Repair User Guide — Branch

Type 4: Under Warranty (External not RUG) — Full Flow (Centre Repair)

Source: Odoo Tour Recorder export — `Tour/4C. Repair User Guide - Branch [ Under Warranty ( External not RUG ) - Full Flow ].json`

Scenario: The product is still under warranty and has a serial number, but the damage is not covered by the warranty and it is not a RUG case (type Under Warranty - External not RUG). It is repaired at the branch's service centre (**Centre Repair**) at the customer's cost: the customer approves the quotation online, pays a 50% deposit in advance and the balance before the item is dispatched back.

Every screenshot below is a real capture from a single, clean, passing automated run — taken *before* each step's action, with the element to use framed in red.

1. Overview

This manual explains how to register and complete a **branch (Centre Repair)** repair for a customer's product that is **still under warranty** and has an existing **serial number**, but whose damage **is not covered by the warranty** and is not a RUG case (type **Under Warranty - External not RUG**). The process starts with a Helpdesk ticket at the receiving branch, records the repair through a Field Service task, quotes the spare part for the customer's online approval, collects a 50% deposit, collects the balance and ends when the item is dispatched back to the customer.

Ticket stages covered

New | Diagnosis | Estimation Sent to Customer | Estimation Approval Received | Advance Received | Repair Started | Repair Completed | Handed Over to Customer

Before you start

- You have access to the Helpdesk, Field Service, Inventory and Accounting apps.
- The active company (top bar) is **Jinasena Agricultural Machinery (Pvt) Ltd.**

- The customer and the finished product (with its serial number, already sold through a sales order) already exist in Odoo.
- The item has been physically brought to the branch by the customer.

Example data used in this manual

Field	Value
Type	Repair - Under Warranty - External not RUG
Return Receipt Location	BR-AM/Stock (Jinasena Ampara Branch)
Repair Reason	Difficult to start the engine
Job Location	Centre Repair
Customer	KURUNEGALA CASH CUSTOMER
Serial Number	0701_002 (Product [JMC6] Multi Chopper 6Hp (Tractor Type) is filled automatically)
Spare Part	[02BB 023] BALL BEARING 6202-2RS
Payment Journal	Commercial Bank
Deposit / Balance	50% deposit, then the remaining balance

How to read each step

Navigation	Where you are in Odoo (app › menu › screen / dialog).
Action	What to click, select, or type.
Description	Why the step is needed and what happens.
Screenshot	The screen you are on *right before* performing the action, with the element to use framed in red.

Step summary

Section	Steps	Purpose

A	1–10	Open Helpdesk, create the ticket and classify it (type, locations, reason, customer) and select the serial number of the finished product.
B	11–13	Return the item into stock and validate the receipt.
C	14–15	Plan the intervention and create the Field Service task (Centre Repair: no factory leg).
D	16–28	The technician records the diagnosis, attaches a photo of the item and adds the spare part.
E	29–32	Open the quotation, send it to the customer by email and confirm it when the customer accepts.
F	33–39	Company policy: a 50% deposit must be paid in advance before the repair proceeds.
G	40–47	Validate the delivery of the repair part and complete the repair task.
H	48–54	Collect the remaining balance from the customer.
I	55–57	Dispatch the repaired item back to the customer.

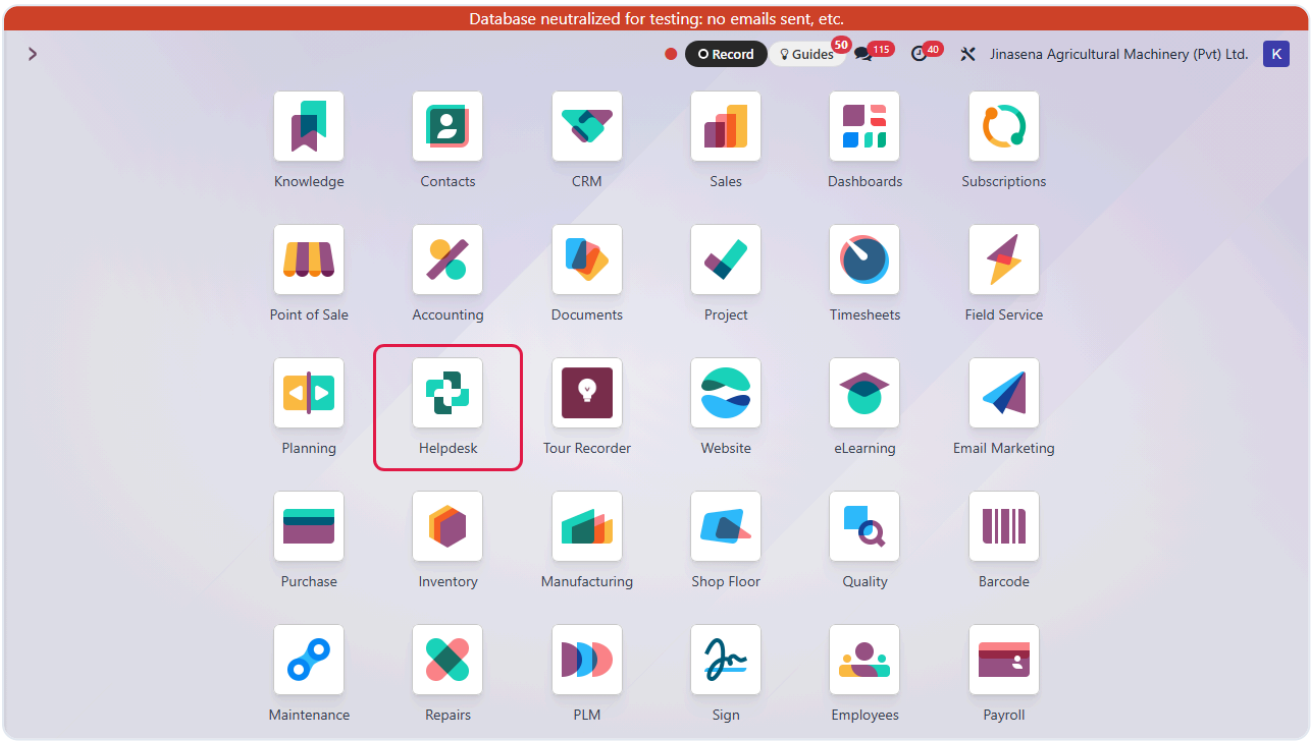

Section A — Create the Repair Ticket (Steps 1–10)

1 Open the HelpDesk app

Navigation Odoo Home → Apps

Action **Click the Helpdesk app icon on the home screen.**

Description Opens the Helpdesk Overview dashboard, showing every support team you have access to.

