Repair User Guide — Factory

Type 1: Under Warranty - RUG — Tested OK

Source: Odoo Tour Recorder export — `Tour/2C. Repair User Guide - Factory [ Under Warranty - RUG - Tested Ok ].json`

Scenario: The product is under warranty and has a serial number and a warranty card. It is checked at the **factory** and found **Tested OK**, returned to the sales centre and dispatched back to the customer.

Every screenshot below is a real capture from a single, clean, passing automated run — taken *before* each step's action, with the element to use framed in red.

1. Overview

This manual explains how to register and complete a **factory** repair for a product that is **under warranty** (RUG) when the technician finds the item **Tested OK** — nothing needs repairing. It runs from the Helpdesk ticket, through the factory and the sales centre, to dispatch back to the customer.

Ticket stages covered

New | Sent to Factory | Received at Factory | Repair Completed | Sent to Sales Centre | Received at Sales Centre | Handed Over to Customer

Before you start

- You have access to the Helpdesk, Field Service and Inventory apps.
- The active company (top bar) is **Jinasena Agricultural Machinery (Pvt) Ltd.**
- The customer and the finished product (with its serial number, already sold through a sales order) already exist in Odoo.
- The customer has brought the item and a photo of the warranty card is available.

Example data used in this manual

Field	Value
Type	Repair - Under Warranty - RUG
Return Receipt Location	BR-AM/Stock (Jinasena Ampara Branch)
Repair Reason	Difficult to start the engine
Job Location	Factory Repair
Customer	KURUNEGALA CASH CUSTOMER
Serial Number	0630_008 (Product [JMC6] Multi Chopper 6Hp (Tractor Type) is filled automatically)
Warranty Card	Image of the customer's warranty card
Repair result	Tested OK (no diagnosis, parts or quotation)

How to read each step

Navigation	Where you are in Odoo (app › menu › screen / dialog).
Action	What to click, select, or type.
Description	Why the step is needed and what happens.
Screenshot	The screen you are on *right before* performing the action, with the element to use framed in red.

Step summary

Section	Steps	Purpose
A	1–12	Open Helpdesk, create the ticket, classify it as Under Warranty - RUG, enter the serial number and attach the warranty card.
B	13–15	Return the item into stock and validate the receipt.
C	16–19	Send the item to the factory, receive it there and create the Field Service task.
D	20–22	Mark the item Tested OK, mark the task done and close it.

E	23–25	Send the item to the sales centre, receive it there and open the task.
F	26–28	Dispatch the item back to the customer.

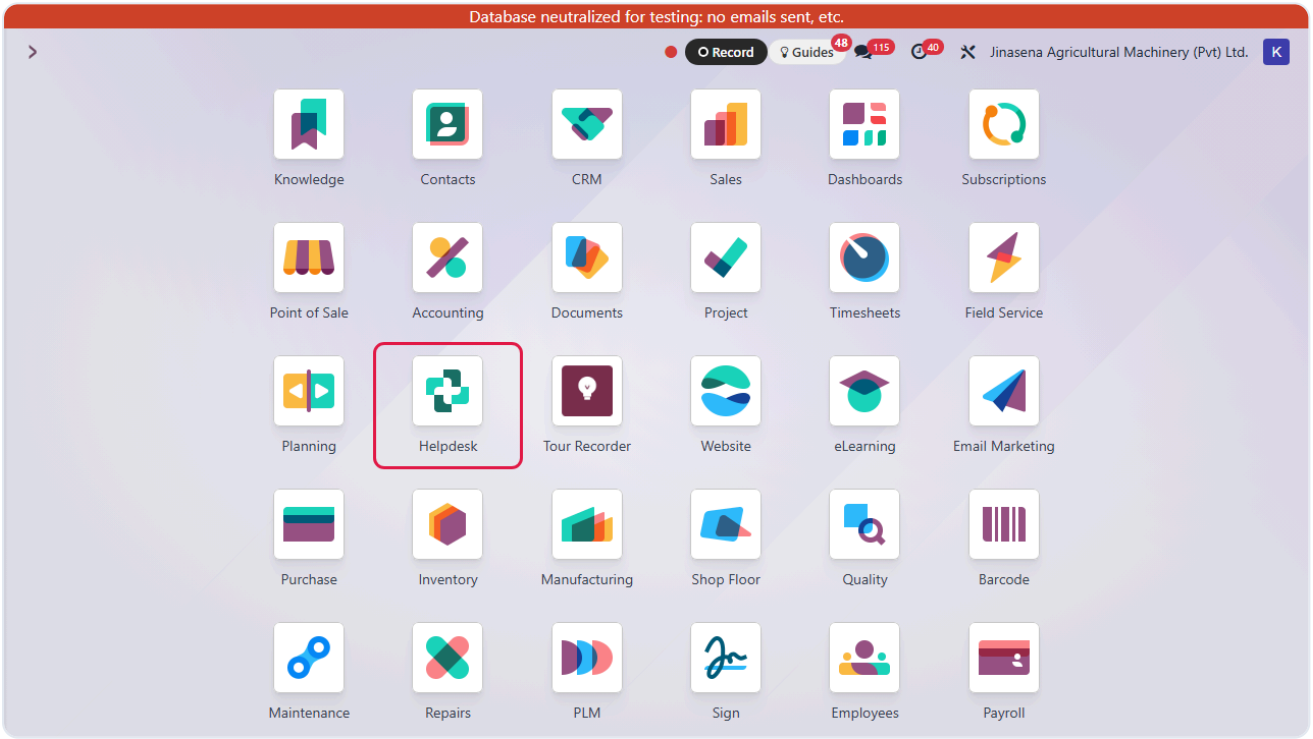

Section A — Create the Repair Ticket (Steps 1–12)

1 Open the HelpDesk app

Navigation Odoo Home → Apps

Action **Click the Helpdesk app icon on the home screen.**

Description Opens the Helpdesk Overview dashboard, showing every support team you have access to.

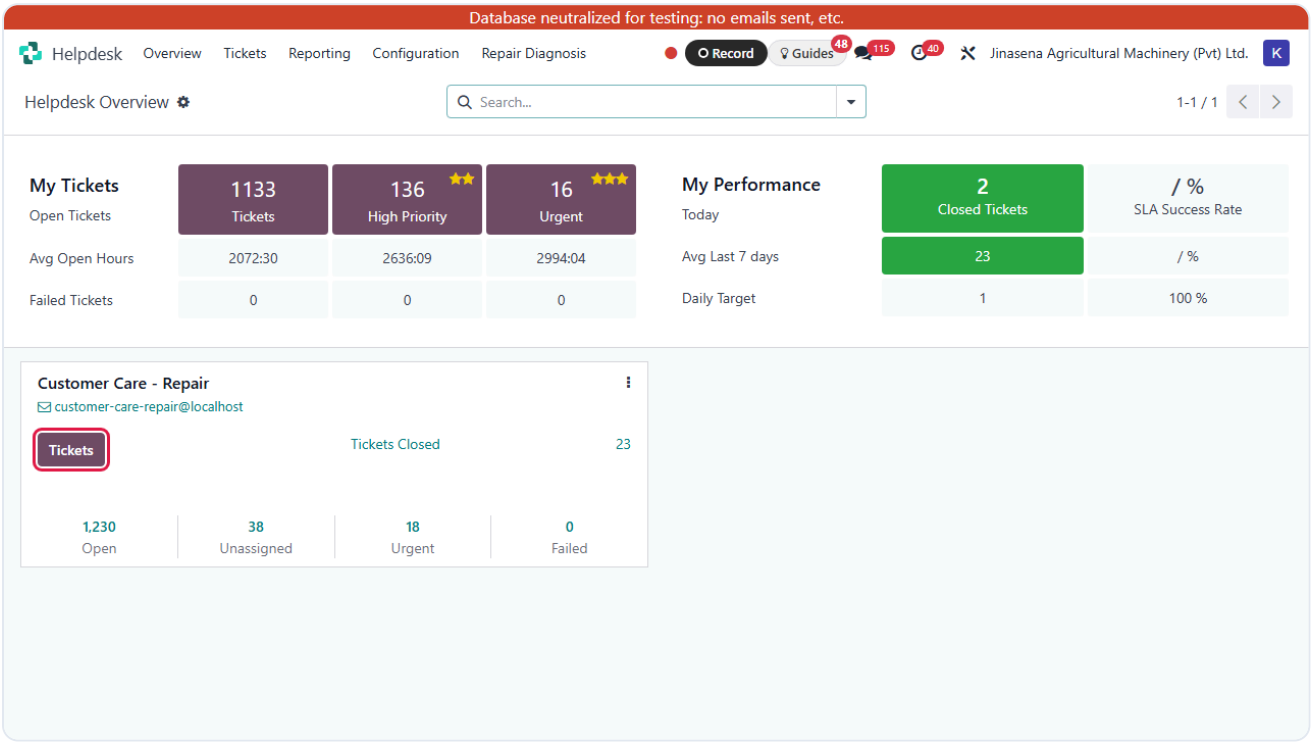

Odoo Apps home screen — Helpdesk app icon

2 Open the repair tickets

Navigation Helpdesk → Overview → Customer Care - Repair

Action **On the Customer Care - Repair team card, click Tickets.**

Description Displays the created tickets and their information.

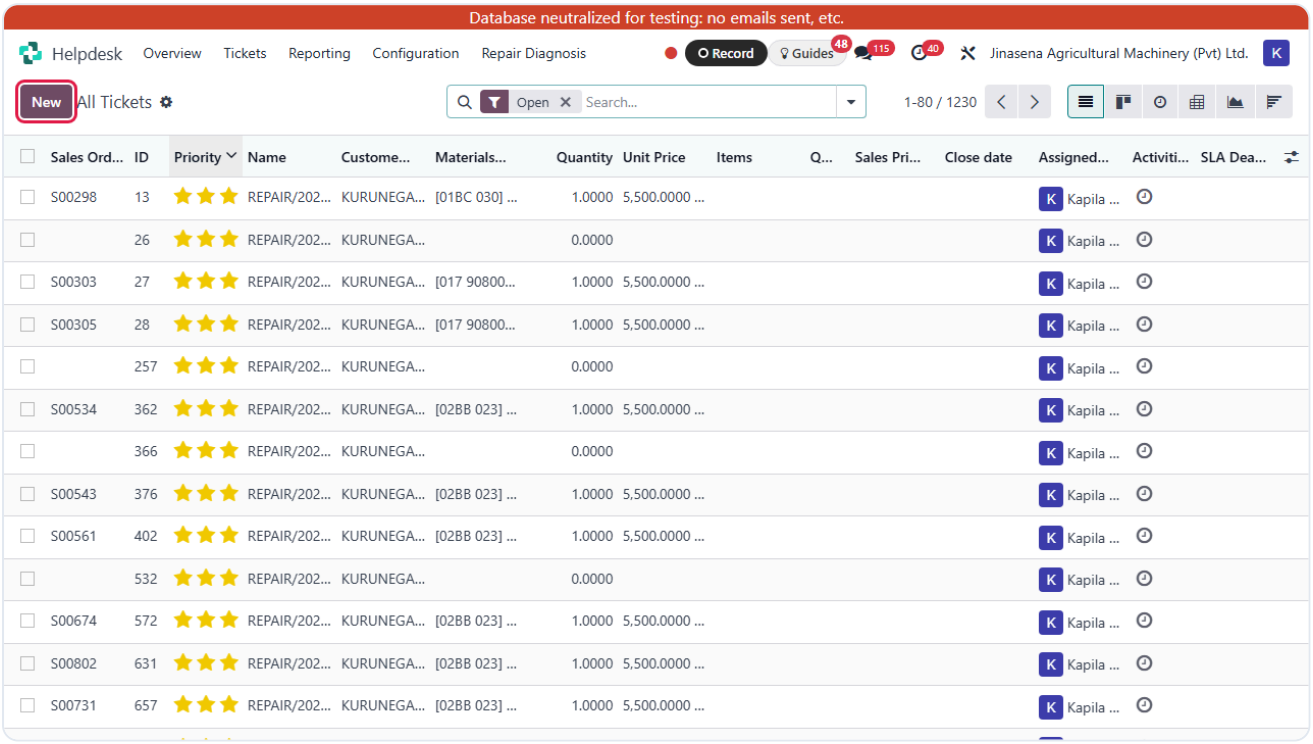

Helpdesk Overview — Tickets button on the Customer Care - Repair team card

3 Create a new ticket

Navigation Helpdesk → Customer Care - Repair (Tickets)

Action **Click New at the top-left of the ticket list.**

Description Opens a blank Helpdesk ticket form for the repair item received from the customer.

