Repair User Guide — Branch

Type 1: Under Warranty - RUG - Tested OK

Source: Odoo Tour Recorder export — `Tour/2F. Repair User Guide - Branch [ Under Warranty - RUG - Tested Ok ].json`

Scenario: The product is under warranty and has a serial number and a warranty card. It is checked at the **branch repair centre**: the technician presses **Tested OK**, marks the task as done and the item is dispatched back to the customer.

Every screenshot below is a real capture from a single, clean, passing automated run — taken *before* each step's action, with the element to use framed in red.

1. Overview

This manual explains how to register and complete a **branch** (Centre Repair) repair for a product that is **under warranty** (RUG) and is found to be working (**Tested OK**), from the Helpdesk ticket through the repair task to dispatch back to the customer.

Ticket stages covered

New | Plan Intervention | Task done | Handed Over to Customer

Before you start

- You have access to the Helpdesk, Field Service and Inventory apps.
- The active company (top bar) is **Jinasena Agricultural Machinery (Pvt) Ltd.**
- The customer and the finished product (with its serial number, already sold through a sales order) already exist in Odoo.
- The customer has brought the item to the branch and a photo of the warranty card is available.

Example data used in this manual

Field	Value
Type	Repair - Under Warranty - RUG
Return Receipt Location	BR-AM/Stock (Jinasena Ampara Branch)
Repair Reason	Difficult to start the engine
Job Location	Centre Repair
Customer	KURUNEGALA CASH CUSTOMER
Serial Number	0630_009 (Product [JMC6] Multi Chopper 6Hp (Tractor Type) is filled automatically)
Warranty Card	Image of the customer's warranty card
Result	Tested OK - no paid repair, item dispatched back to the customer

How to read each step

Navigation	Where you are in Odoo (app › menu › screen / dialog).
Action	What to click, select, or type.
Description	Why the step is needed and what happens.
Screenshot	The screen you are on *right before* performing the action, with the element to use framed in red.

Step summary

Section	Steps	Purpose
A	1–12	Open Helpdesk, create the ticket, classify it as Under Warranty - RUG, enter the serial number and attach the warranty card.
B	13–15	Return the item into stock and validate the receipt.
C	16–17	Create the Field Service task for the repair technician.
D	18–20	The technician confirms the item works, marks the task as done and closes it.

E	21–23	Dispatch the tested item back to the customer.

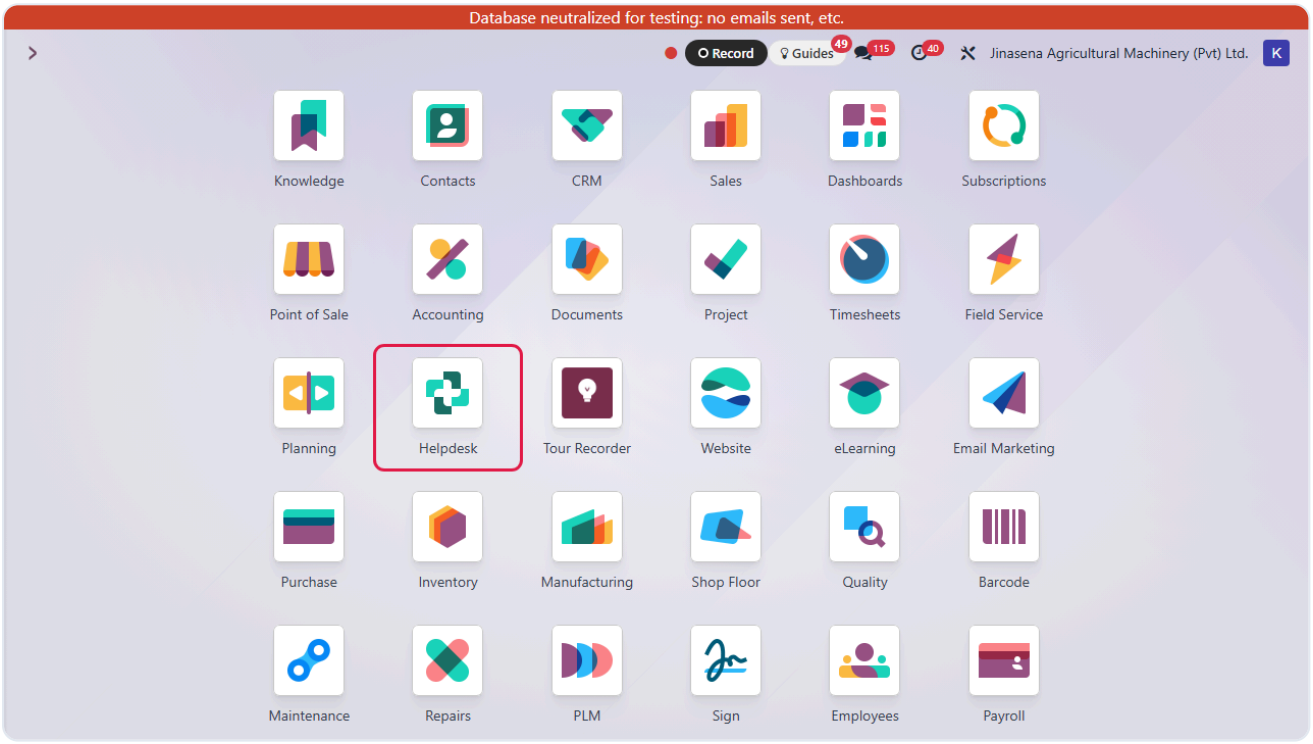

Section A — Create the Repair Ticket (Steps 1–12)

1 Open the HelpDesk app

Navigation Odoo Home → Apps

Action **Click the Helpdesk app icon on the home screen.**

Description Opens the Helpdesk Overview dashboard, showing every support team you have access to.

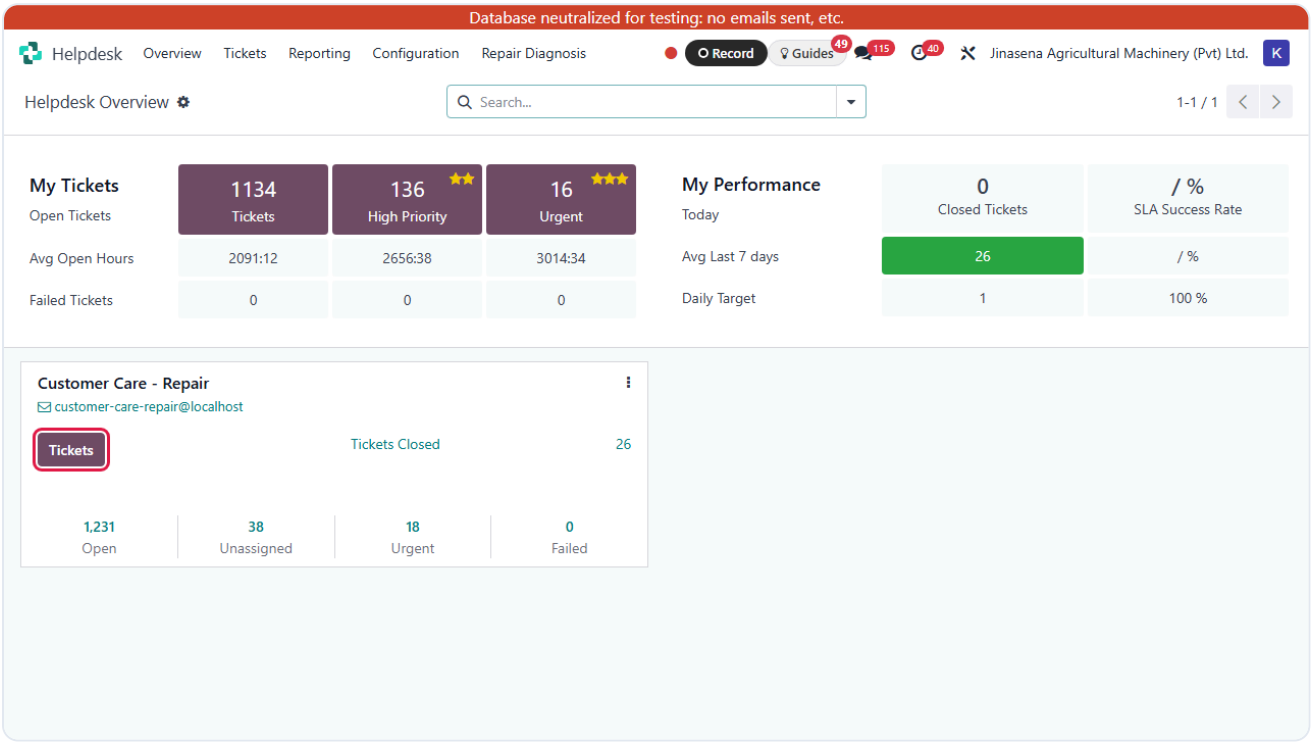

Odoo Apps home screen — Helpdesk app icon

2 Open the repair tickets

Navigation Helpdesk → Overview → Customer Care - Repair

Action **On the Customer Care - Repair team card, click Tickets.**

Description Displays the created tickets and their information.

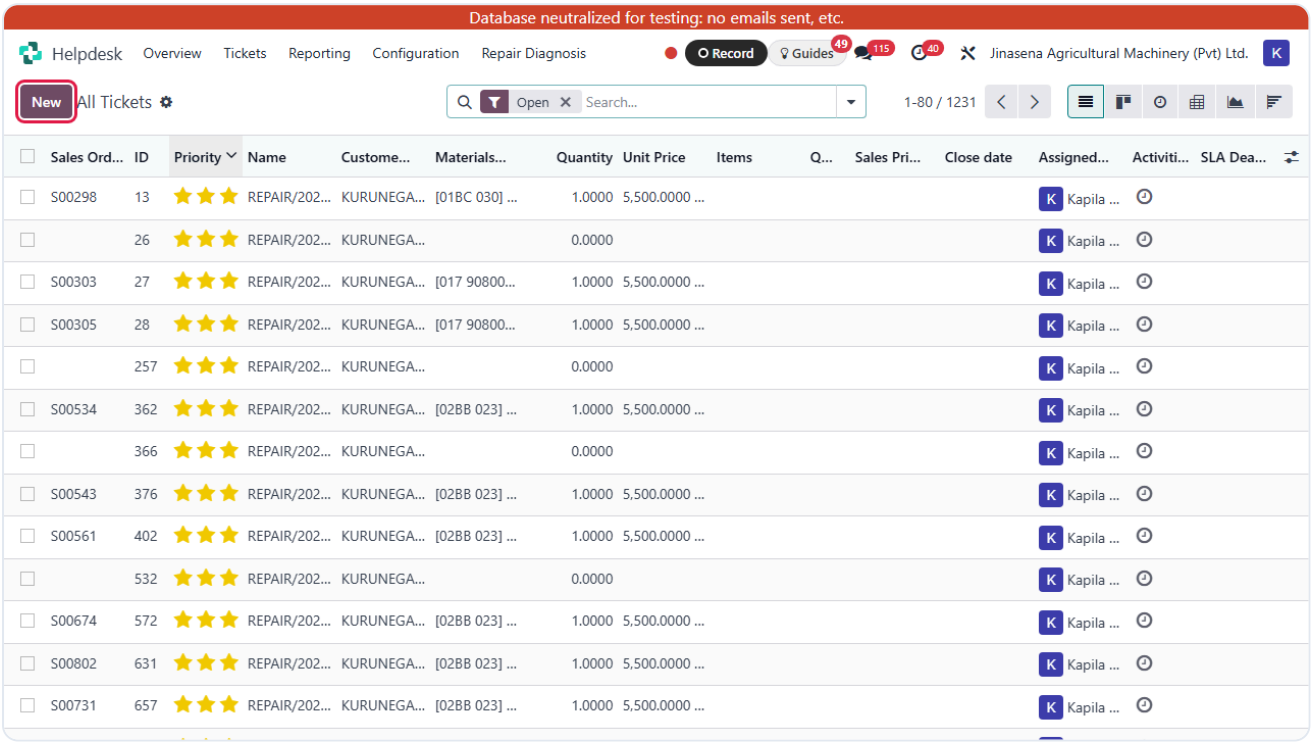

Helpdesk Overview — Tickets button on the Customer Care - Repair team card

3 Create a new ticket

Navigation Helpdesk → Customer Care - Repair (Tickets)

Action **Click New at the top-left of the ticket list.**

Description Opens a blank Helpdesk ticket form for the repair item received from the customer.