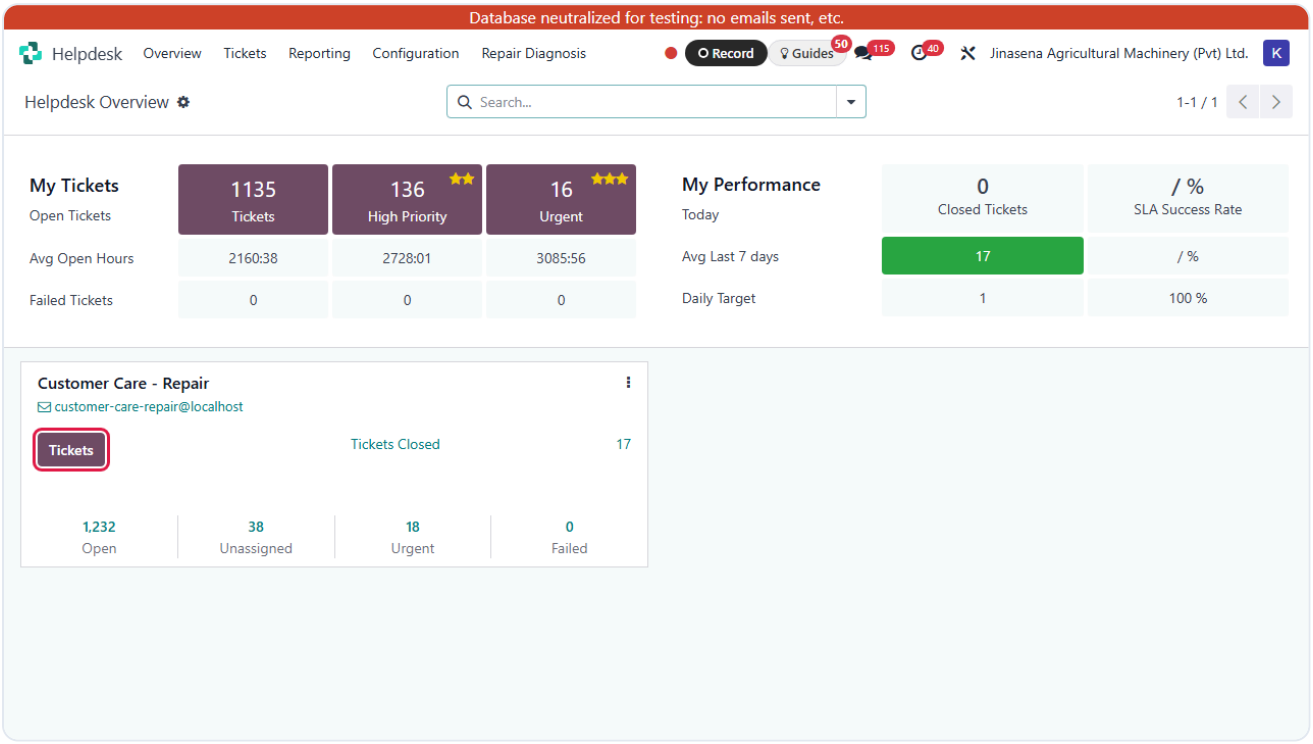

Odoo Apps home screen — Helpdesk app icon

2 Open the repair tickets

Navigation Helpdesk → Overview → Customer Care - Repair

Action **On the Customer Care - Repair team card, click Tickets.**

Description Displays the created tickets and their information.

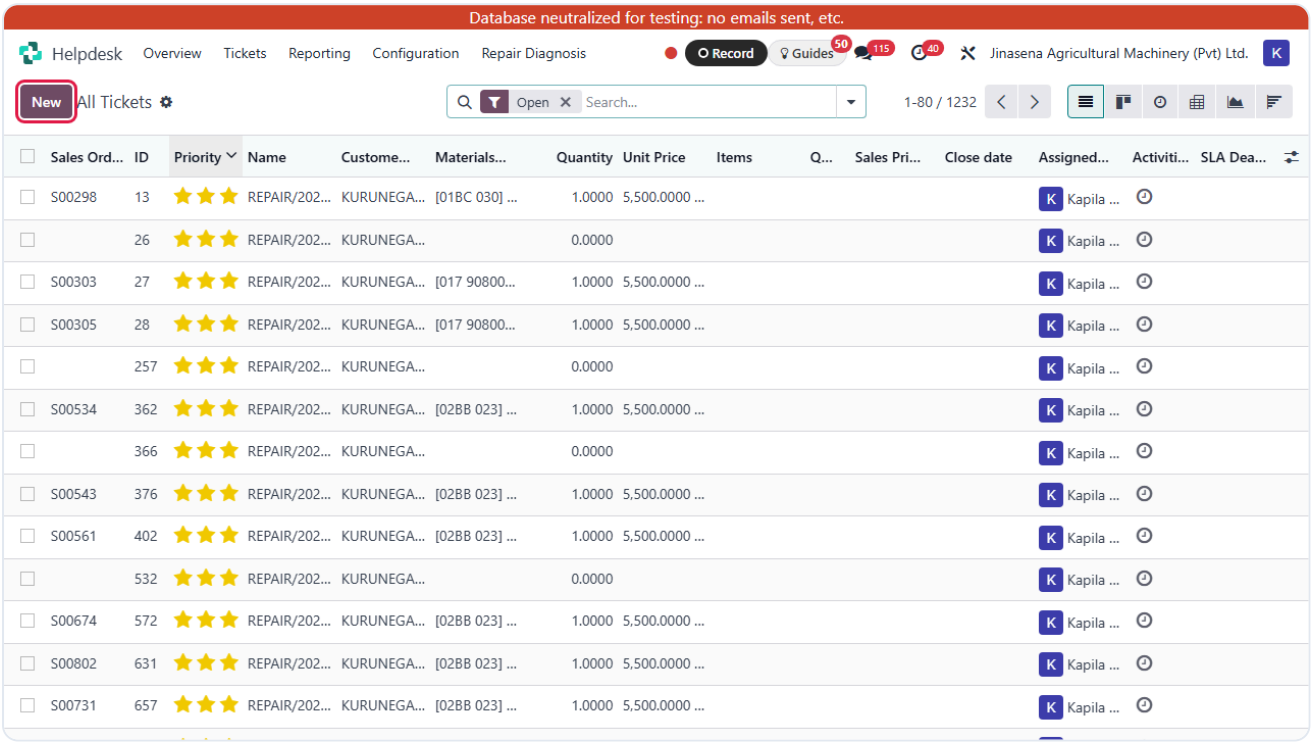

Helpdesk Overview — Tickets button on the Customer Care - Repair team card

3 Create a new ticket

Navigation Helpdesk → Customer Care - Repair (Tickets)

Action **Click New at the top-left of the ticket list.**

Description Opens a blank Helpdesk ticket form for the repair item received from the customer.