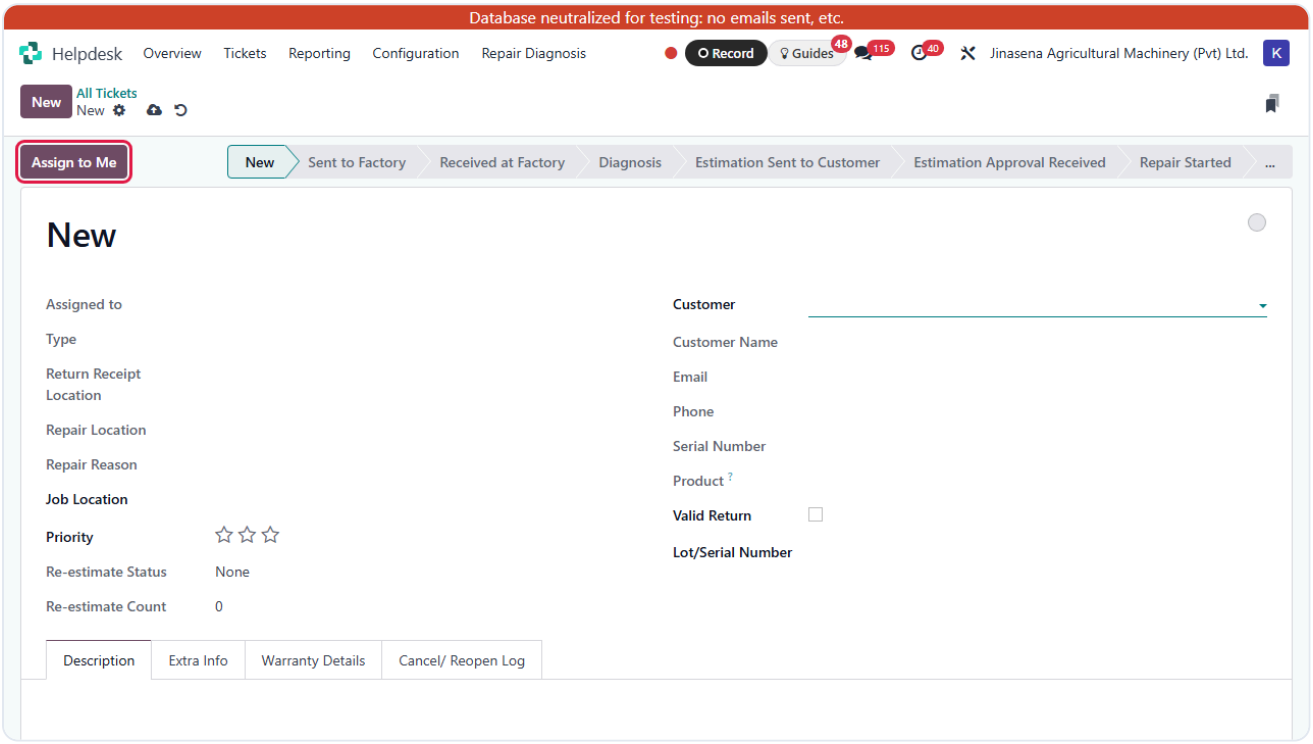

All Tickets list — New button

4 Assign the ticket to yourself

Navigation New ticket form

Action **Click Assign to Me in the status bar.**

Description Saves the ticket for the first time and assigns it to the current user. This also generates the ticket's sequence-based name (e.g. `REPAIR/2026/01643`) — the ticket has no user-editable title.

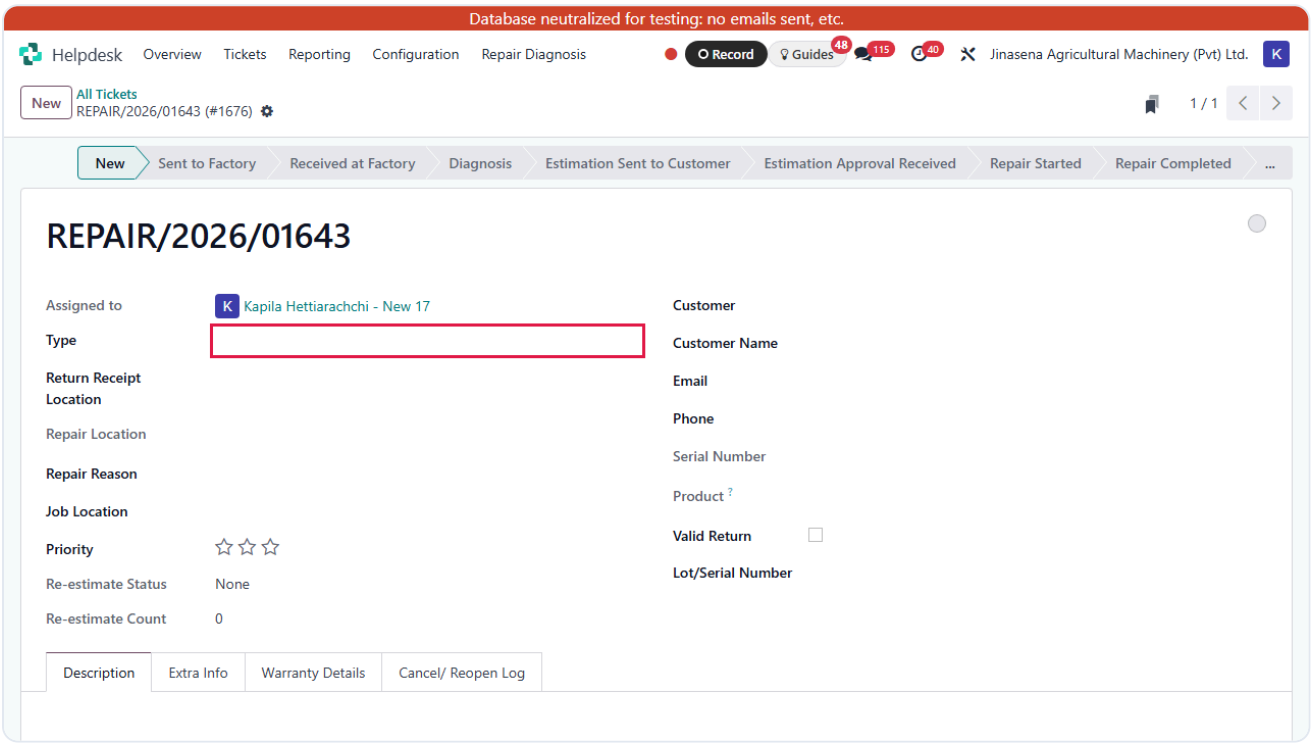

Blank new ticket form — Assign to Me button

5 Set the repair Type

Navigation Ticket form → Type field

Action **Click the Type field and select Repair - Under Warranty - RUG.**

Description Selects the *Under Warranty - RUG* flow: the product is still under warranty and the repair is carried out at the company's cost under the RUG facility. For this type a **Serial Number** and a photo of the **Warranty Card** are required (there is no *Create Serial No* button).

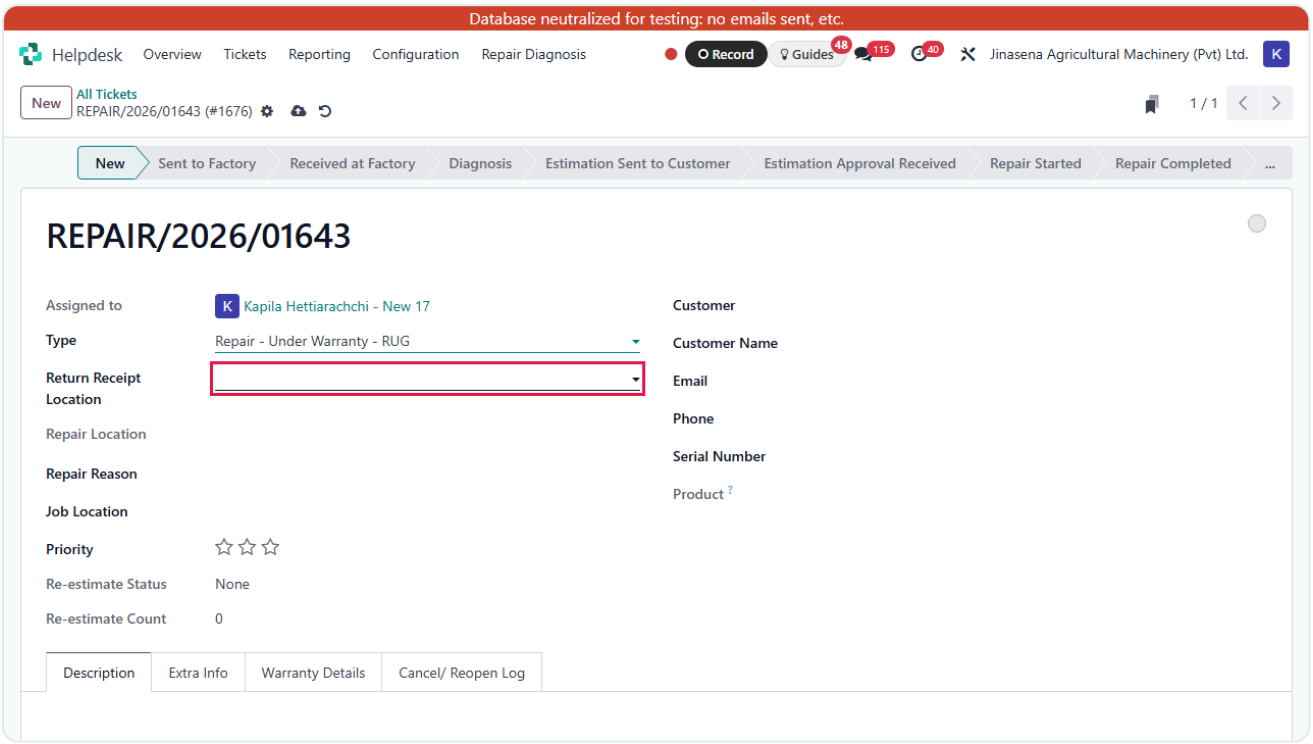

Ticket form — Type field

6 Set the Return Receipt Location

Navigation Ticket form → Return Receipt Location field

Action **Click Return Receipt Location and select the branch receiving the item (e.g. `BR-AM/Stock`, Jinasena Ampara Branch).**

Description The location where the item is received for repair.

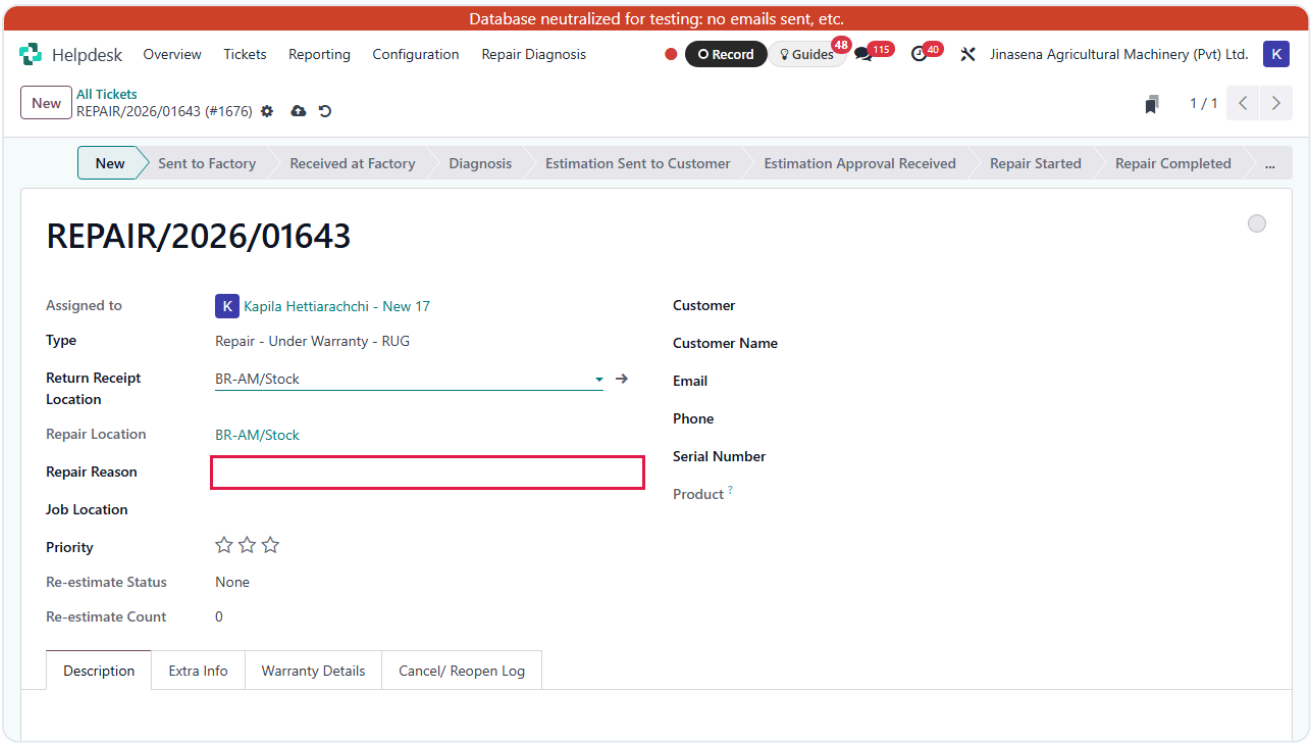

Ticket form — Return Receipt Location field

7 Select the Repair Reason

Navigation Ticket form → Repair Reason field

Action **Click Repair Reason and select the reported fault (e.g. `Difficult to start the engine`).**

Description A list of common errors is provided; select the ones that apply. This is a tags field.