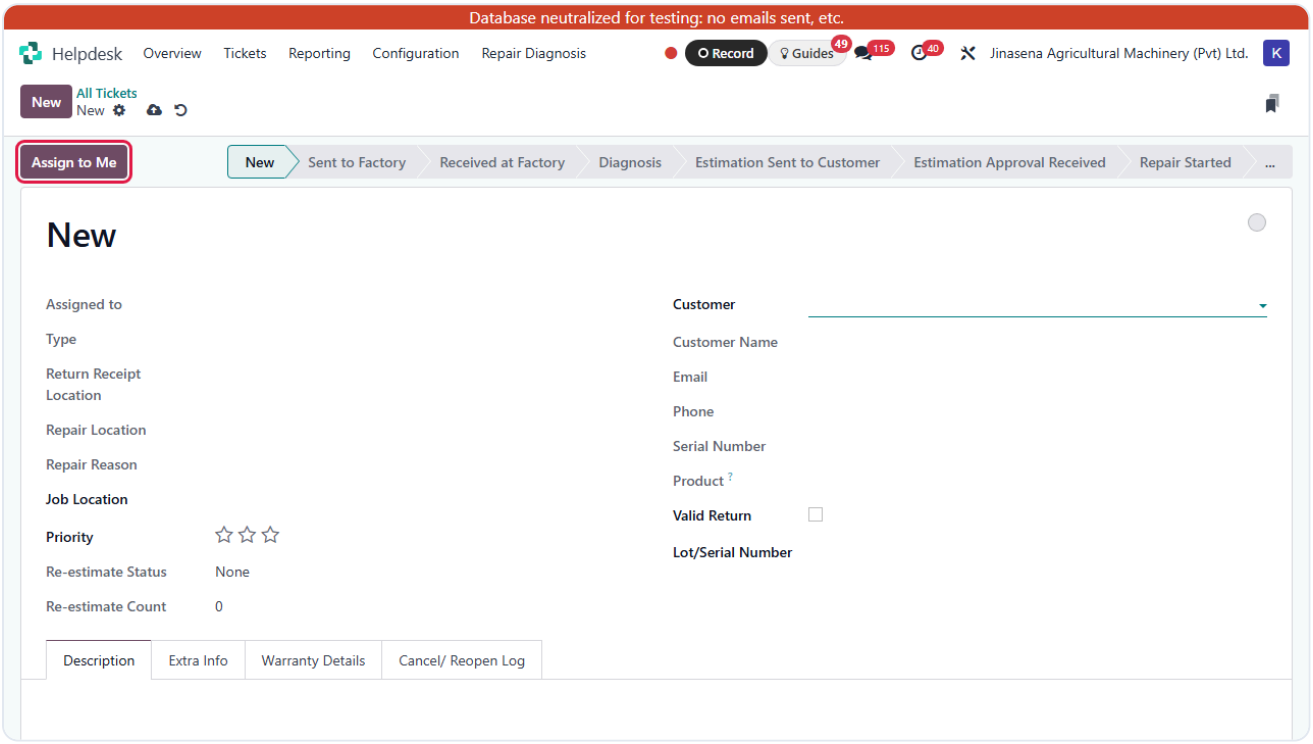

All Tickets list — New button

4 Assign the ticket to yourself

Navigation New ticket form

Action **Click Assign to Me in the status bar.**

Description Saves the ticket for the first time and assigns it to the current user. This also generates the ticket's sequence-based name (e.g. `REPAIR/2026/01645`) — the ticket has no user-editable title.

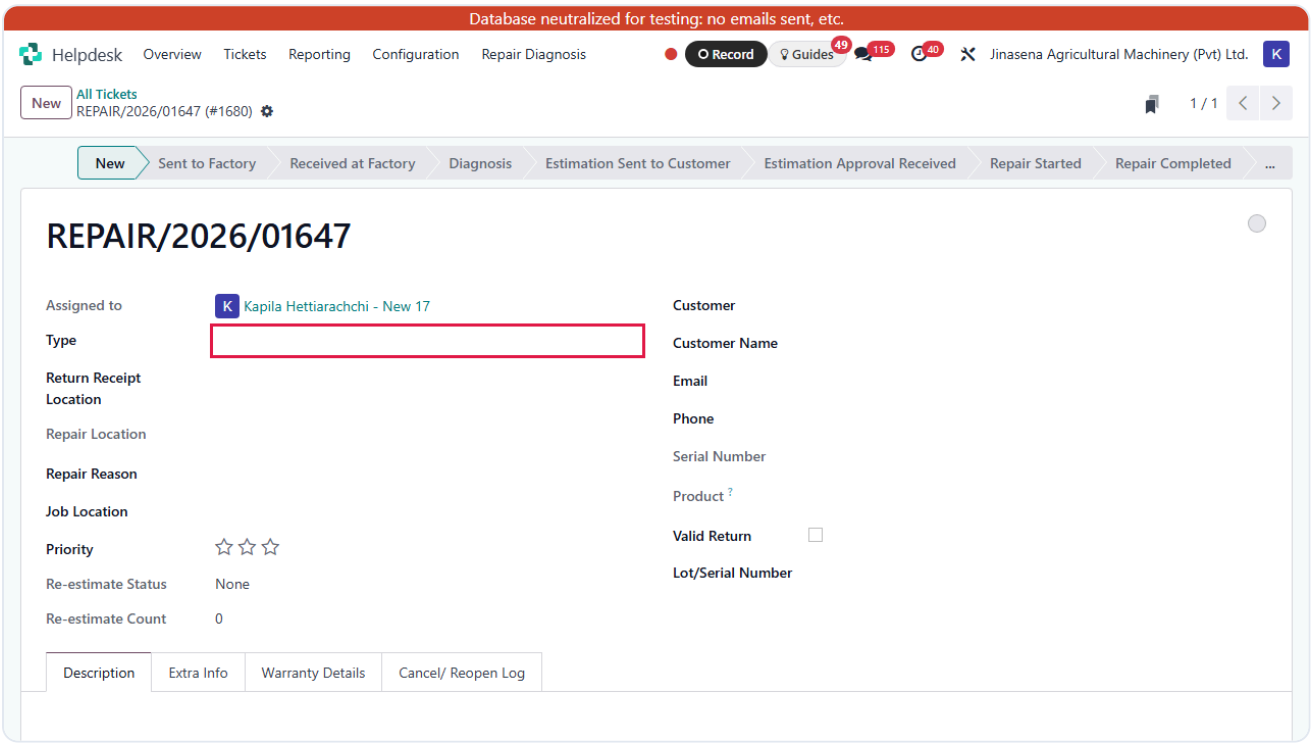

Blank new ticket form — Assign to Me button

5 Set the repair Type

Navigation Ticket form → Type field

Action **Click the Type field and select Repair - Under Warranty - RUG.**

Description Selects the *Under Warranty - RUG* flow: the product is still under warranty and the repair is carried out at the company's cost under the RUG facility. For this type a **Serial Number** and a photo of the **Warranty Card** are required (there is no *Create Serial No* button).

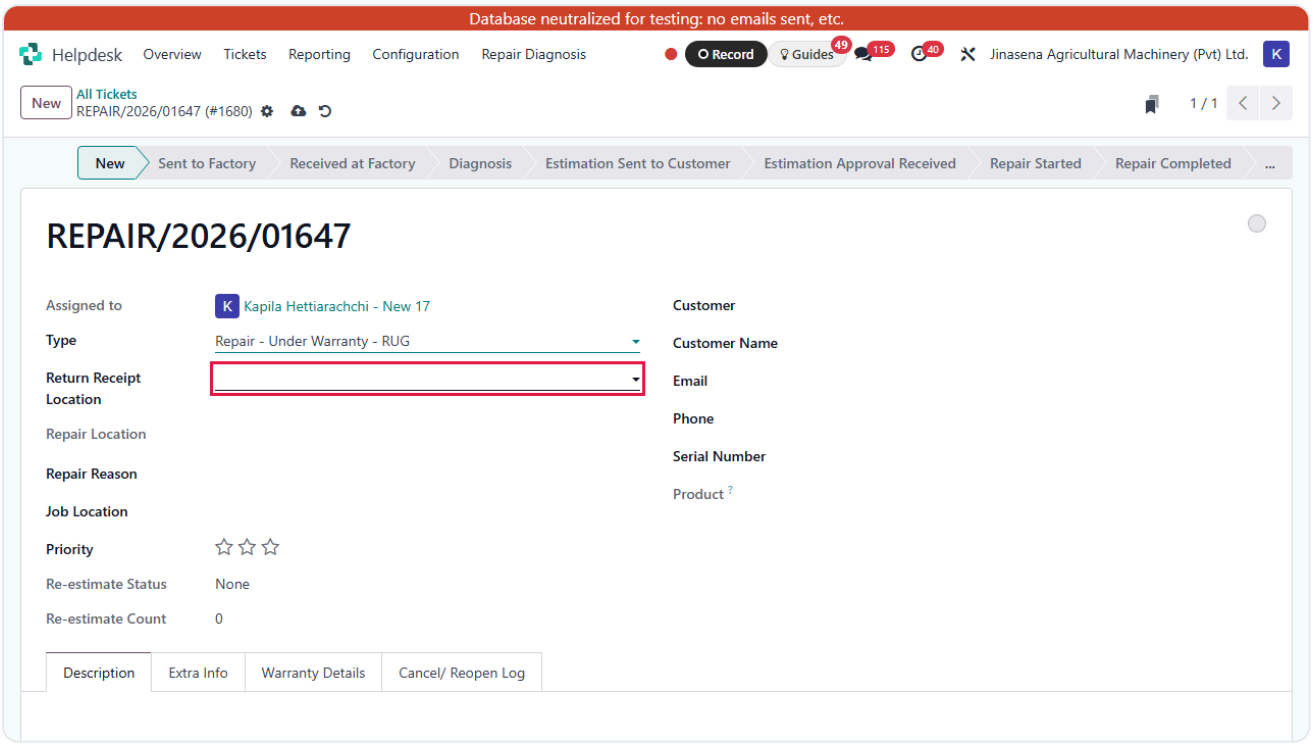

Ticket form — Type field

6 Set the Return Receipt Location

Navigation Ticket form → Return Receipt Location field

Action **Click Return Receipt Location and select the branch receiving the item (e.g. `BR-AM/Stock`, Jinasena Ampara Branch).**

Description The location where the item is received for repair.