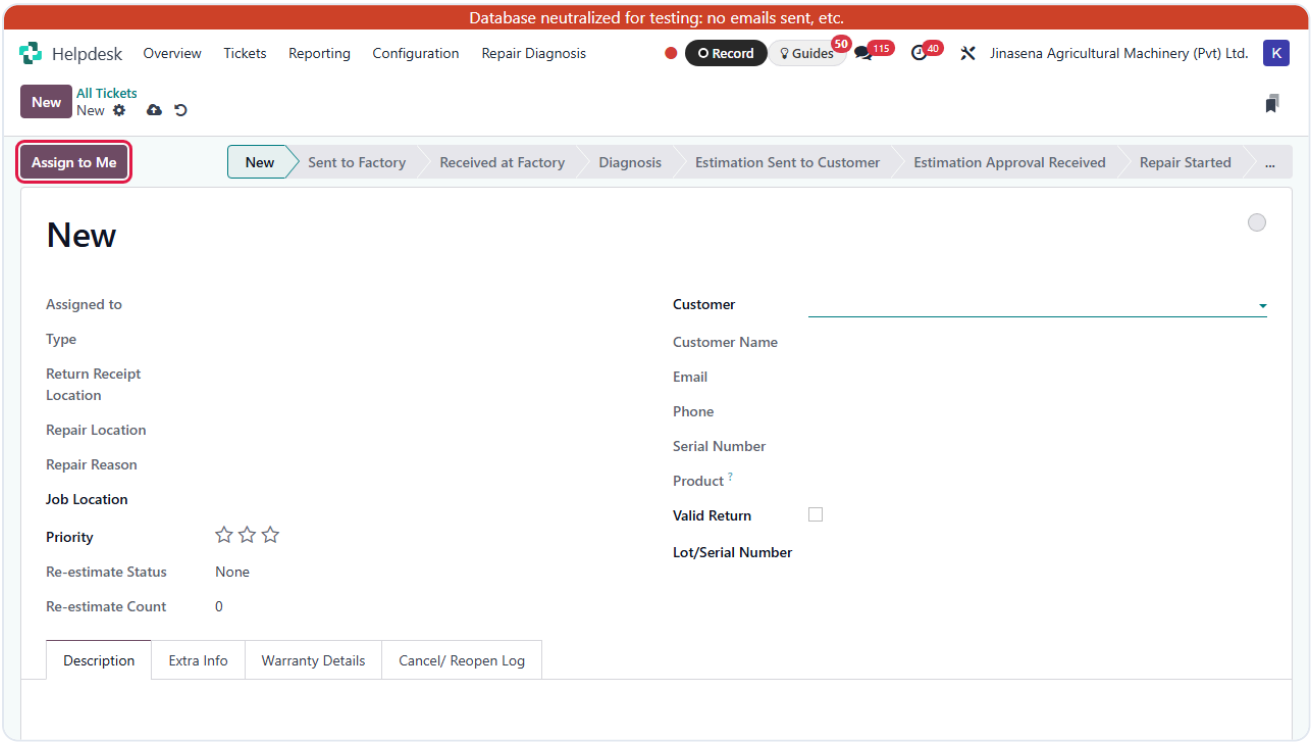

All Tickets list — New button

4 Assign the ticket to yourself

Navigation New ticket form

Action **Click Assign to Me in the status bar.**

Description Saves the ticket for the first time and assigns it to the current user. This also generates the ticket's sequence-based name (e.g. `REPAIR/2026/01649`) — the ticket has no user-editable title.

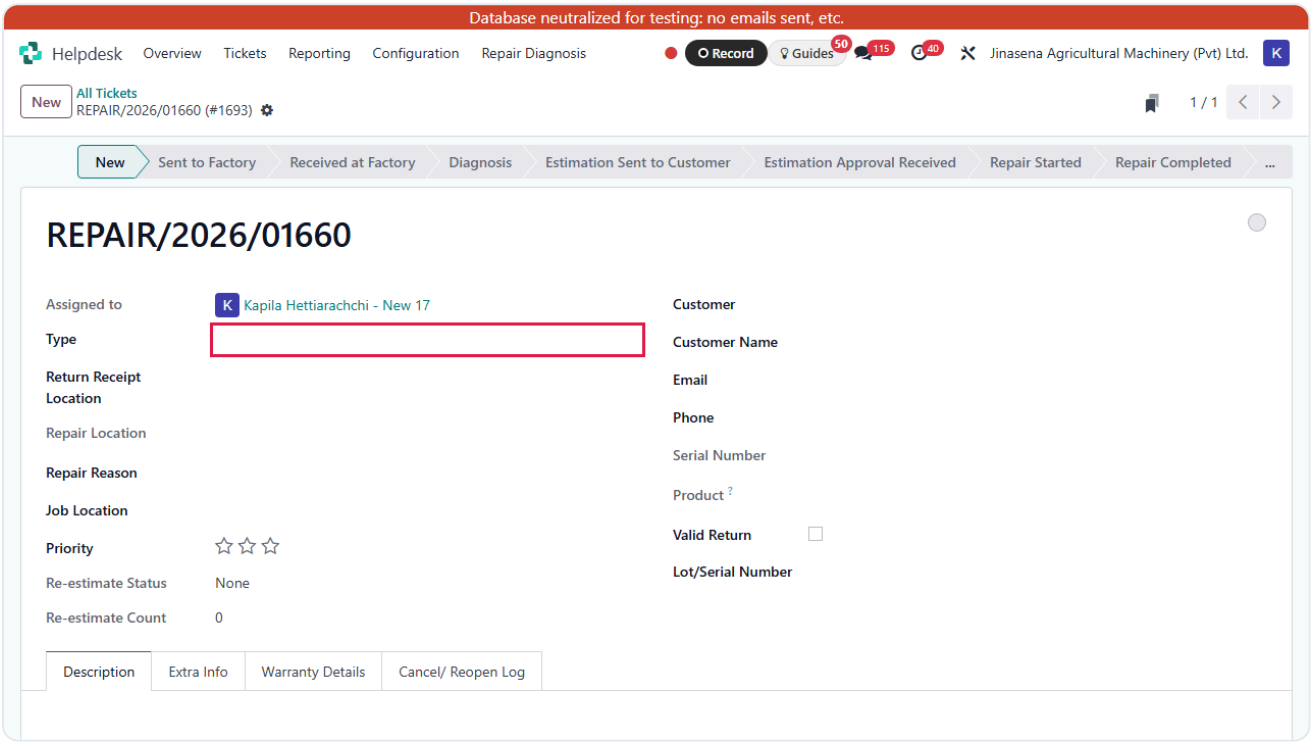

Blank new ticket form — Assign to Me button

5 Set the repair Type

Navigation Ticket form → Type field

Action **Click the Type field and select Repair - Under Warranty - External not RUG.**

Description Selects the flow for a product that is under warranty but whose damage is not covered by it (External, not RUG). For this type the item is identified by an existing **Serial Number**; there is no *Create Serial No* step.