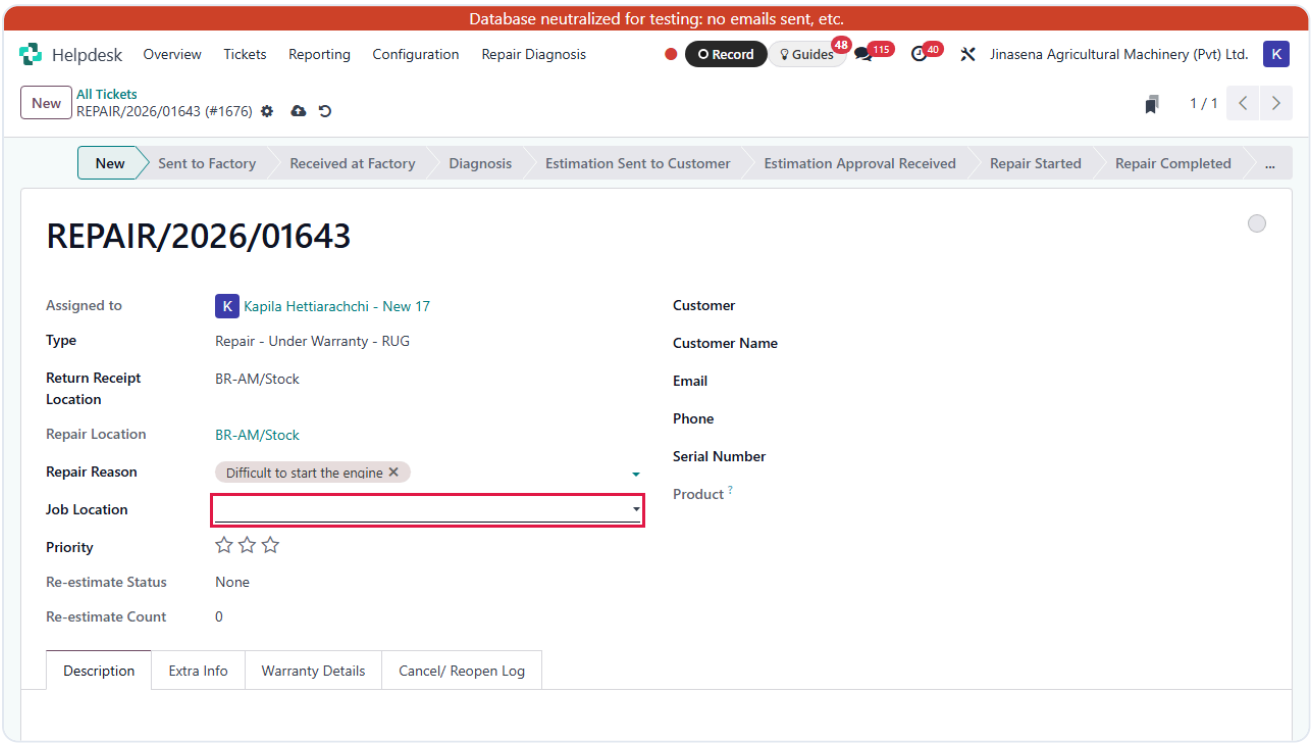

Ticket form — Repair Reason field

8 Select the Job Location

Navigation Ticket form → Job Location field

Action **In Job Location, select Factory Repair.**

Description Defines where the repair will be performed. **Factory Repair** means the item is sent to the factory, which adds the *Send to Factory / Received at Factory* steps.

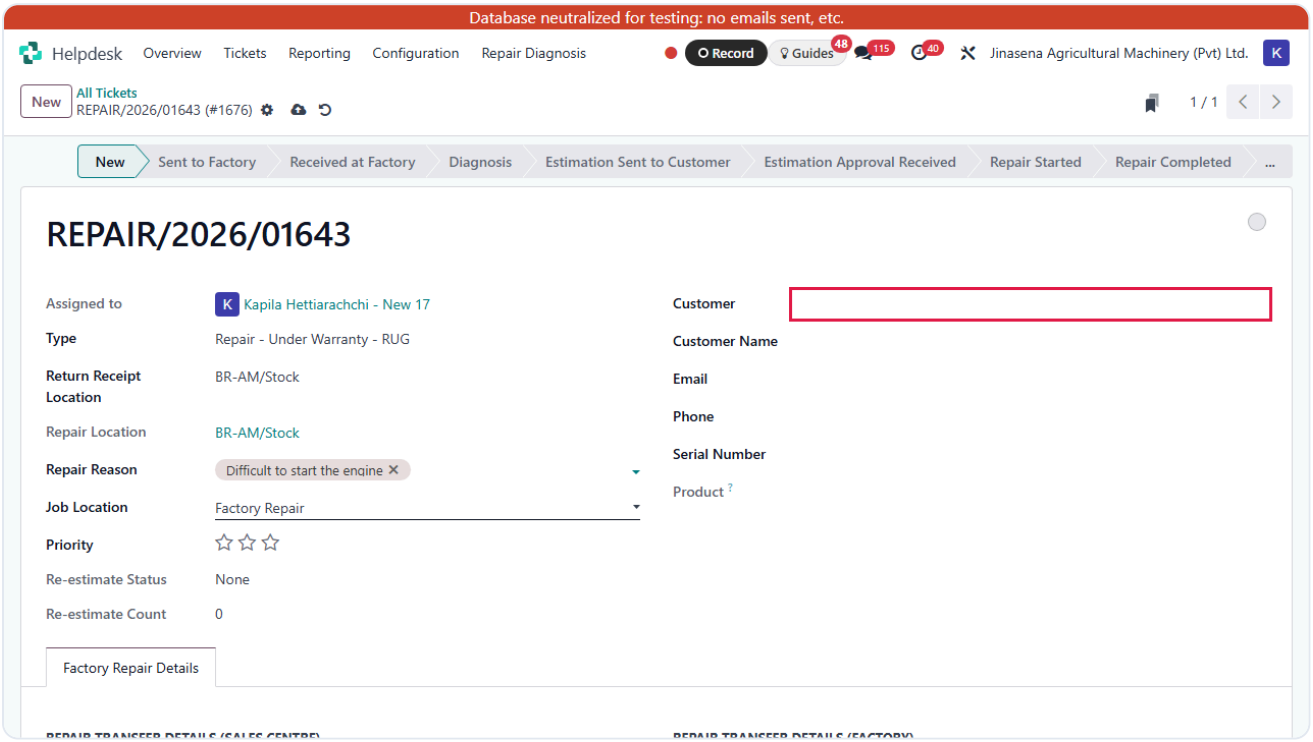

Ticket form — Job Location field

9 Select the Customer

Navigation Ticket form → Customer field

Action **Click Customer and select `KURUNEGALA CASH CUSTOMER`.**

Description Email and Phone are filled automatically from the customer record.

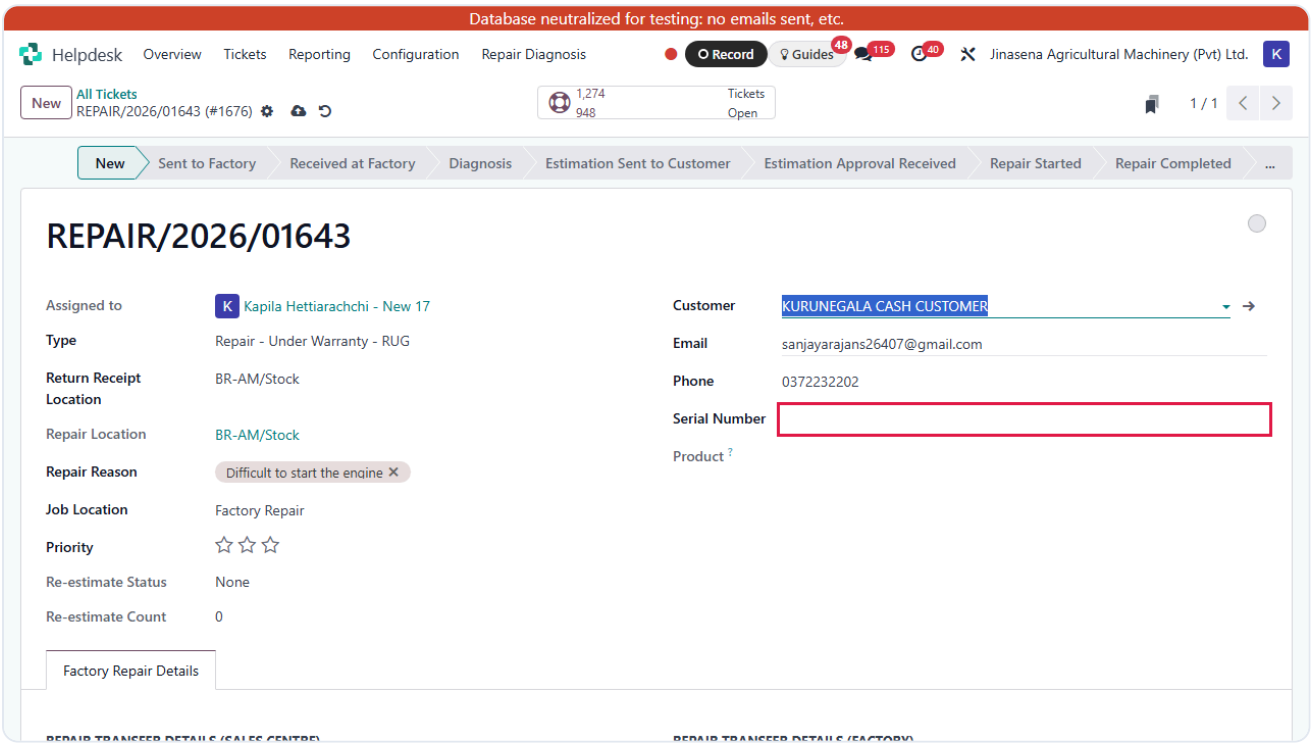

Ticket form — Customer field

10 Enter the Serial Number

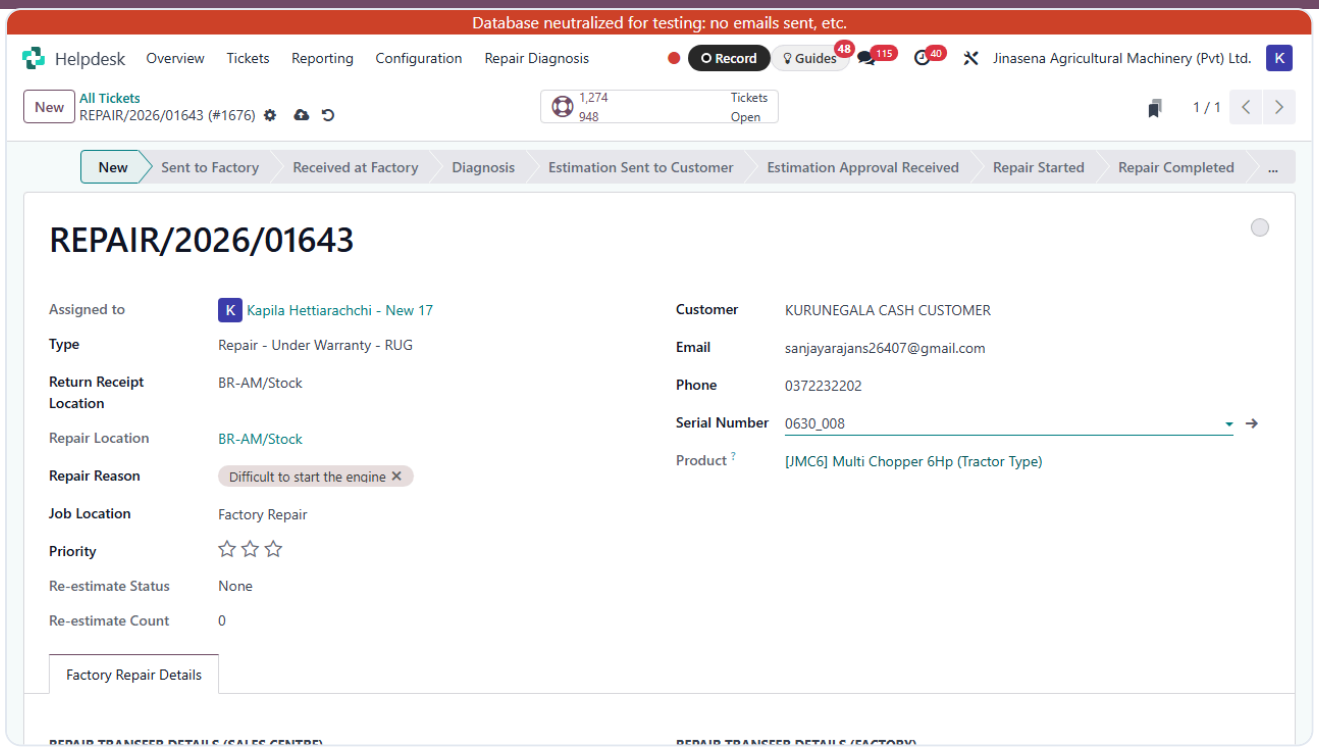

Navigation Ticket form → Serial Number field

Action **Click Serial Number, type the serial number of the finished product (e.g. `0630_008`) and select it from the list.**

Description Type the serial number of the finished product that was sold through a sales order; only serials already sold to a customer are offered. Selecting it fills in the **Product** automatically (here `[JMC6] Multi Chopper 6Hp (Tractor Type)`), so there is no separate Product step.

