Repair User Guide — Branch

Type 2: Not Under Warranty (Without Serial No.) — Quick Repair (Centre Repair)

Source: Odoo Tour Recorder export — `Tour/1E. Repair User Guide - Branch [ Not Under Warranty (Without Serial No ) - Quick Repair ].json`

Scenario: The product's warranty period has expired and it has no serial number. The item is repaired at the branch's **Centre Repair** (not sent to the factory): a one-day **Quick Repair**: diagnosis, parts, quotation approved by the customer, **full payment at once**, delivery of the parts, task completion, and dispatch back to the customer.

Every screenshot below is a real capture from a single, clean, fully-passing automated run — taken *before* each step's action, with the element to use framed in red.

1. Overview

This manual explains how to register and complete a **branch (Centre Repair)** repair for an out-of-warranty product with **no serial number**, from the Helpdesk ticket through quotation, payment and dispatch.

Ticket stages covered

New | Diagnosis | Estimation Sent to Customer | Estimation Approval Received | Repair Started | Repair Completed | Handed Over to Customer

Before you start

- You have access to the Helpdesk, Field Service, Sales, Accounting and Inventory apps.
- The active company (top bar) is **Jinasena Agricultural Machinery (Pvt) Ltd.**
- The customer, product and spare parts already exist in Odoo (Contacts and Product Master).
- The item has been physically brought to the branch by the customer.

Example data used in this manual

Field	Value
Type	Repair - Not Under Warranty (Without Serial No.)
Return Receipt Location	BR-AM/Stock (Jinasena Ampara Branch)
Repair Reason	Low Pressue
Job Location	Centre Repair
Customer	KURUNEGALA CASH CUSTOMER
Product	[JMC6] Multi Chopper 6Hp (Tractor Type)
Diagnosis	Burnt Part / Base plate / Internal / Hi Voltage / Reject / 1-REP-REC
Spare part quoted	[02BB 023] BALL BEARING 6202-2RS (1,200.00)
Payments	Full payment at once — Commercial Bank journal

How to read each step

Navigation	Where you are in Odoo (app › menu › screen / dialog).
Action	What to click, select, or type.
Description	Why the step is needed and what happens.
Screenshot	The screen you are on *right before* performing the action, with the element to use framed in red.

Step summary

Section	Steps	Purpose
A	1–11	Open Helpdesk, create the ticket, classify it (branch Centre Repair), and generate a temporary serial number.
B	12–14	Return the item into stock and validate the receipt.
C	15–16	Plan the intervention and create the Field Service task (no factory transfer for a Centre Repair).

D	17–29	Record the diagnosis, attach a photo and add the spare part to be quoted.
E	30–37	Send the quotation by email and confirm it once the customer accepts online.
F	38–44	Create and confirm the invoice and register the full payment at once (Quick Repair).
G	45–52	Validate the delivery transfers and mark the repair task as done.
H	53–55	Dispatch the repaired item straight back to the customer.

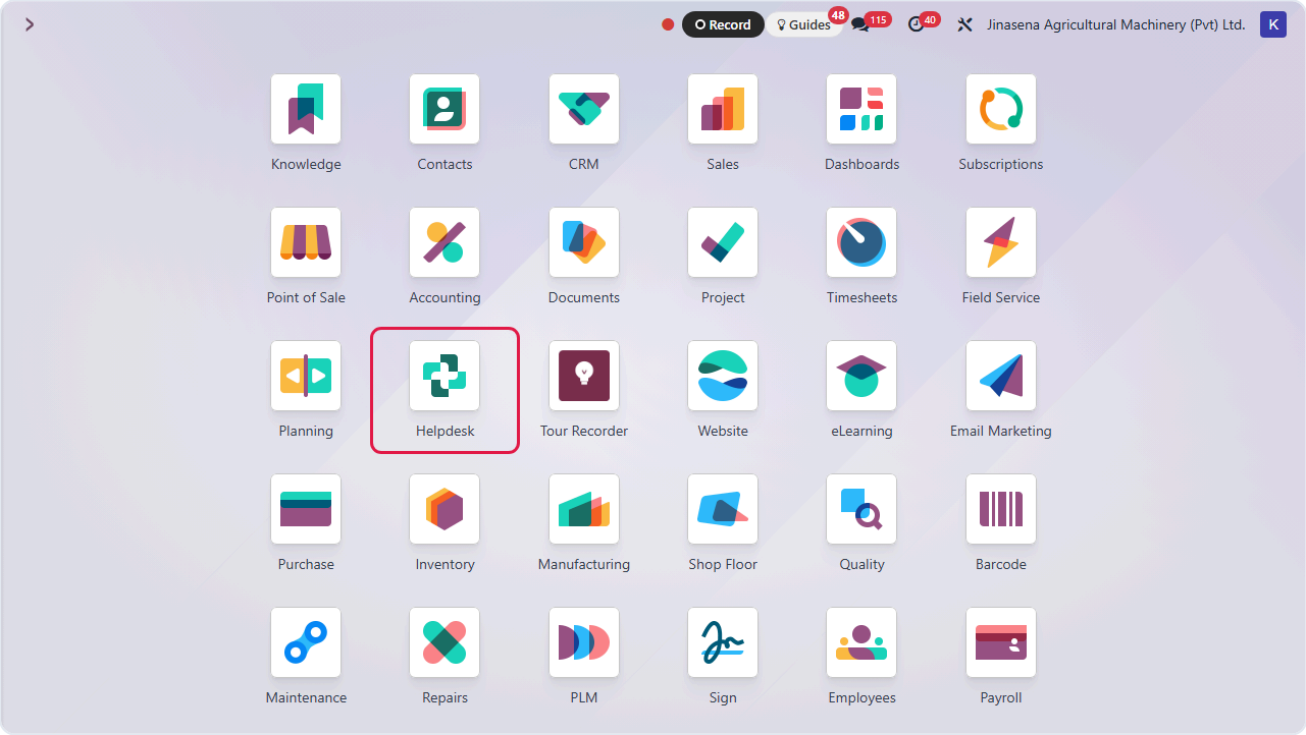

Section A — Create the Repair Ticket (Steps 1–11)

1 Open the HelpDesk app

Navigation Odoo Home → Apps

Action **Click the Helpdesk app icon on the home screen.**

Description Opens the Helpdesk Overview dashboard, showing every support team you have access to.

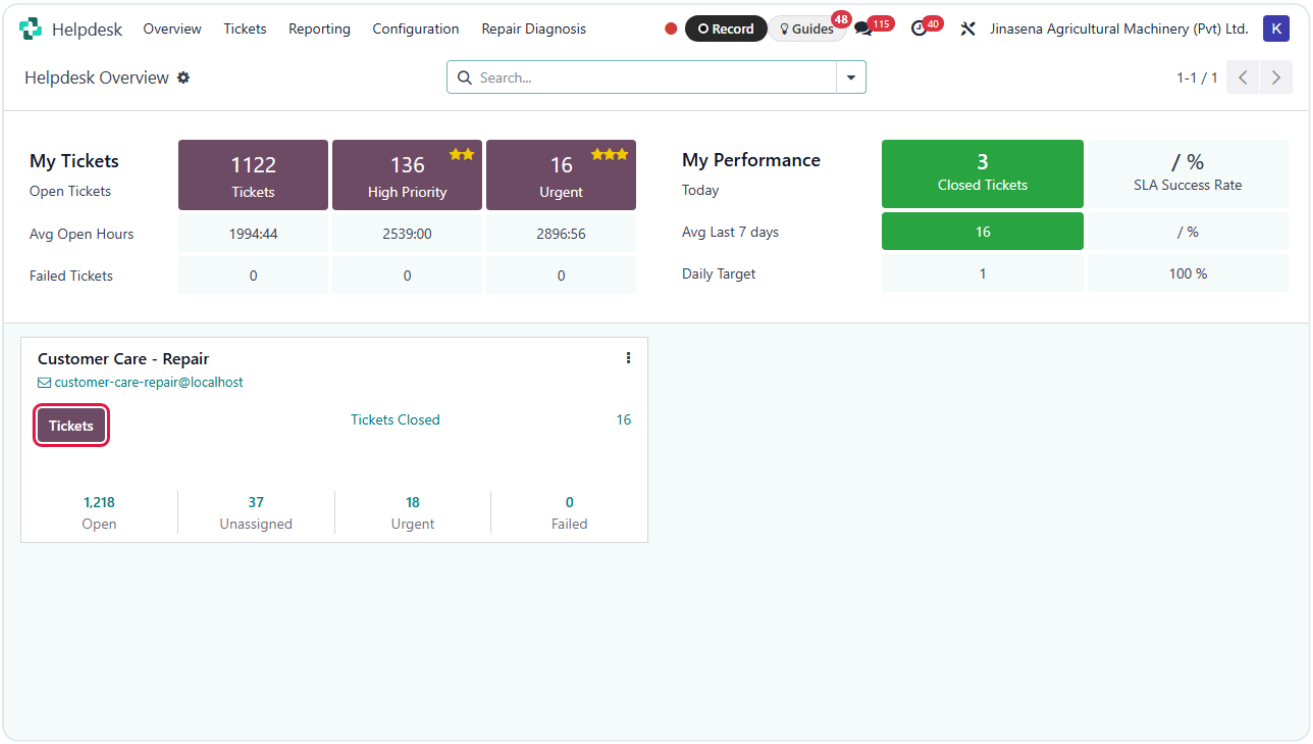

Odoo Apps home screen — Helpdesk app icon

2 Open the repair tickets

Navigation Helpdesk → Overview → Customer Care - Repair

Action **On the Customer Care - Repair team card, click Tickets.**

Description Opens the list of repair tickets already created for the team.

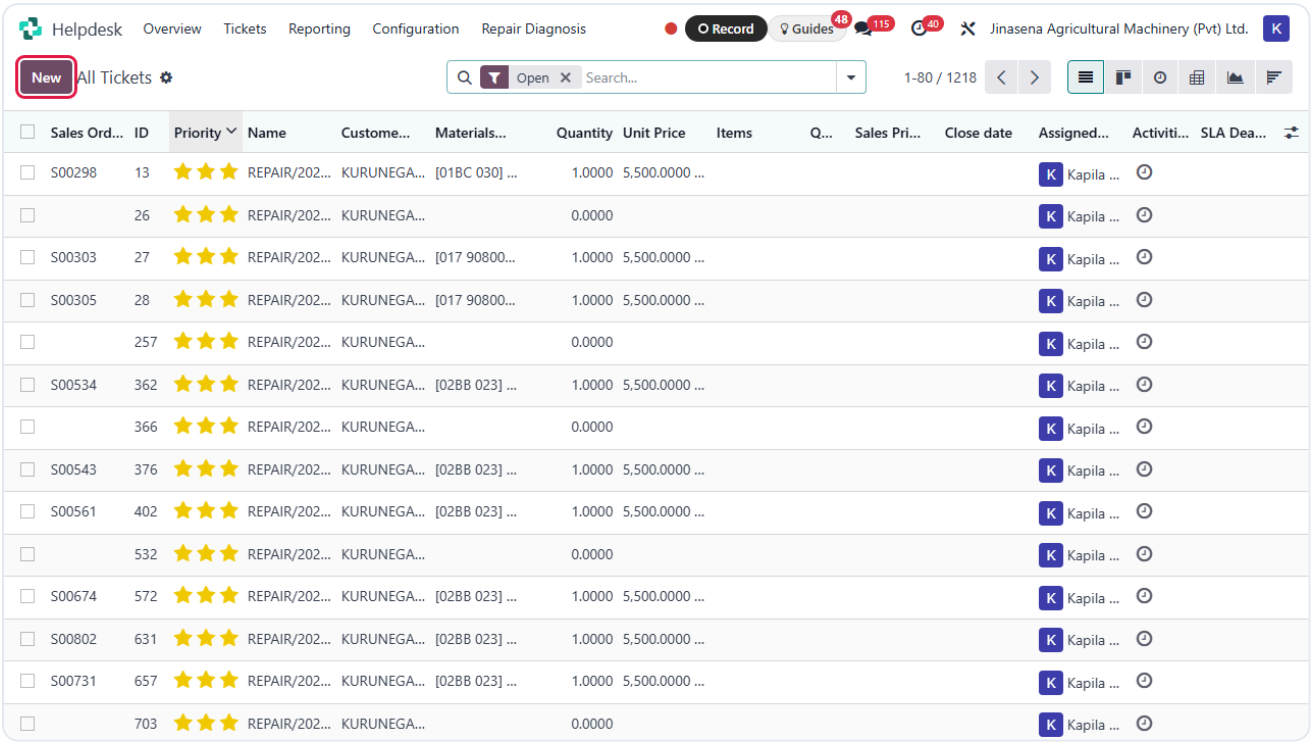

Helpdesk Overview — Tickets button on the Customer Care - Repair team card

3 Create a new ticket

Navigation Helpdesk → Customer Care - Repair (Tickets)

Action **Click New at the top-left of the ticket list.**

Description Opens a blank Helpdesk ticket form for the repair item received from the customer.

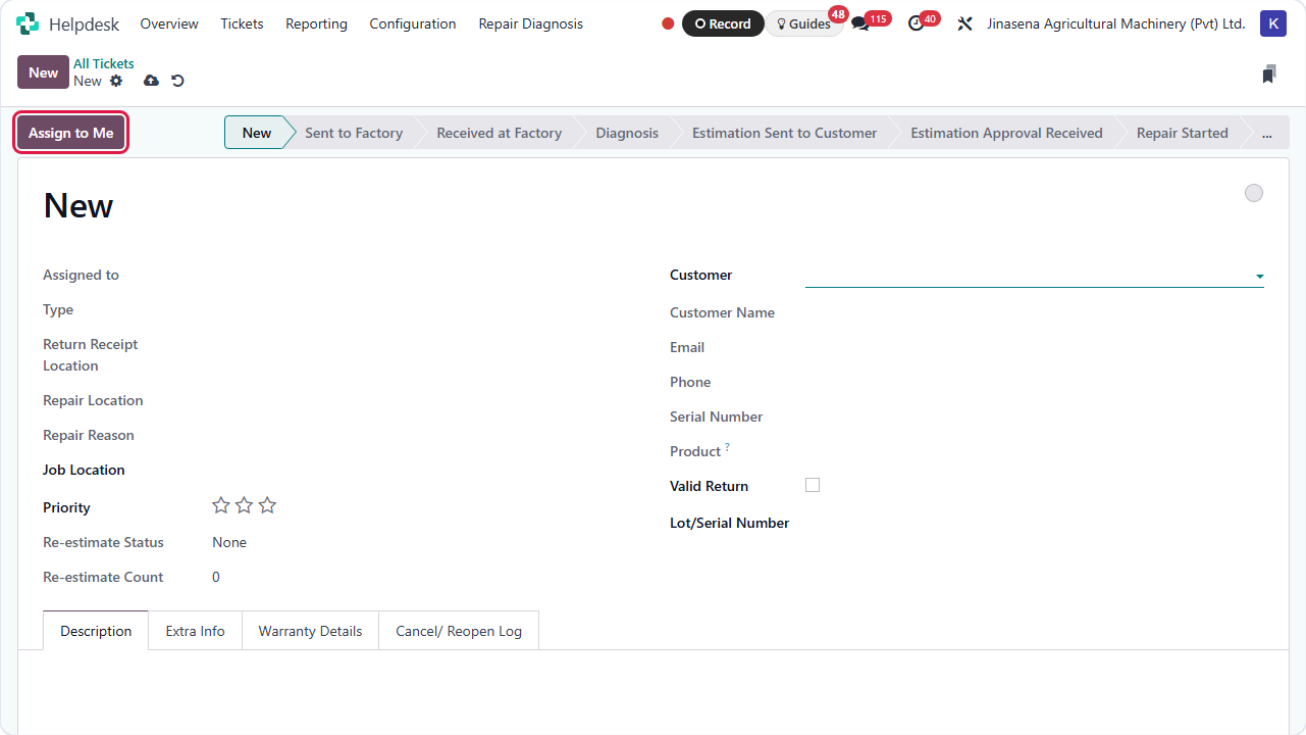

All Tickets list — New button

4 Assign the ticket to yourself

Navigation New ticket form

Action **Click Assign to Me in the status bar.**

Description Saves the ticket for the first time and assigns it to the current user. This also generates the ticket's sequence-based name (e.g. `REPAIR/2026/01609`) — the ticket has no user-editable title.

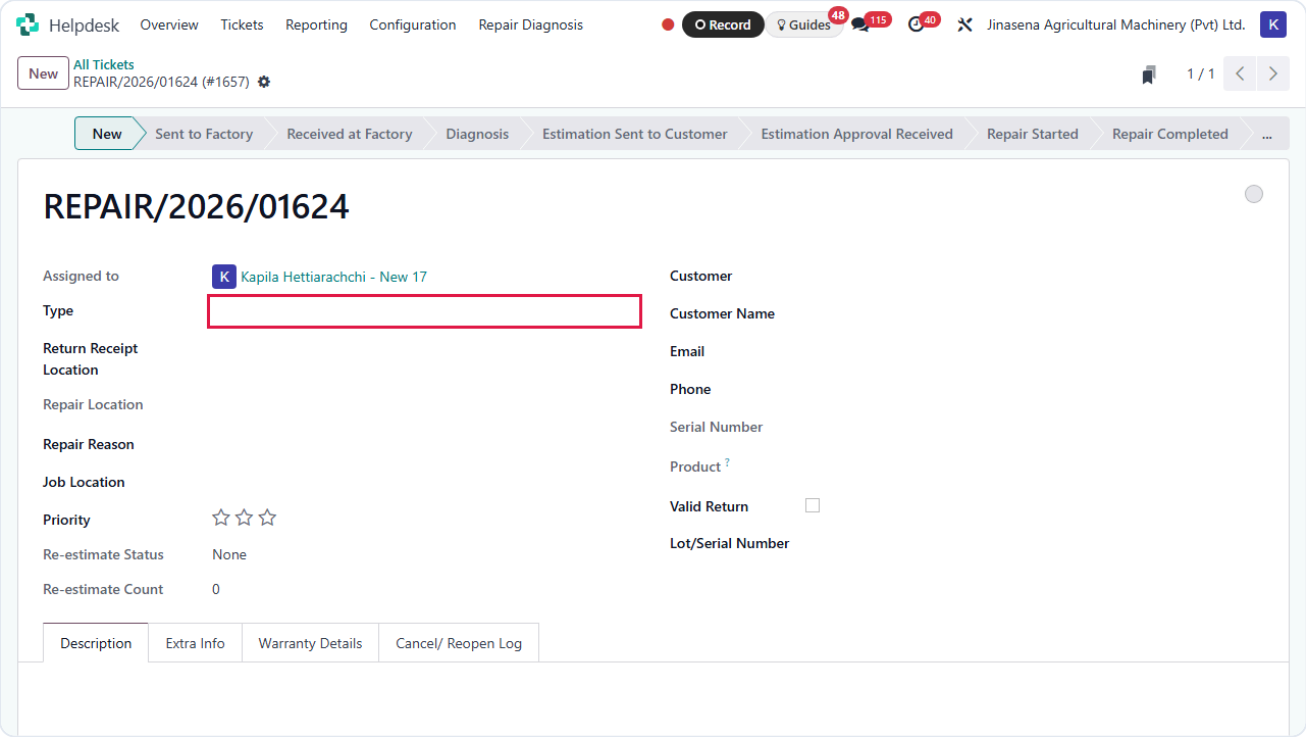

Blank new ticket form — Assign to Me button

5 Set the repair Type

Navigation Ticket form → Type field

Action **Click the Type field and select Repair - Not Under Warranty (Without Serial No.).**

Description Classifies items whose warranty has expired and that have no serial number. The field lists the repair types configured in Studio.

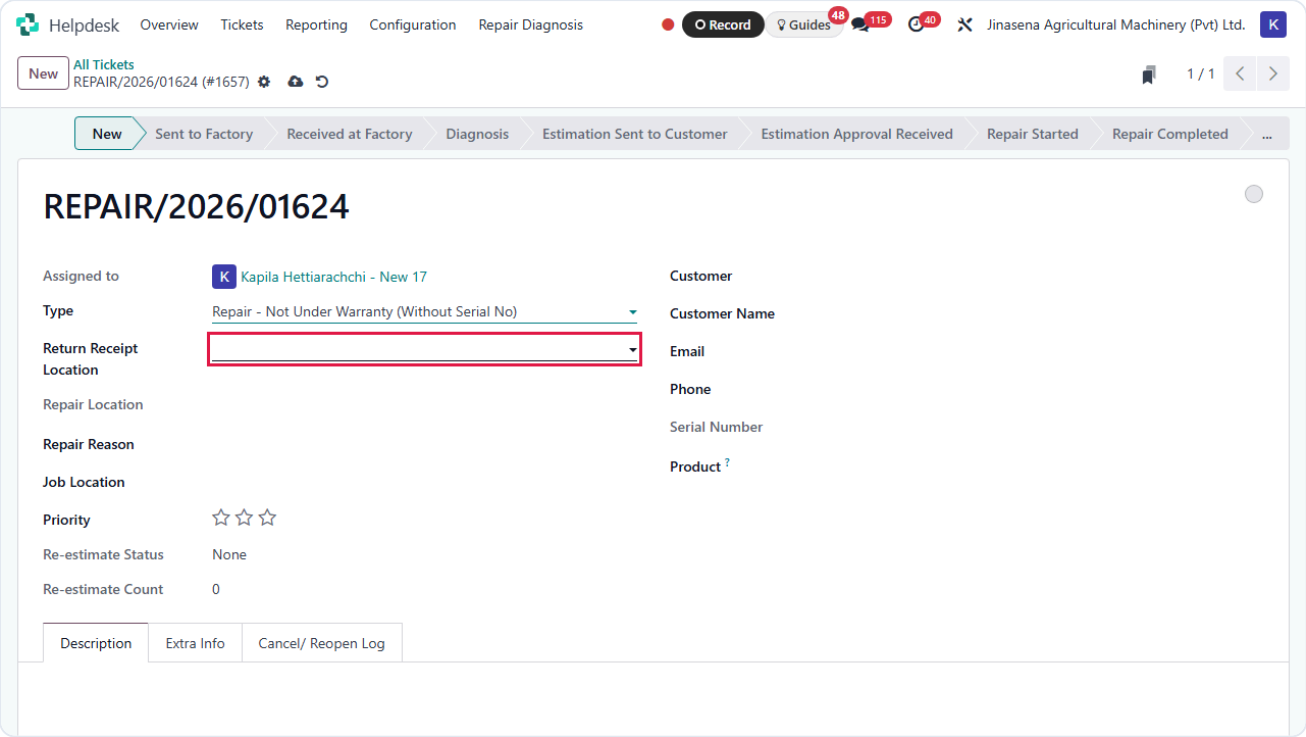

Ticket form — Type field

6 Set the Return Receipt Location

Navigation Ticket form → Return Receipt Location field

Action **Click Return Receipt Location and select the branch receiving the item (e.g. `BR-AM/Stock`, Jinasena Ampara Branch).**

Description The location where the item is received for repair at the branch.

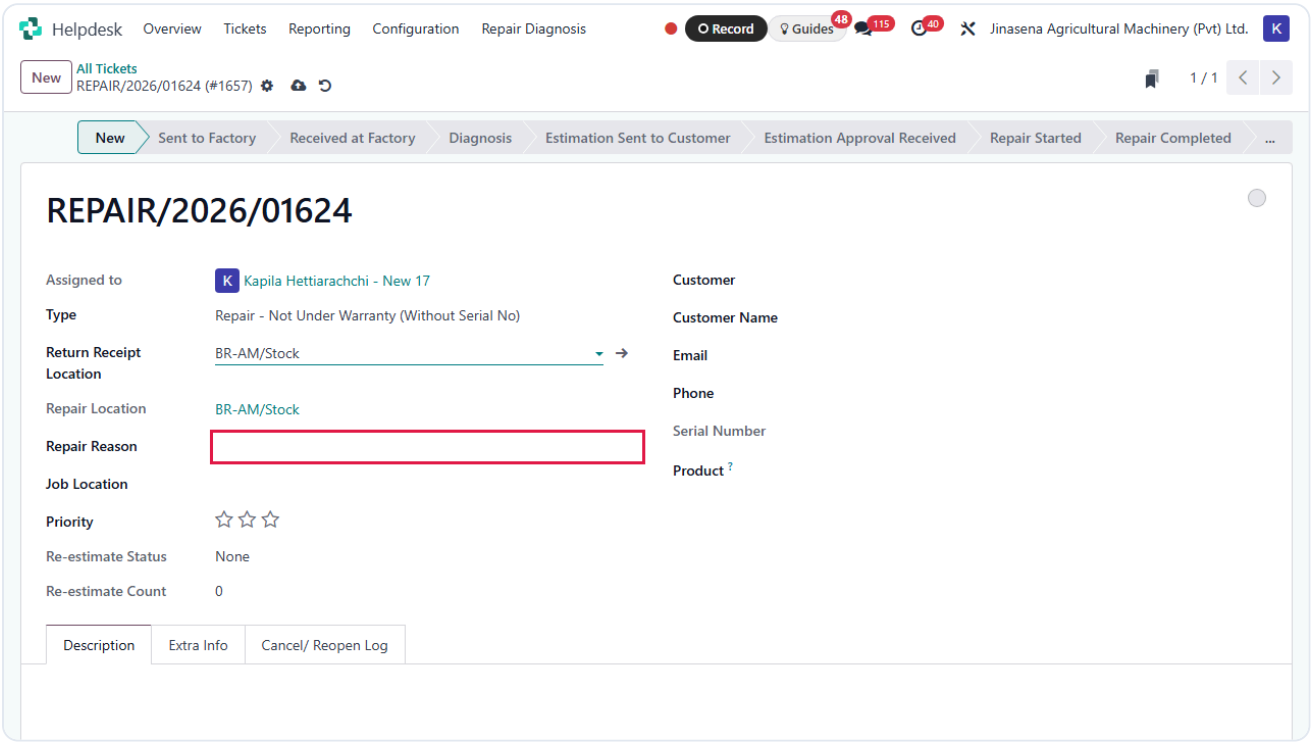

Ticket form — Return Receipt Location field

7 Select the Repair Reason

Navigation Ticket form → Repair Reason field

Action **Click Repair Reason and select the reported fault (e.g. `Low Pressue`).**

Description Choose the common error that best matches the customer's complaint. This is a tags field; at least one reason is required before the item can be returned. (The reason is spelled *Low Pressue* in the Odoo configuration.)