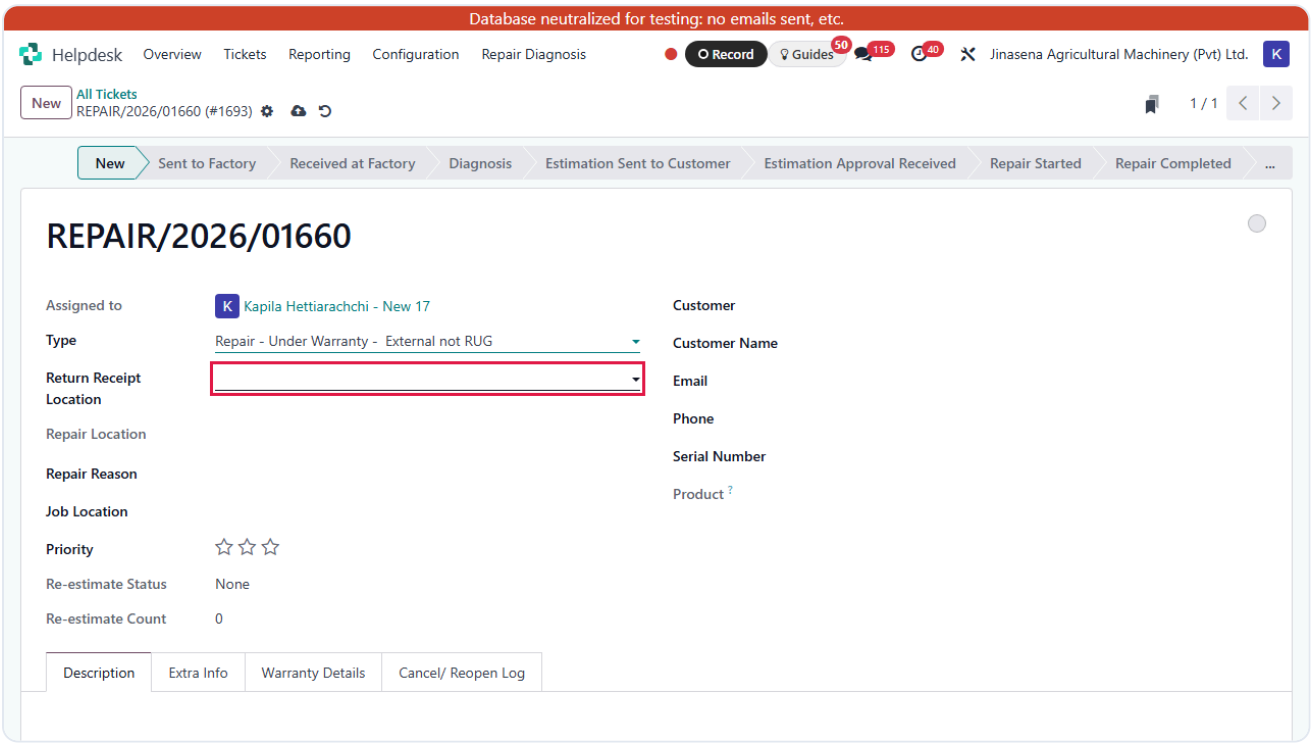

Ticket form — Type field

6 Set the Return Receipt Location

Navigation Ticket form → Return Receipt Location field

Action **Click Return Receipt Location and select the branch receiving the item (e.g. `BR-AM/Stock`, Jinasena Ampara Branch).**

Description Select the location where you would like to receive the product for repair.

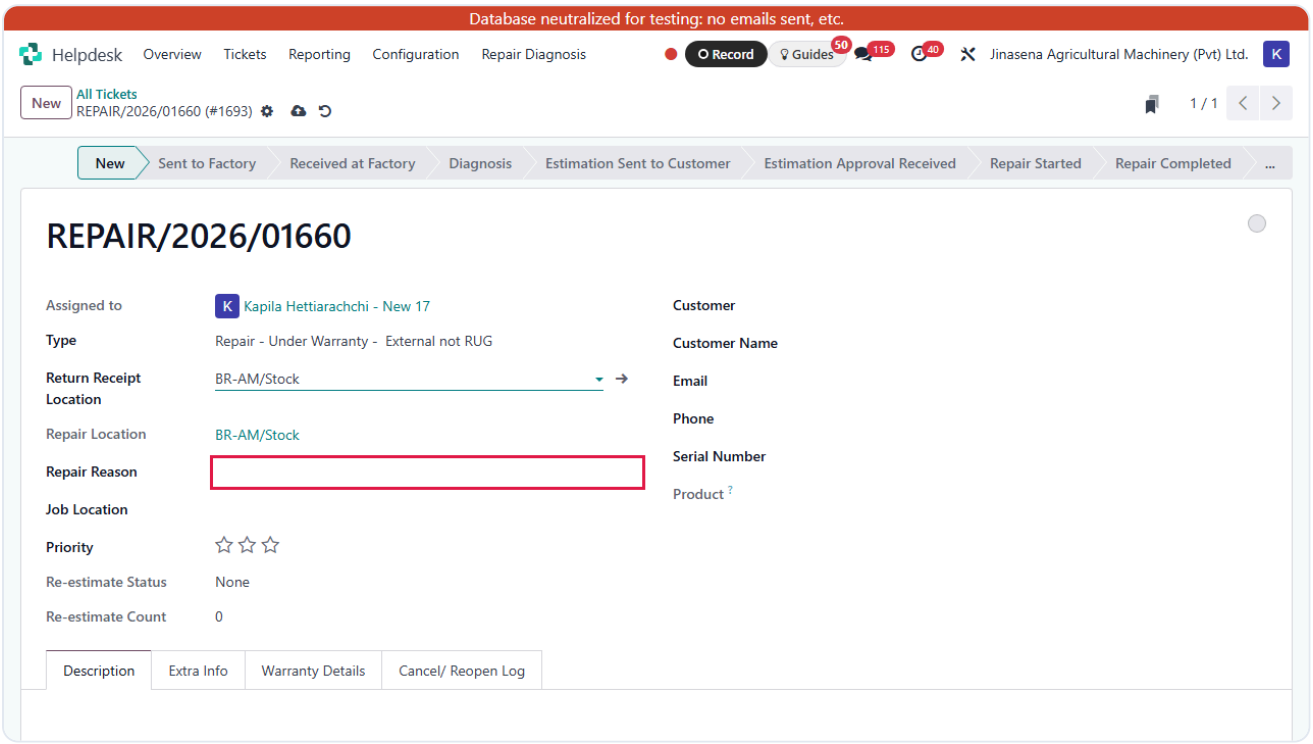

Ticket form — Return Receipt Location field

7 Select the Repair Reason

Navigation Ticket form → Repair Reason field

Action **Click Repair Reason and select the reported fault (e.g. `Difficult to start the engine`).**

Description A list of common errors is provided; select the ones that apply. This is a tags field.