Ticket form — Serial Number field

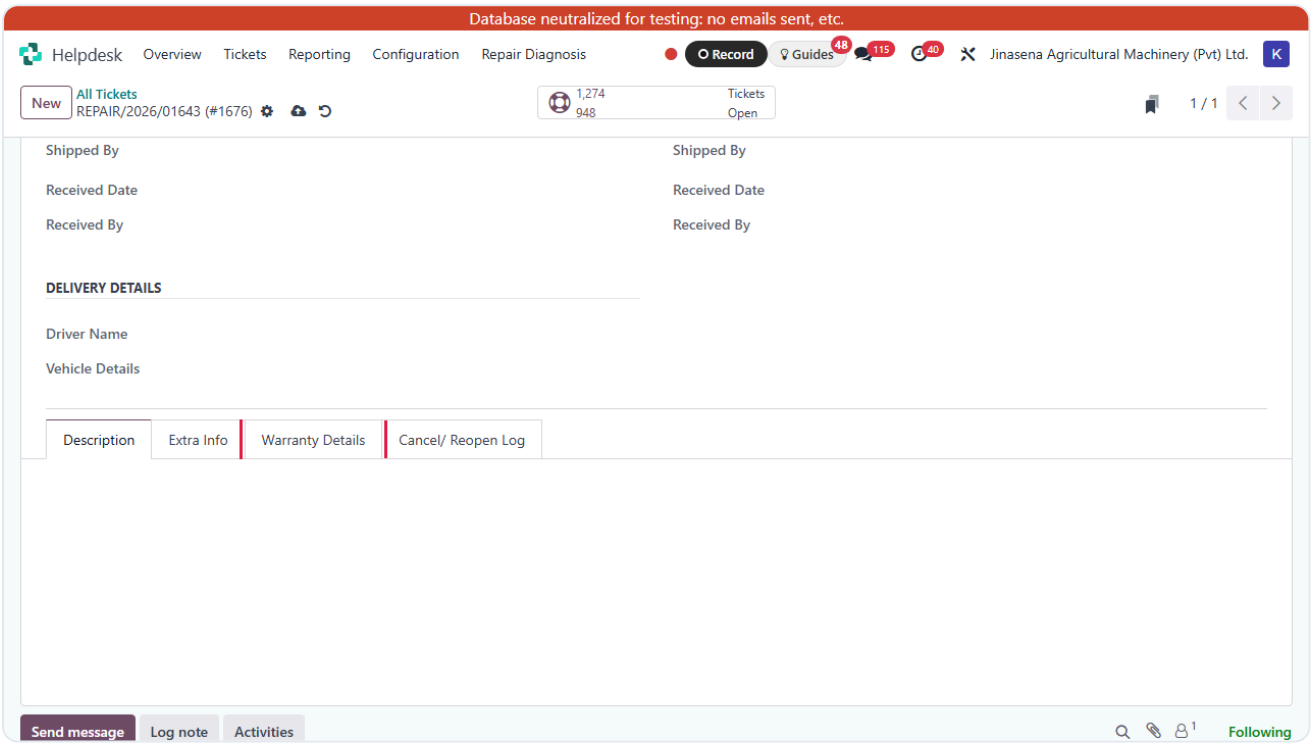

Ticket form — Serial Number entered, Product filled in

11 Open the Warranty Card tab

Navigation Ticket form → Warranty Details tab

Action **Click the Warranty Details tab.**

Description You must attach one or two images of the warranty card; this tab holds the **Warranty Card** image.

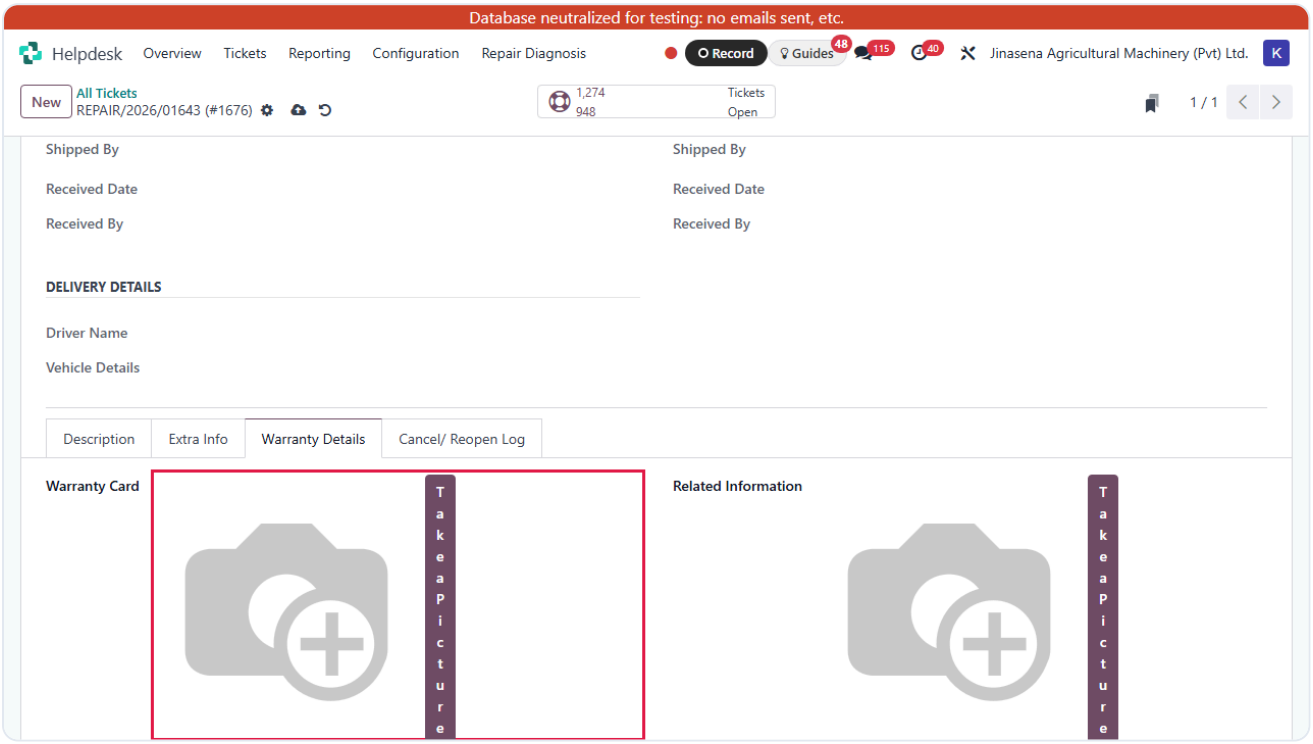

Ticket form — Warranty Details tab

12 Attach the warranty card image

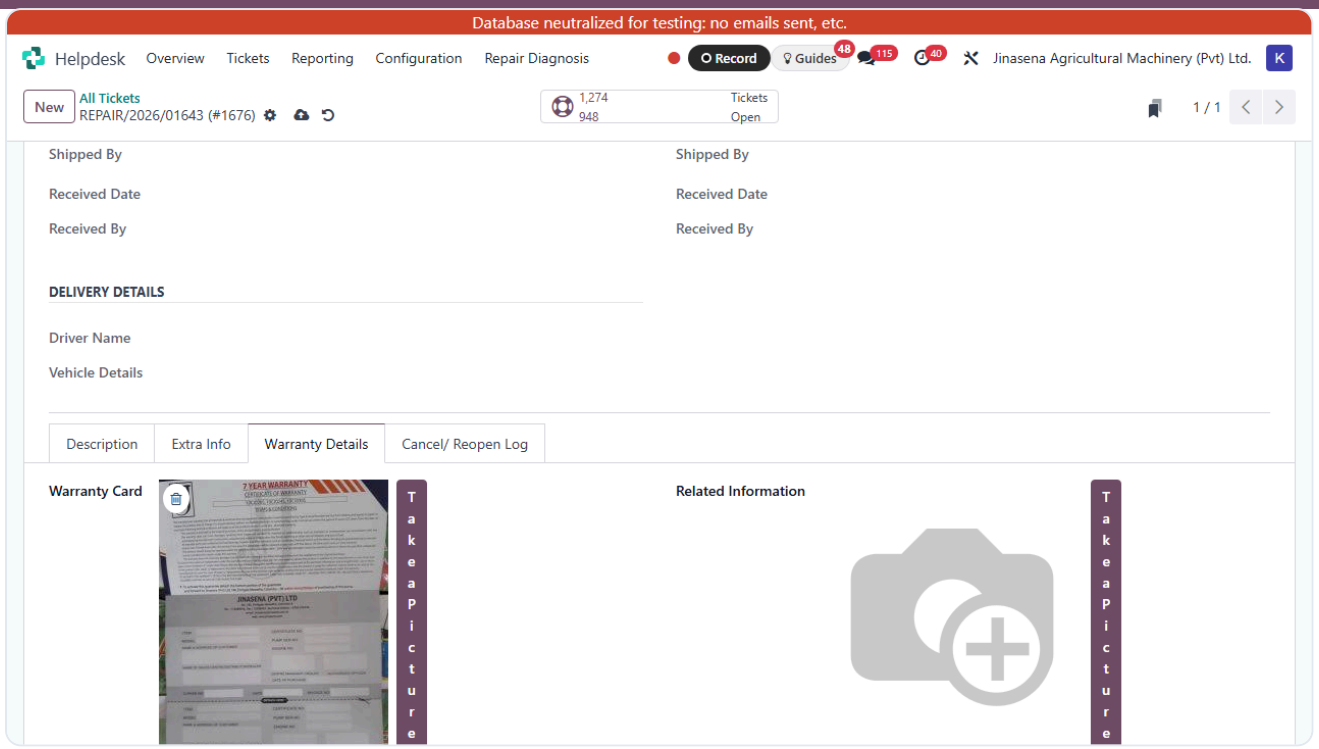

Navigation Ticket form → Warranty Details → Warranty Card

Action **Click the Warranty Card picture area, select the image file and click Open.**

Description Attaches the photo of the customer's warranty card to the ticket.

Ticket form — Warranty Card image field

Ticket form — Warranty card attached

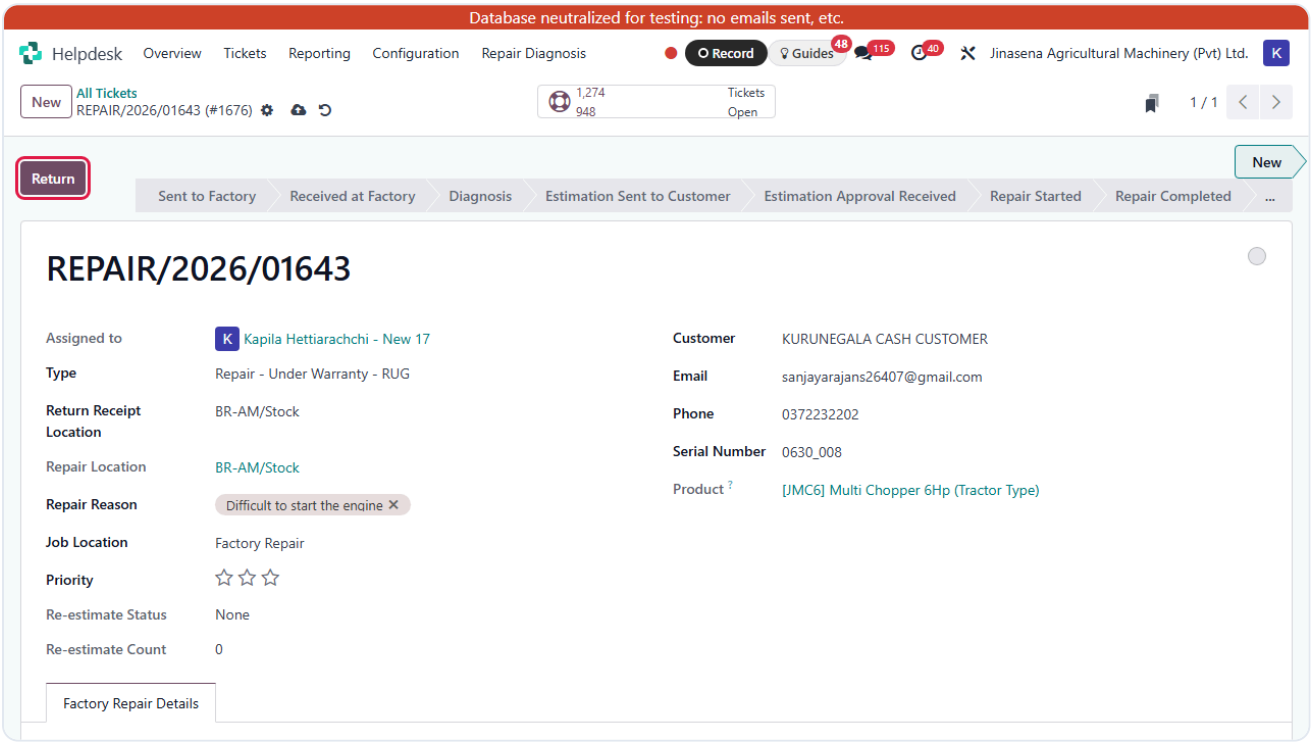

Section B — Receive the Item (Steps 13–15)

13 Return

Navigation Ticket form → status bar

Action **Click Return.**

Description Gets the repair item into our company: creates the Returned Picking (receipt) for the item. (The server also raises "You may only return Done pickings" after creating it; see the QA notes.)