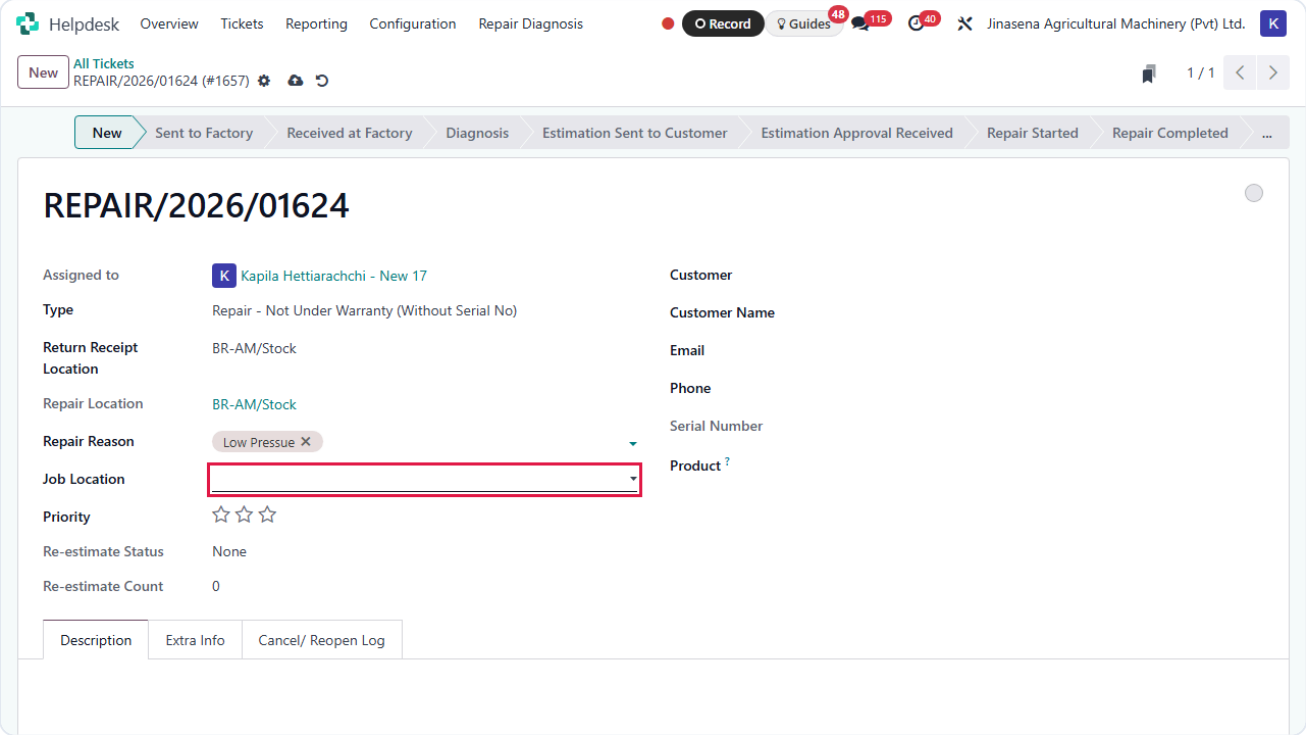

Ticket form — Repair Reason field

8 Select the Job Location

Navigation Ticket form → Job Location field

Action **In Job Location, select Centre Repair.**

Description Defines where the repair is performed. **Centre Repair** keeps the work at the branch's service centre, so the item does not travel to the factory (no Send to Factory / Send to Sales Centre steps).

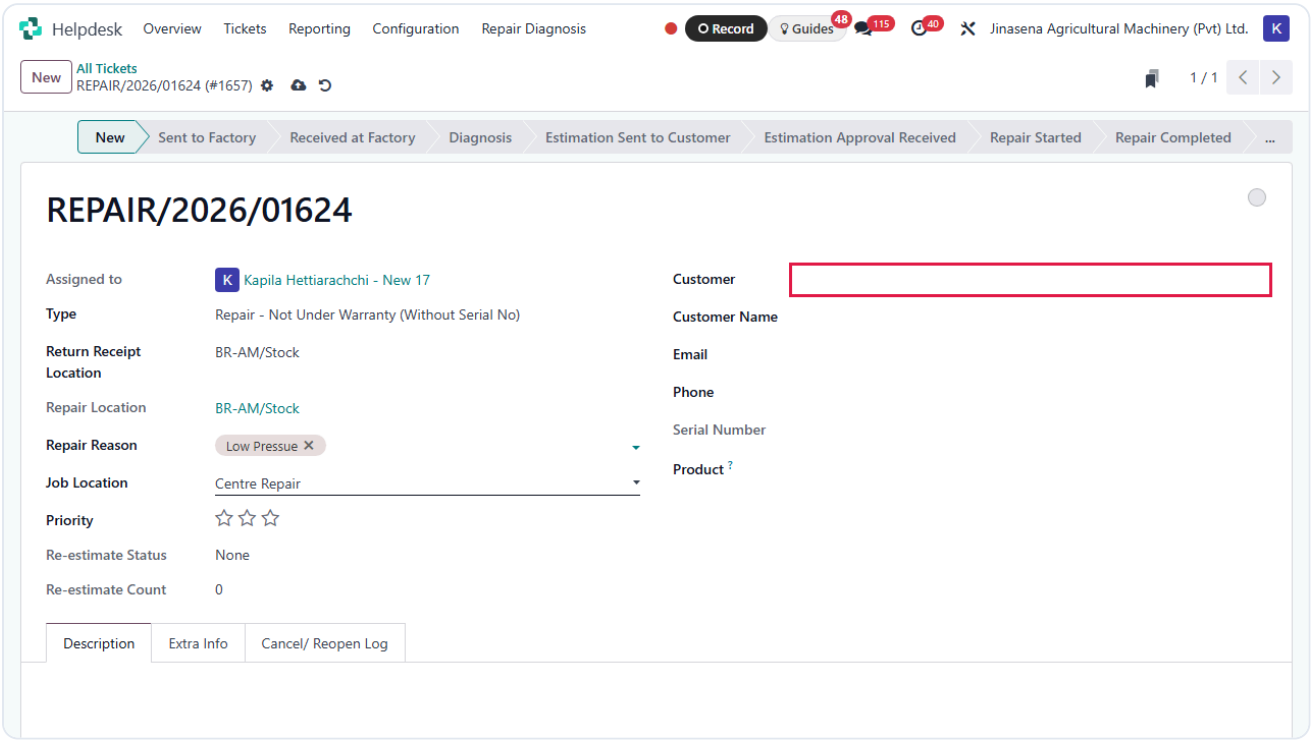

Ticket form — Job Location field

9 Select the Customer

Navigation Ticket form → Customer field

Action **Click Customer and select `KURUNEGALA CASH CUSTOMER`.**

Description Email and Phone are filled automatically from the customer record.

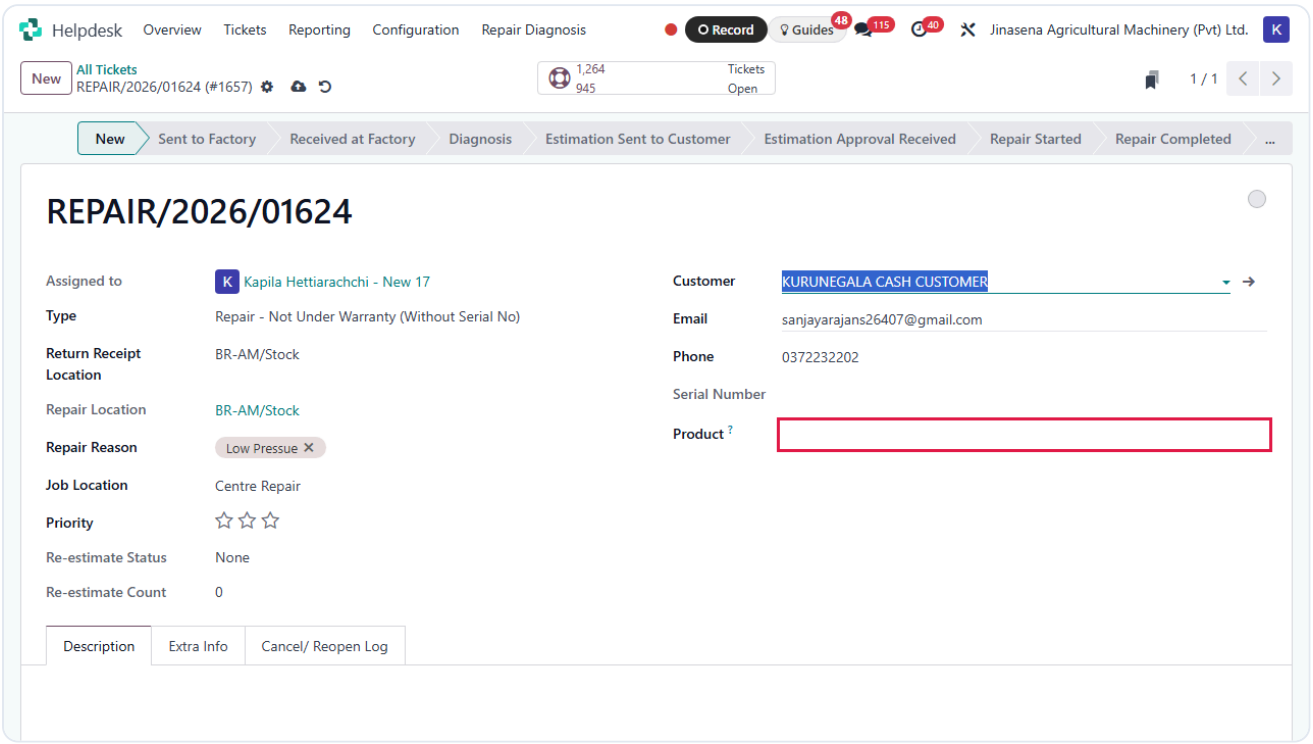

Ticket form — Customer field

10 Select the Product

Navigation Ticket form → Product field

Action **Click Product and select `[JMC6] Multi Chopper 6Hp (Tractor Type)`.**

Description The repair item from the Product Master. Once Customer, Product and Repair Reason are set, the **Create Serial No** button appears.

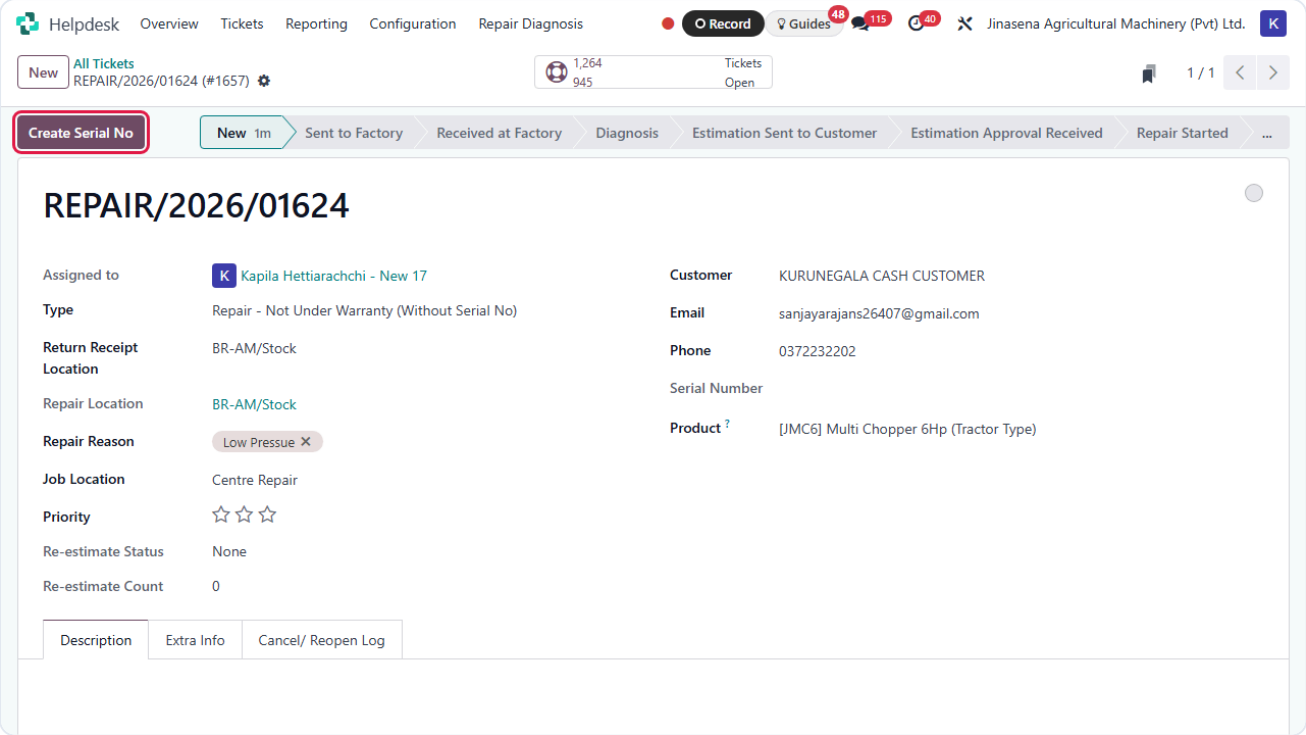

Ticket form — Product field

11 Create a temporary serial number

Navigation Ticket form → status bar

Action **Click Create Serial No.**

Description This repair type has no manufacturer serial number, so the system generates a temporary one (equal to the ticket number). Save the ticket first if it has pending changes.

Ticket form — Create Serial No button

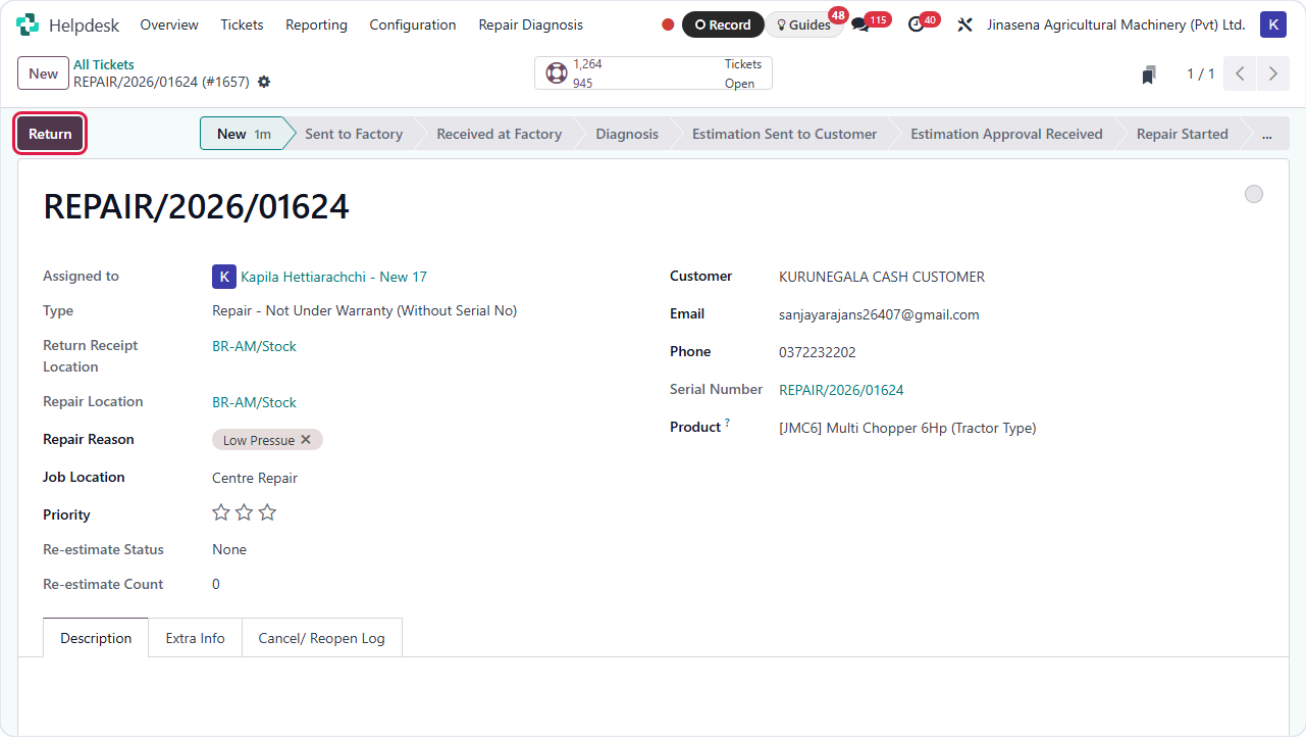

Section B — Receive the Item (Steps 12–14)

12 Return — receive the item

Navigation Ticket form → status bar

Action **Click Return.**

Description Records the item being physically received from the customer by creating a Returned Picking (e.g. `BR-AM/RET/00766`) in the Ready state.

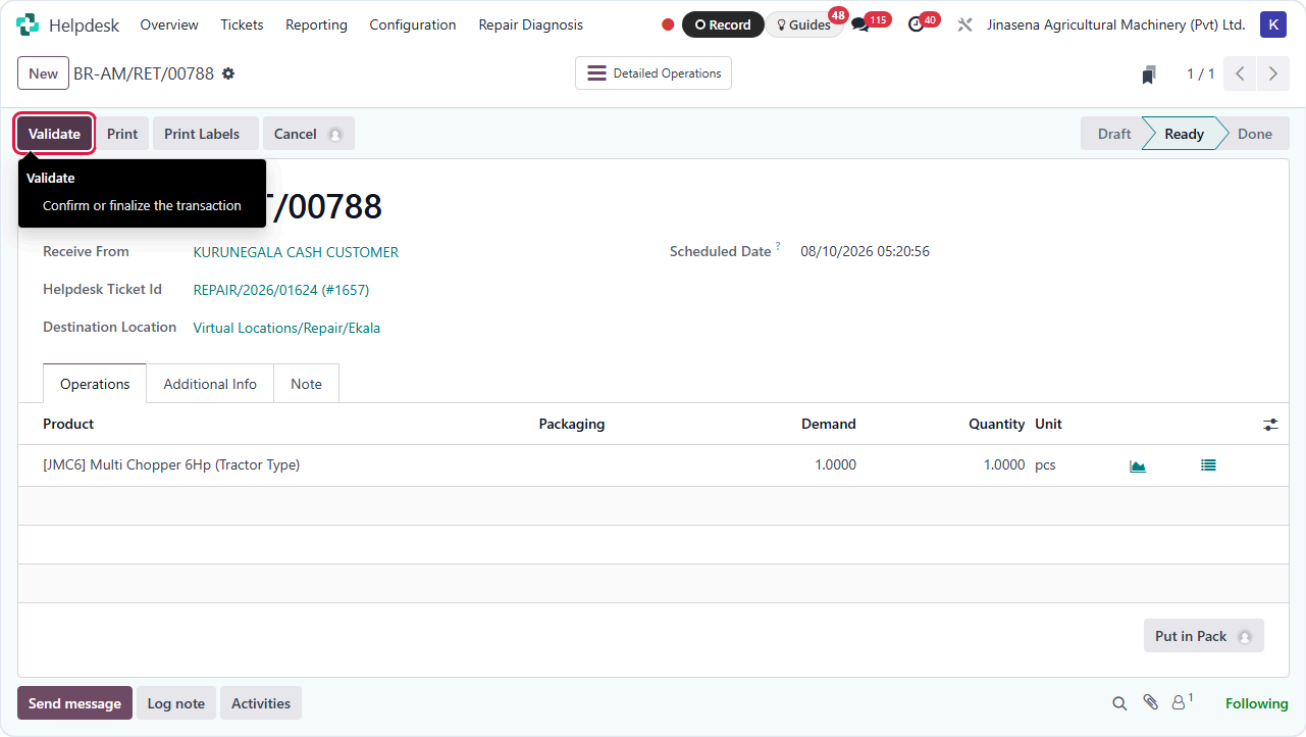

Ticket form — Return button

13 Validate the receipt

Navigation Returned Picking → status bar

Action **Click Validate.**

Description Confirms the item has arrived into the repair stock location. The ticket cannot move on until this picking is Done.

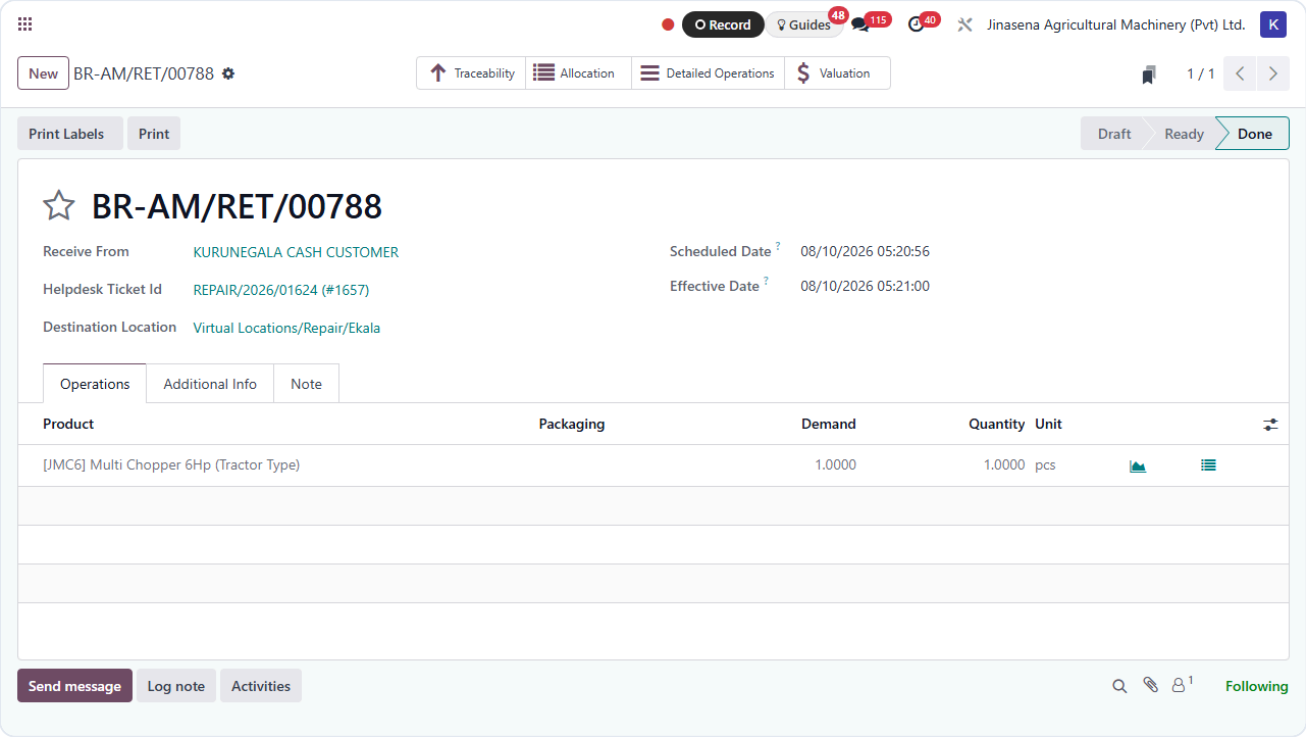

Returned Picking (Ready) — Validate button

14 Close

Navigation Returned Picking (Done)

Action **Click Close to return to the ticket.**

Description The receipt is Done. Returning to the ticket, the **Plan Intervention** button is now available.