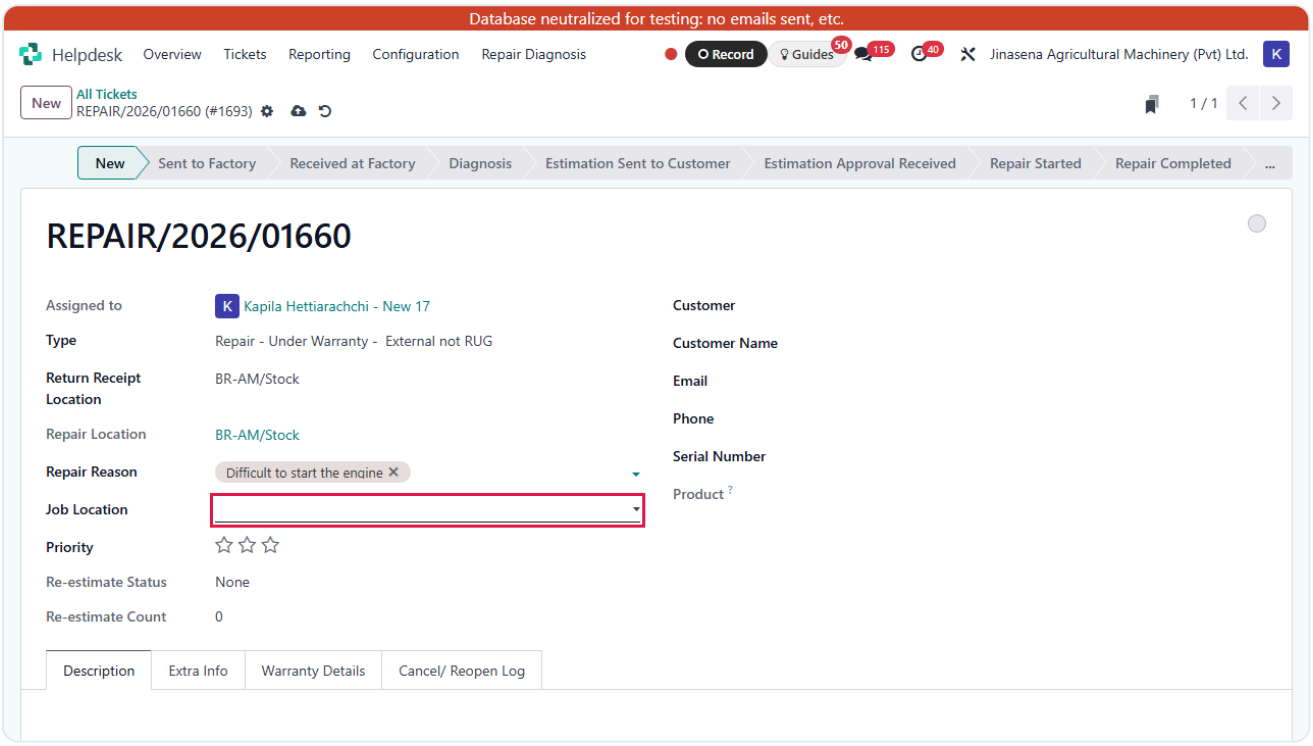

Ticket form — Repair Reason field

8 Select the Job Location

Navigation Ticket form → Job Location field

Action **In Job Location, select Centre Repair.**

Description Defines where the repair will be performed. **Centre Repair** means the repair is done at the branch's service centre, so there is no Send to Factory / Send to Sales Centre leg.

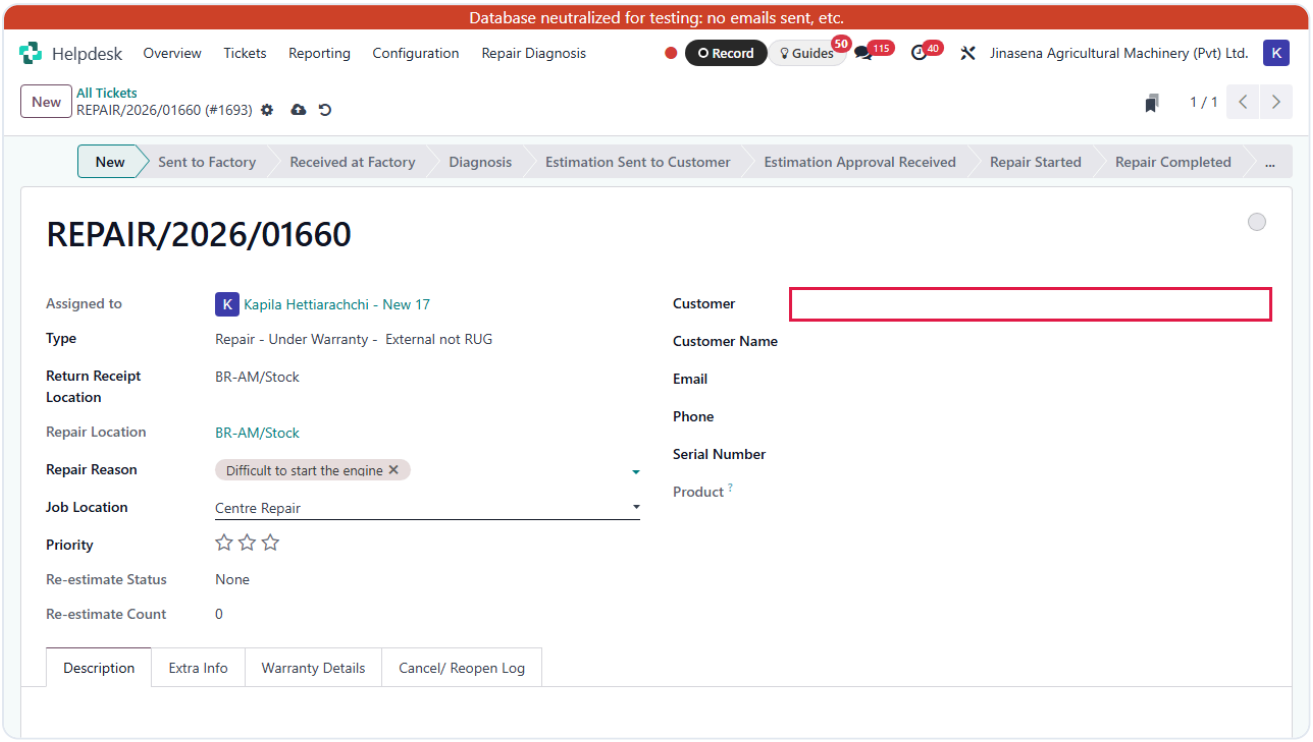

Ticket form — Job Location field

9 Select the Customer

Navigation Ticket form → Customer field

Action **Click Customer and select `KURUNEGALA CASH CUSTOMER`.**

Description Email and Phone are filled automatically from the customer record.