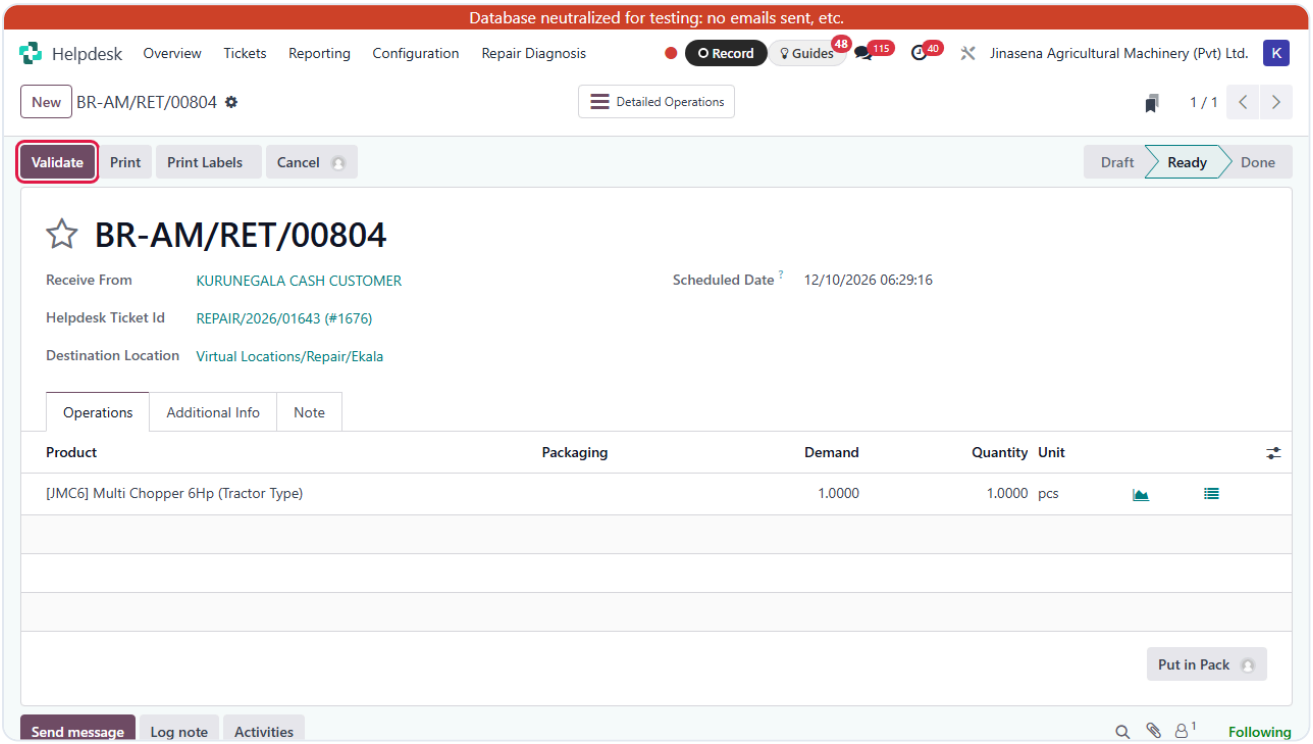

Ticket form — Return button

14 Validate the receipt

Navigation Transfer (Receipt) → header

Action **Click Validate.**

Description Confirms that the item has been received into stock; the transfer becomes *Done*.

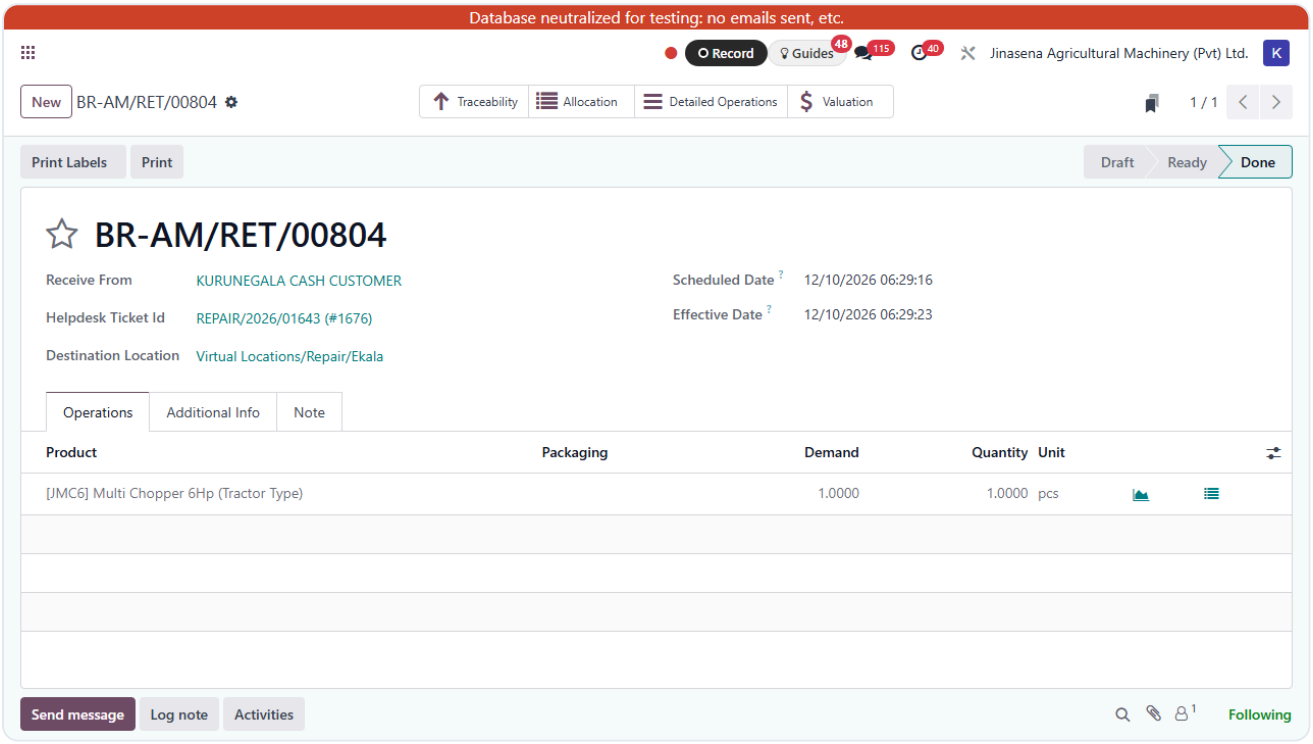

Transfer (Ready) — Validate button

15 Back

Navigation Transfer (Done)

Action **Click Back.**

Description Returns to the previous menu — the ticket view. The screenshot shows the receipt in the *Done* state; on this instance it opens as a full page, so there is no Back button to frame.

Transfer (Done)

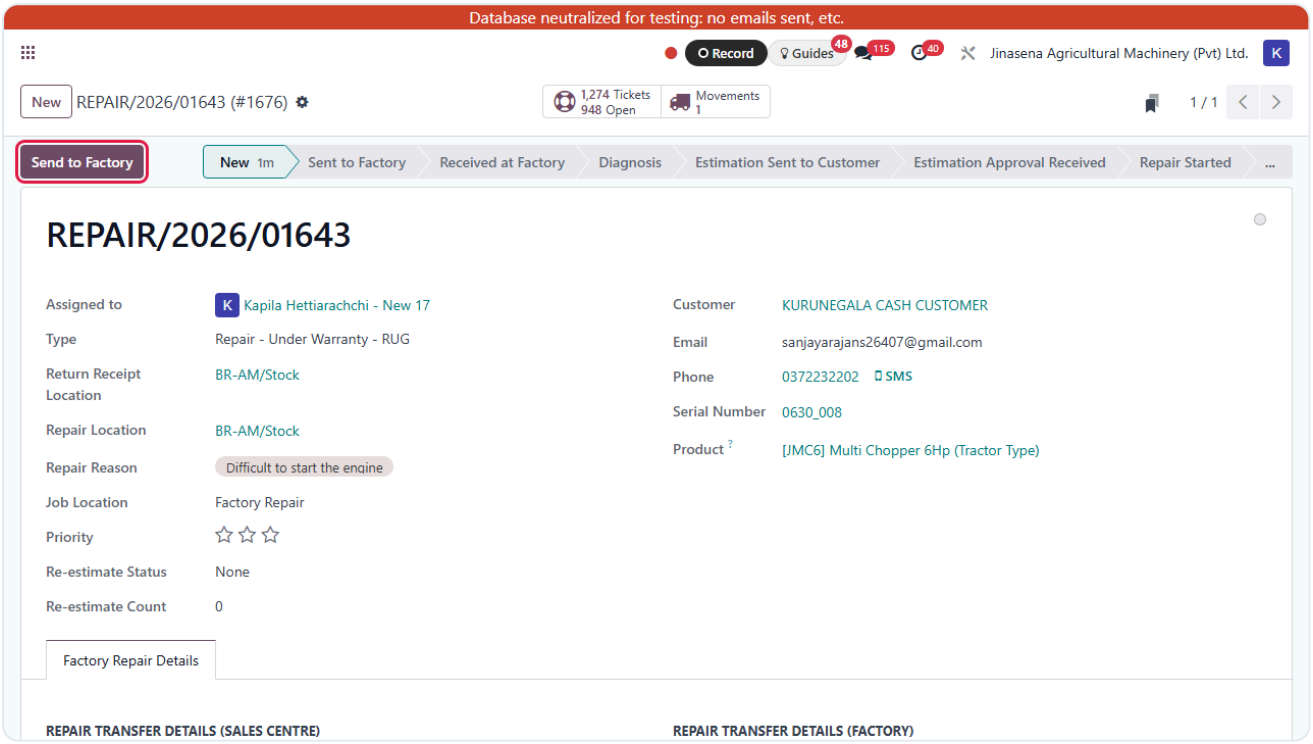

Section C — Send to the Factory and Plan the Task (Steps 16–19)

16 Send to Factory

Navigation Ticket form → status bar

Action **Click Send to Factory.**

Description Sends the item to the factory for repair; the ticket moves to *Sent to Factory*.

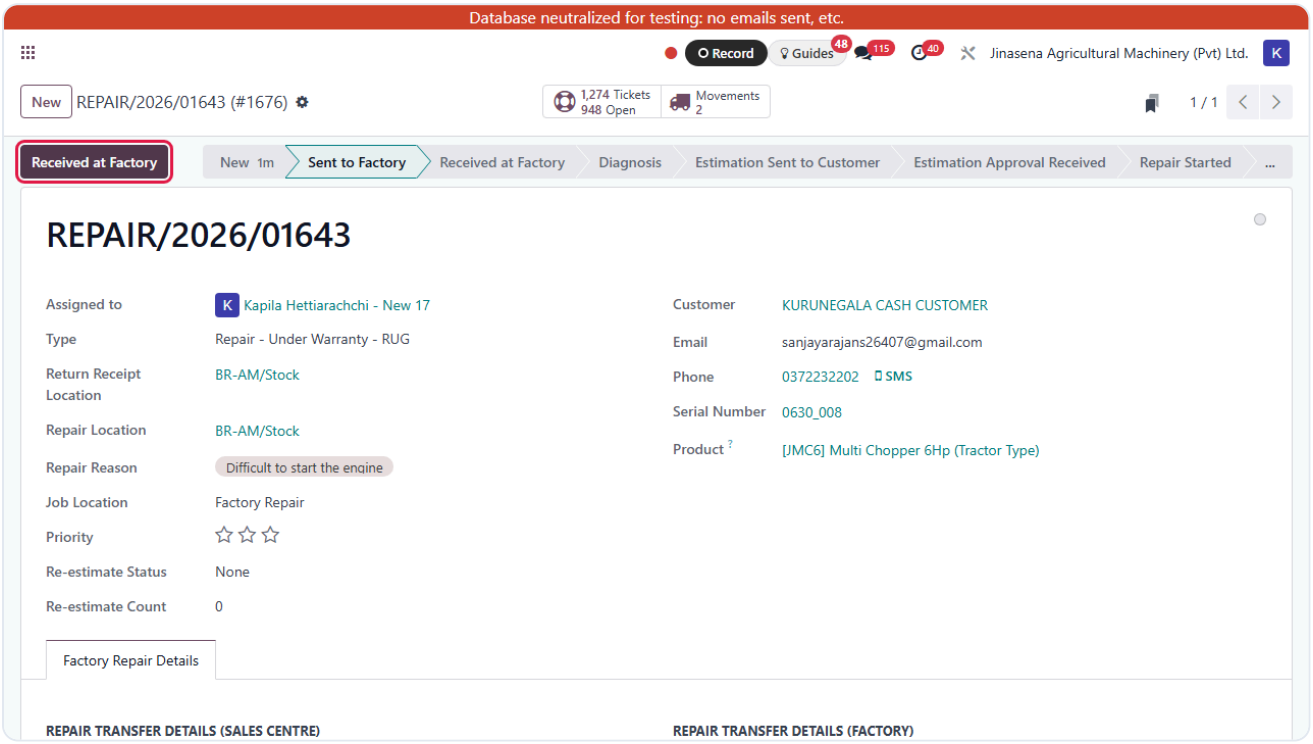

Ticket form — Send to Factory button

17 Received at Factory

Navigation Ticket form → status bar

Action **Click Received at Factory.**

Description Confirms the item has arrived at the factory.