Returned Picking (Done) — Close

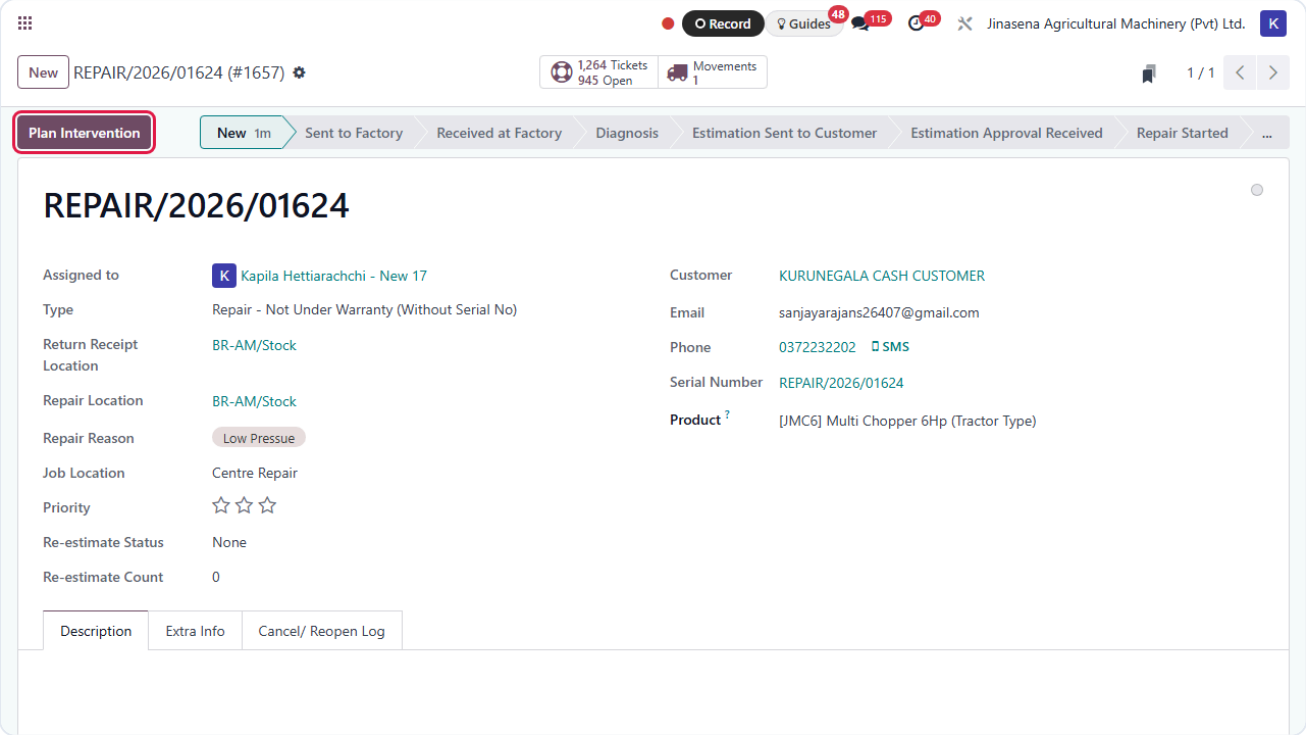

Section C — Plan the Repair Task (Steps 15–16)

15 Plan Intervention

Navigation Ticket form → status bar

Action **Click Plan Intervention.**

Description Assigns the work to a repair technician. Because the Job Location is *Centre Repair*, the ticket goes straight to planning at the branch — there is no Send to Factory / Received at Factory leg.

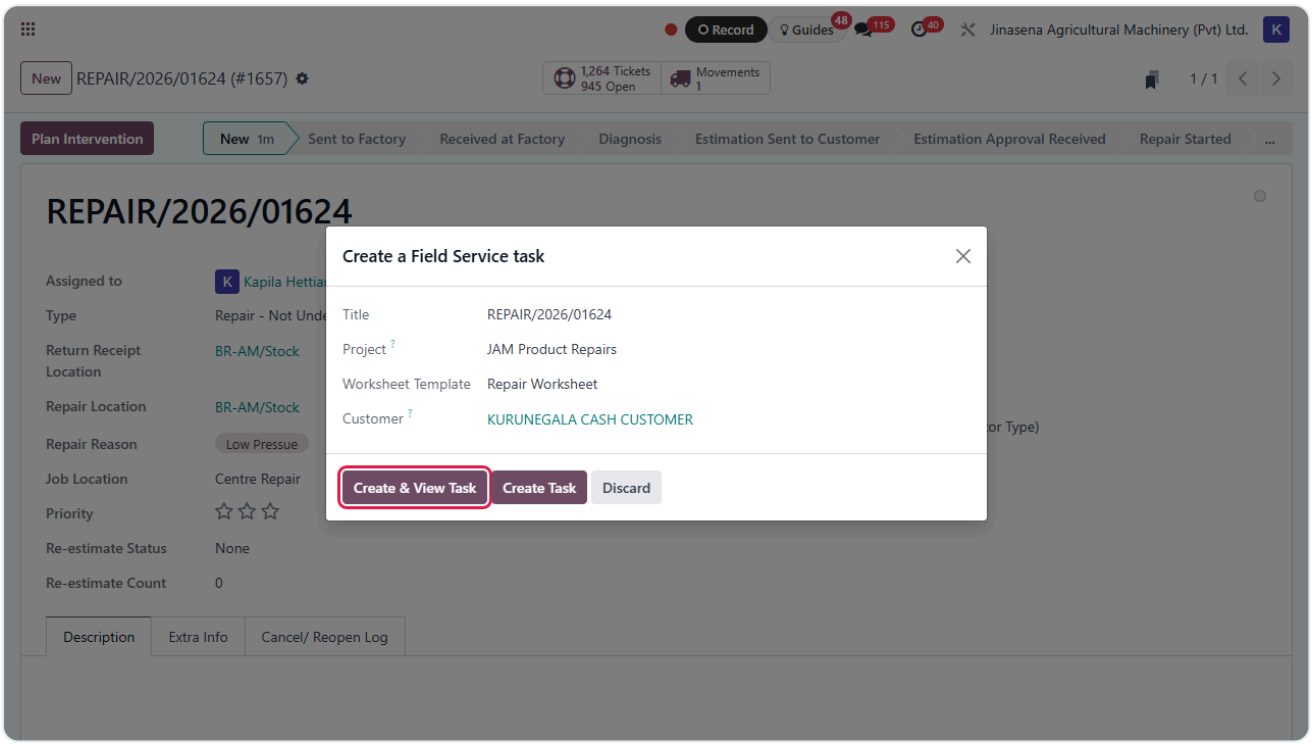

Ticket form — Plan Intervention button

16 Create & View Task

Navigation Create a Field Service task dialog

Action **Click Create & View Task.**

Description Creates the Field Service task and opens it, where the technician records the diagnosis, photo and parts.

Create a Field Service task dialog — Create & View Task button

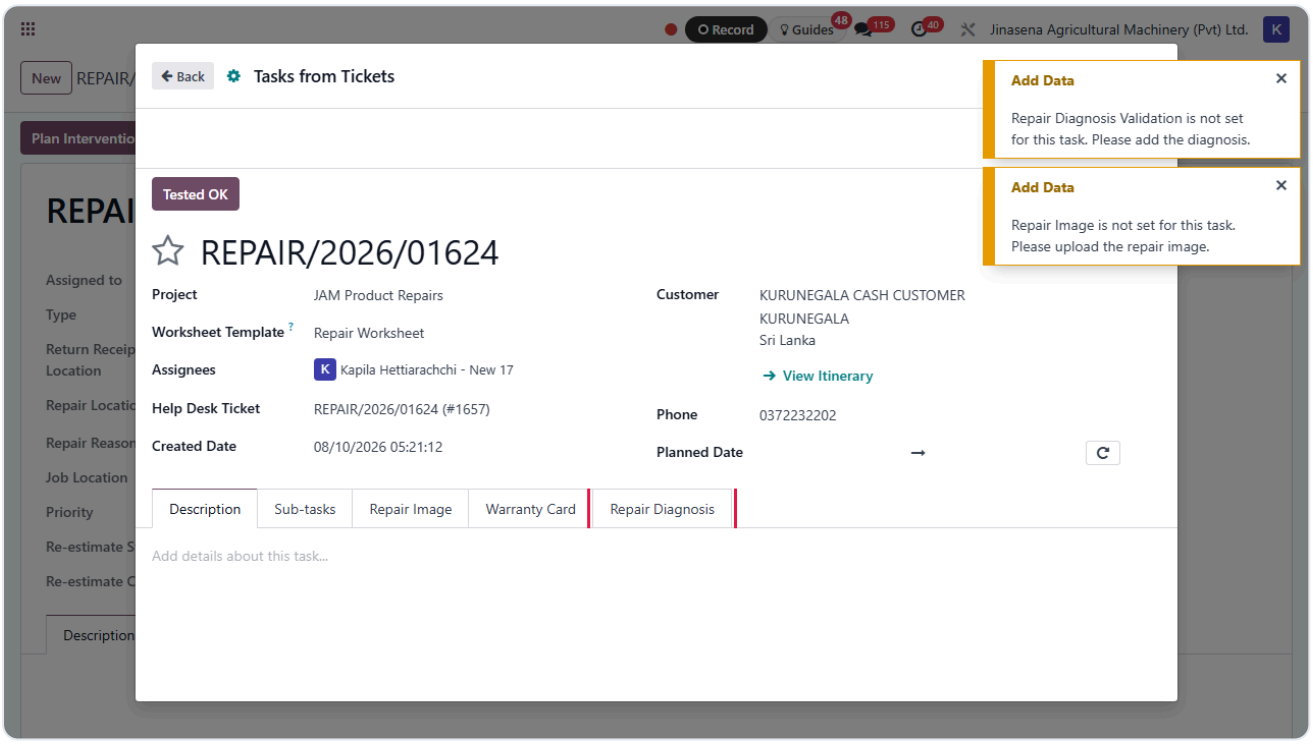

Section D — Diagnosis, Image and Parts (Steps 17–29)

17 Open the Repair Diagnosis tab

Navigation Task form → Repair Diagnosis tab

Action **Click the Repair Diagnosis tab.**

Description The technician records what was found on the item. At least one diagnosis line is required.

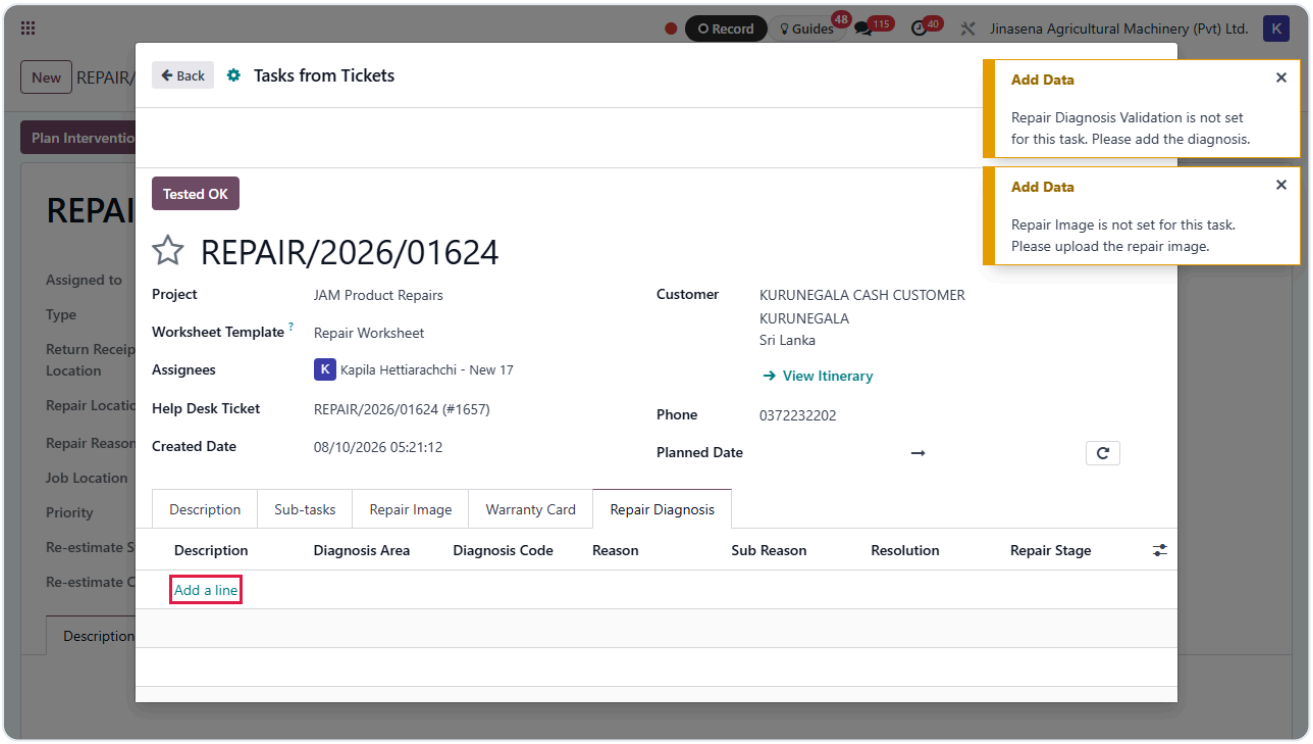

Task form — Repair Diagnosis tab

18 Add a diagnosis line

Navigation Task form → Repair Diagnosis tab

Action **Click Add a line.**

Description Adds a new row to the diagnosis table (a short description is filled in first).

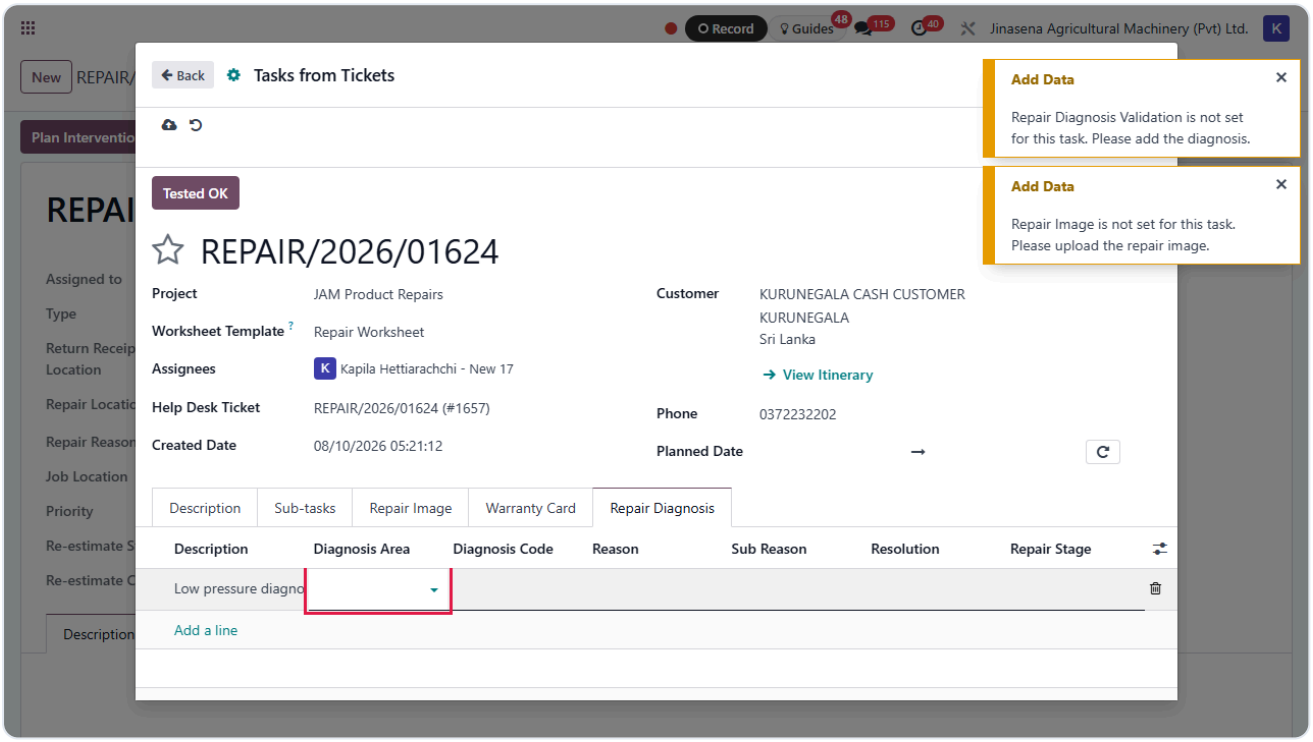

Repair Diagnosis tab — Add a line

19 Diagnosis Area

Navigation Repair Diagnosis → diagnosis line

Action **Click the Diagnosis Area cell and select `Burnt Part`.**

Description The area of the machine where the problem lies.

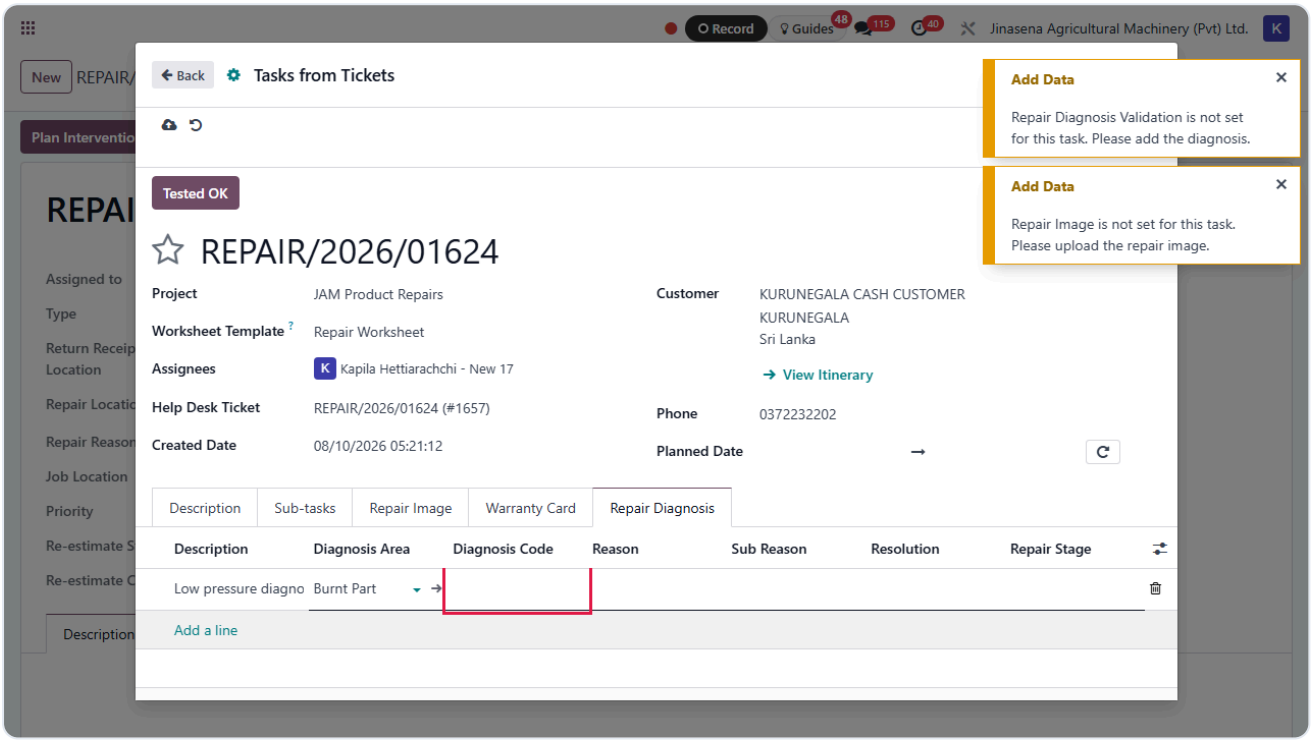

Diagnosis line — Diagnosis Area cell

20 Diagnosis Code

Navigation Repair Diagnosis → diagnosis line

Action **Click the Diagnosis Code cell and select `Base plate`.**

Description The specific part or code of the fault.

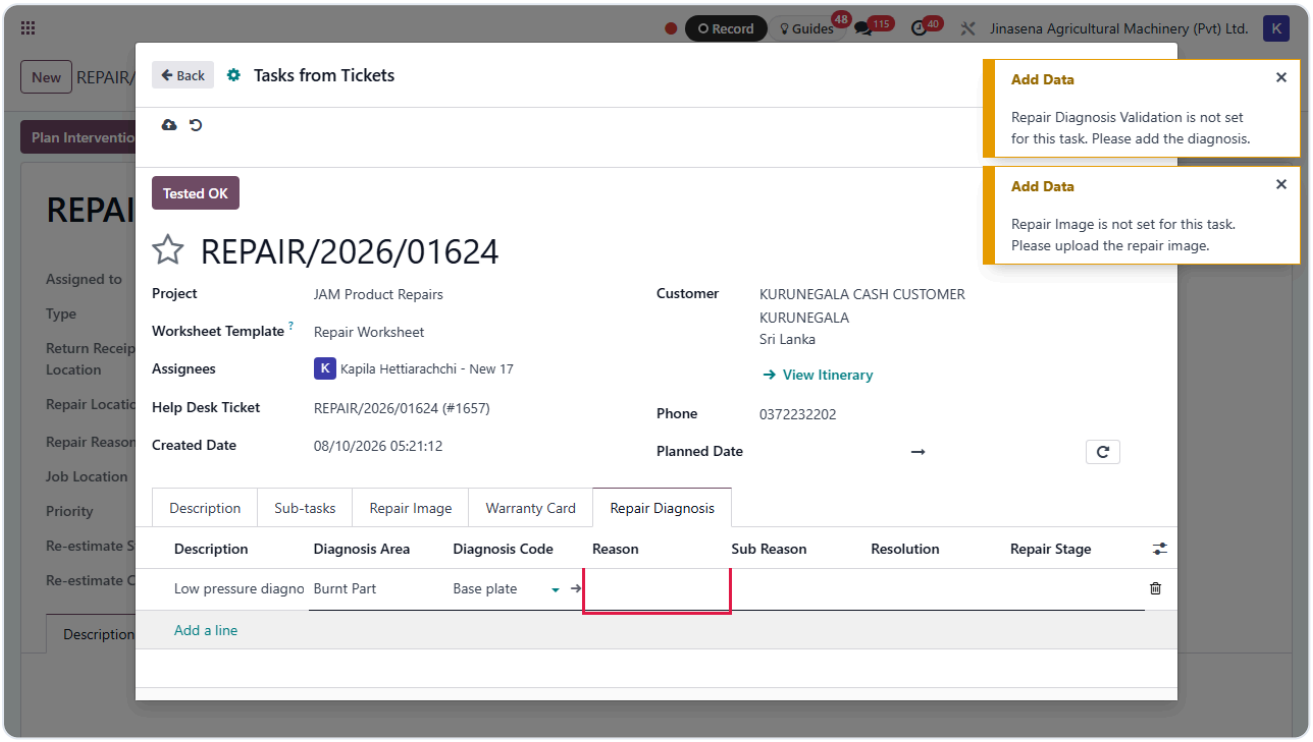

Diagnosis line — Diagnosis Code cell

21 Reason

Navigation Repair Diagnosis → diagnosis line

Action **Click the Reason cell and select `Internal`.**

Description The root-cause category.