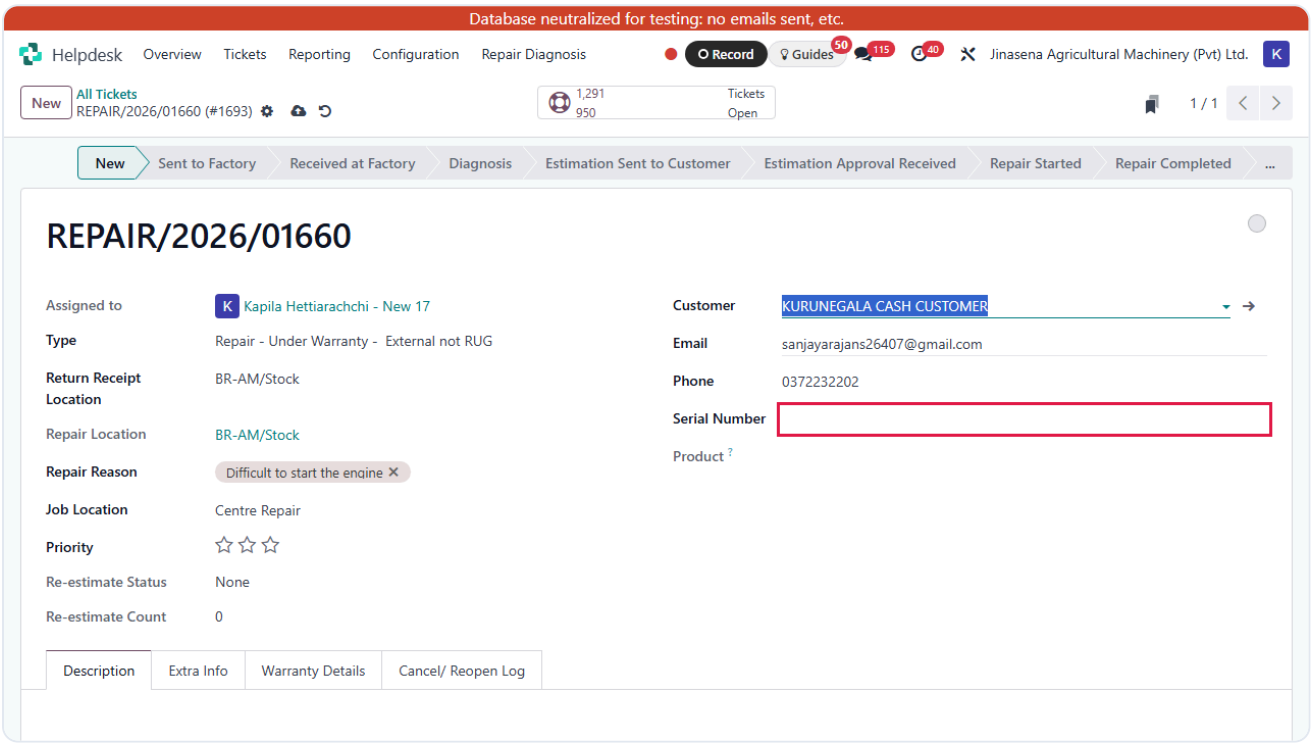

Ticket form — Customer field

10 Enter the Serial Number

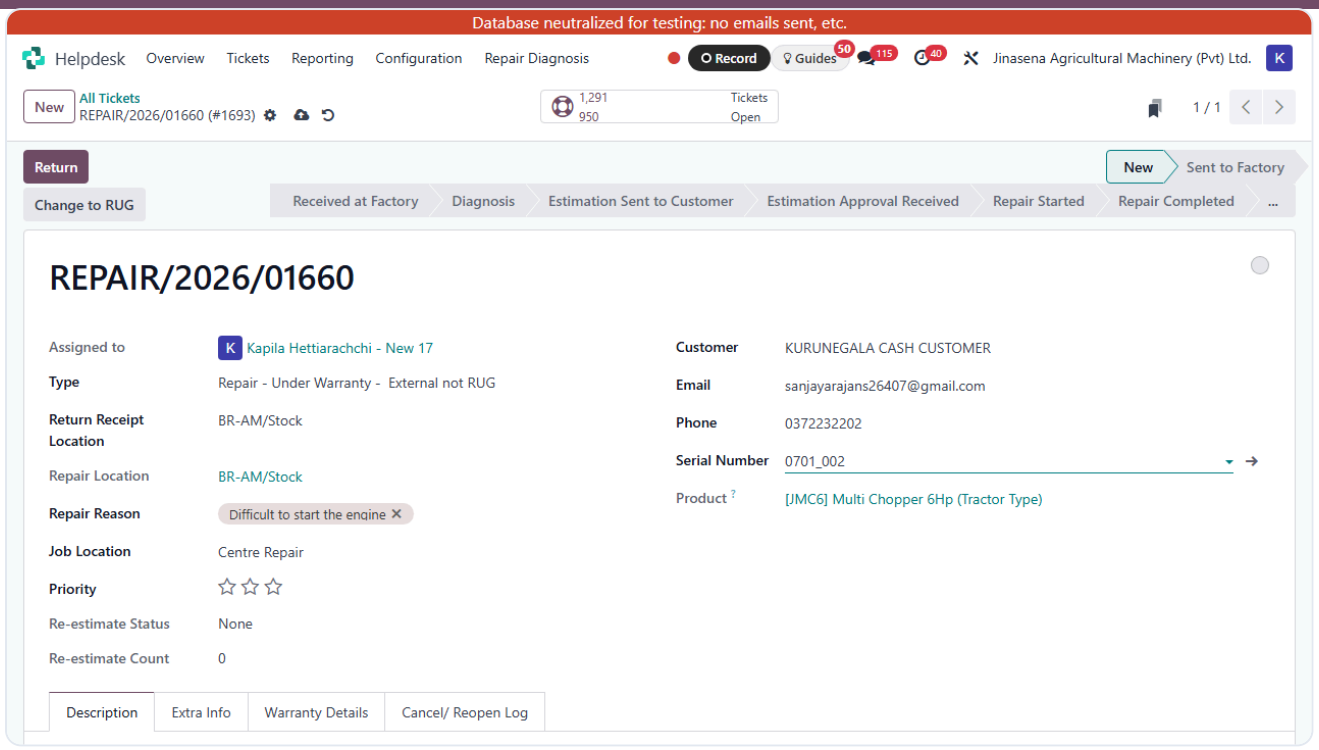

Navigation Ticket form → Serial Number field

Action **Click Serial Number, type the serial number of the finished product (e.g. `0701_002`) and select it from the list.**

Description Type the serial number corresponding to the finished product sold via a sales order and select it. Only serials already sold to a customer are offered. Selecting it fills in the **Product** and the **Sales Order** automatically (here `[JMC6] Multi Chopper 6Hp (Tractor Type)`), so there is no separate Product step.

Ticket form — Serial Number field

Ticket form — Serial Number entered, Product filled in

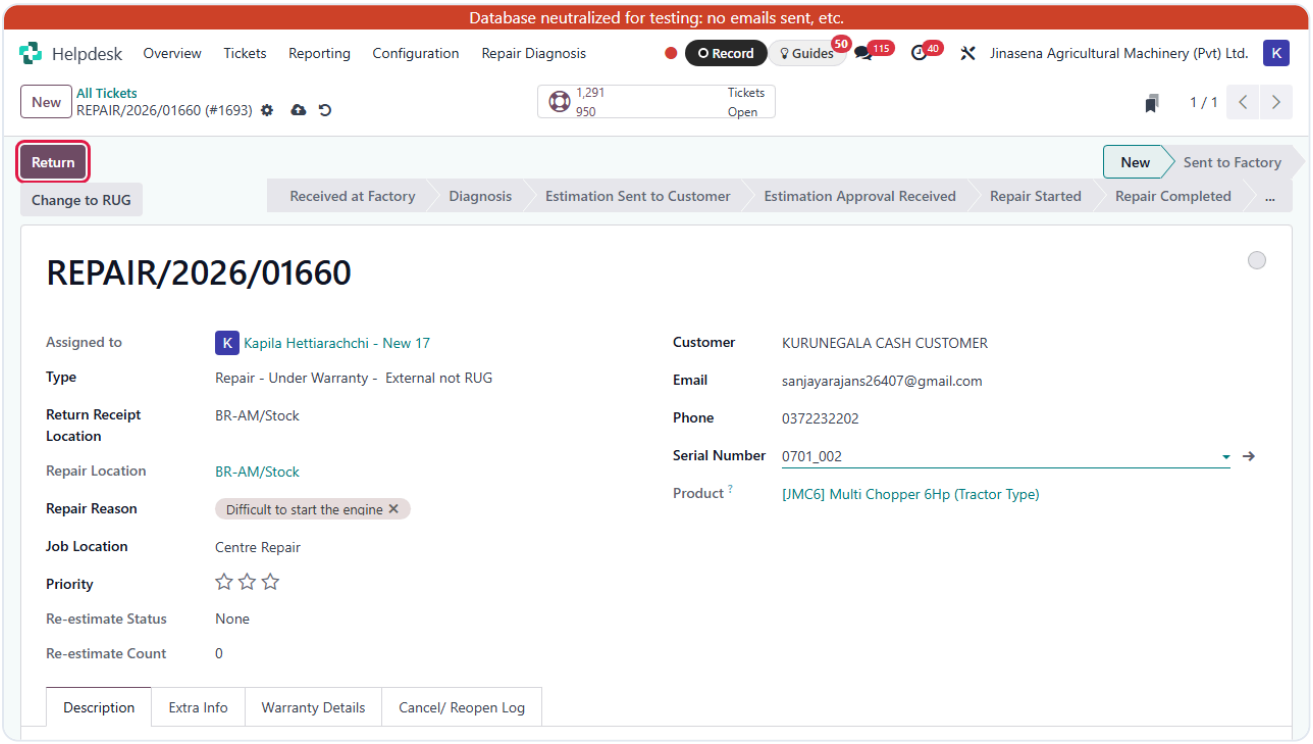

Section B — Receive the Item (Steps 11–13)

11 Return

Navigation Ticket form → status bar

Action **Click Return.**

Description Records the item being received from the customer: creates the Returned Picking (receipt) for the product. (The server also raises "You may only return Done pickings" after creating it; see the QA notes.)