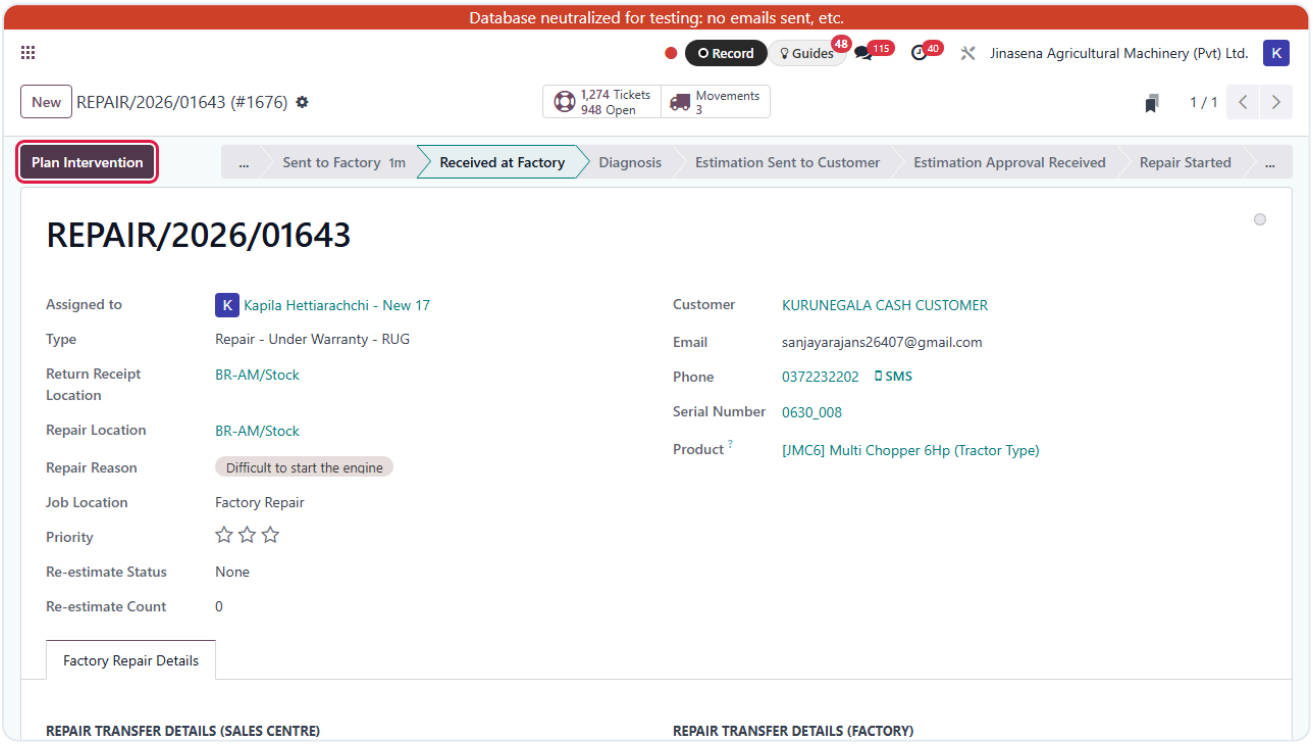

Ticket form — Received at Factory button

18 Plan Intervention

Navigation Ticket form → status bar

Action **Click Plan Intervention.**

Description To assign the job to a repair technician, create a Field Service task.

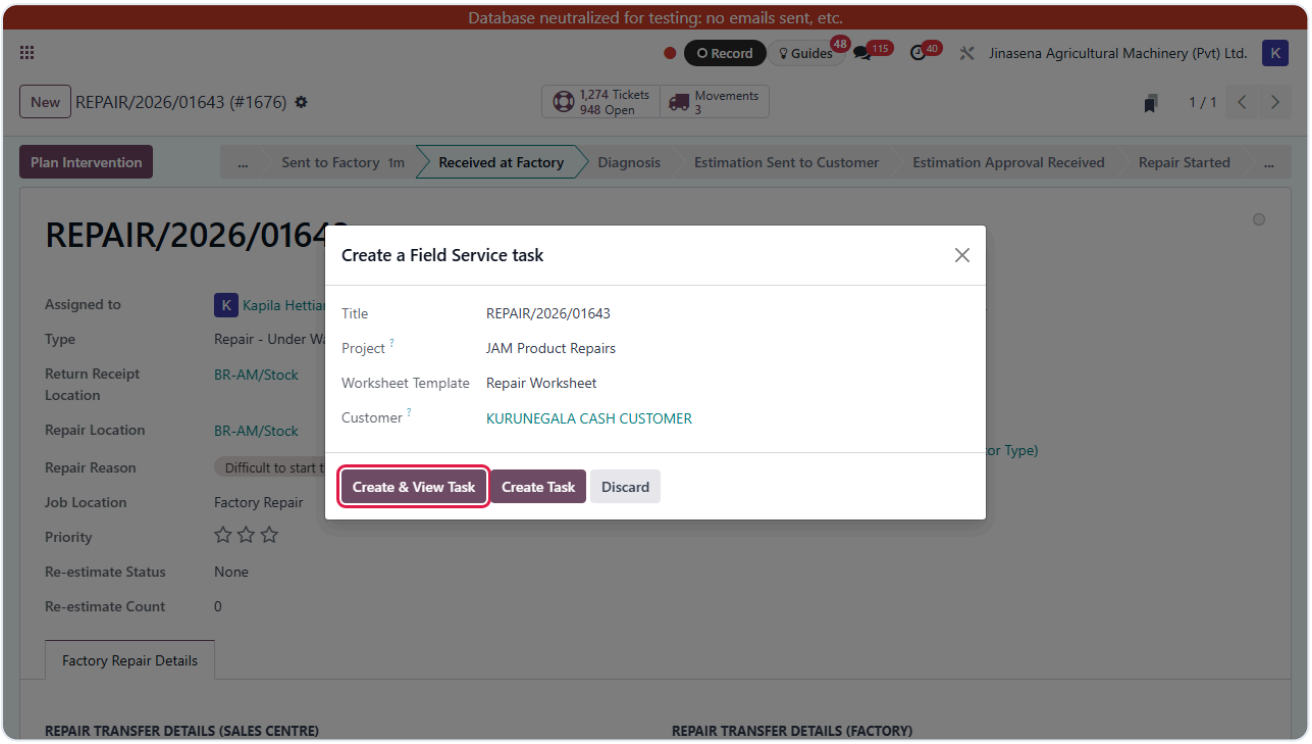

Ticket form — Plan Intervention button

19 Create & View Task

Navigation Create a Field Service task dialog

Action **Click Create & View Task.**

Description Creates the Field Service task and opens it so the technician can manage it.

Create a Field Service task dialog — Create & View Task button

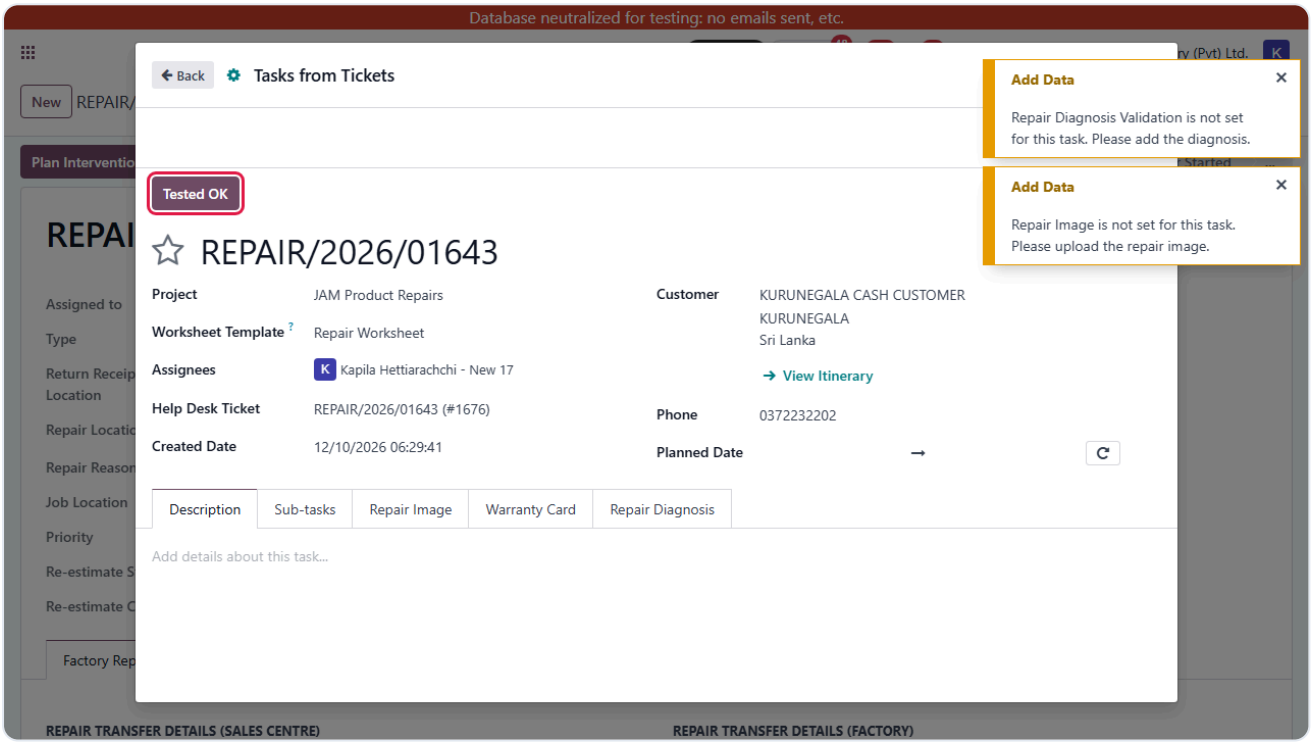

Section D — Complete the Task as Tested OK (Steps 20–22)

20 Tested OK

Navigation Task dialog → header

Action **Click Tested OK.**

Description Use this when the technician finds the item works and needs no repair. It skips the diagnosis, parts, quotation and approval steps of the full flow (the "Add Data" reminders about diagnosis and image can be ignored).

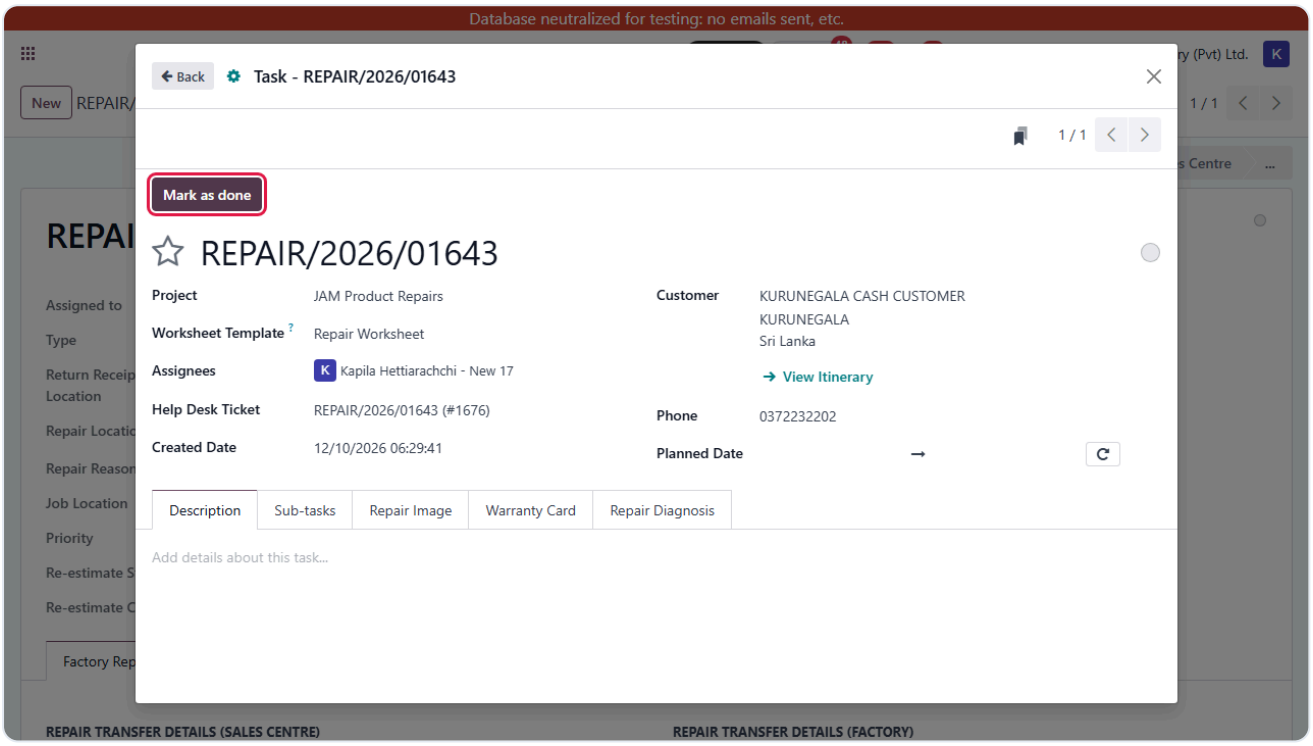

Task dialog — Tested OK button

21 Mark as done

Navigation Task dialog → header

Action **Click Mark as done.**

Description The work on the task has been completed; this ends the task and the ticket moves to *Repair Completed*.