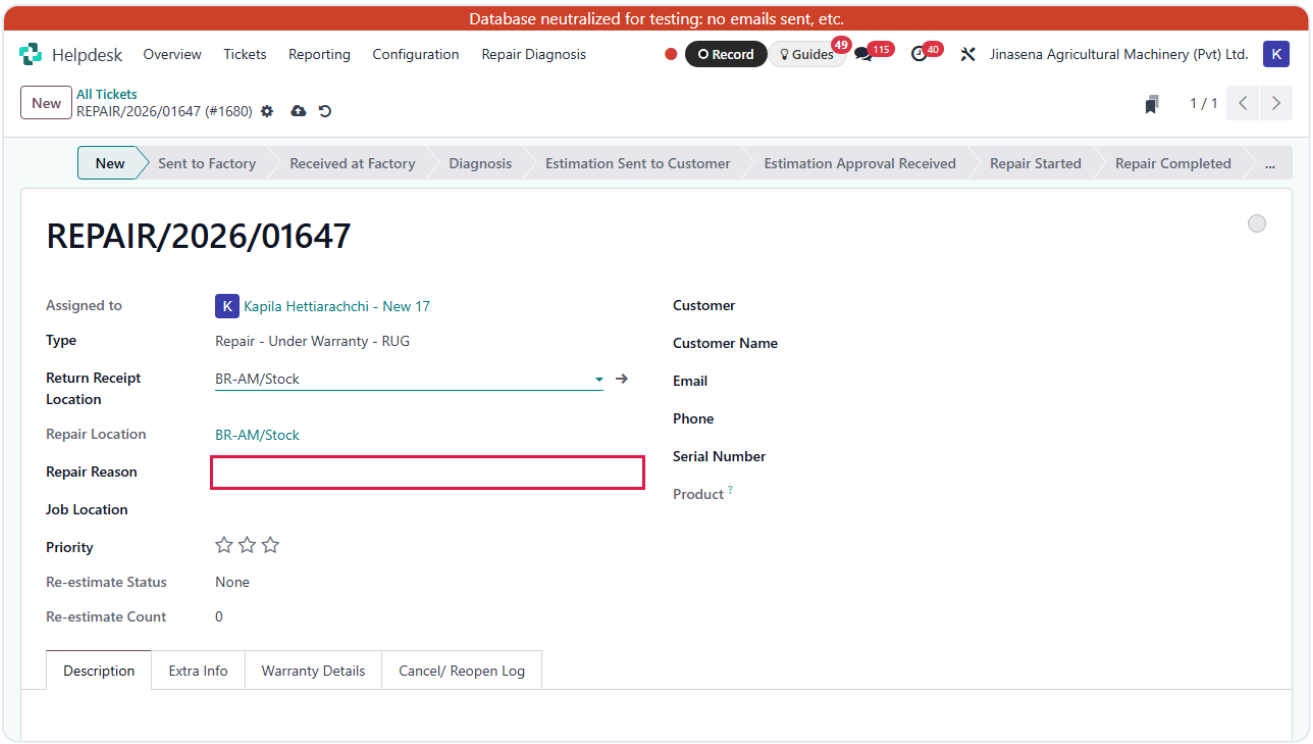

Ticket form — Return Receipt Location field

7 Select the Repair Reason

Navigation Ticket form → Repair Reason field

Action **Click Repair Reason and select the reported fault (e.g. `Difficult to start the engine`).**

Description A list of common errors is provided; select the ones that apply. This is a tags field.

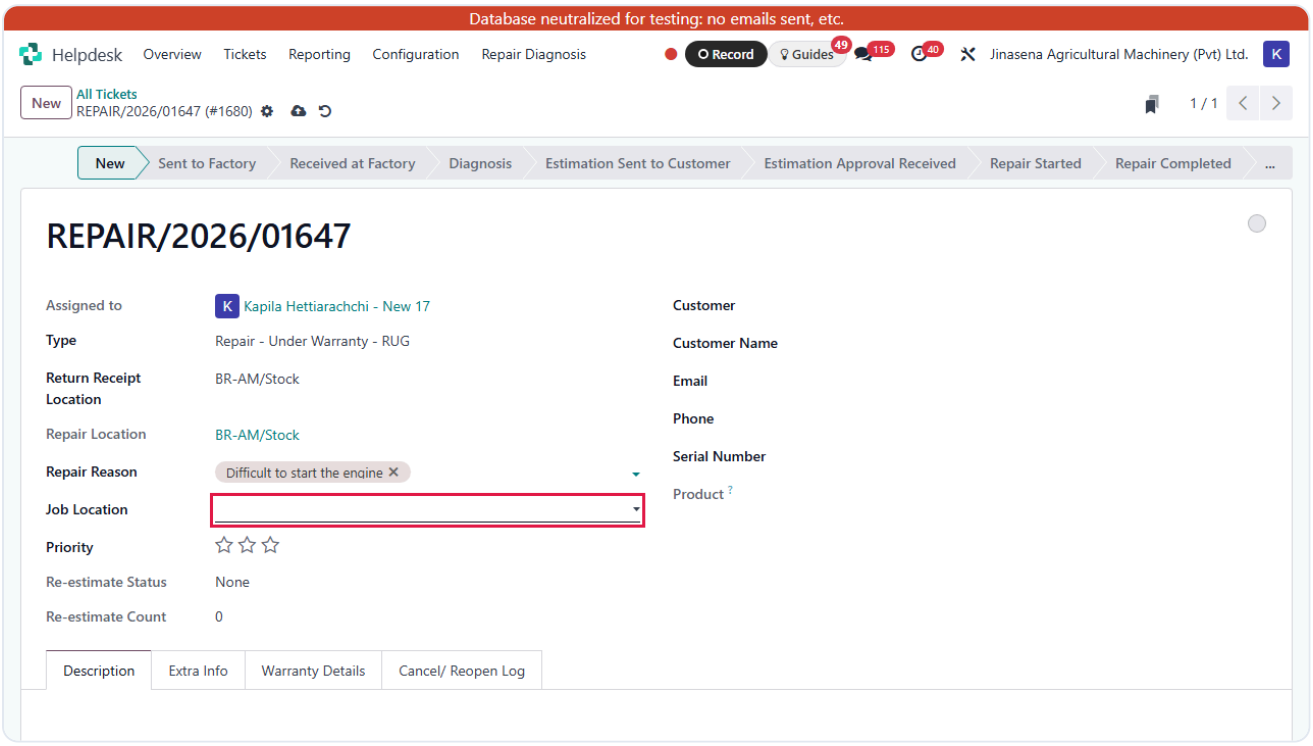

Ticket form — Repair Reason field

8 Select the Job Location

Navigation Ticket form → Job Location field

Action **In Job Location, select Centre Repair.**

Description Defines where the repair will be performed. **Centre Repair** means the repair is done at the branch repair centre itself.

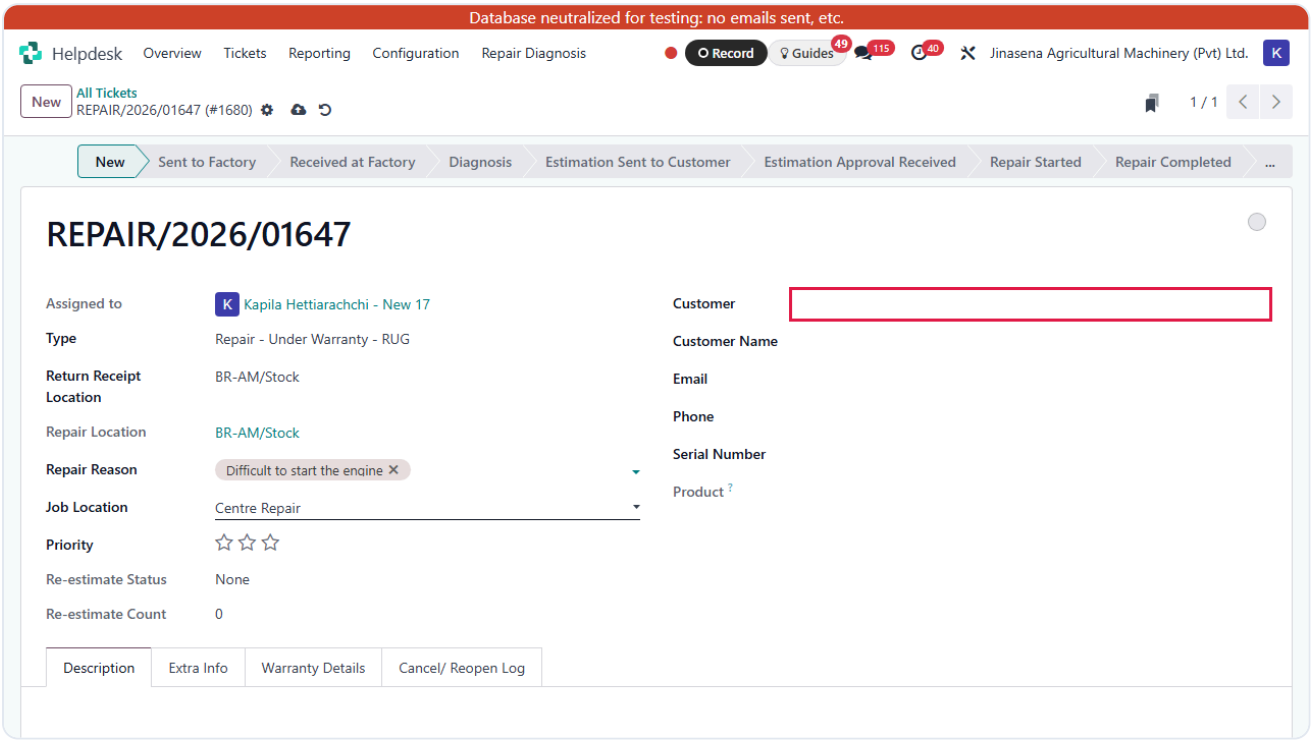

Ticket form — Job Location field

9 Select the Customer

Navigation Ticket form → Customer field

Action **Click Customer and select `KURUNEGALA CASH CUSTOMER`.**

Description Email and Phone are filled automatically from the customer record.