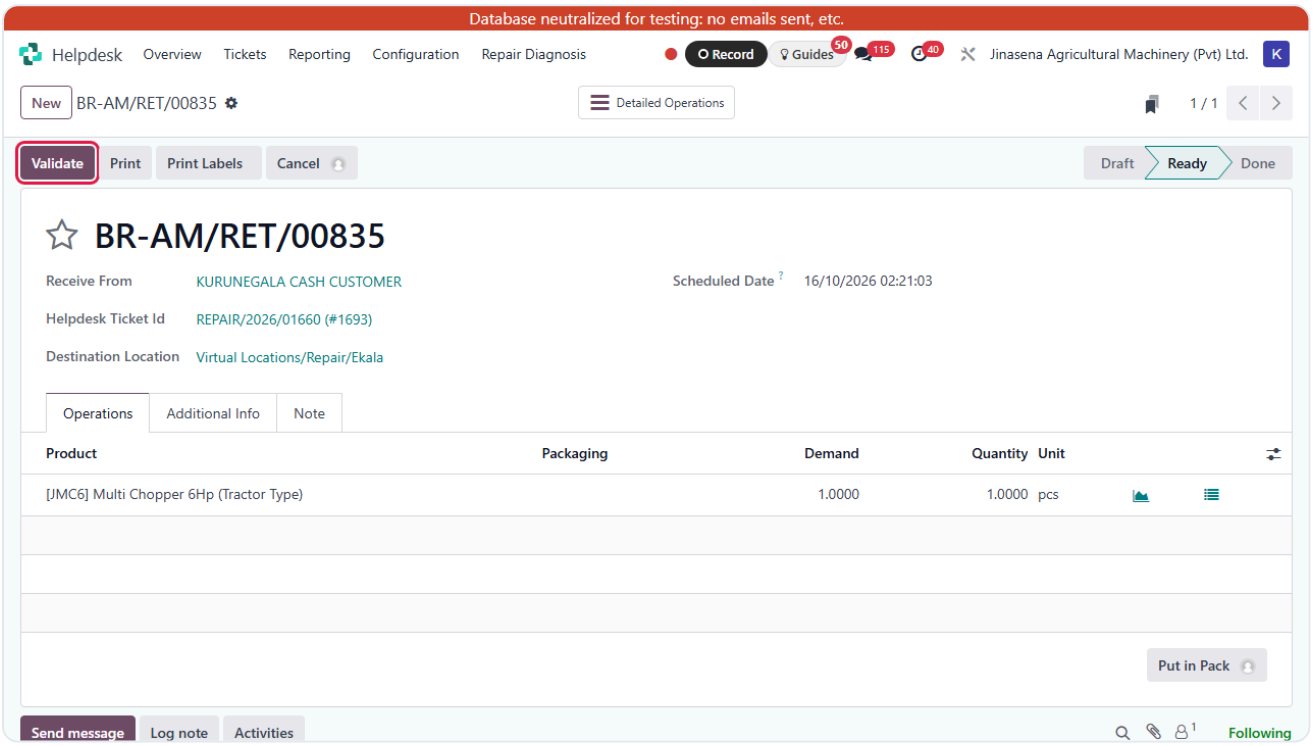

Ticket form — Return button

12 Validate the receipt

Navigation Transfer (Receipt) → header

Action **Click Validate.**

Description Validates the return operation: the item is received into stock and the transfer becomes *Done*. This is required before *Plan Intervention* appears.

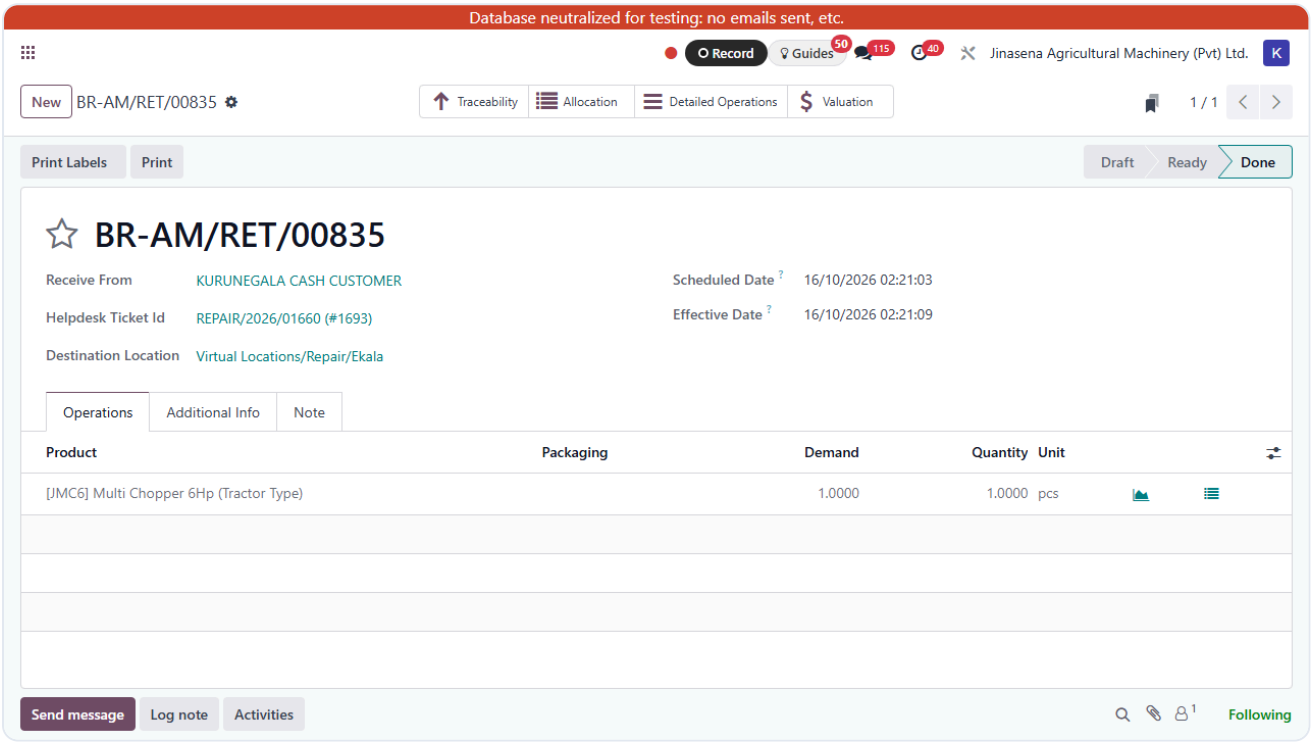

Transfer (Ready) — Validate button

13 Back

Navigation Transfer (Done)

Action **Click Back.**

Description Returns to the previous menu — the ticket view. The screenshot shows the receipt in the *Done* state; on this instance it opens as a full page, so there is no Back button to frame.