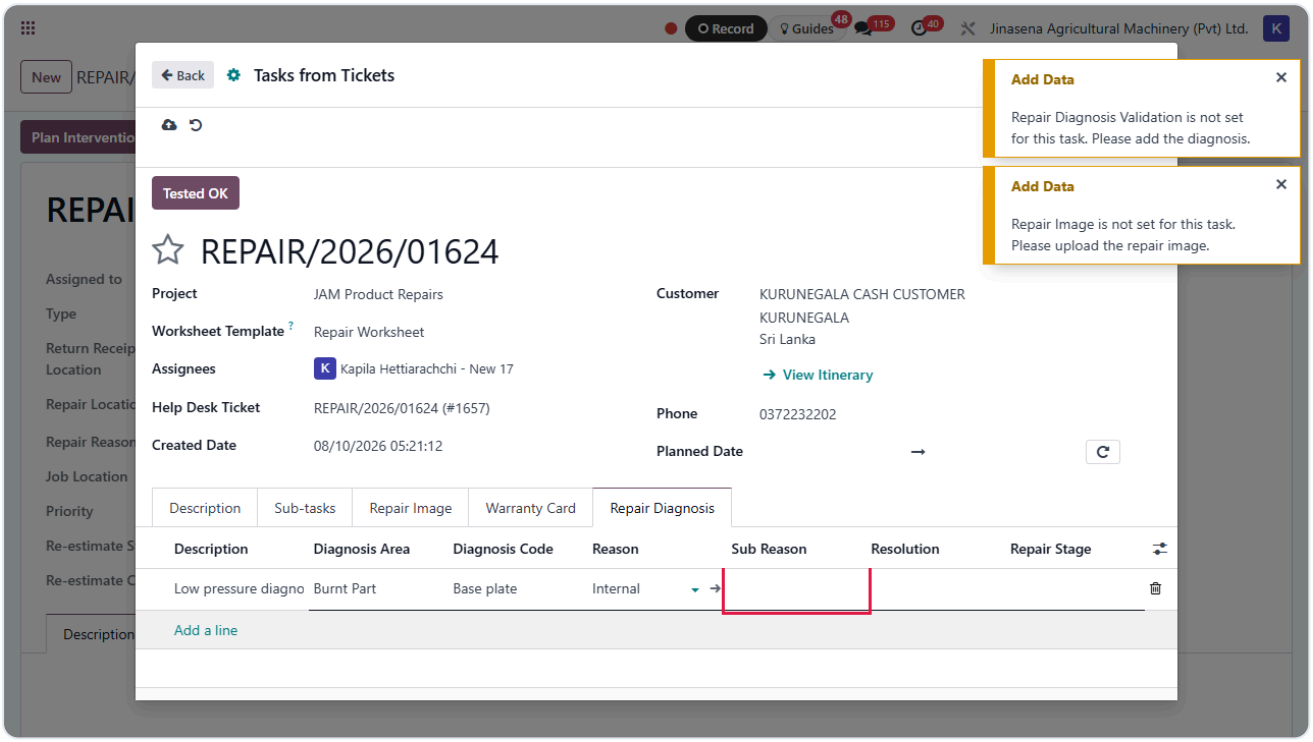

Diagnosis line — Reason cell

22 Sub Reason

Navigation Repair Diagnosis → diagnosis line

Action **Click the Sub Reason cell and select `Hi Voltage`.**

Description A finer breakdown of the root cause.

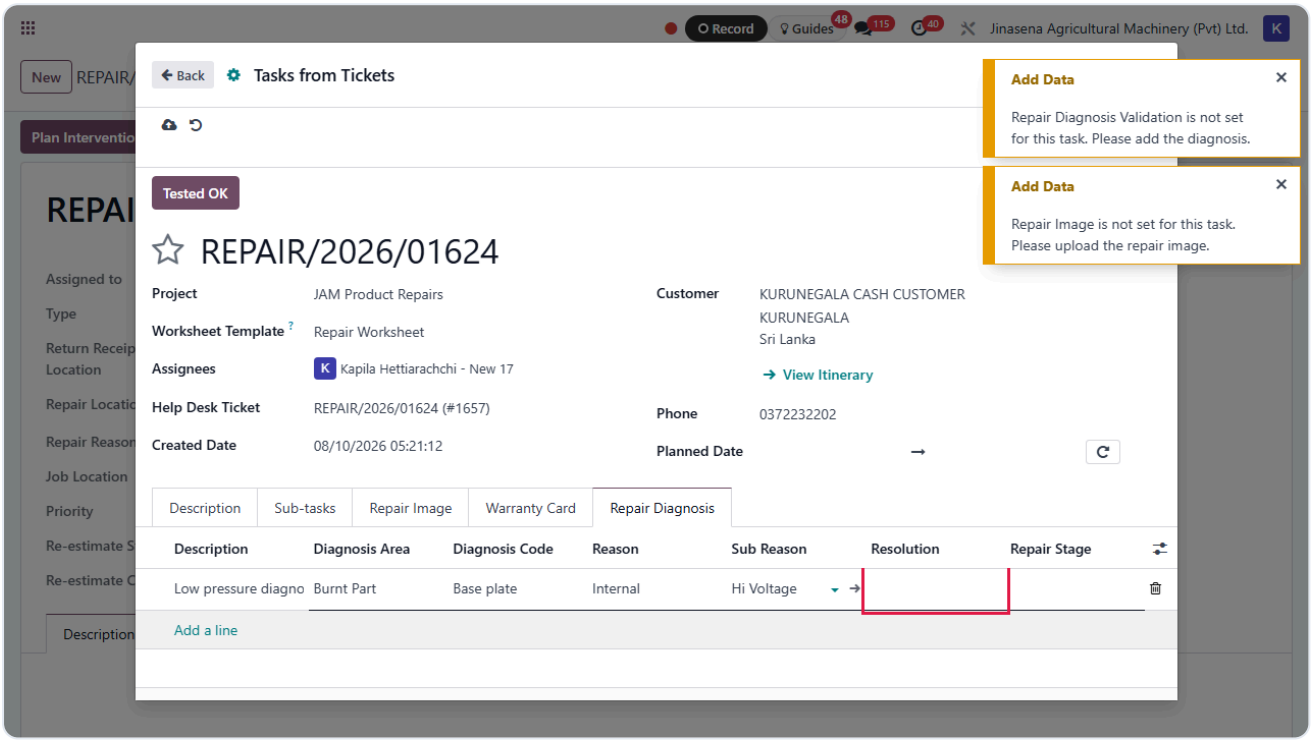

Diagnosis line — Sub Reason cell

23 Resolution

Navigation Repair Diagnosis → diagnosis line

Action **Click the Resolution cell and select `Reject`.**

Description The resolution decided by the technician.

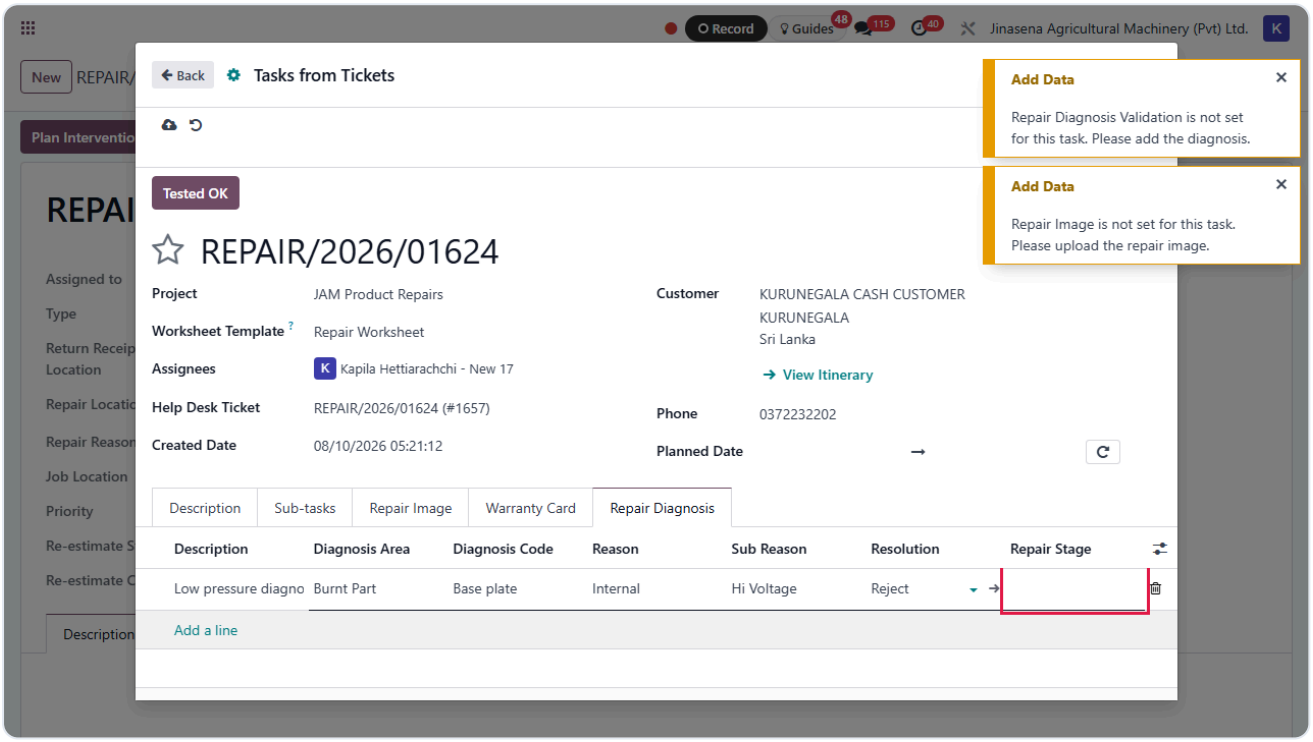

Diagnosis line — Resolution cell

24 Repair Stage

Navigation Repair Diagnosis → diagnosis line

Action **Click the Repair Stage cell and select `1-REP-REC`.**

Description The repair stage the item is at.

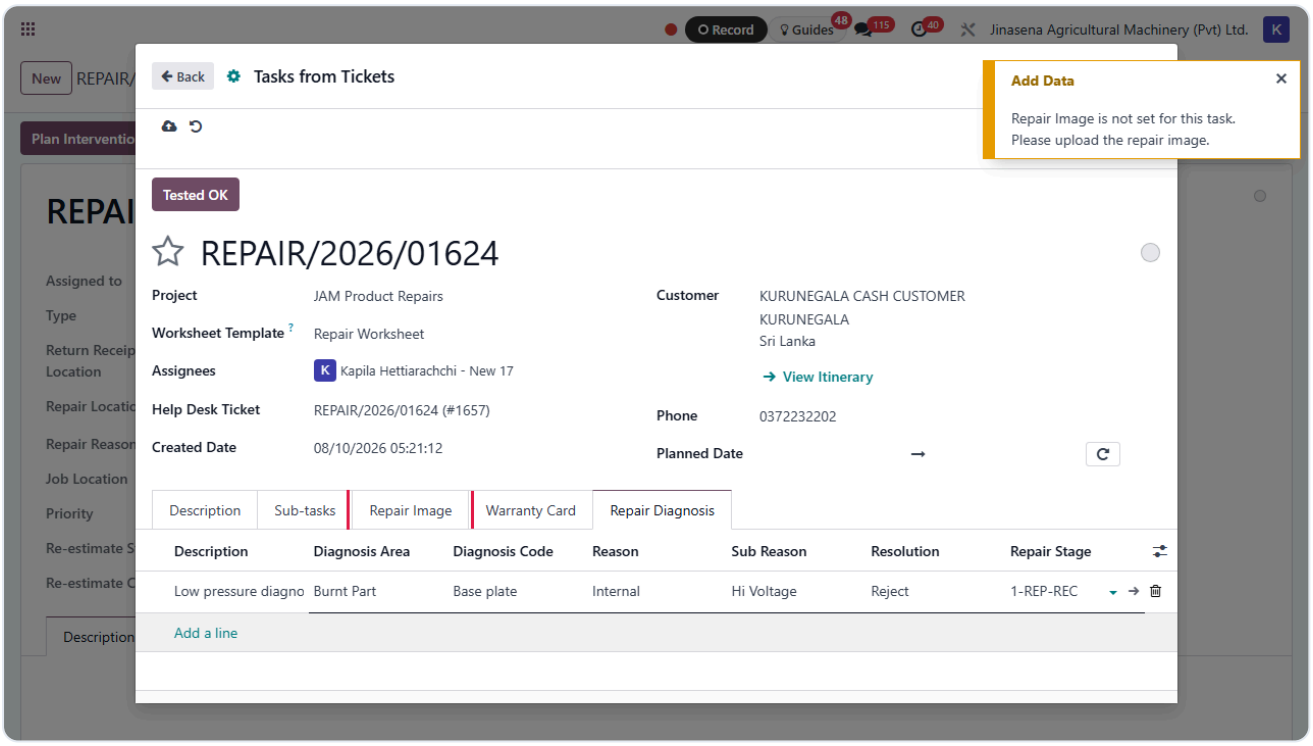

Diagnosis line — Repair Stage cell

25 Open the Repair Image tab

Navigation Task form → Repair Image tab

Action **Click the Repair Image tab.**

Description At least one photo of the item being repaired must be attached. (The Add Data notice is expected until a photo is uploaded.)

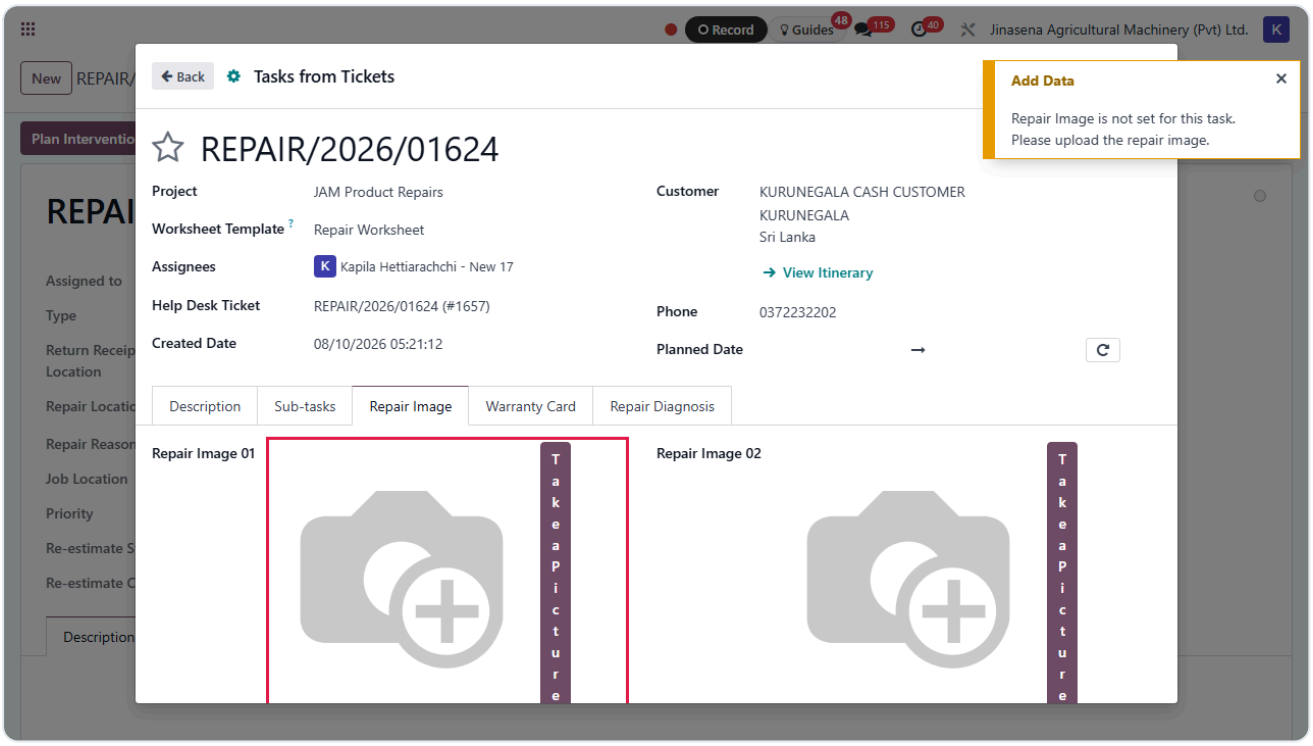

Task form — Repair Image tab

26 Take a Picture

Navigation Task form → Repair Image tab

Action **Click Take a Picture, then select the image file and click Open.**

Description Attaches the photo of the item to the task. Once Diagnosis and Image are both set, the **Products** button appears.

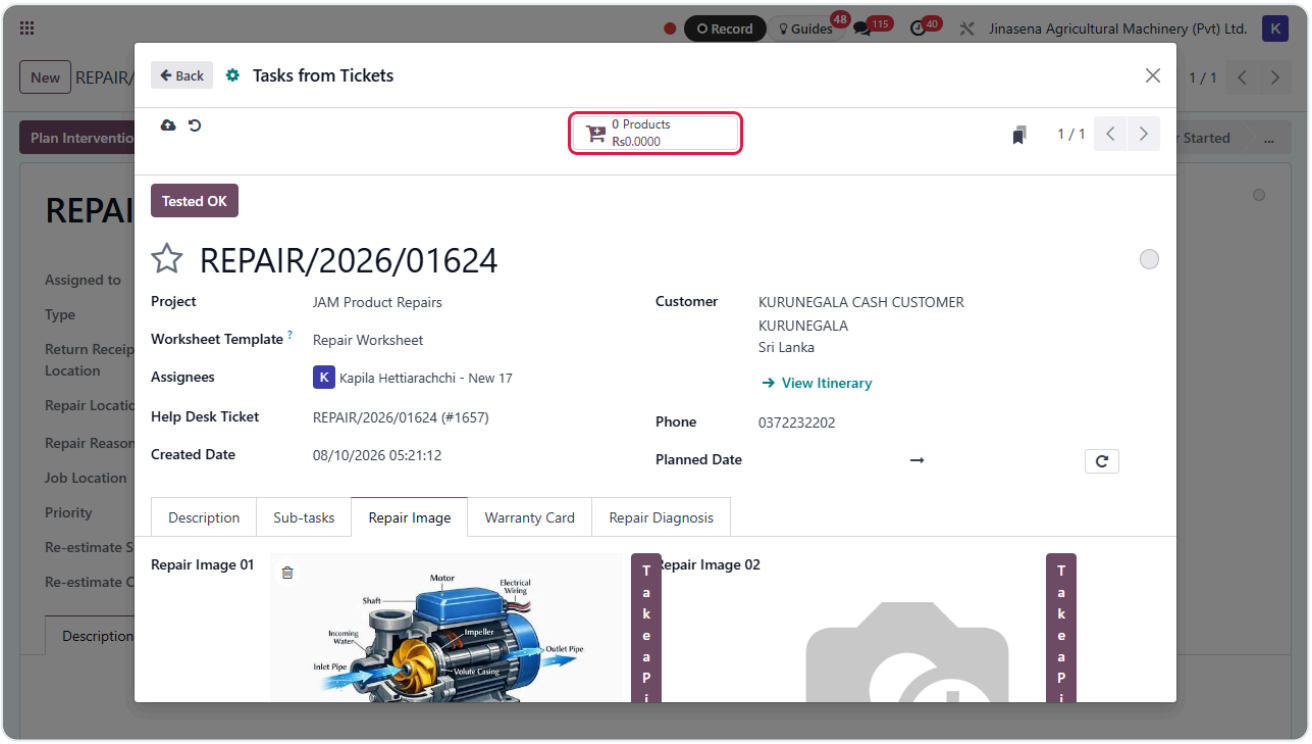

Repair Image tab — Take a Picture (Repair Image 01)

27 Products

Navigation Task form → button box

Action **Click Products.**

Description Opens the item master (product catalog) to pick the spare parts used for the repair.

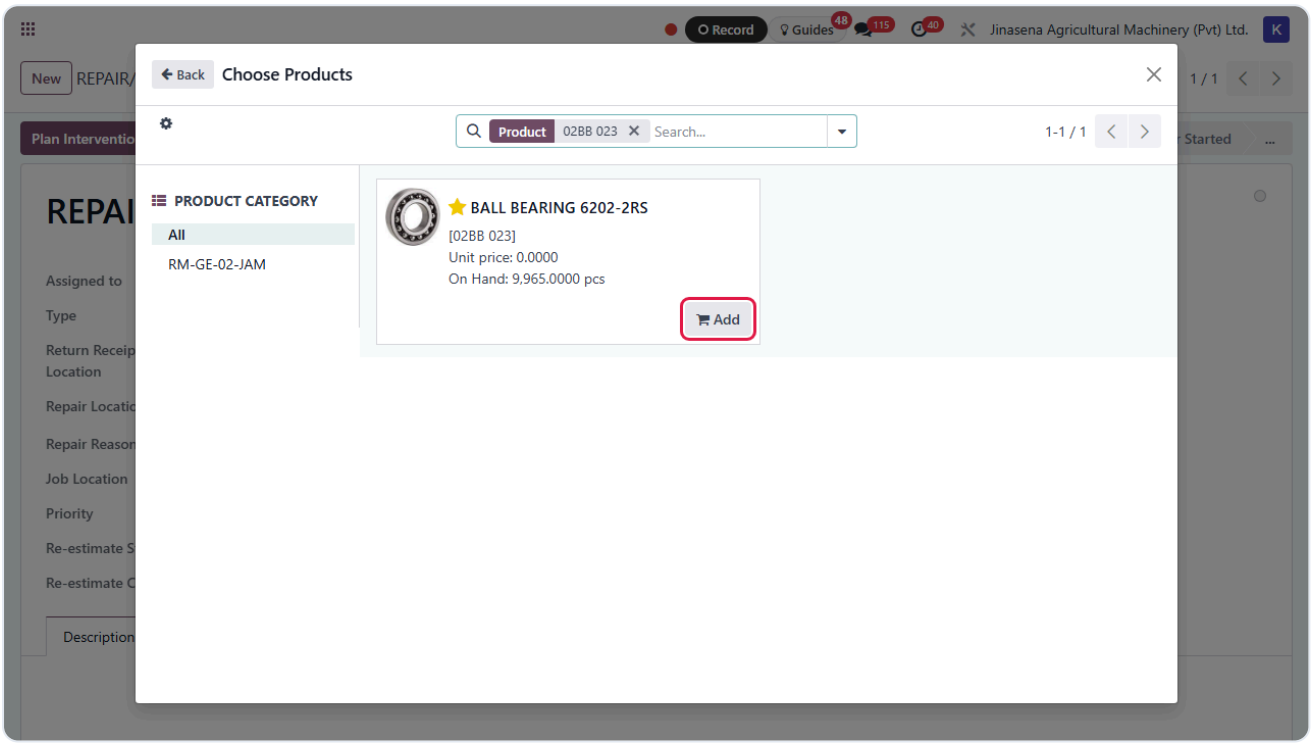

Task form — Products button

28 Add the spare part

Navigation Product catalog

Action **Find the part (e.g. `[02BB 023] BALL BEARING 6202-2RS`) and click Add.**

Description Adds the part with quantity 1 to the task; it becomes a line on the repair quotation. Repeat for every item needed.

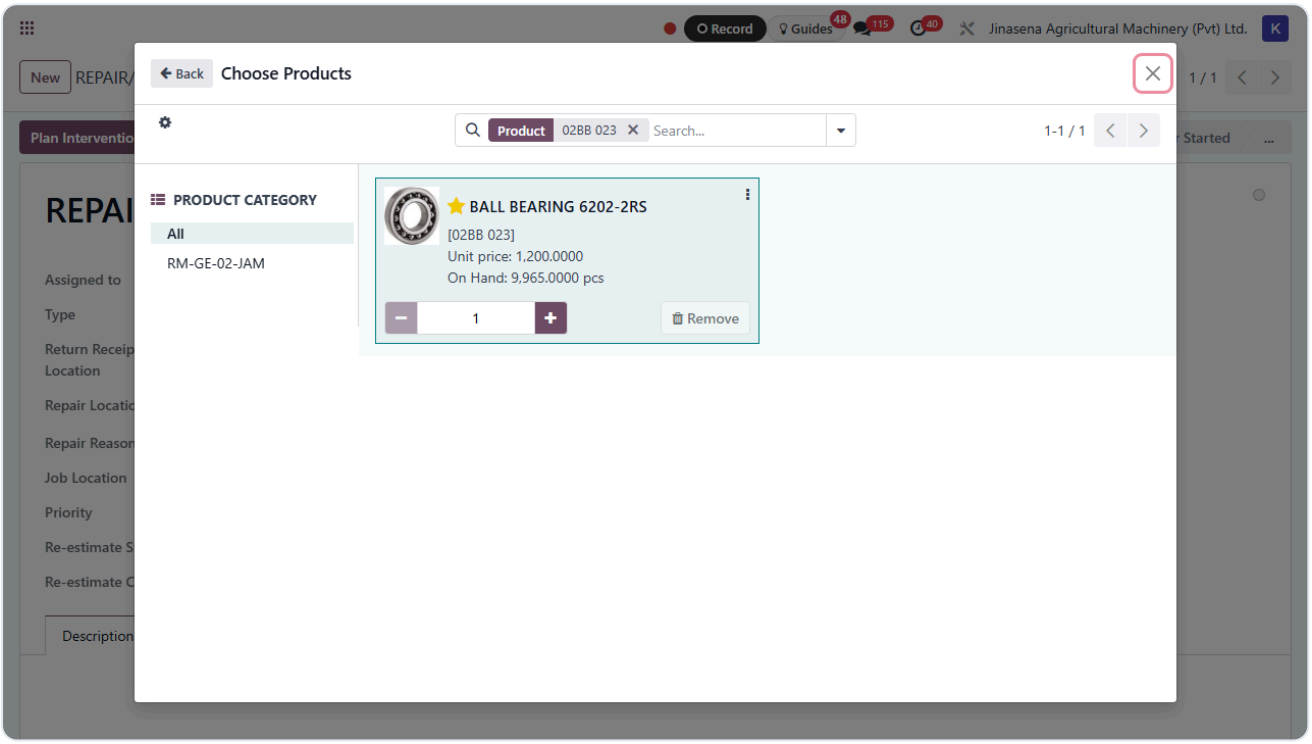

Product catalog — Add button

29 Close the catalog

Navigation Product catalog

Action **Click Close to return to the previous menu.**

Description Returns to the task/ticket. The quotation now exists.