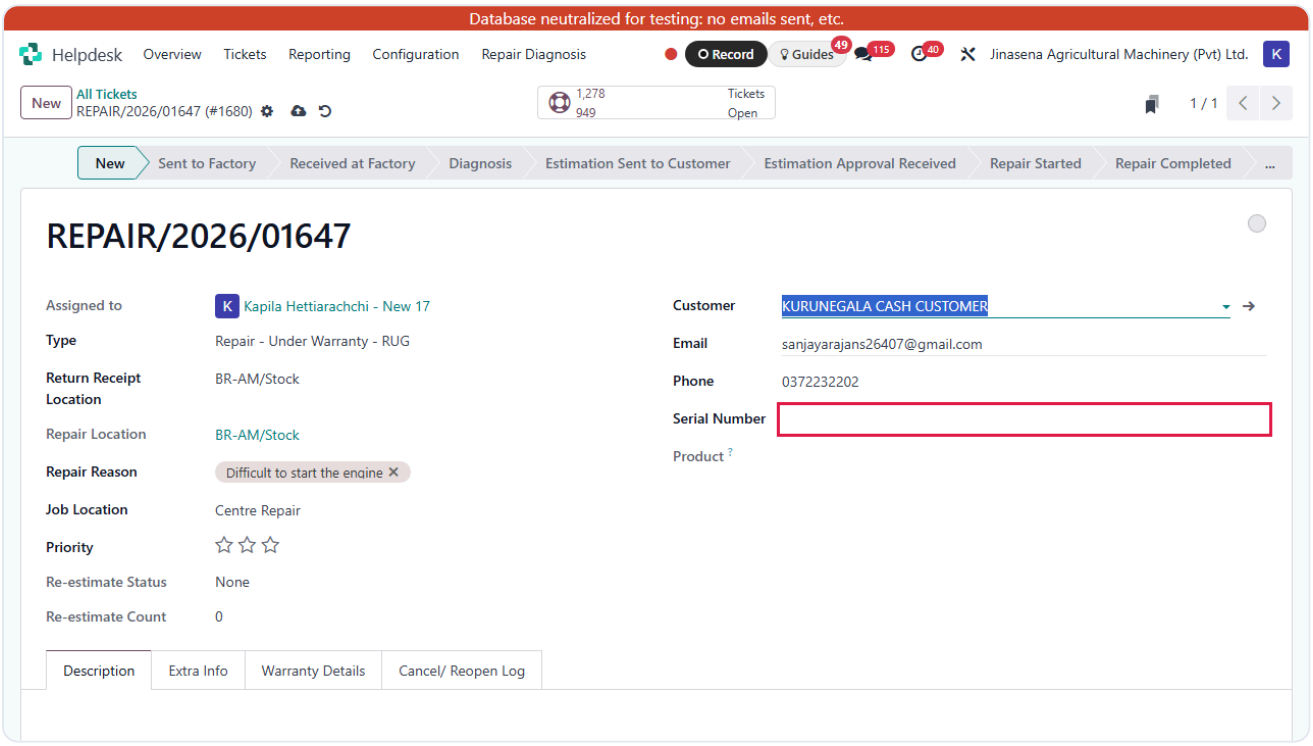

Ticket form — Customer field

10 Enter the Serial Number

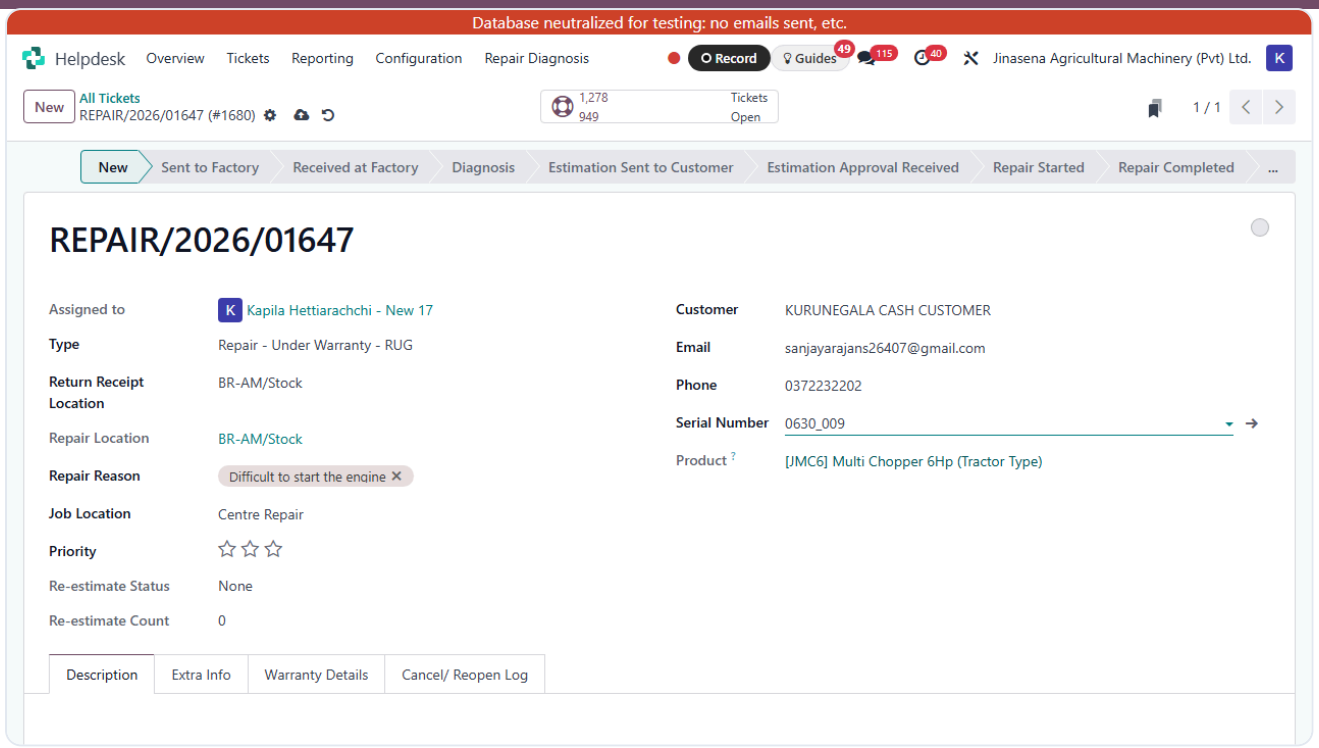

Navigation Ticket form → Serial Number field

Action **Click Serial Number, type the serial number of the finished product (e.g. `0630_009`) and select it from the list.**

Description Type the serial number of the finished product that was sold through a sales order; only serials already sold to a customer are offered. Selecting it fills in the **Product** automatically (here `[JMC6] Multi Chopper 6Hp (Tractor Type)`), so there is no separate Product step.

Ticket form — Serial Number field

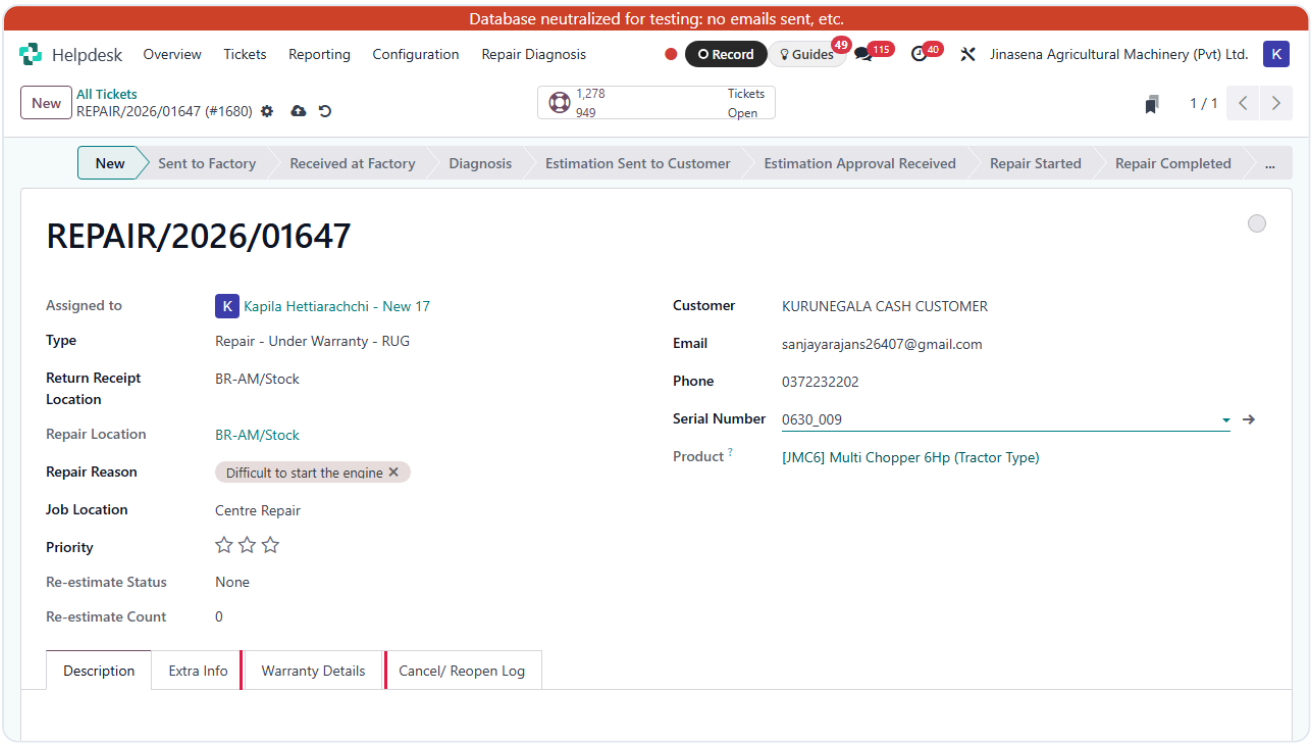

Ticket form — Serial Number entered, Product filled in

11 Open the Warranty Card tab

Navigation Ticket form → Warranty Details tab

Action **Click the Warranty Details tab.**

Description It is mandatory to attach one or two images of the warranty card; this tab holds the **Warranty Card** image.