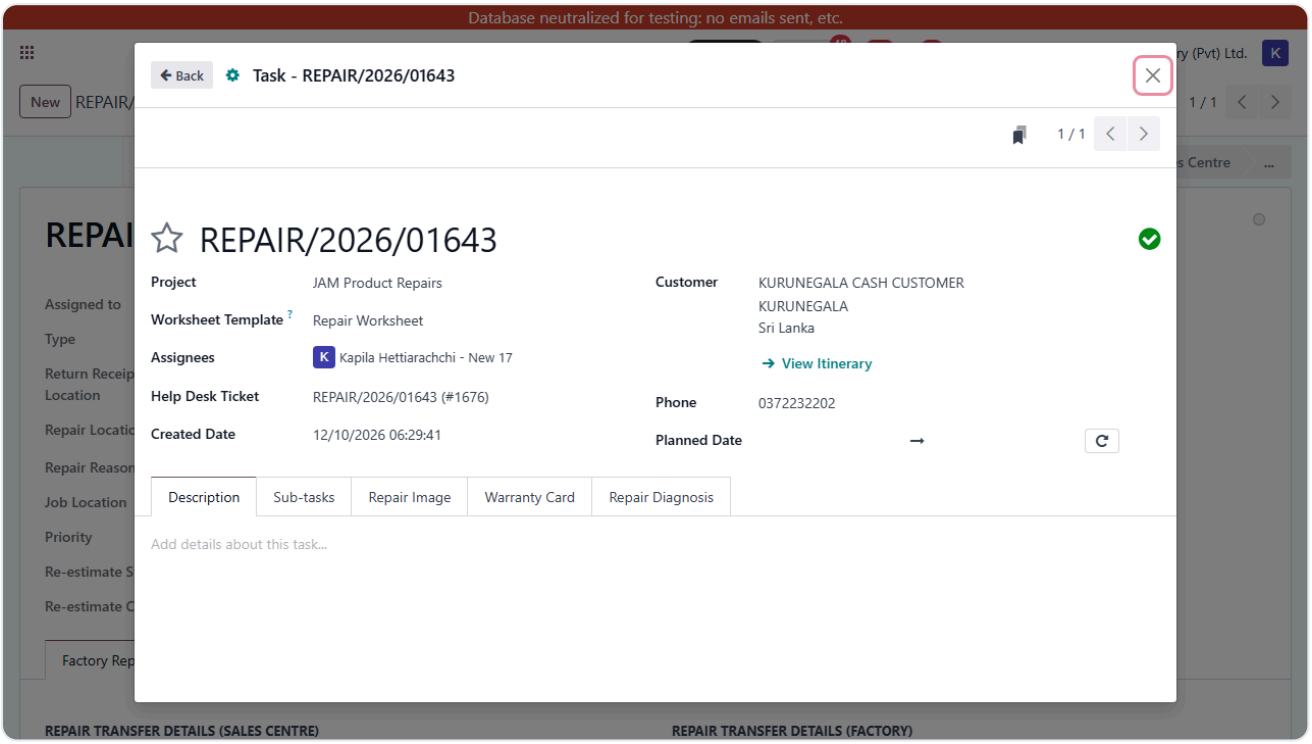

Task dialog — Mark as done button

22 Close

Navigation Task dialog (Done)

Action **Click Close.**

Description Returns to the ticket. The task now shows a green done check.

Task dialog (Done) — Close button

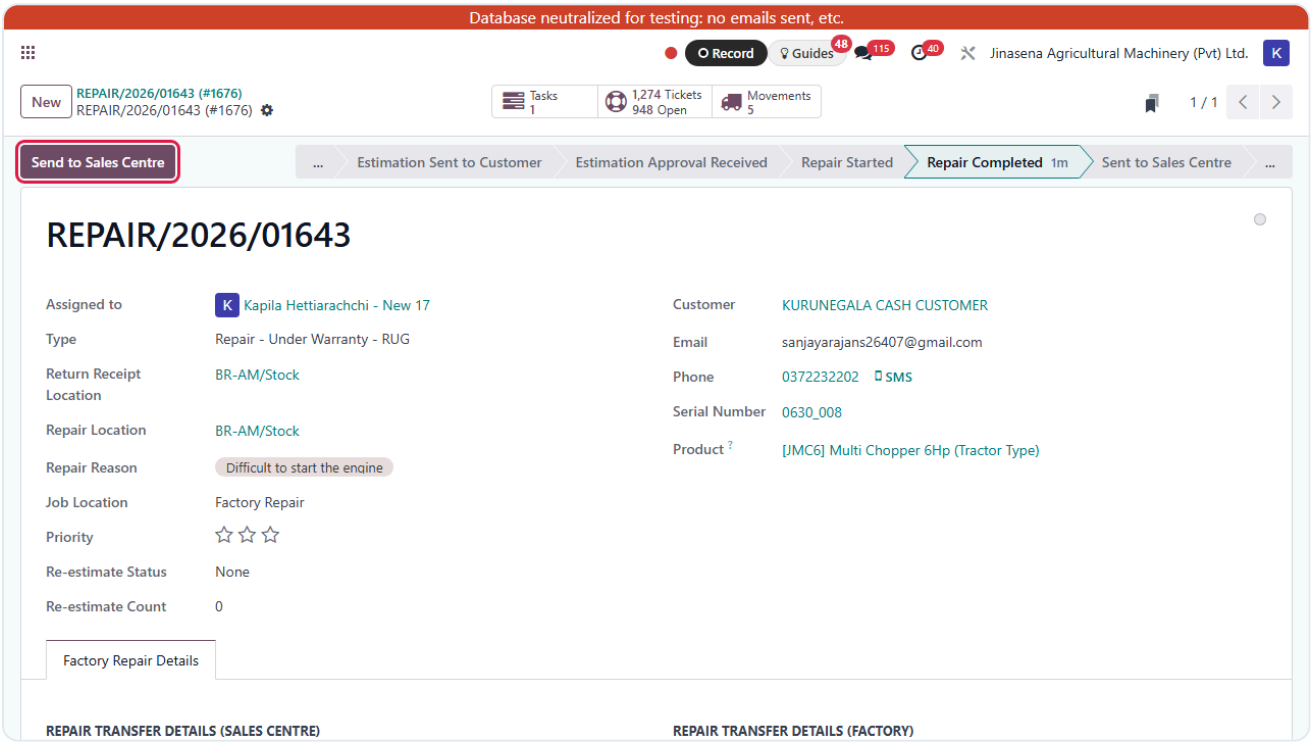

Section E — Return to the Sales Centre (Steps 23–25)

23 Send to Sales Centre

Navigation Ticket form → status bar

Action **Click Send to Sales Centre.**

Description Since this item was received from a sales centre and sent to the factory, send it back to the sales centre. The button appears once the task is done (you may need to refresh the page).

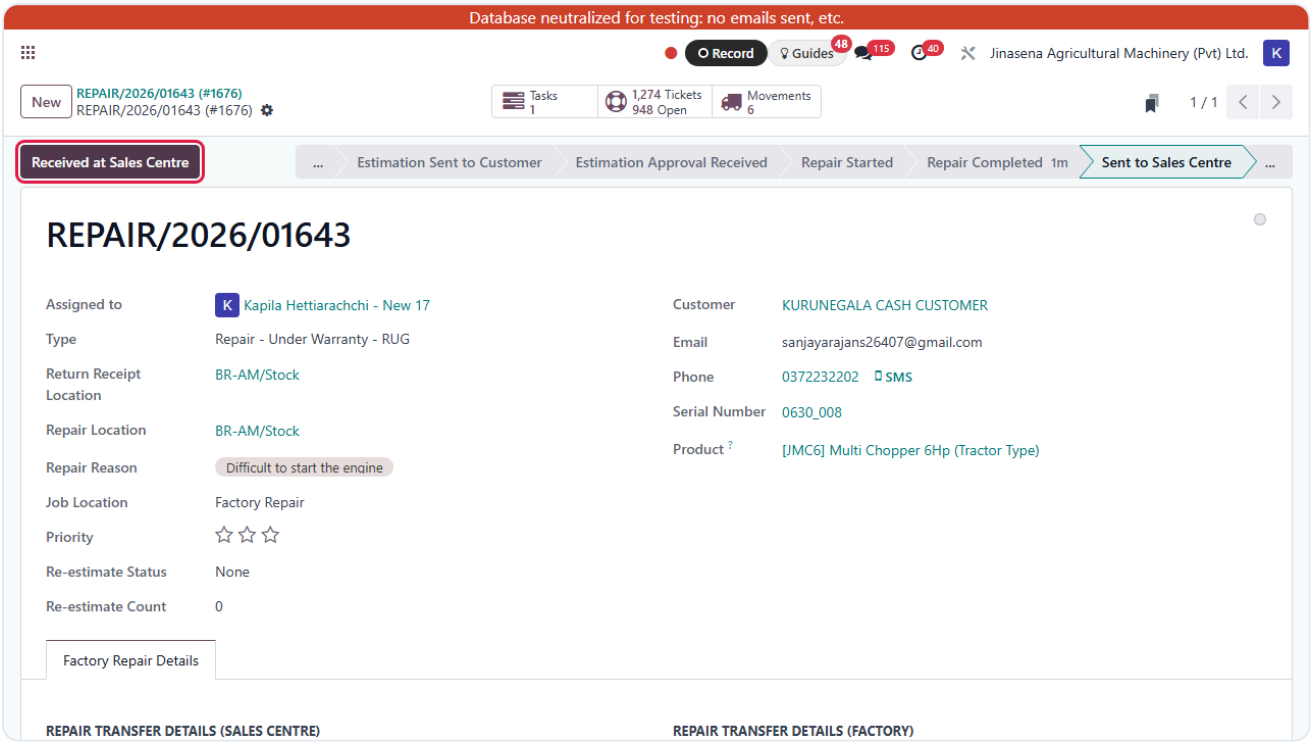

Ticket form — Send to Sales Centre button

24 Received at Sales Centre

Navigation Ticket form → status bar

Action **Click Received at Sales Centre.**

Description Accepts the item at the sales centre.

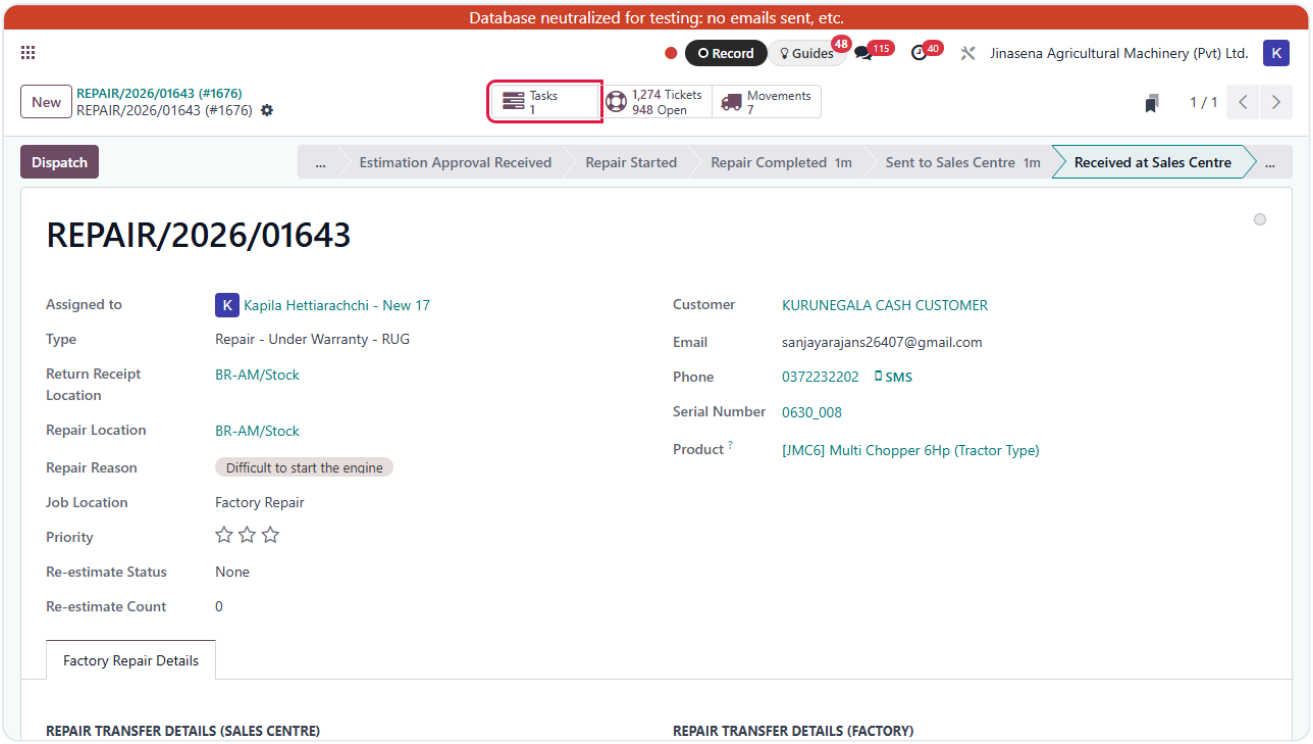

Ticket form — Received at Sales Centre button

25 Tasks

Navigation Ticket form → button box

Action **Click the Tasks button.**

Description Opens the task of this ticket.

