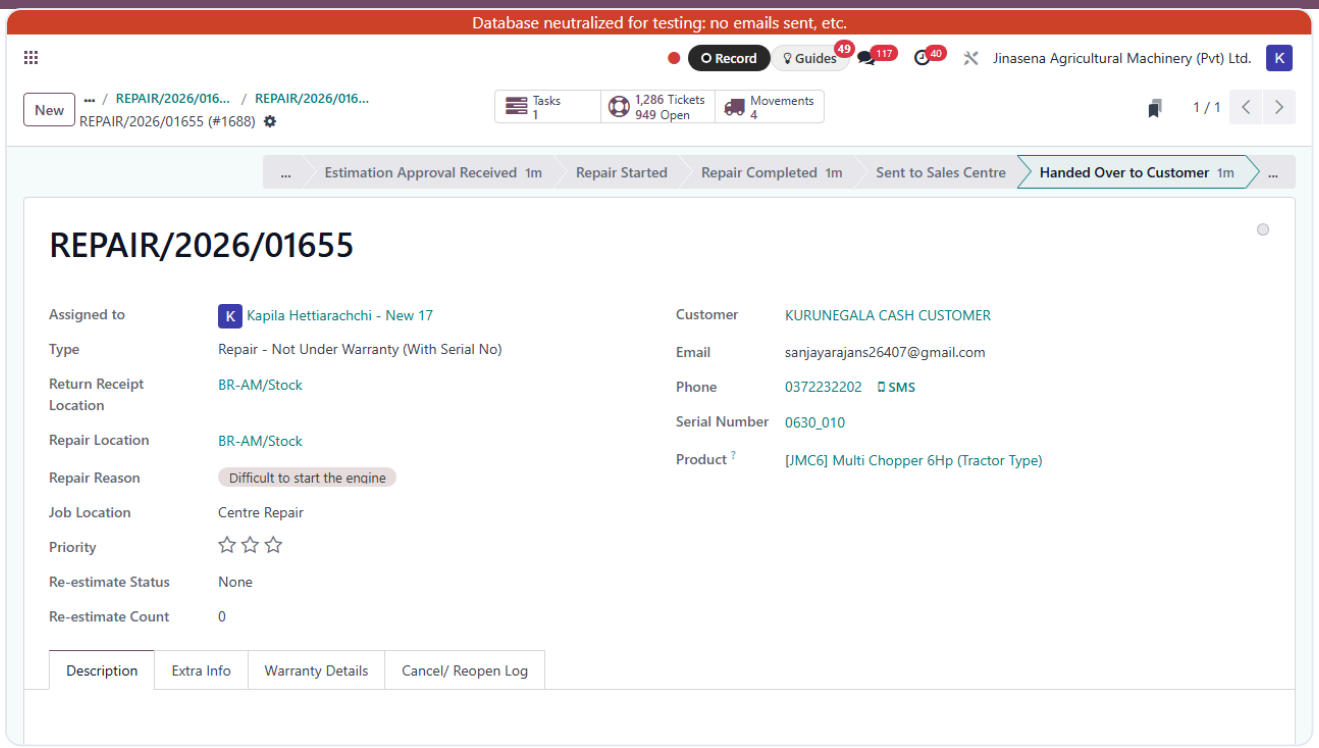

Navigation Returned Picking dialog (Done)

Action **Click Close to go to the ticket view.**

Description The ticket is now in *Handed Over to Customer* — the repair is complete.

Transfer dialog (Done) — Close

Result: ticket after the Close action

QA notes

- This manual covers the **Not Under Warranty (With Serial No)** flow for a **branch (Centre Repair)** repair as a **Quick Repair** (done in one day). Compared with the *3C* full flow, the customer pays the **full invoice amount at once** instead of a 50% deposit, so there is **no balance-collection leg**, and after the task is marked done the item is dispatched straight away. Compared with the *Without Serial No* Quick Repair (1E) there is no Product selection and no **Create Serial No** step: the item is identified by an existing **Serial Number**, which fills in the Product. No warranty card is needed because the warranty period has expired, and there is no Send to / Received at Factory or Sales Centre leg.
- The Serial Number field only offers serials already sold to a customer. The tour picked its own serial; as required by the test-data rules the automated run picks a serial of [JMC6] whose on-hand quantity is zero (this run used `0630_010`), skipping serials that still hold stock in a Repair location from earlier unfinished runs, which would make the receipt and the final Dispatch fail.
- The tour selects the Repair Reason *Low Pressue*; the test-data rules specify `Difficult to start the engine`, which the automated run and this manual use. The tour selects the Return Receipt Location "Jinasena Ampara Branch"; the automated run selects its stock location `BR-AM/Stock`. The tour's diagnosis steps are generic lookups (typed 1–6); the manual uses the test-data values.
- The **Return** button (`fix_repair_action_direct_return`) raises "You may only return Done pickings" server-side but still creates the Returned Picking first. The automated run clicks the real button, which created the picking on this run; the receipt is validated through `/web/dataset/call_kw` (its

Validate button is hidden by the Studio views). The receipt opens as a full page, so the Back screenshot (step 13) shows the Done receipt without a framed button.

- On this instance the quotation's **Confirm** button is hidden once the email has been sent, so the guide shows the customer path (View Quotation → Accept & Sign → Accept & Sign on the online portal; step 32 shows the real portal pages). In the final run the order still showed as *sent* after the portal flow, so the automated run then confirmed it with `action_confirm` over RPC (the spec verifies the order state via RPC and falls back when needed). The draft invoice is posted through RPC (screenshot 34 shows the Confirm button); the full payment is registered through the real Register Payment wizard.
- The number of delivery transfers depends on branch stock. The final run produced a single delivery transfer (`BR-AM/OUT/00766`), which the Delivery button opens directly and which was validated through the real Validate button (steps 42–44); a different run may produce the three-transfer chain (`JM-EK/OUT` → `RP-JM/IN` → `RP-JM/OUT`). The automated run handles both cases.
- The tour has no separate Close / Tasks / Sales Order navigation between sending the quotation and confirming it; the manual follows the tour. The tour also has an *Open Task* click after **Create & View Task**; on this instance the task is already open at that point, so there is no separate step for it. The **Dispatch** button appears in the status bar only after a full page reload once the task is done, so the automated flow reloads the ticket in a polling loop.
- Each screenshot is captured immediately before the step's action with the target element framed in red (a temporary CSS outline applied to the live element only for the capture); result screenshots (serial entered, portal order confirmed, final ticket) have no box. Screenshots come from one clean, fully-passing automated run (admin role): ticket `REPAIR/2026/01655` , quotation `S02196` .
- Every screenshot shows a red "Database neutralized for testing: no emails sent, etc." banner at the top. This is expected on the test database and is not part of the normal production screen.