Product catalog — Close

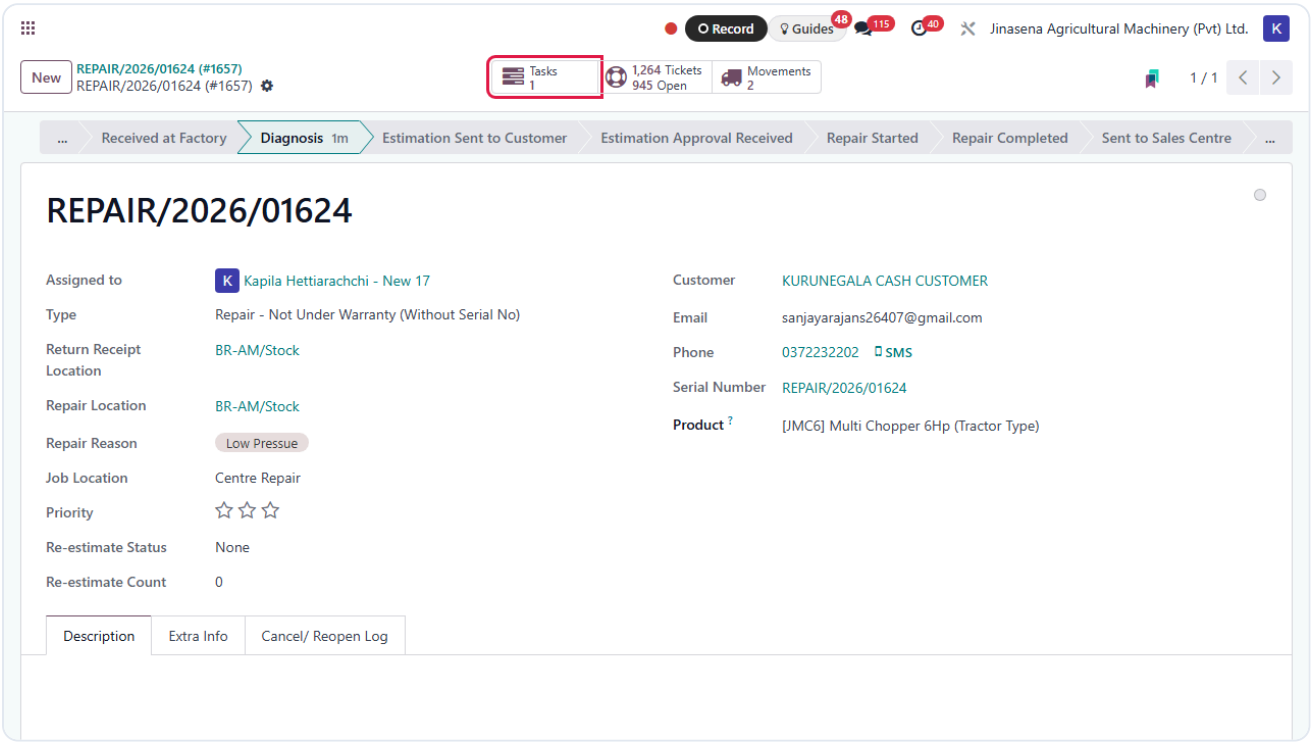

Section E — Quotation and Customer Confirmation (Steps 30–37)

30 Tasks — go to the quotation

Navigation Ticket form → button box

Action **Click the Tasks button (it shows 1).**

Description Opens the repair task, which holds the link to the created quotation.

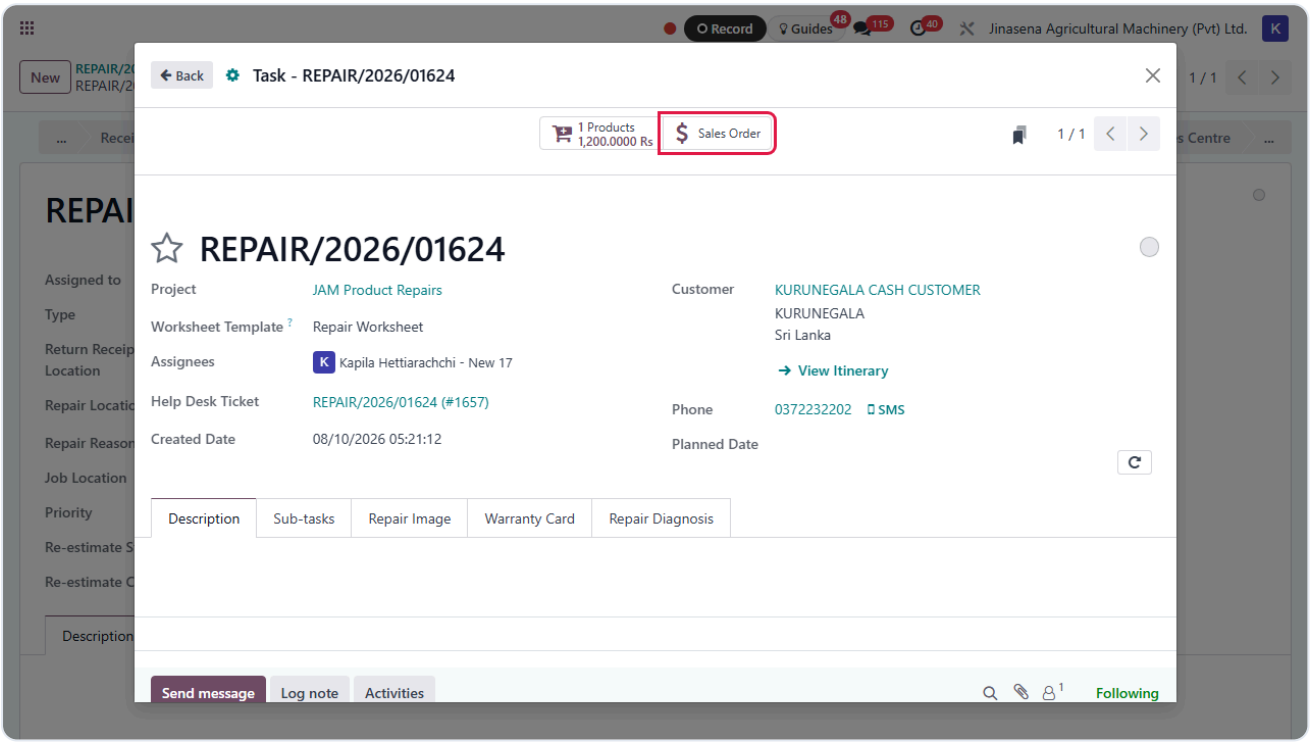

Ticket form — Tasks button

31 Sales Order

Navigation Task form → button box

Action **Click the Sales Order button.**

Description Opens the quotation created from the parts added to the task.

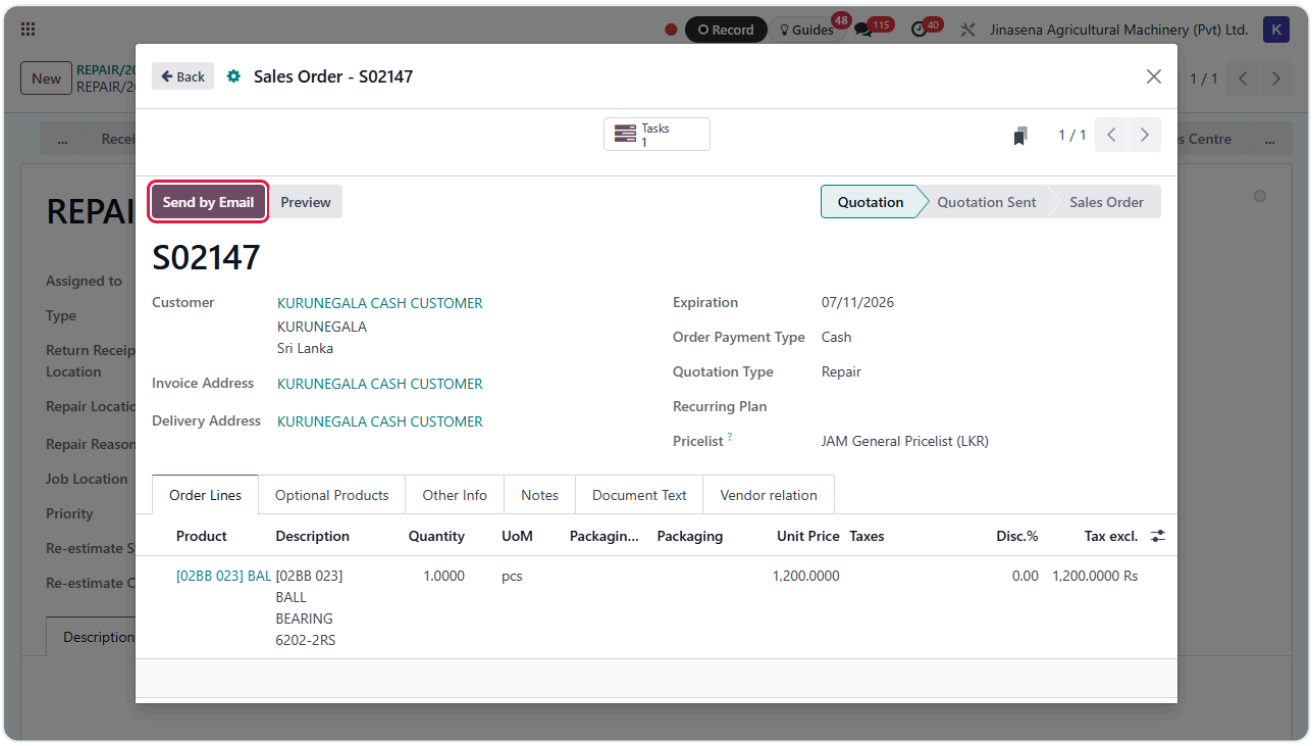

Task form — Sales Order button

32 Send by Email

Navigation Sales Order (Quotation)

Action **Click Send by Email.**

Description The quotation must be approved by the customer. This prepares the email containing the online quotation link.

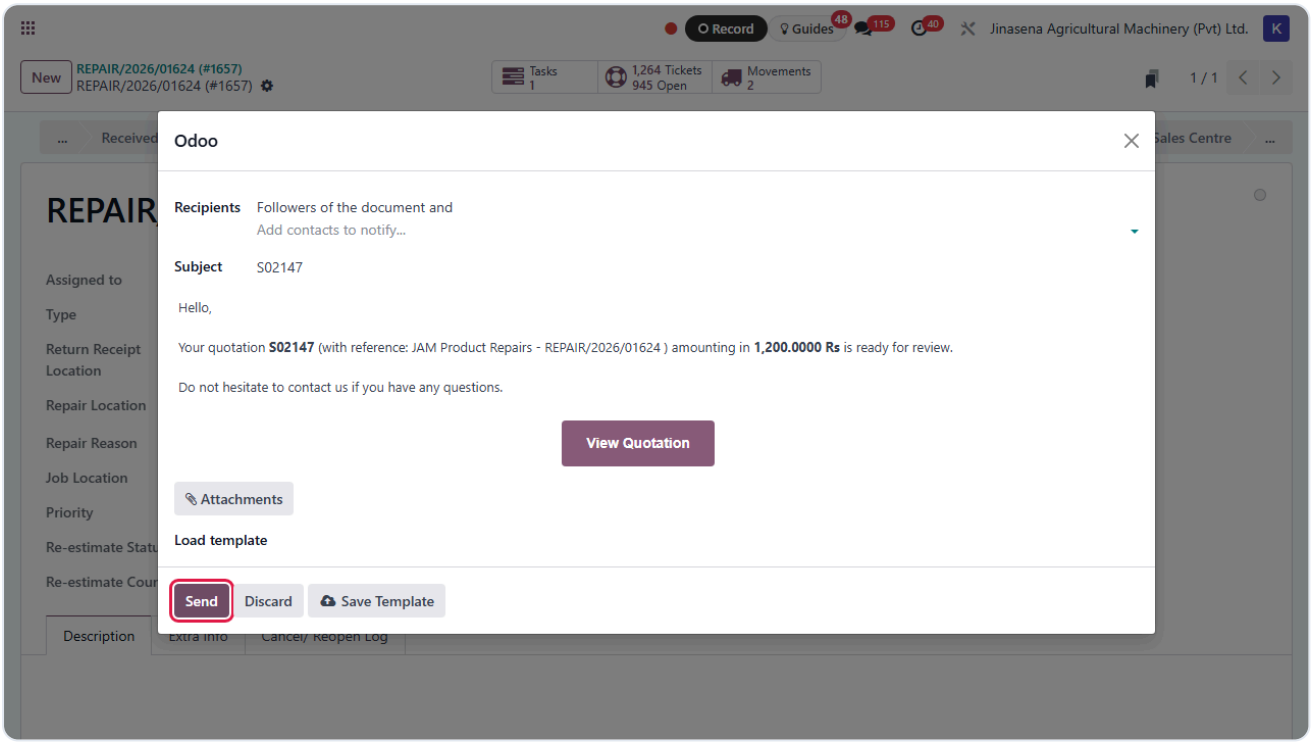

Quotation — Send by Email button

33 Send

Navigation Send email dialog

Action **Click Send.**

Description Sends the email and moves the quotation to *Quotation Sent*.

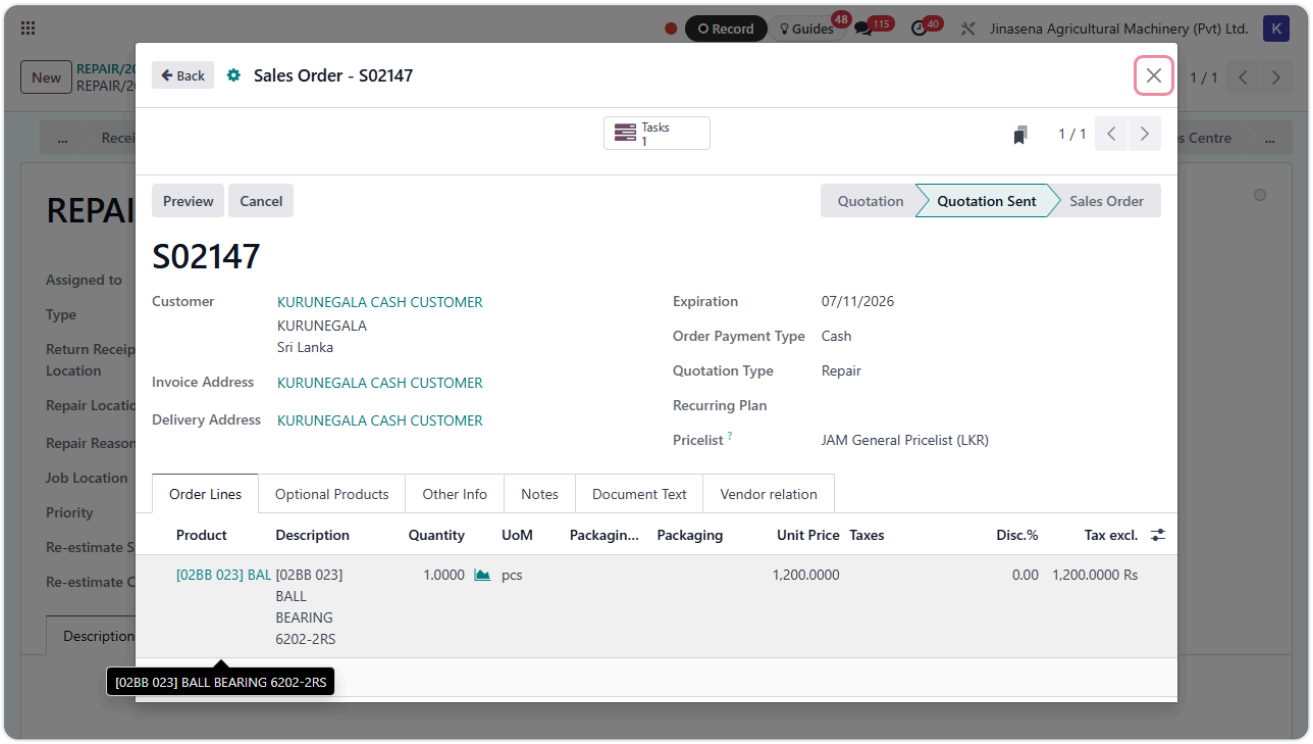

Send email dialog — Send button

34 Close

Navigation Sales Order (Quotation Sent)

Action **Click Close.**

Description Returns to the previous screen while waiting for the customer.

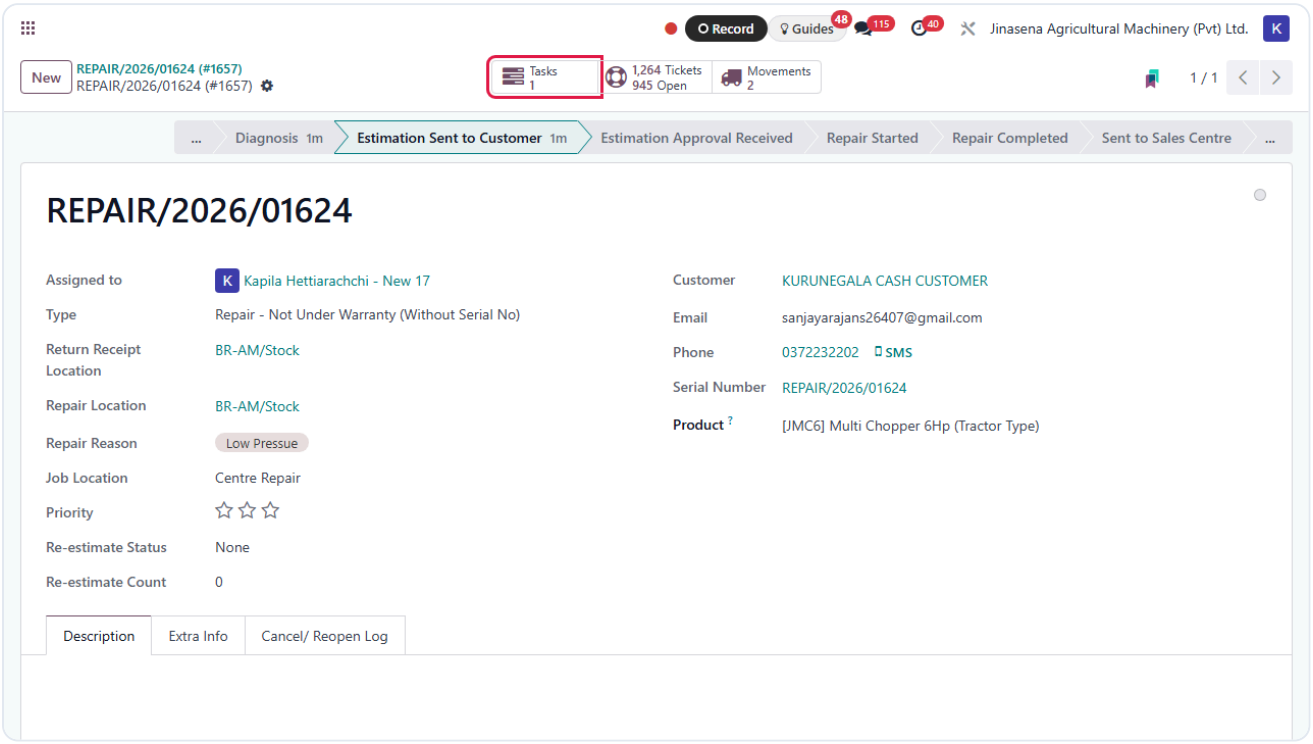

Quotation (Quotation Sent) — Close

35 Tasks — check the confirmation

Navigation Ticket form → button box

Action **Click the Tasks button.**

Description Go back to the task to see whether the customer has approved the quotation.

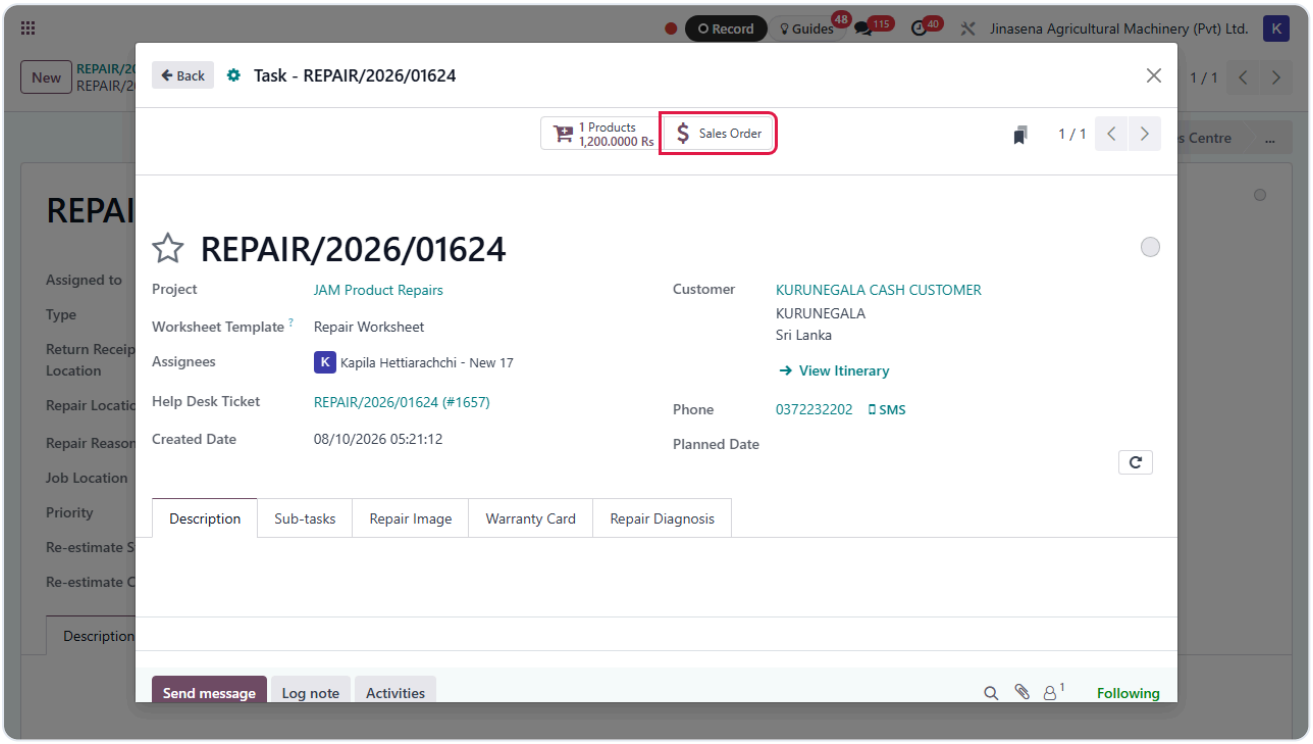

Ticket form — Tasks button

36 Sales Order

Navigation Task form → button box

Action **Click the Sales Order button.**

Description Opens the quotation to confirm it.