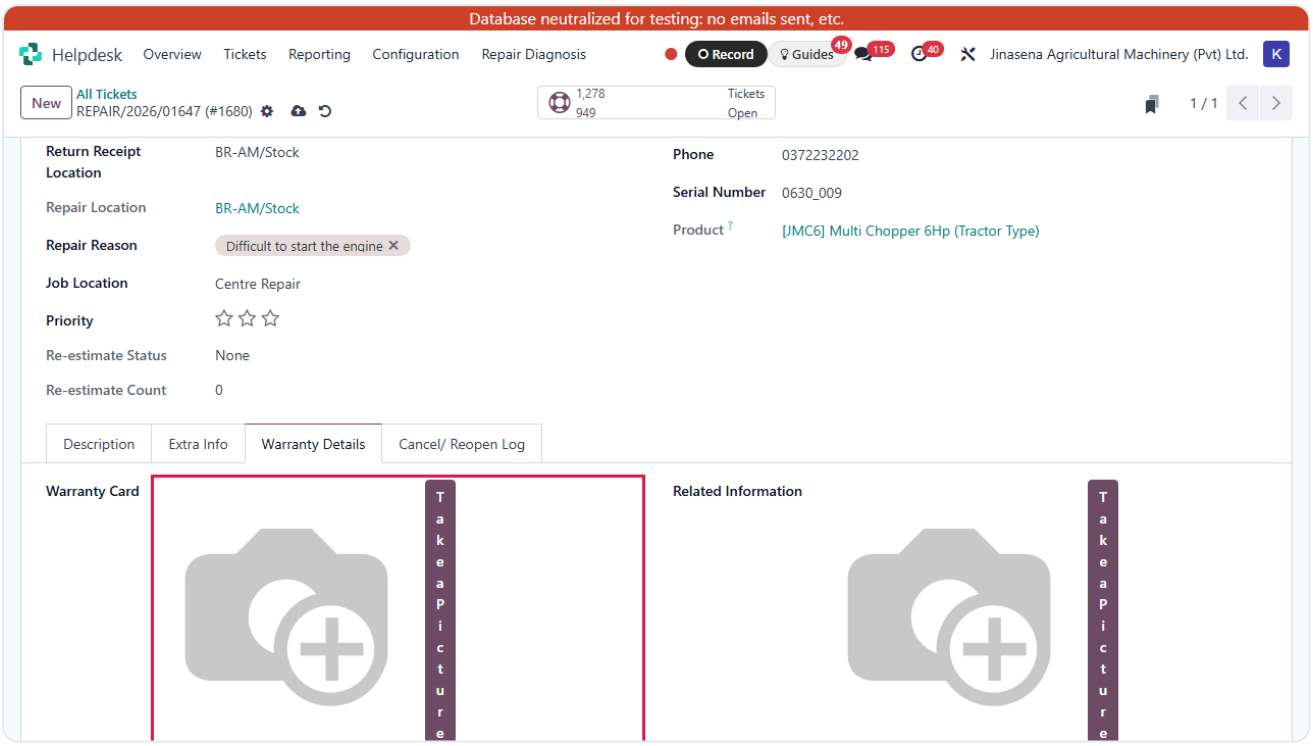

Ticket form — Warranty Details tab

12 Attach the warranty card image

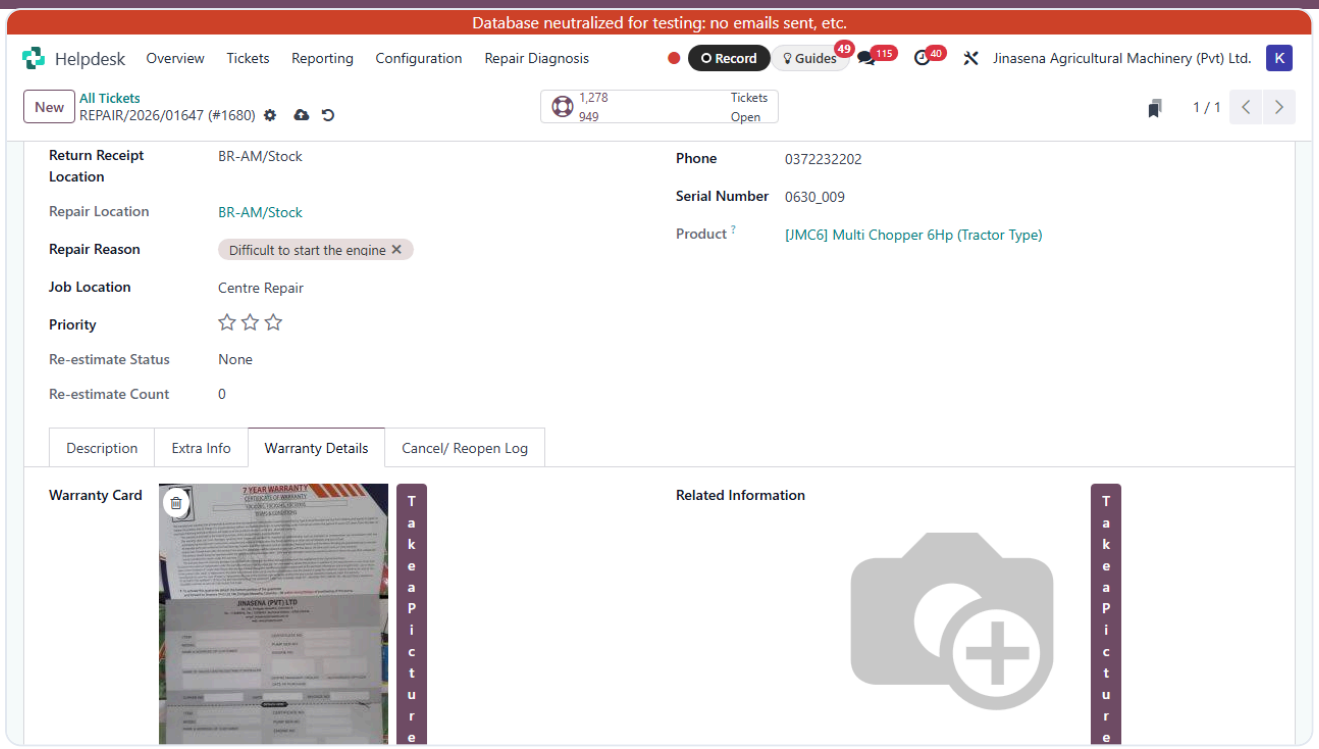

Navigation Ticket form → Warranty Details → Warranty Card

Action **Click the Warranty Card picture area, select the image file and click Open.**

Description Attaches the photo of the customer's warranty card to the ticket. The image is mandatory for this repair type.

Ticket form — Warranty Card image field

Ticket form — Warranty card attached

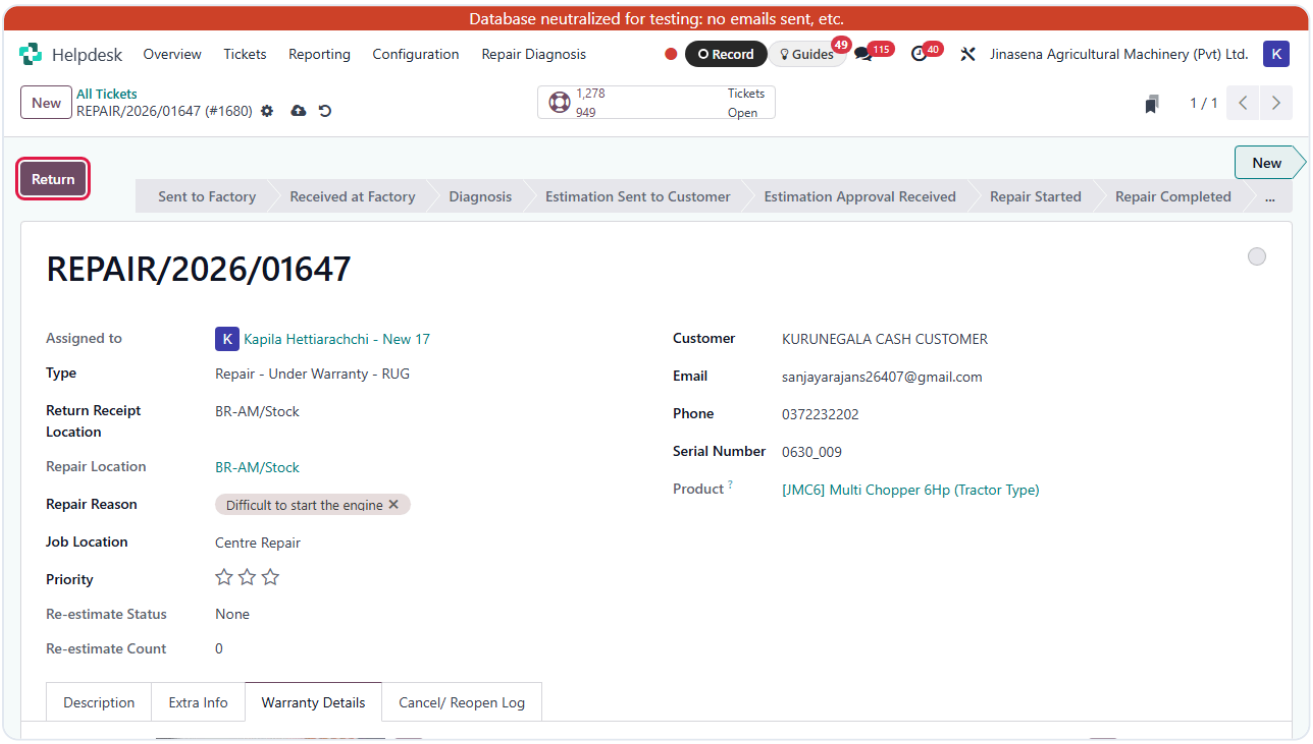

Section B — Receive the Item (Steps 13–15)

13 Return

Navigation Ticket form → status bar

Action **Click Return.**

Description Creates the return operation: the Returned Picking (receipt) for the item. (The server also raises "You may only return Done pickings" after creating it; see the QA notes.)

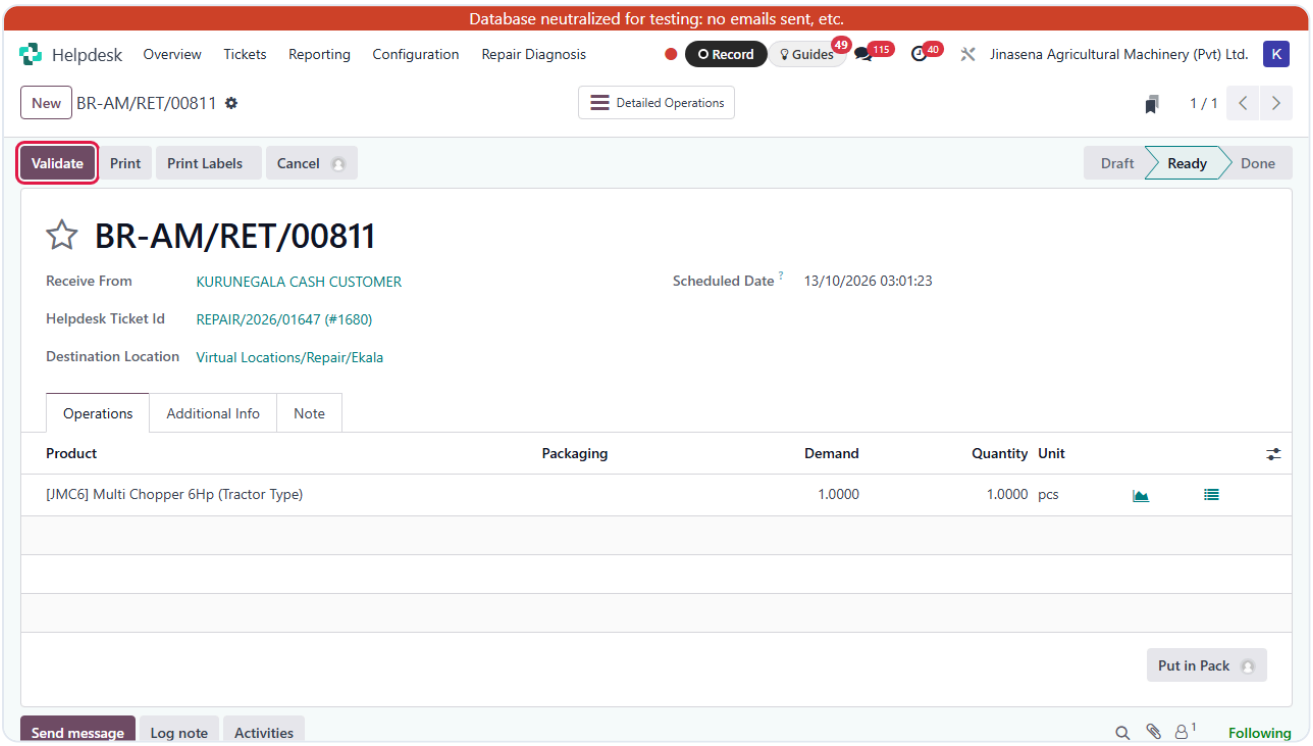

Ticket form — Return button

14 Validate the receipt

Navigation Transfer (Receipt) → header

Action **Click Validate.**

Description Validates the return operation: the item is received into stock and the transfer becomes *Done*.