Ticket form — Tasks button

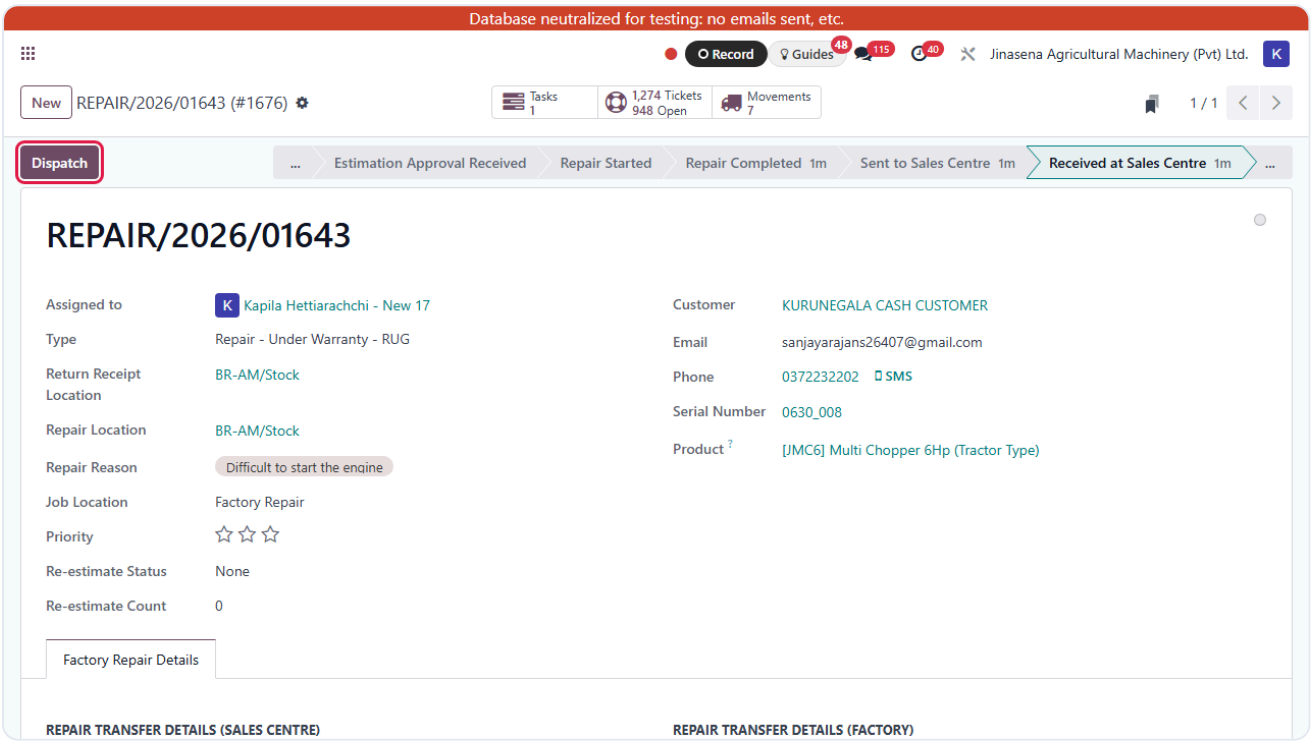

Section F — Dispatch (Steps 26–28)

26 Dispatch

Navigation Ticket form → status bar

Action **Click Dispatch.**

Description Processes the completed repair item back to the customer. The button appears once the task is done (you may need to refresh the page).

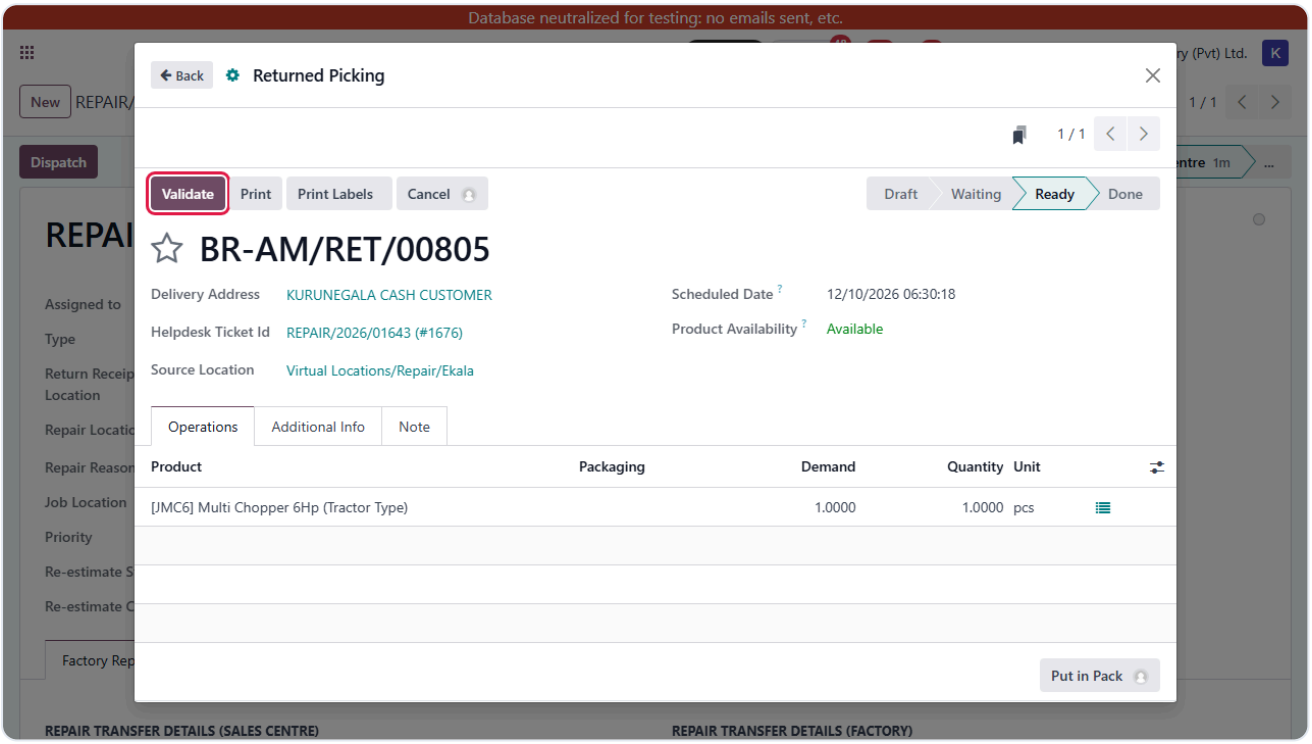

Ticket form — Dispatch button

27 Validate the dispatch

Navigation Returned Picking dialog → header

Action **Click Validate.**

Description Completes the return operation: the item leaves for the customer.

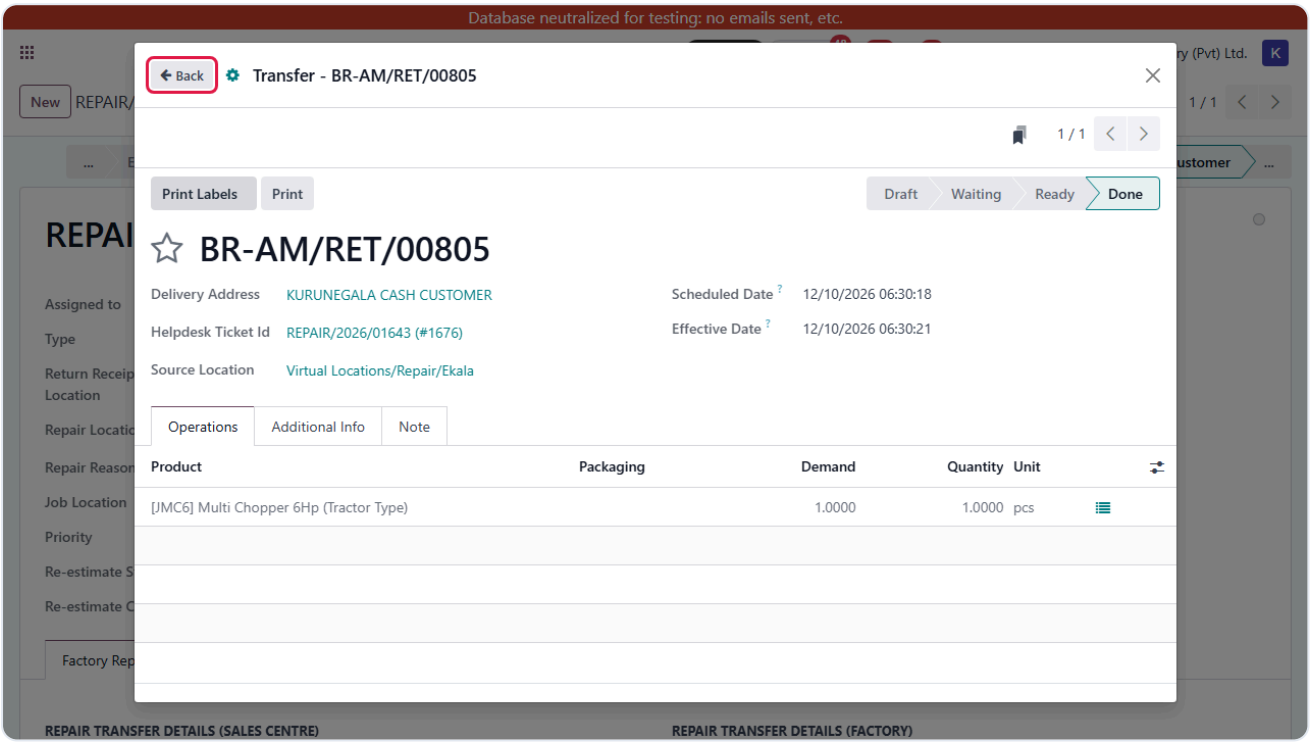

Returned Picking dialog (Ready) — Validate button

28 Back

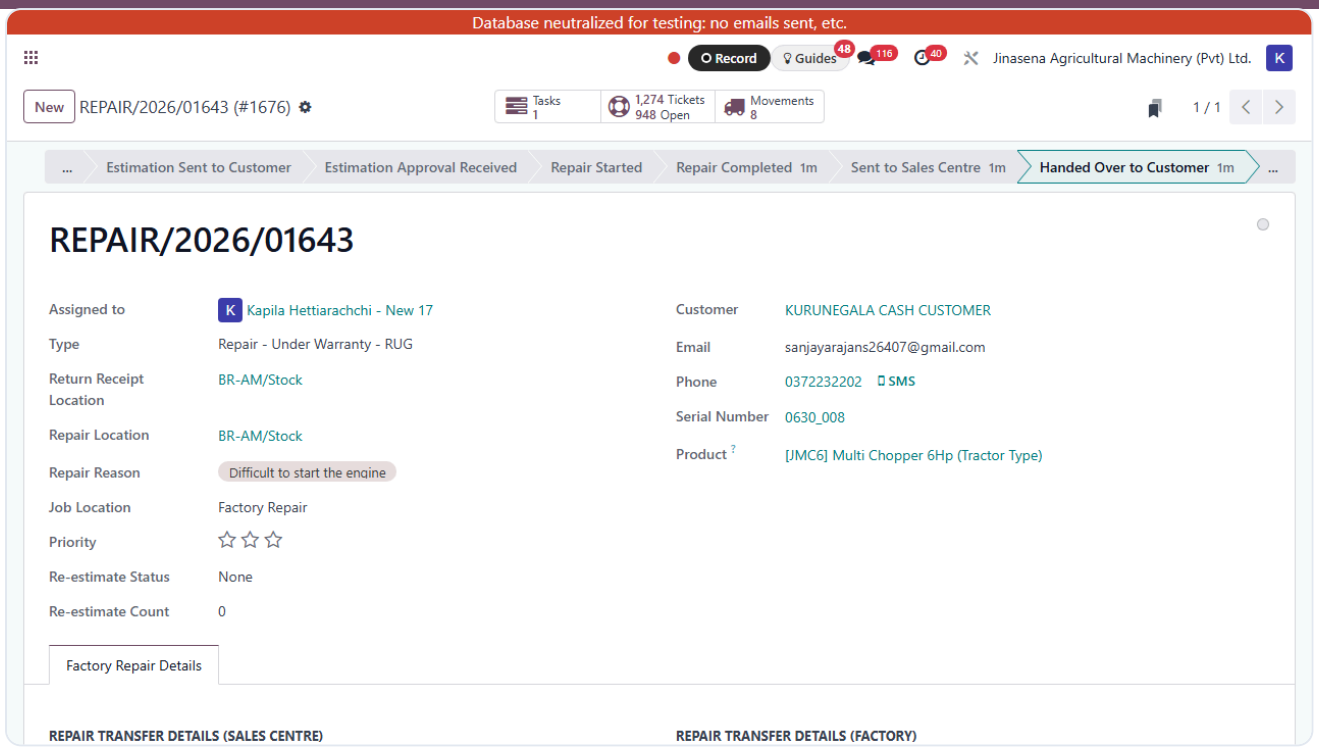

Navigation Returned Picking dialog (Done)

Action **Click Back to go to the ticket view.**

Description The ticket is now in *Handed Over to Customer* — the repair is complete.

Transfer dialog (Done) — Back button

Result: ticket in Handed Over to Customer, after the Back action

QA notes

- Steps 1-19 follow the "Approved Full Flow" (2A) guide: **Serial Number** and **Warranty Card** instead of *Create Serial No*. From the task onward this flow follows the Tested OK guide (1B): **Tested OK** replaces diagnosis / image / parts / quotation / RUG approval / deliveries.
- The Serial Number field only offers serials already sold to a customer. The tour typed its own serial; the automated run picks a sold serial of the product with zero on-hand quantity and a clean history (this run used `0630_008`). The Product field is filled from the serial, so there is no separate Product step.
- The **Return** button (`fix_repair_action_direct_return`) raises "You may only return Done pickings" server-side but still creates the Returned Picking first. The automated run swallows the error, then validates the receipt via `/web/dataset/call_kw` (the picking's Validate button is hidden/unreliable under the Studio views). The receipt opens as a full page, so the Back screenshot (step 15) shows the Done receipt without a framed button.
- **Send to Sales Centre** and **Dispatch** become visible only after a full page reload once the previous action completes. A hash-only navigation does not refresh the record, so the automated flow uses `page.reload()` in a polling loop.
- Each screenshot is captured immediately before the step's action with the target element framed in red (a temporary CSS outline applied to the live element only for the capture); result screenshots (serial entered, warranty card attached, final ticket) have no box. Screenshots come from one clean, passing automated run against the staging instance.

- The "Add Data" toast notifications on the Tested OK screenshot (diagnosis/image not set) are expected for this shortcut path; they do not block the flow.
- The staging database is a temporary Odoo.sh environment, automatically deleted on 12 October 2026; regenerate the screenshots on the production instance if needed.