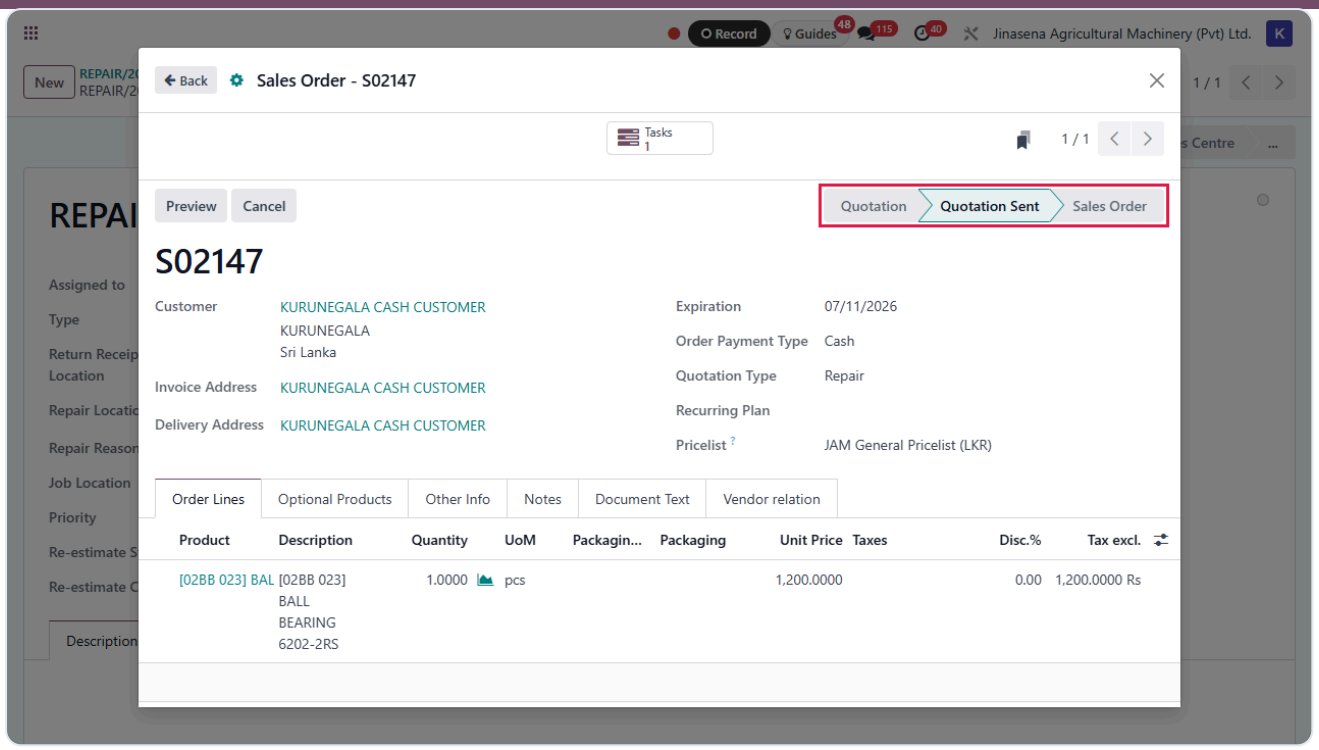

Task form — Sales Order button

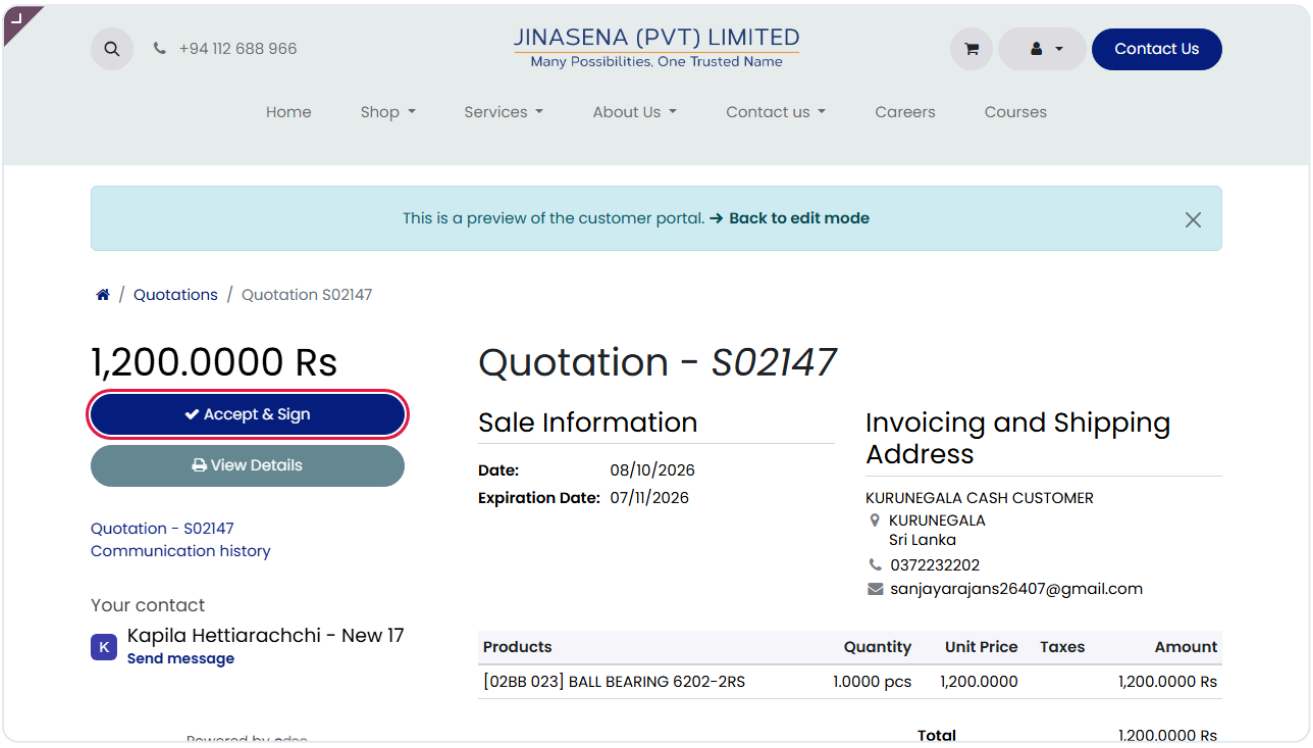

37 Confirm the order

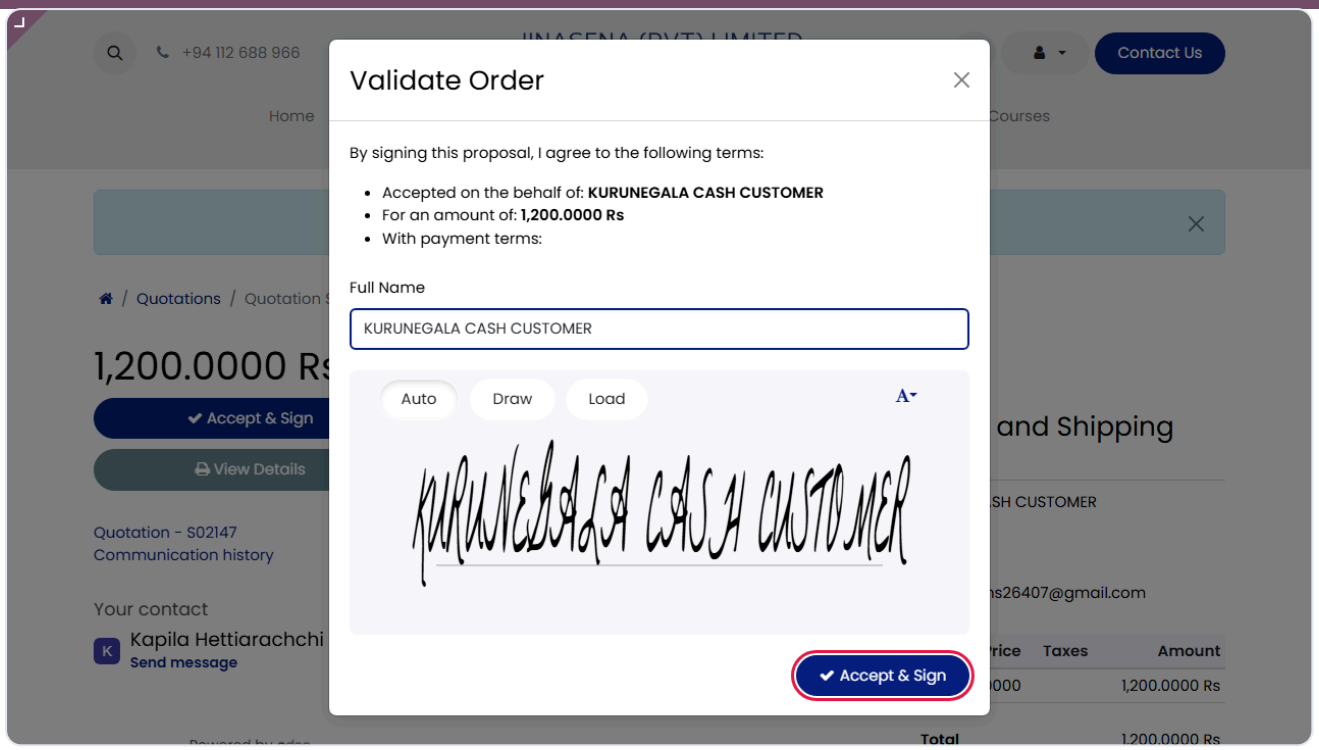

Navigation Sales Order (Quotation Sent) / customer portal

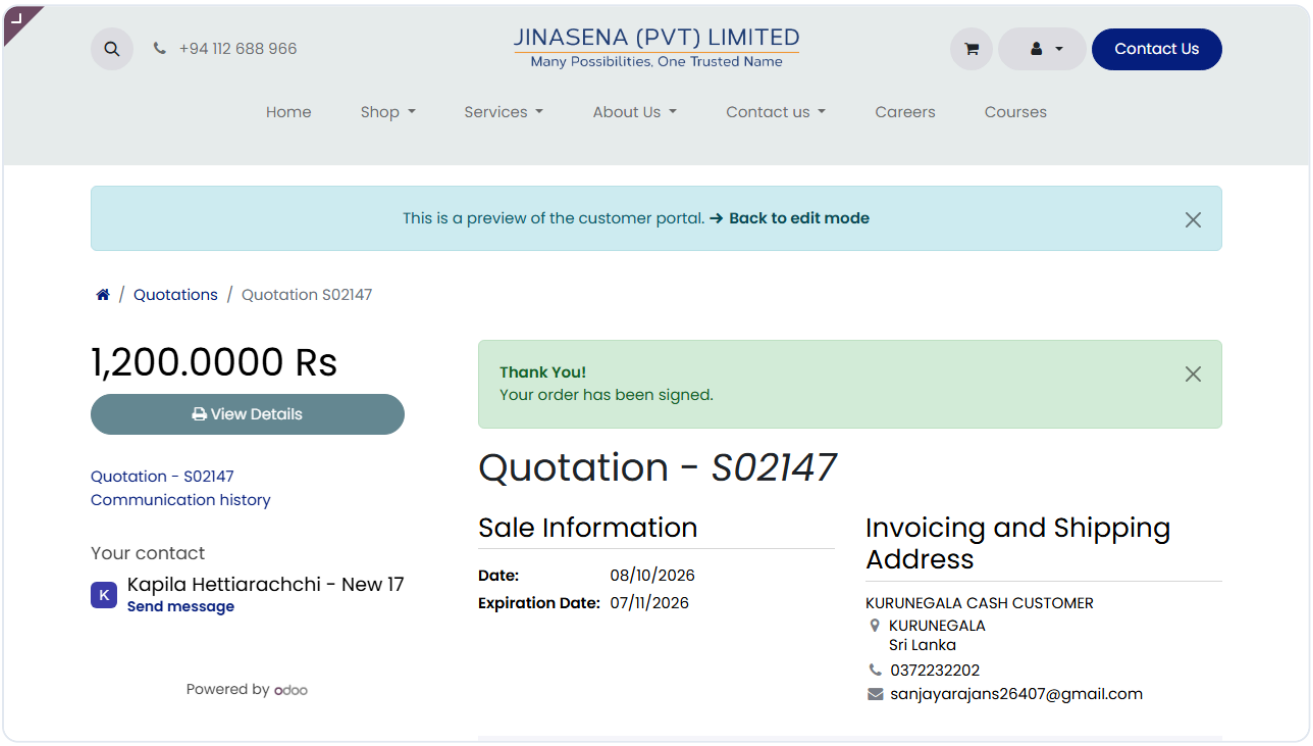

Action **The customer opens View Quotation from the email and clicks Accept & Sign, then Accept & Sign again in the signature pop-up.**

Description The order moves to *Sales Order* once the customer accepts. On this instance the Confirm button itself is hidden in the back-office view, so the customer's online acceptance (the real-world path) confirms the order.

Quotation Sent — state before the customer accepts (the next three images show the customer's online portal: quotation, signature pop-up, and order confirmed)

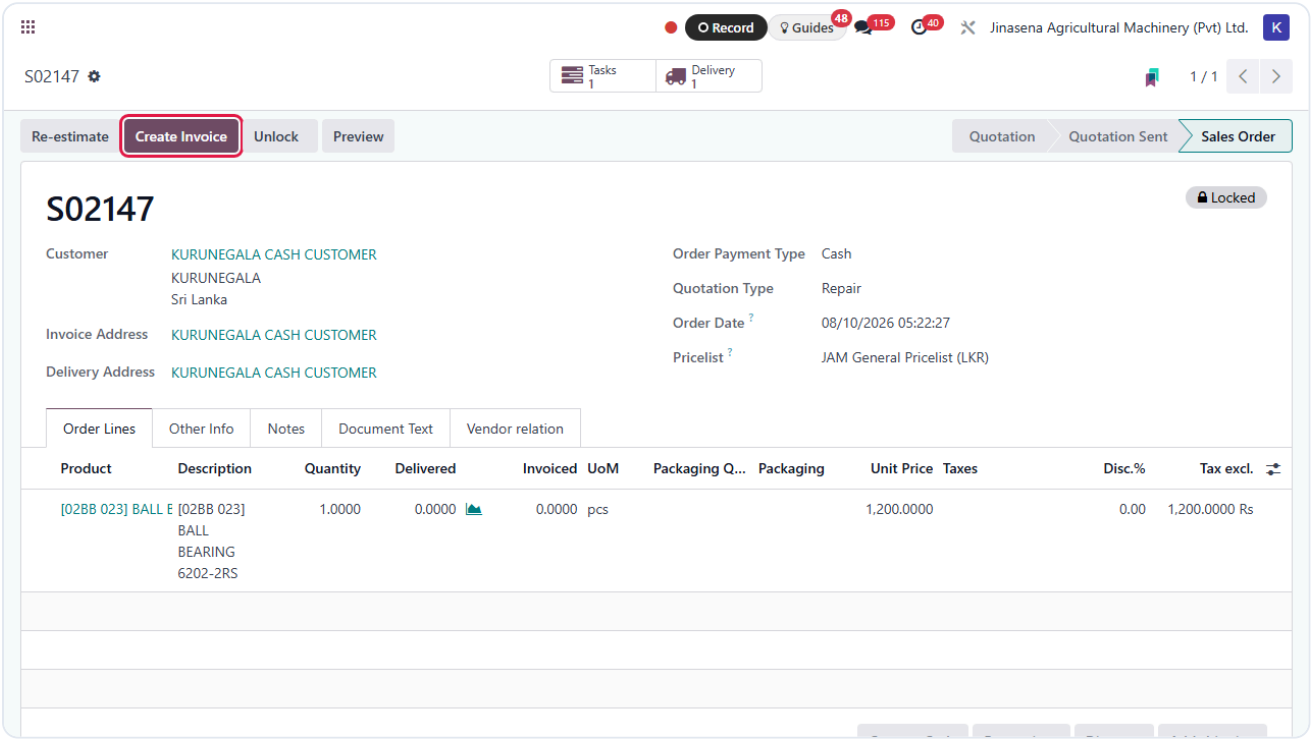

Section F — Full Payment (Steps 38–44)

38 Create Invoice

Navigation Sales Order (confirmed)

Action **Click Create Invoice.**

Description Company policy asks for an advance payment; for a Quick Repair (done in one day) the customer pays the full amount at once. This creates the invoice for the order.

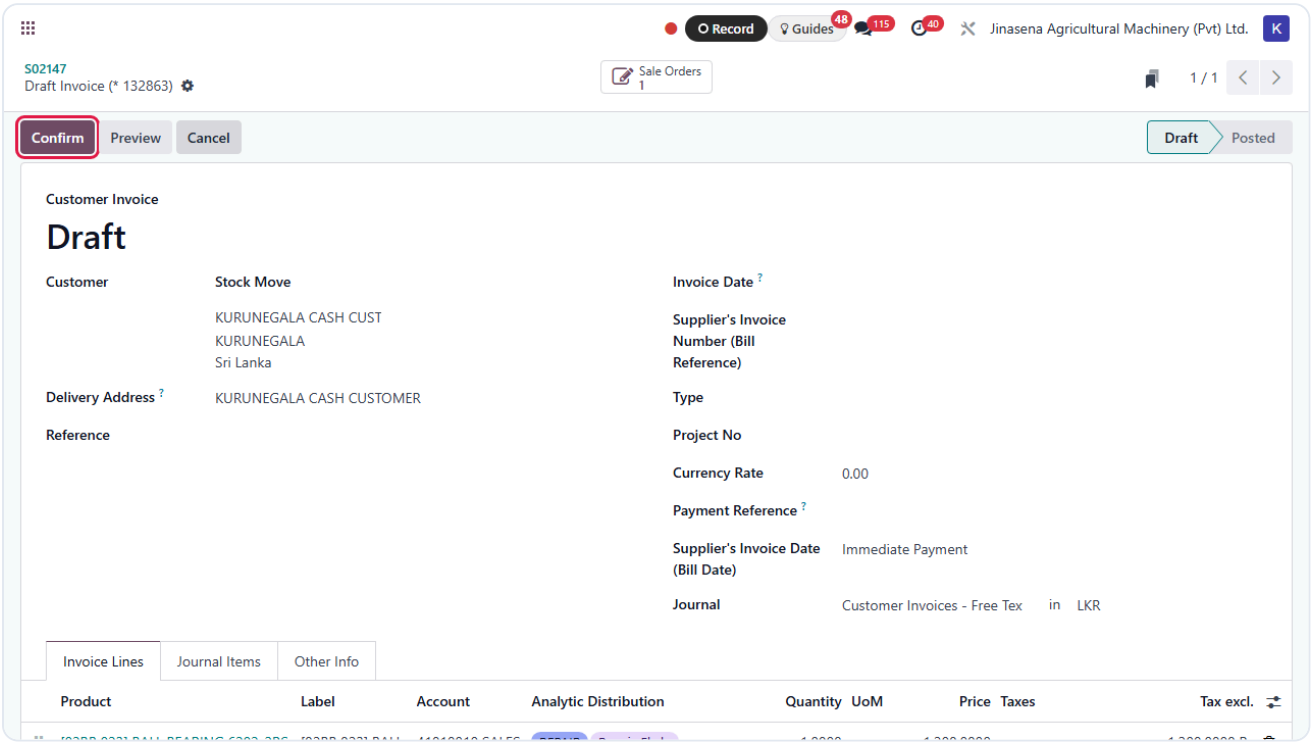

Sales Order — Create Invoice button

39 Confirm the invoice

Navigation Customer Invoice (Draft)

Action **Click Confirm.**

Description Posts the invoice so a payment can be registered against it.

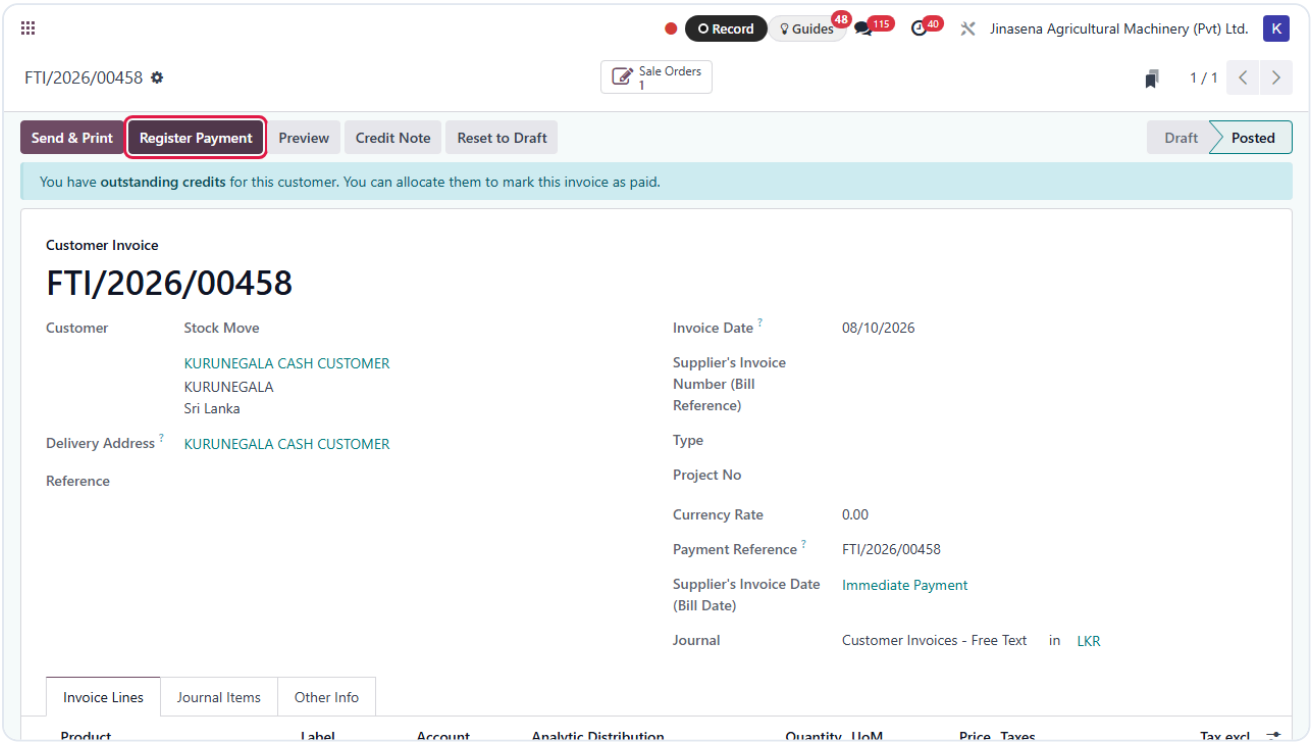

Draft invoice — Confirm button

40 Register Payment

Navigation Customer Invoice (Posted)

Action **Click Register Payment.**

Description Opens the payment wizard for the invoice.

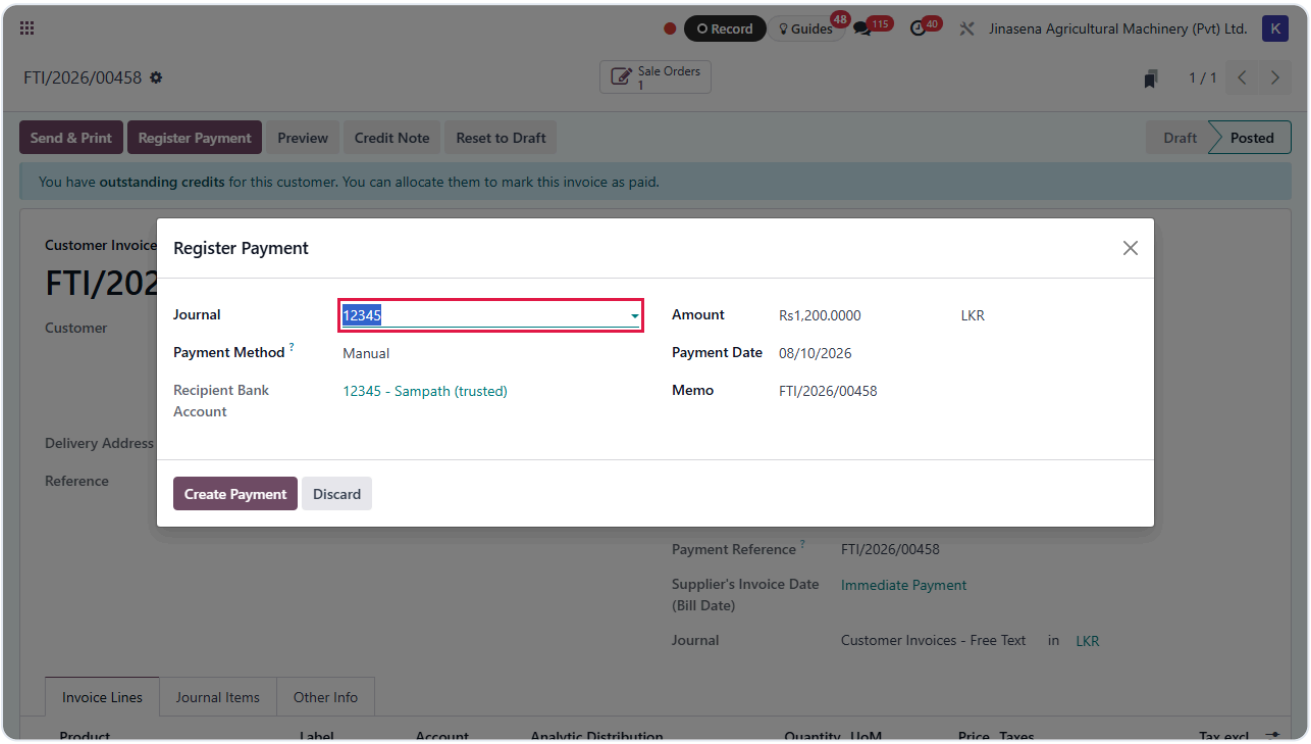

Posted invoice — Register Payment button

41 Select the Journal

Navigation Register Payment dialog

Action **Click the Journal field.**

Description Choose how the money was received.