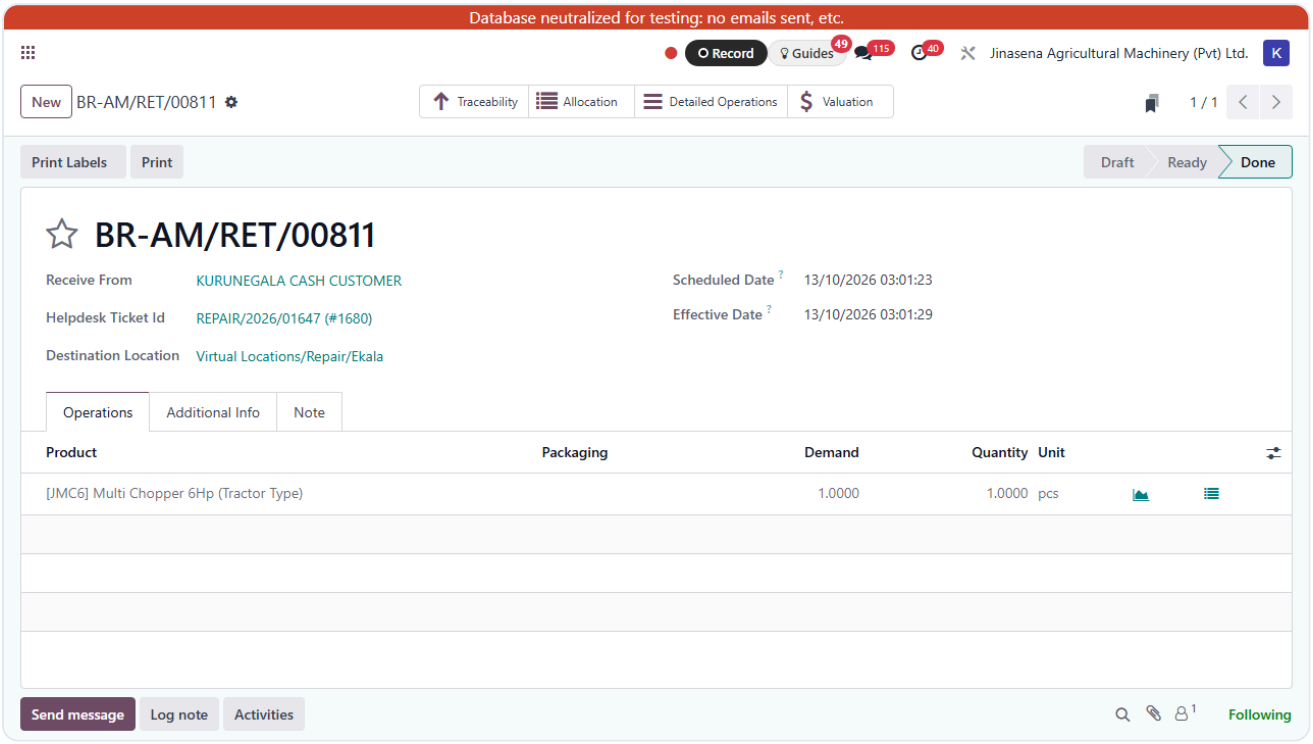

Transfer (Ready) — Validate button

15 Back

Navigation Transfer (Done)

Action **Click Back.**

Description Returns to the previous menu — the ticket view. The screenshot shows the receipt in the *Done* state; on this instance it opens as a full page, so there is no Back button to frame.

Transfer (Done)

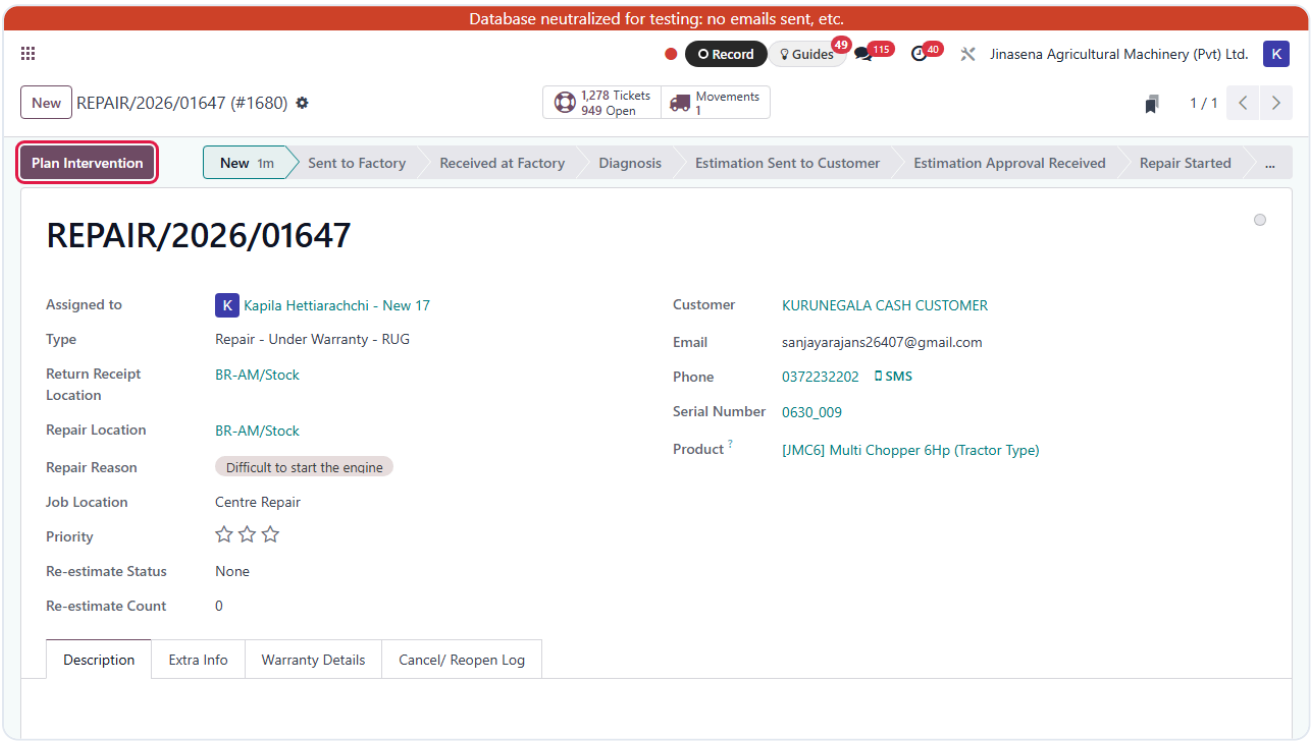

Section C — Plan the Task (Steps 16–17)

16 Plan Intervention

Navigation Ticket form → status bar

Action **Click Plan Intervention.**

Description To assign the job to a repair technician, create a Field Service task. Because the Job Location is *Centre Repair*, the ticket goes straight to this step once the item is received.

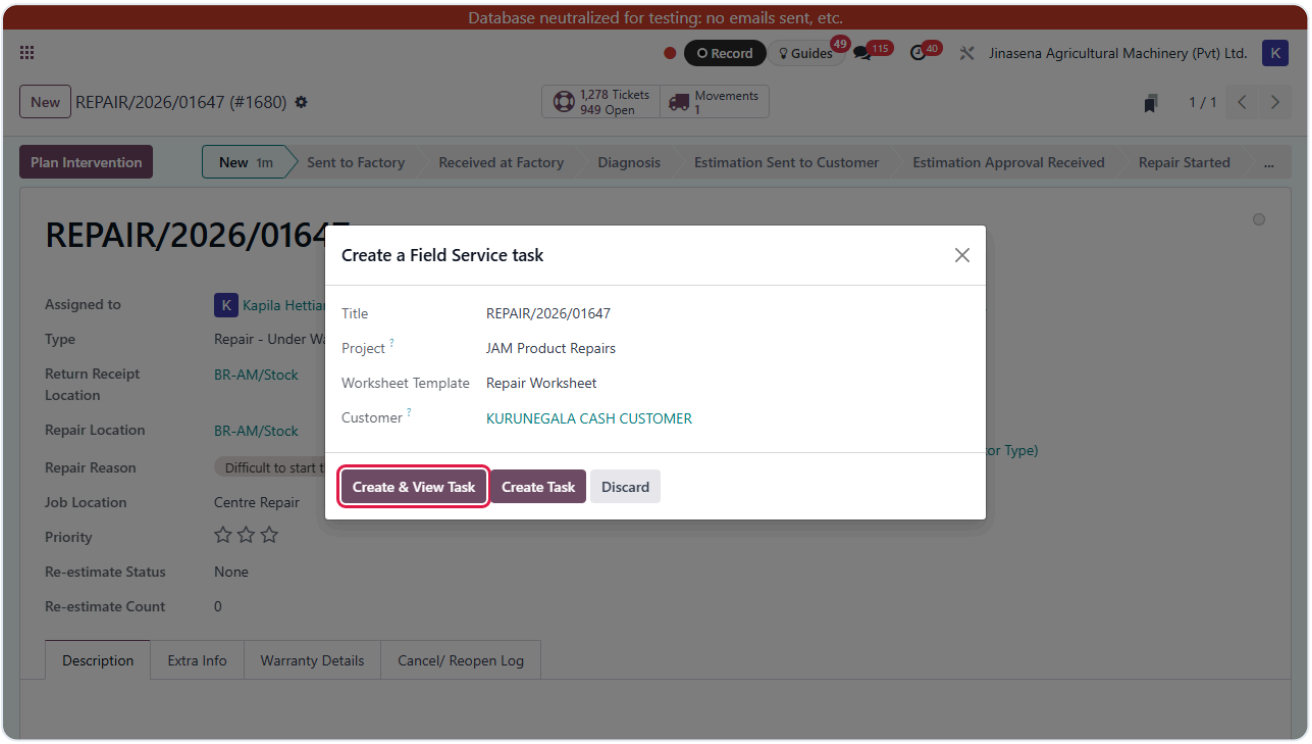

Ticket form — Plan Intervention button

17 Create & View Task

Navigation Create a Field Service task dialog

Action **Click Create & View Task.**

Description Creates the Field Service task and opens it so the technician can manage it.

Create a Field Service task dialog — Create & View Task button

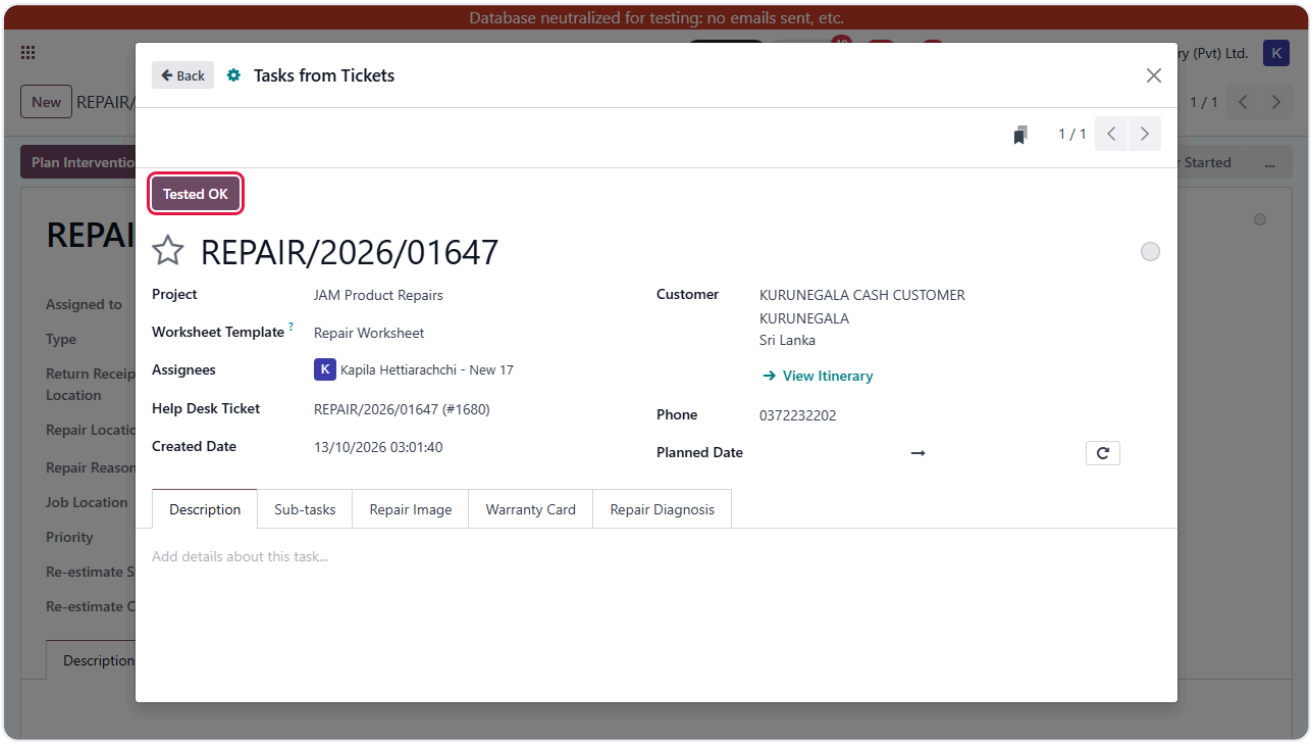

Section D — Tested OK and Task Completion (Steps 18–20)

18 Tested OK

Navigation Task form (opened by Create & View Task) → header

Action **Click Tested OK.**

Description If the repair item can be restored to its original condition through a process that has no monetary value, the item can be returned to the customer under this facility. The item is tested and found to be working, so it needs no paid repair.