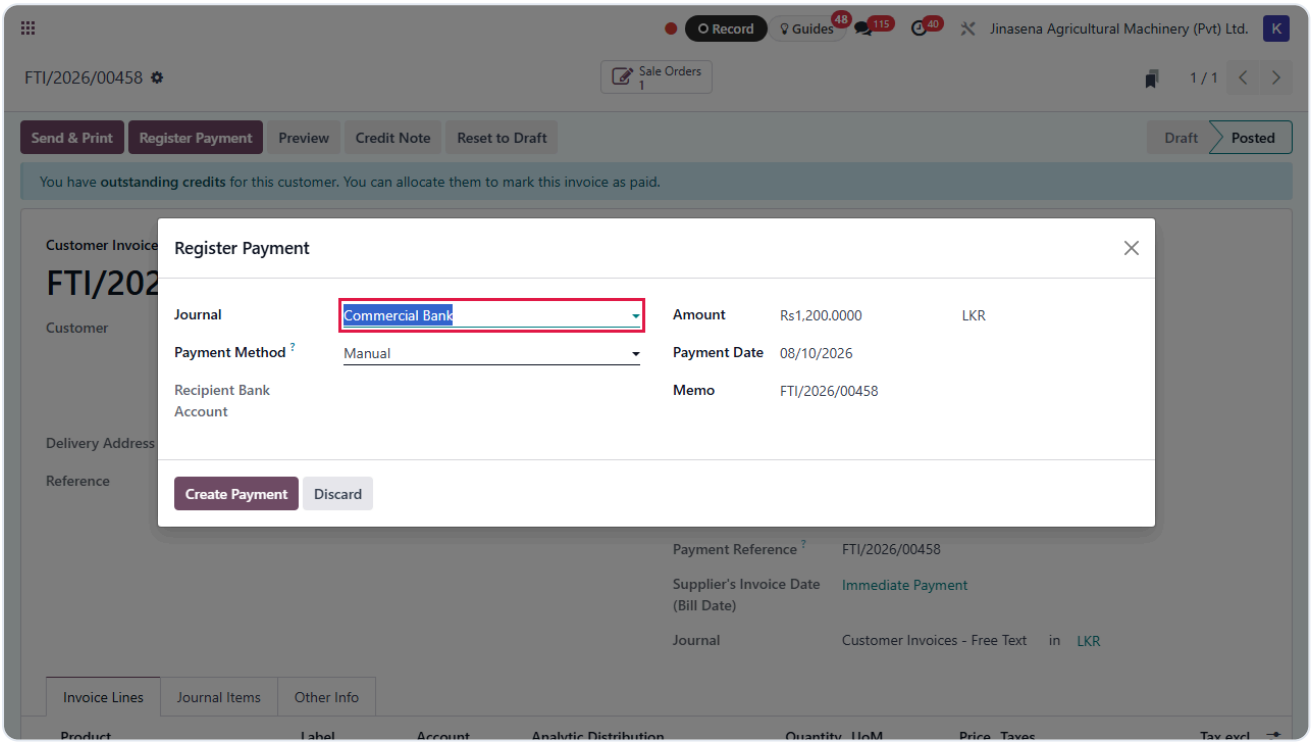

Register Payment dialog — Journal field

42 Journal and Amount

Navigation Register Payment dialog

Action **Select Commercial Bank. Leave the Amount as pre-filled — the full invoice total (e.g. `1,200.00`).**

Description Because the whole amount is paid, no Payment Difference remains and no balance has to be collected later.

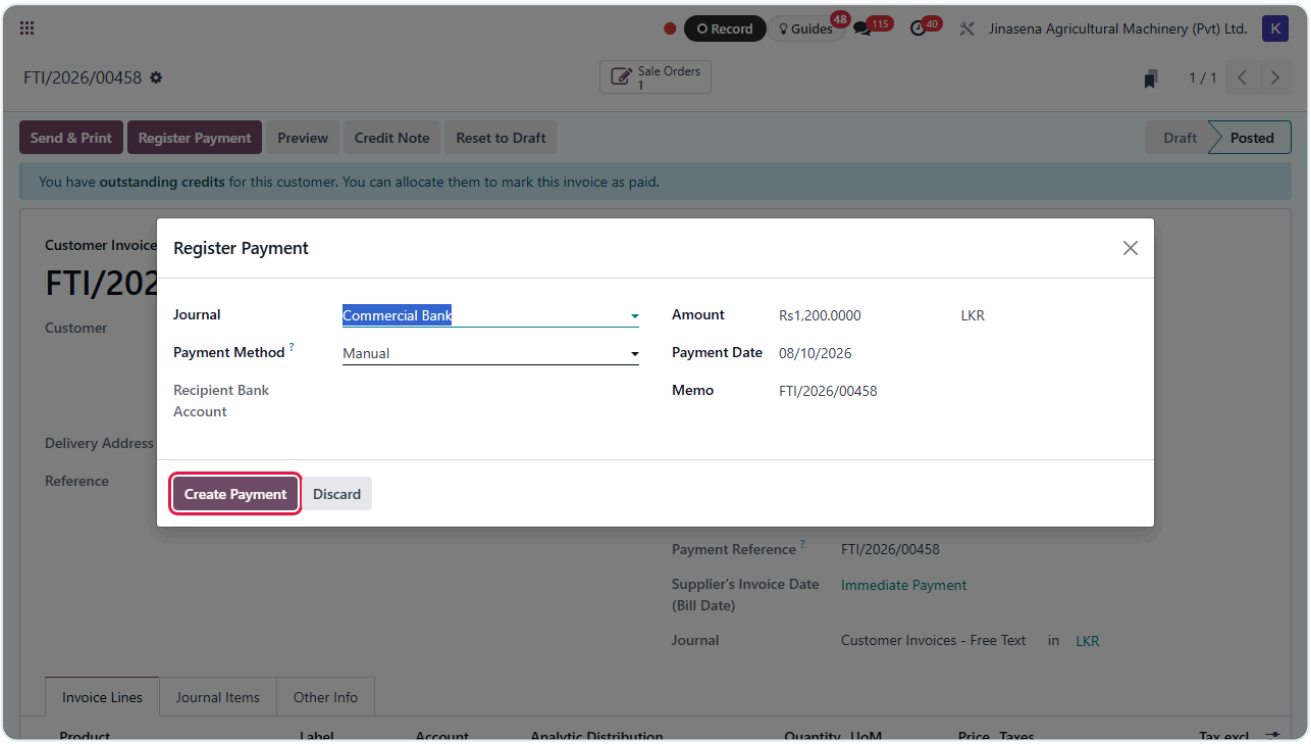

Register Payment dialog — Journal set to Commercial Bank, Amount = full invoice total

43 Create Payment

Navigation Register Payment dialog

Action **Click Create Payment.**

Description Creates the payment. The invoice becomes *Paid*.

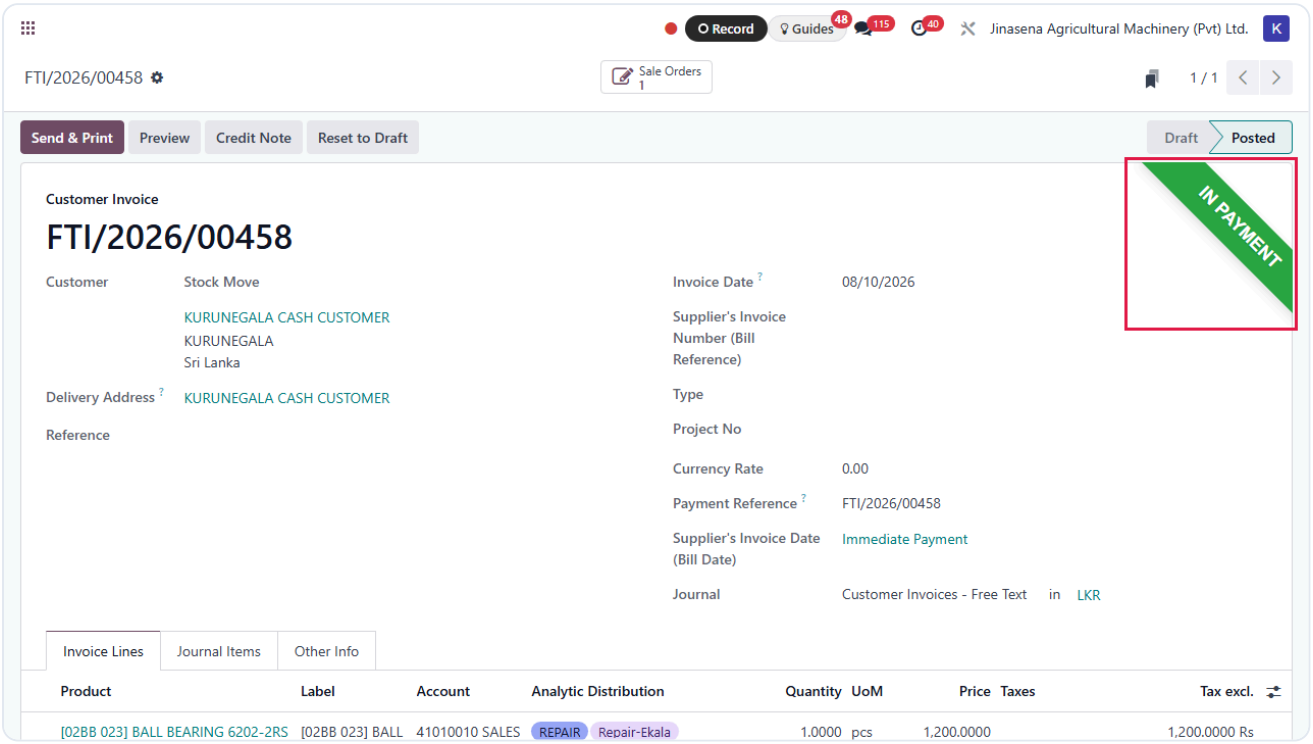

Register Payment dialog — Create Payment button

44 Close

Navigation Customer Invoice (Paid)

Action **Click Close.**

Description Returns to the previous menu. The invoice shows the **Paid** ribbon.

Invoice after the full payment — Paid ribbon

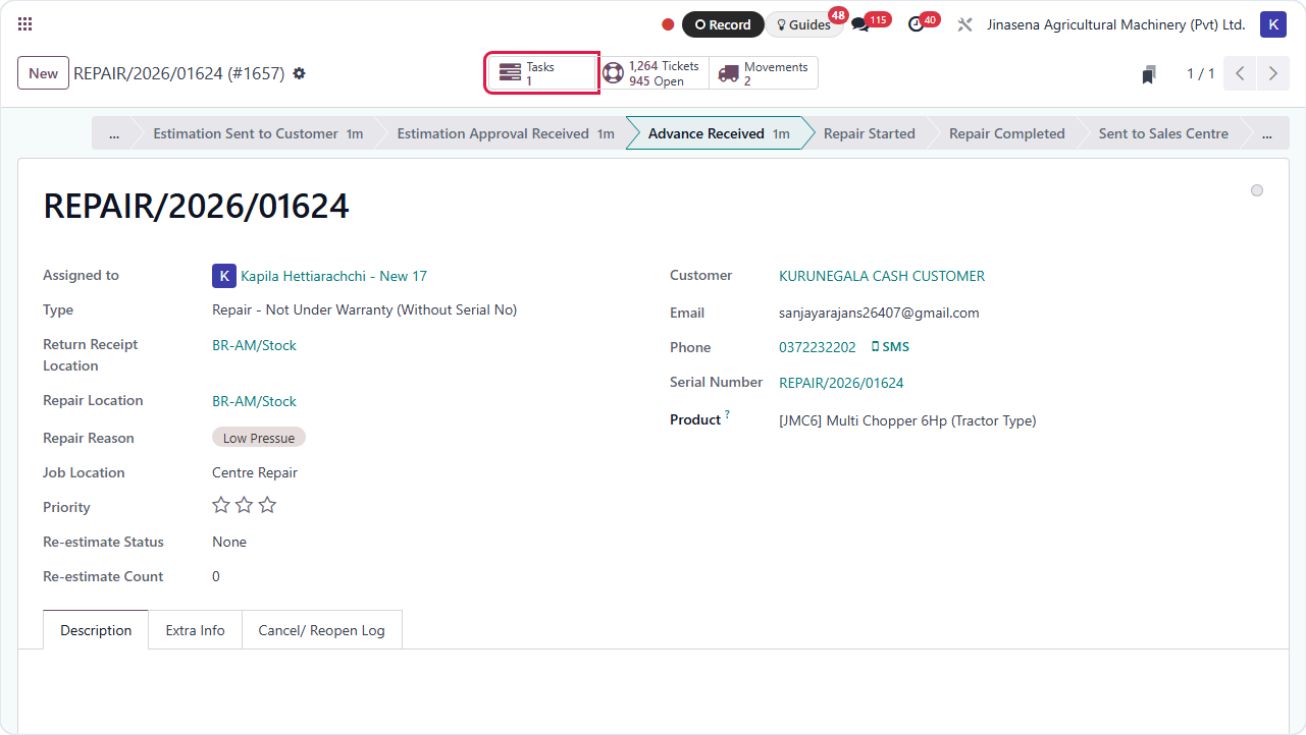

Section G — Delivery and Task Completion (Steps 45–52)

45 Tasks — back to the order

Navigation Ticket form → button box

Action **Click Tasks.**

Description Since the full payment has been received, return to the sales order to complete the repair process.

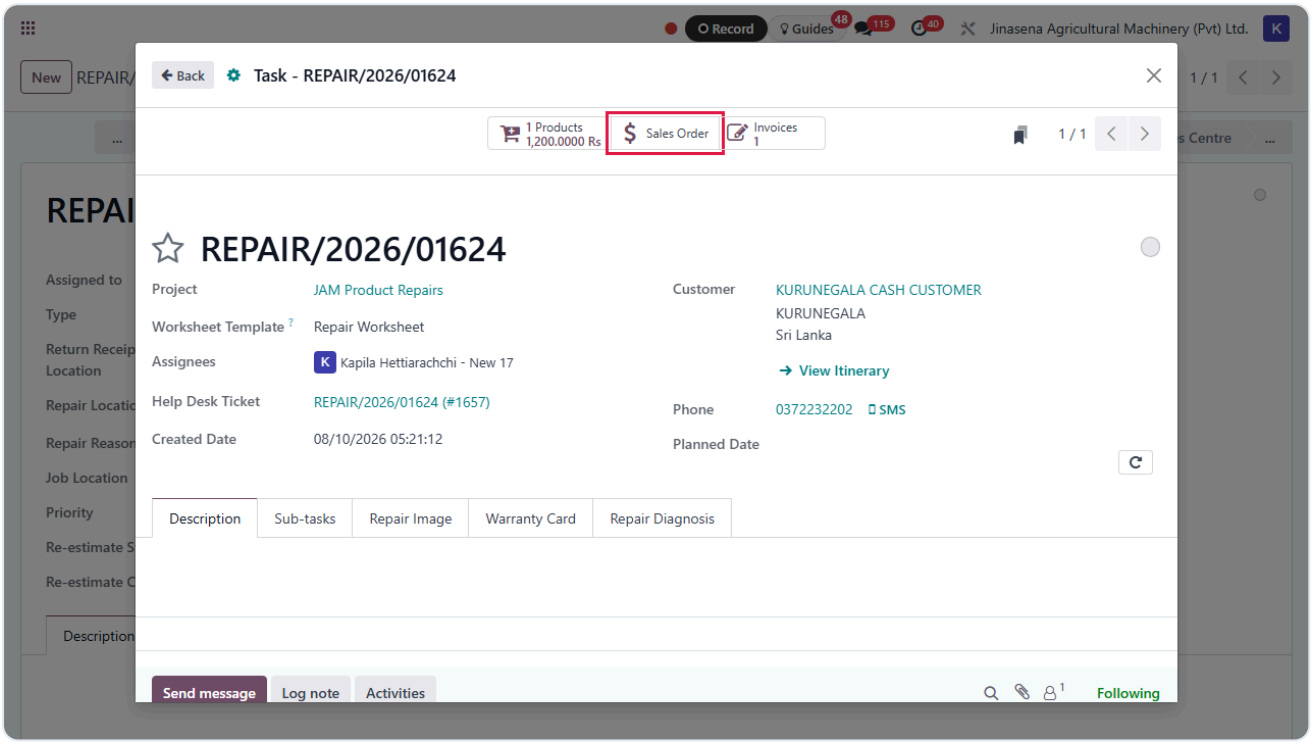

Ticket form — Tasks button

46 Sales Order

Navigation Task form → button box

Action **Click Sales Order.**

Description Opens the confirmed order.

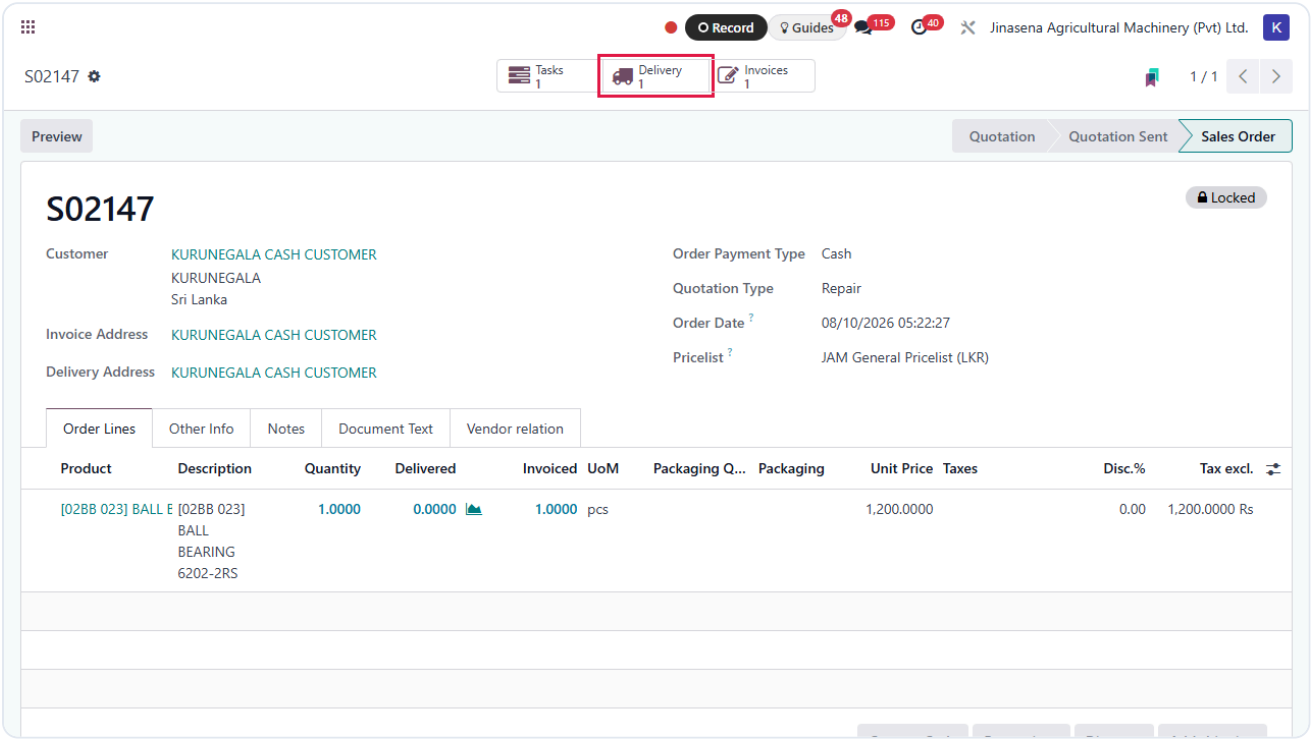

Task form — Sales Order button

47 Delivery

Navigation Sales Order → button box

Action **Click the Delivery button.**

Description Opens the transfers generated by the order. The item used for the repair is consumed by the customer. On this route the order generates a chain of three transfers (e.g. `JM-EK/OUT`, `RP-JM/IN`, `RP-JM/OUT`), each ready only after the one before it.

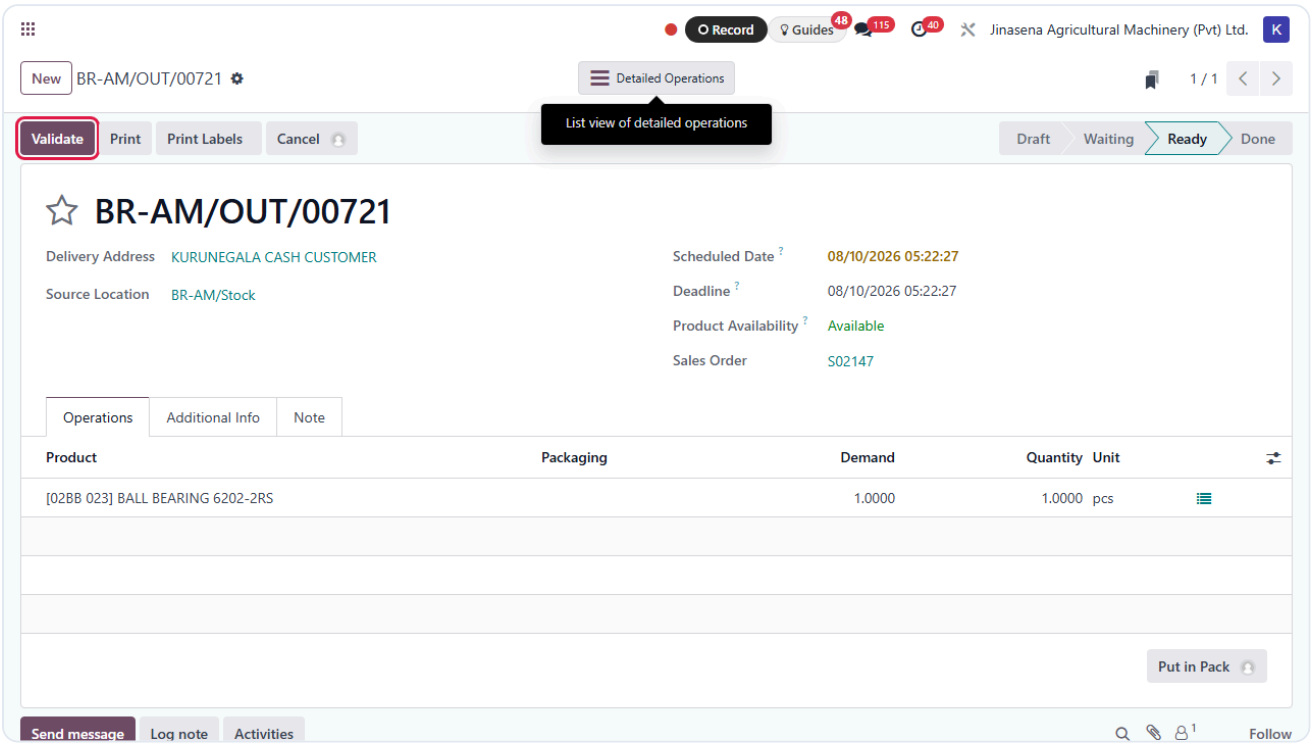

Sales Order — Delivery button

48 Validate

Navigation Delivery transfer (Ready)

Action **Click Validate on each transfer in order.**

Description Completes the stock movement of the repair parts. Repeat for each transfer in the chain.

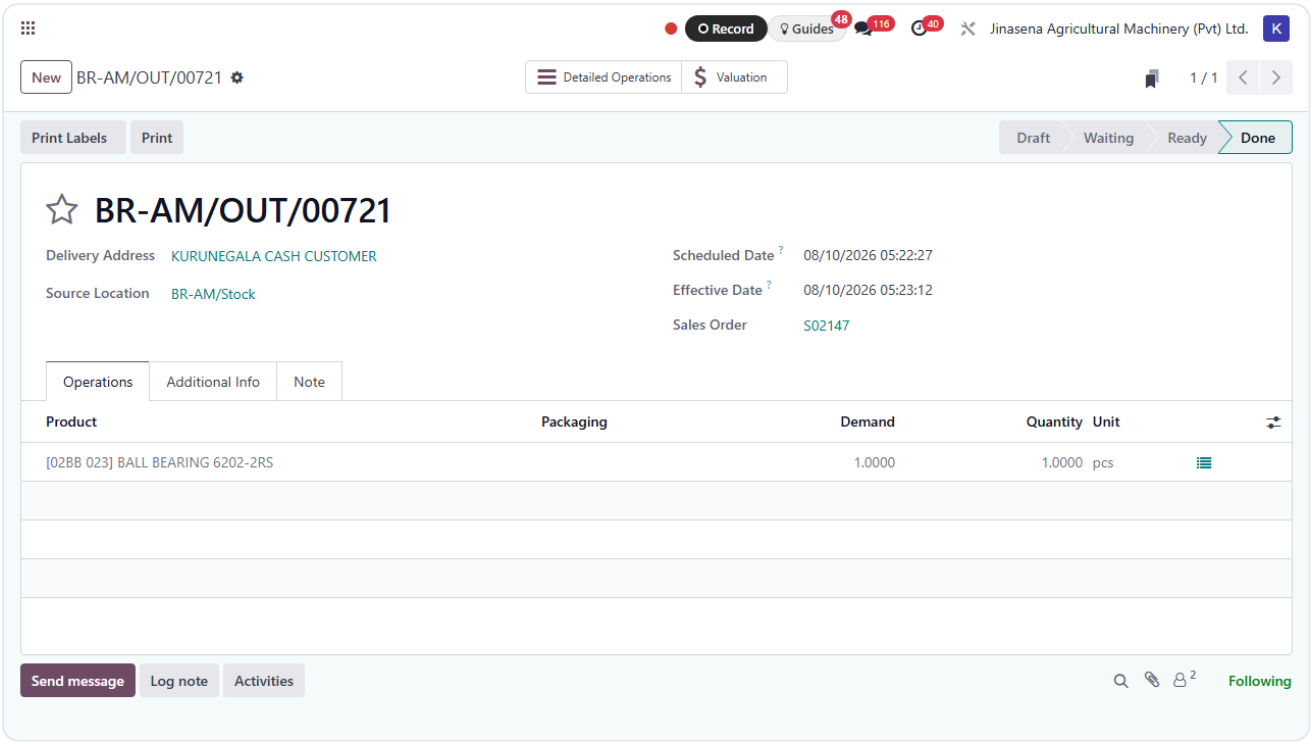

Delivery transfer (Ready) — Validate button

49 Close

Navigation Delivery transfer (Done)

Action **Click Close.**

Description Returns to the previous menu once the transfers are Done.