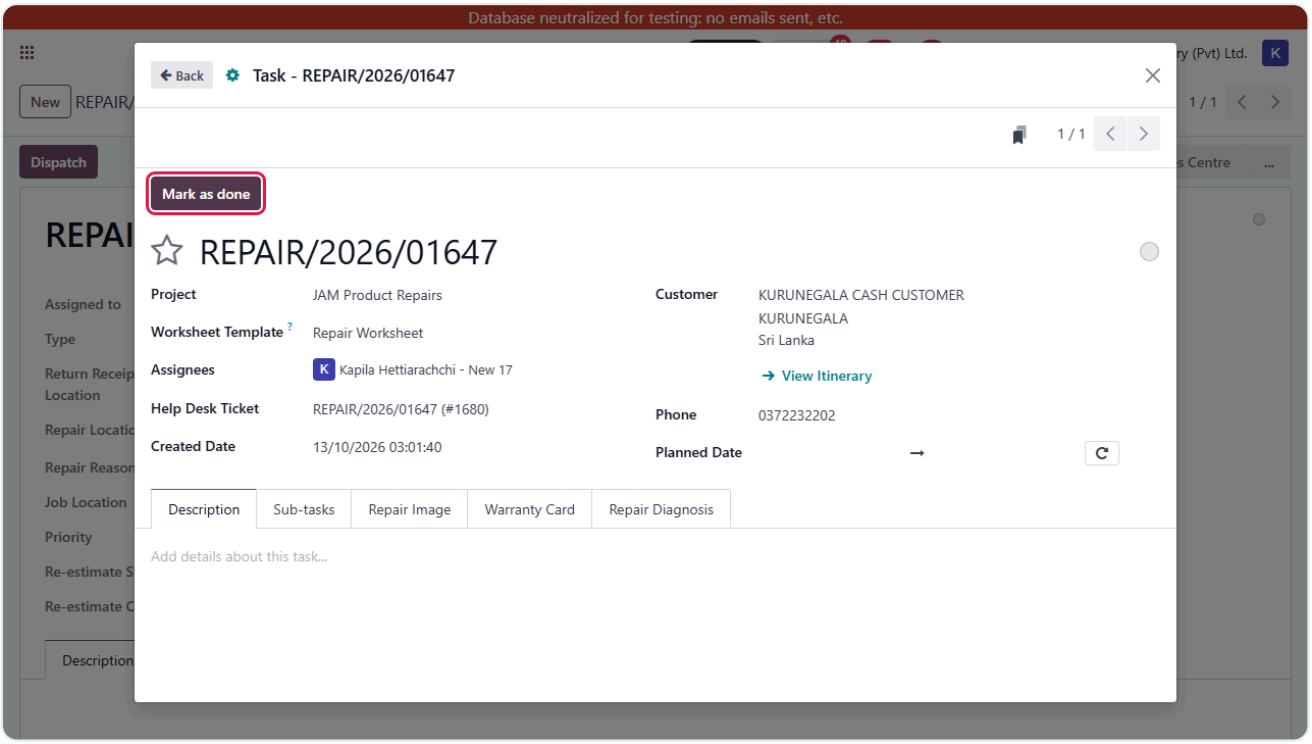

Task form — Tested OK button

19 Mark as done

Navigation Task form → header

Action **Click Mark as done.**

Description Ends the task: the work on it has been completed.

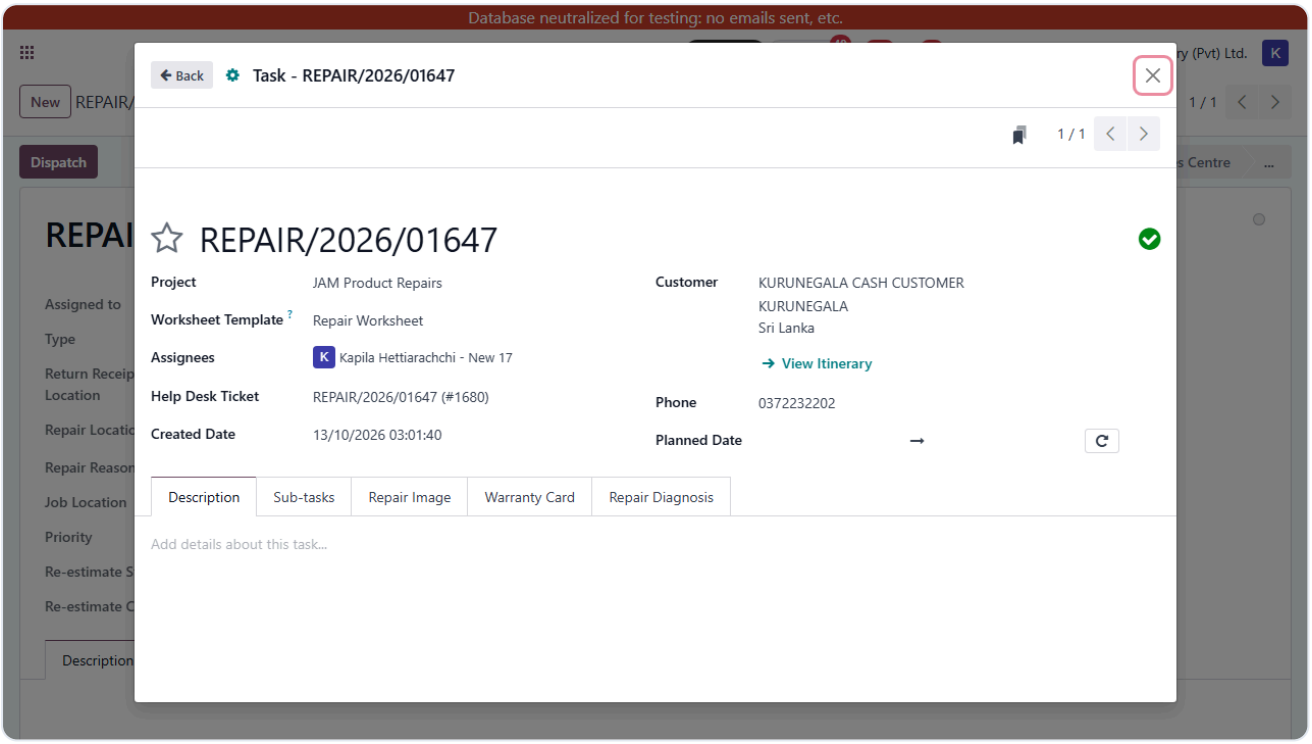

Task form — Mark as done button

20 Close the task

Navigation Task form (Done)

Action **Click Close.**

Description Closes the task window and returns to the ticket.

Task (Done) — Close

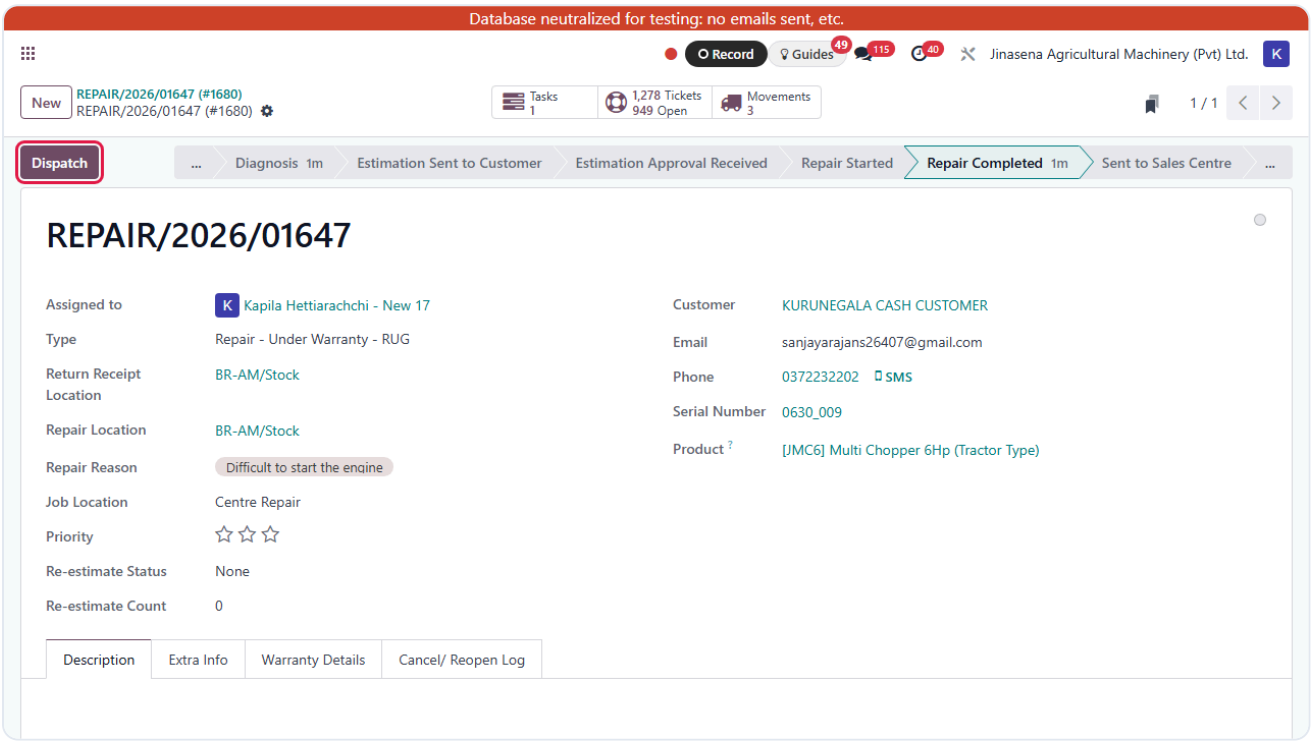

Section E — Dispatch (Steps 21–23)

21 Dispatch

Navigation Ticket form → status bar

Action **Click Dispatch.**

Description Processes the completed item back to the customer. The button appears once the task is done (you may need to refresh the page).

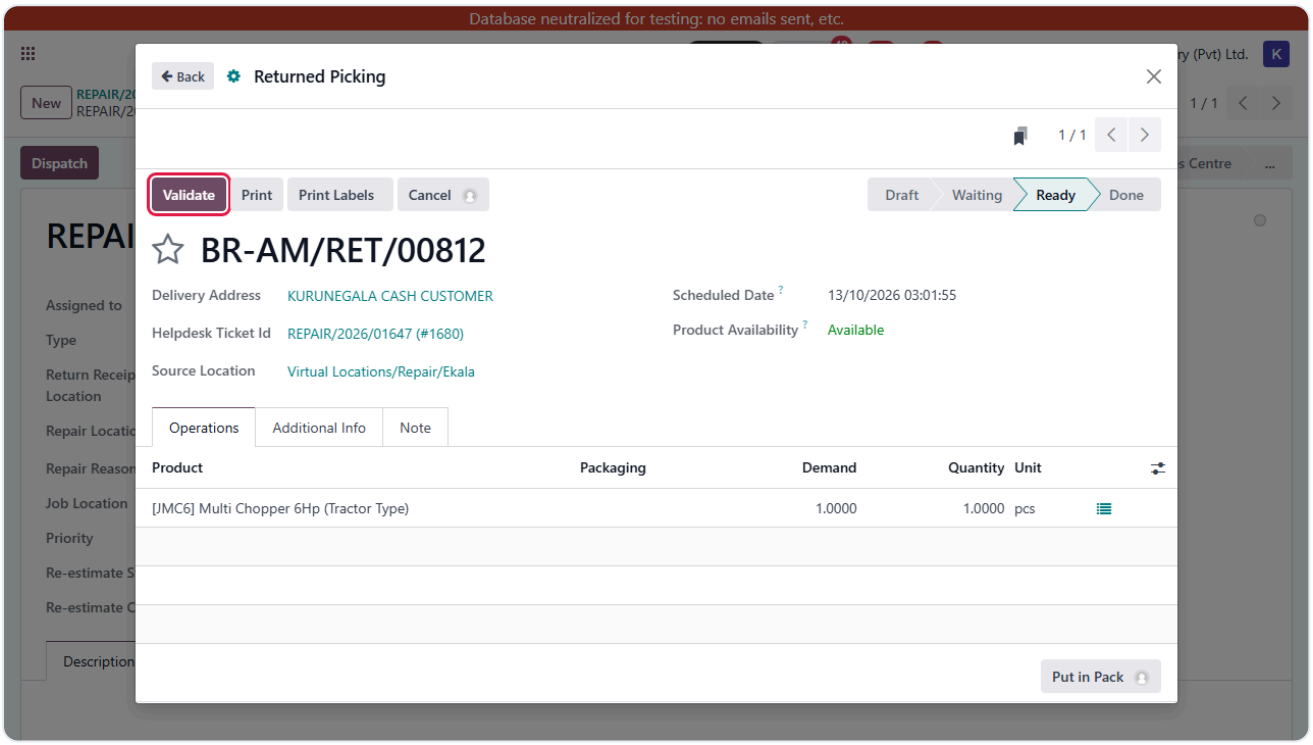

Ticket form — Dispatch button

22 Validate the dispatch

Navigation Returned Picking dialog → header

Action **Click Validate.**

Description Completes the return operation: the item leaves for the customer. The transfer becomes *Done*.

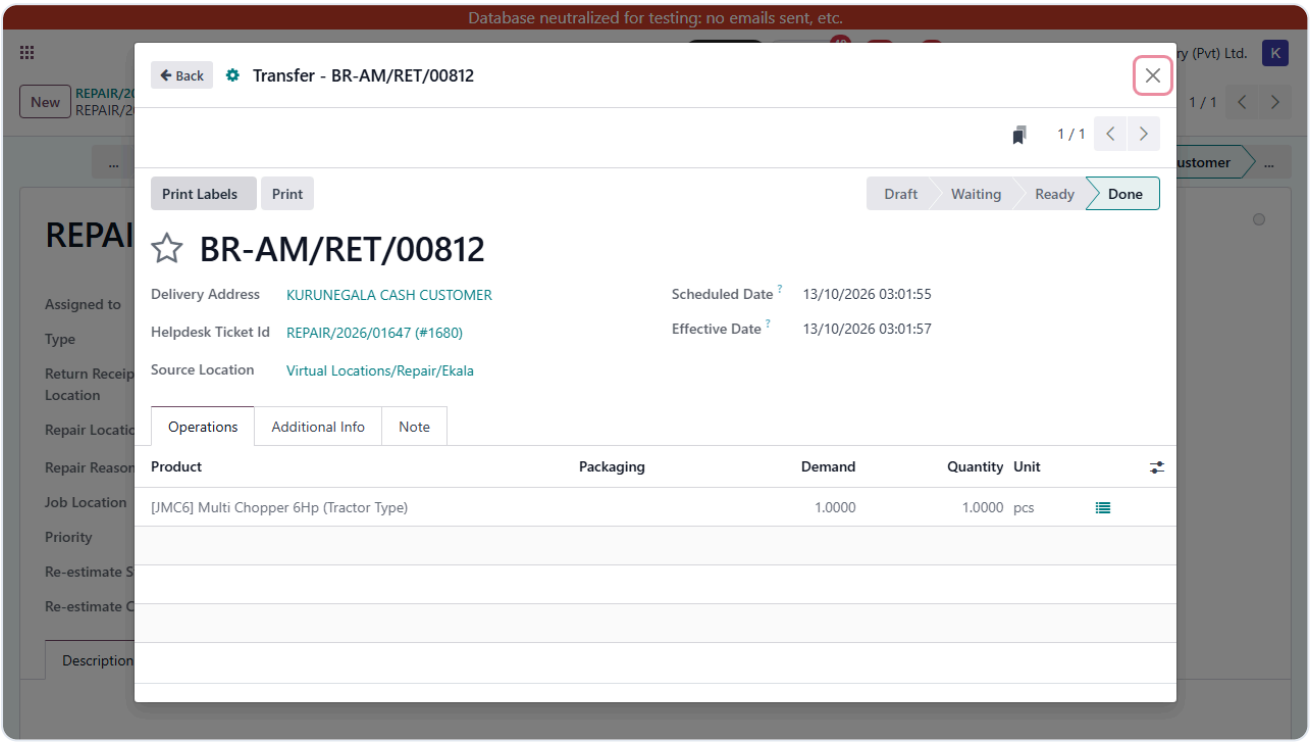

Returned Picking dialog (Ready) — Validate button

23 Close

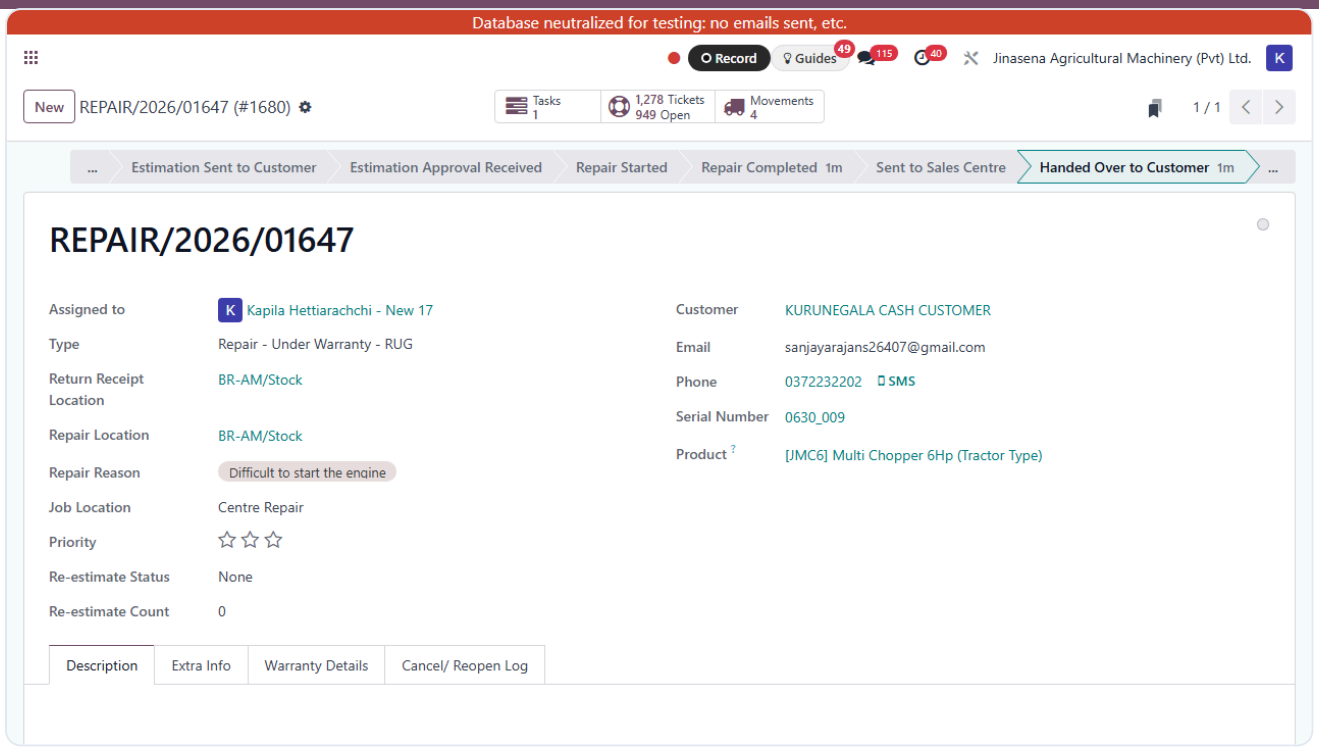

Navigation Returned Picking dialog (Done)

Action **Click Close to go to the ticket view.**

Description The ticket is now in *Handed Over to Customer* — the repair is complete.

Transfer dialog (Done) — Close

Result: ticket after the Close action

QA notes

- This **Branch** variant of the Under Warranty - RUG flow uses **Job Location = Centre Repair**: after the item is received the ticket goes straight to **Plan Intervention**. The ticket needs a **Serial Number** and a **Warranty Card** image. The repair ends with **Tested OK** on the task, **Mark as done**, and **Dispatch** of the item back to the customer.
- The Serial Number field only offers serials already sold to a customer. The tour typed its own serial; as required by the test-data rules the automated run picks a serial of [JMC6] whose on-hand quantity is zero (this run used `0630_009`), skipping serials that still hold stock in a Repair location from earlier unfinished runs, which would make the final Dispatch fail. The Product field is filled from the serial, so there is no separate Product step.
- The tour and the test-data rules agree on the Repair Reason (`Difficult to start the engine`) and the customer. The Warranty Card image is uploaded from the project's `WarrantyCard.jpg`. The tour's photo step on the Warranty Details tab is the warranty card upload.
- The **Return** button (`fix_repair_action_direct_return`) raises "You may only return Done pickings" server-side but still creates the Returned Picking first. The automated run clicks the real button, falls back to the same call via `/web/dataset/call_kw` if no picking appears, and validates the receipt through RPC (the receipt's Validate button is unreliable under the Studio views). The receipt opens as a full page, so the Back screenshot (step 15) shows the Done receipt without a framed button.
- After **Create & View Task** the task window stays open and **Tested OK** is clicked directly in it. The **Dispatch** button appears only after a full page reload once the task is done, so the automated flow

reloads in a polling loop.

- Each screenshot is captured immediately before the step's action with the target element framed in red (a temporary CSS outline applied to the live element only for the capture); result screenshots (serial entered, warranty card attached, final ticket) have no box. Screenshots come from one clean, fully-passing automated run (admin role).
- Every screenshot shows a red "Database neutralized for testing: no emails sent, etc." banner at the top. This is expected on the test database and is not part of the normal production screen.