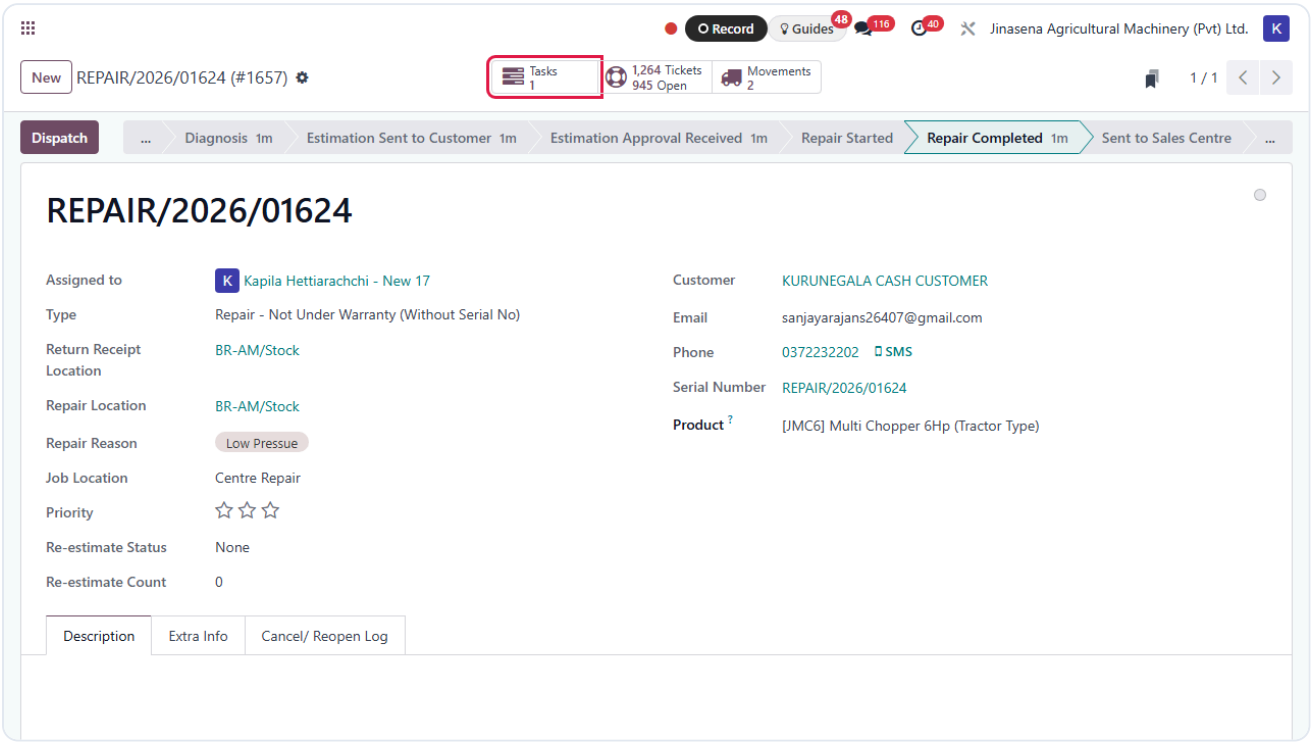

Delivery transfer (Done)

50 Open the repair task

Navigation Ticket form → button box

Action **Click Tasks to open the task created for the repair.**

Description Go to the task to complete it.

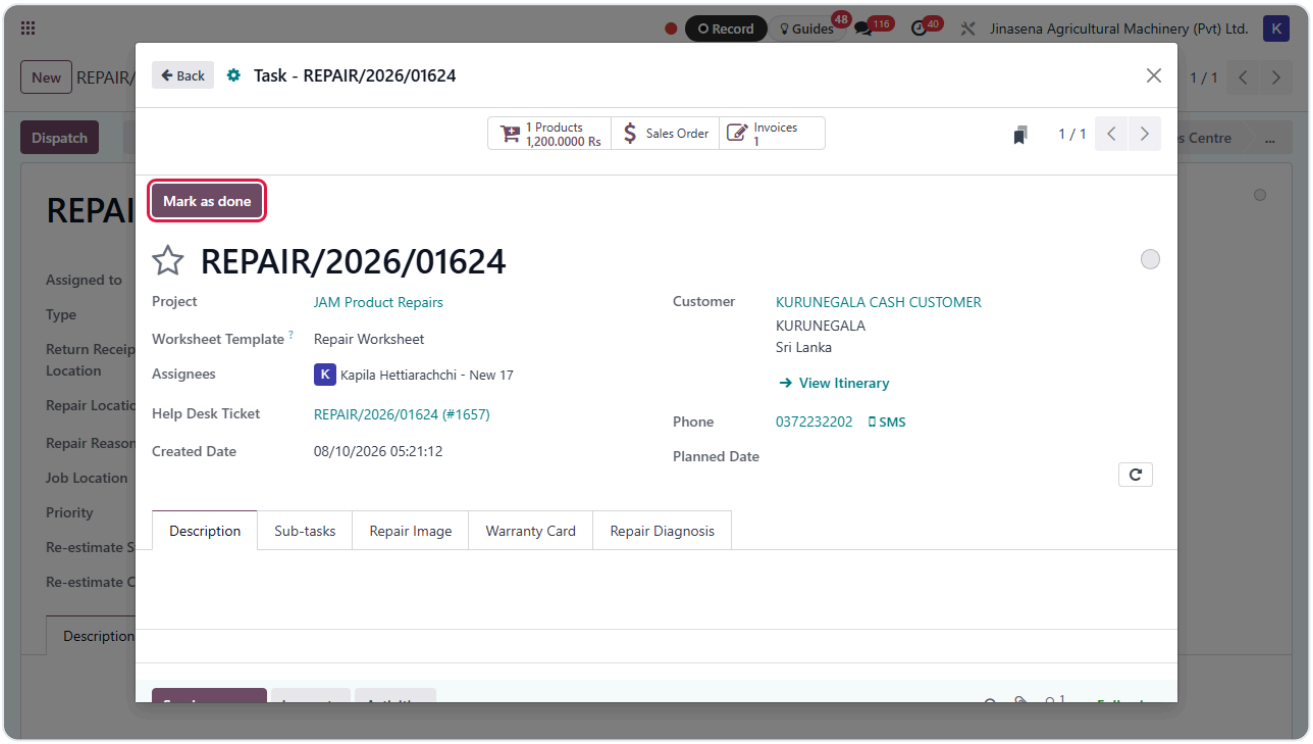

Ticket form — Tasks button

51 Mark as done

Navigation Task form → status bar

Action **Click Mark as done.**

Description Ends the repair task.

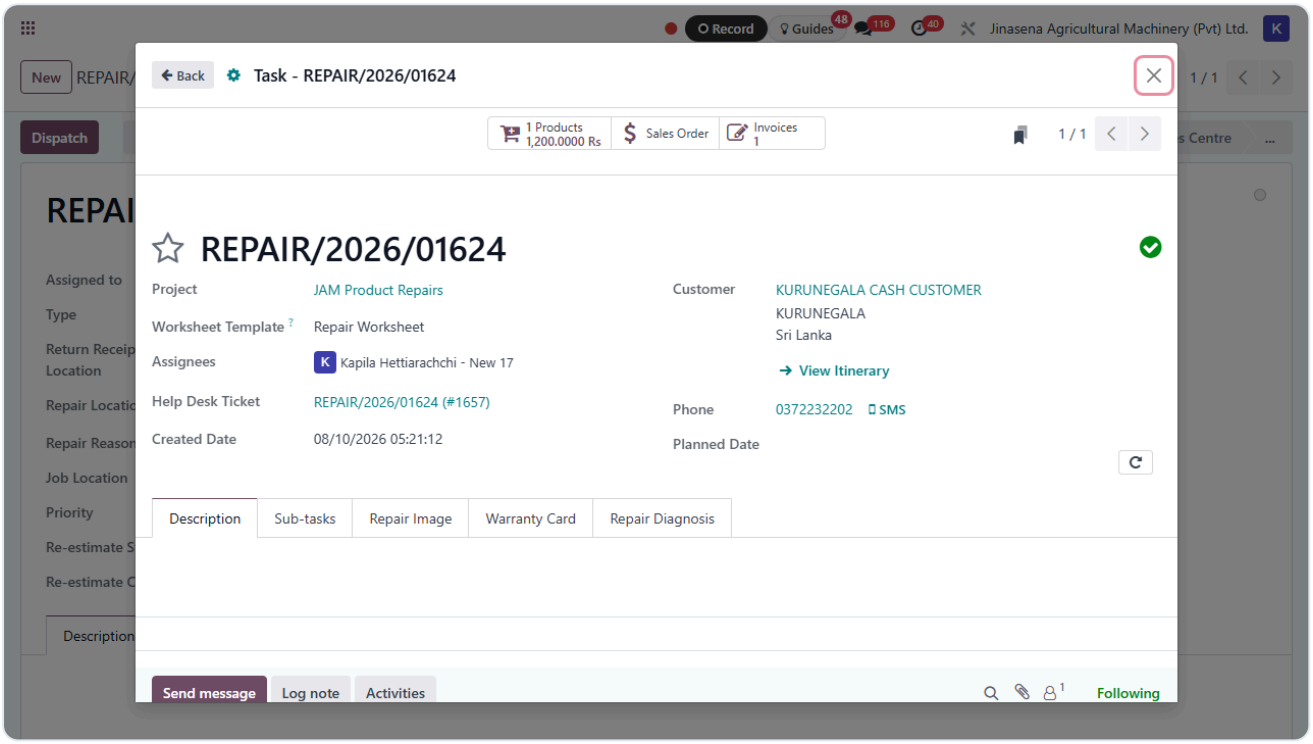

Task form — Mark as done button

52 Close

Navigation Task form (Done)

Action **Click Close.**

Description Returns to the main menu (the ticket).

Task (Done) — Close

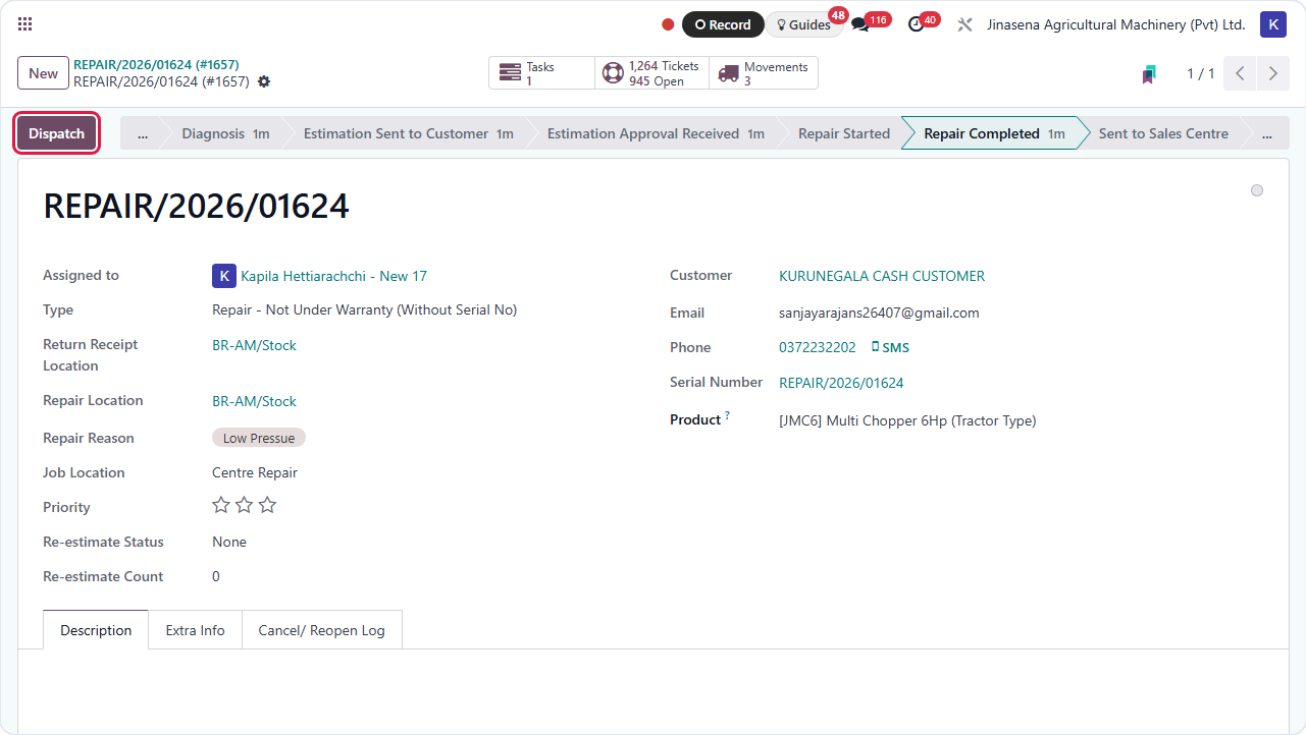

Section H — Dispatch (Steps 53–55)

53 Dispatch

Navigation Ticket form → status bar

Action **Click Dispatch.**

Description Processes the completed repair item back to the customer. The button appears once the task is done and the invoice is paid (you may need to refresh the page).

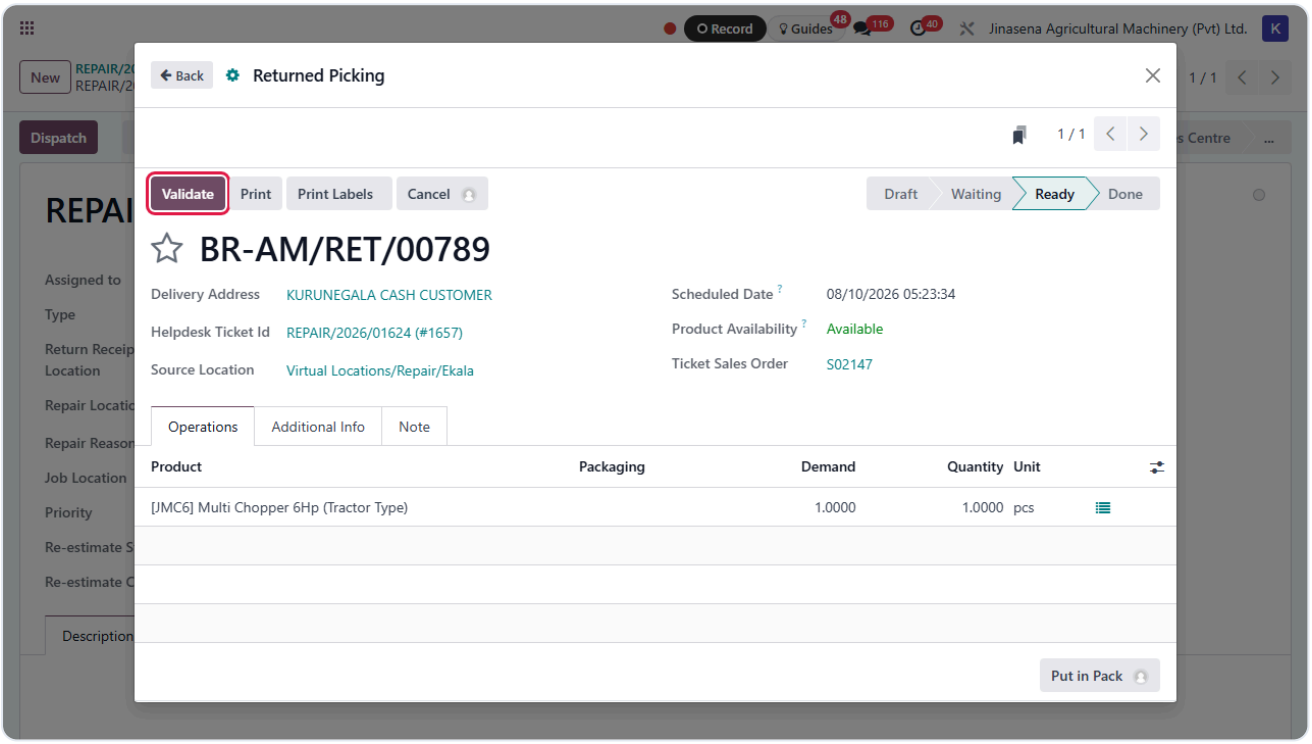

Ticket form — Dispatch button

54 Validate the dispatch

Navigation Returned Picking dialog → header

Action **Click Validate.**

Description Completes the outgoing transfer of the repaired item to the customer.

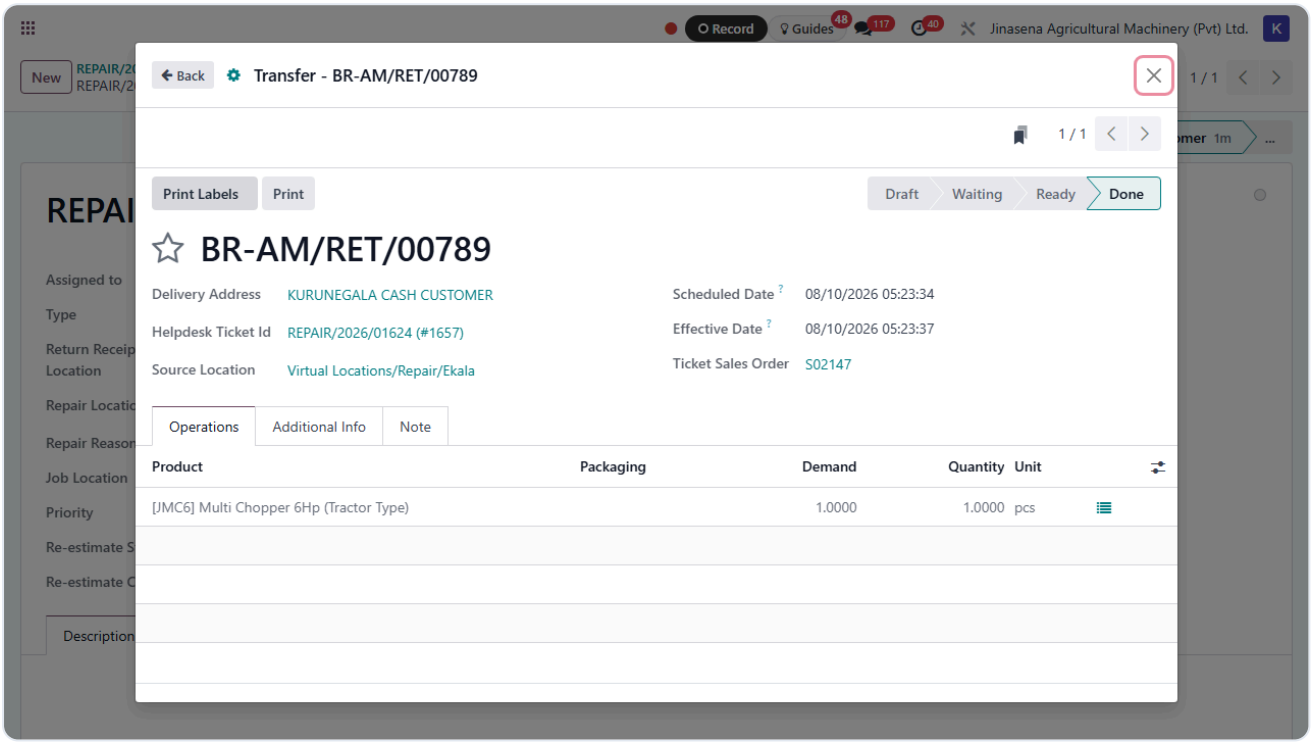

Returned Picking dialog (Ready) — Validate button

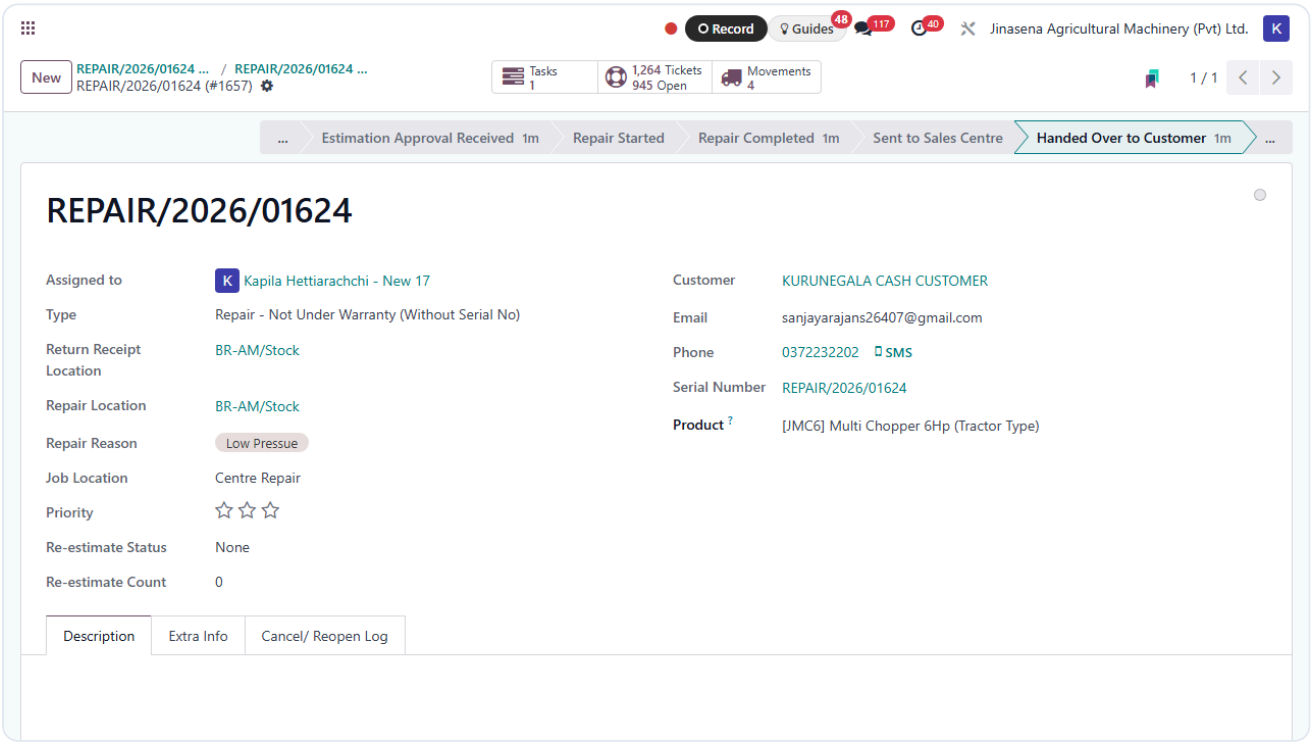

55 Close

Navigation Returned Picking dialog (Done)

Action **Click Close to go to the ticket view.**

Description The ticket is now in *Handed Over to Customer* — the repair is complete.

Transfer dialog (Done) — Close button

QA notes

- Steps 1–29 are identical to the "Branch - Full Flow" (1C) guide and the order/invoice steps 30–52 follow it too. The differences in this **Quick Repair** variant: the customer pays the **full invoice amount at once** (instead of a 50% deposit), so there is **no balance-collection leg**, and after the task is marked done the item is dispatched straight away.
- The **Return** button (`fix_repair_action_direct_return`) raises "You may only return Done pickings" server-side but still creates the Returned Picking first. The automated run calls it, swallows the error, then validates the resulting picking via `/web/dataset/call_kw` (the Validate button is hidden/unreliable under the Studio views).
- The **Confirm**, invoice **Confirm** and delivery **Validate** buttons are hidden by the Fix-Repair Studio views in the automated user's session. The order is confirmed through the genuine online portal flow (Send by Email → View Quotation → Accept & Sign → Accept & Sign); the invoice is posted and the transfers validated via `/web/dataset/call_kw` . The **Register Payment** wizard is driven through the real UI.
- The sales order generates a chain of three transfers on this route; the tour records only one Validate. The automated run validates them all in dependency order.
- **Dispatch** becomes visible only after the task is done and the page is fully reloaded (computed field). A hash-only navigation does not refresh the record, so the automated flow reloads in a polling loop.
- Each screenshot is captured immediately before the step's action with the target element framed in red (a temporary CSS outline applied to the live element only for the capture). Screenshots come from one clean, fully-passing automated run (admin role) against the staging instance.
- The staging database is a temporary Odoo.sh environment, automatically deleted on 12 October 2026; regenerate the screenshots on the production instance if needed.