Transfer (Done)

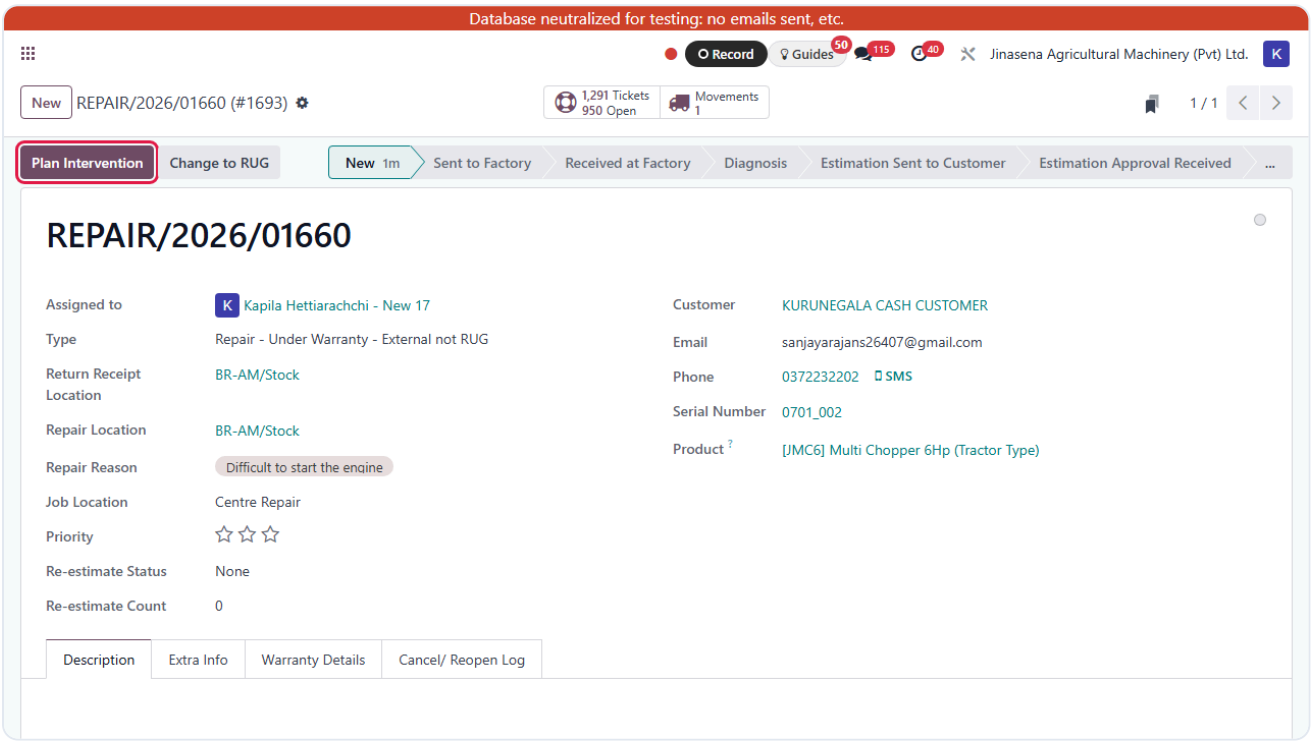

Section C — Plan the Task (Steps 14–15)

14 Plan Intervention

Navigation Ticket form → status bar

Action **Click Plan Intervention.**

Description To assign the job to a repair technician, create a Field Service task. With Centre Repair the ticket goes straight to Plan Intervention after the receipt is validated.

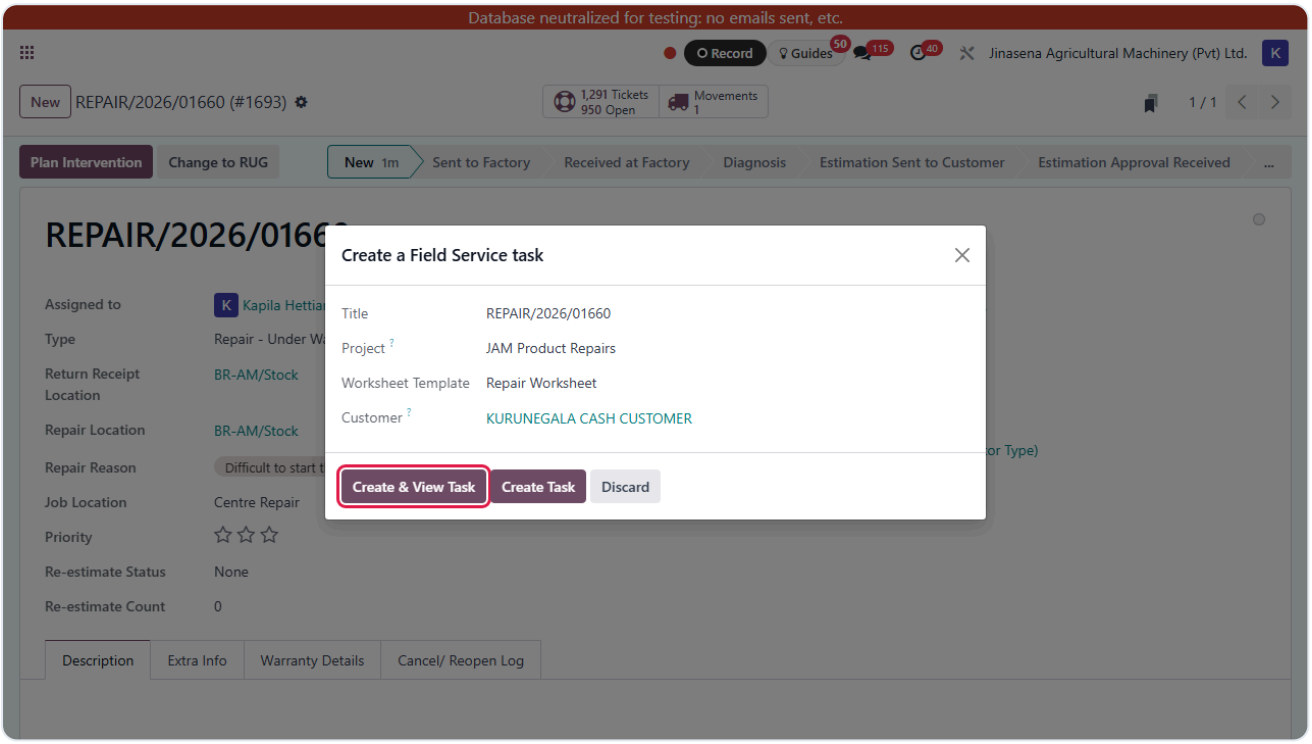

Ticket form — Plan Intervention button

15 Create & View Task

Navigation Create a Field Service task dialog

Action **Click Create & View Task.**

Description Creates the Field Service task and opens it so the technician can create and manage it.

Create a Field Service task dialog — Create & View Task button

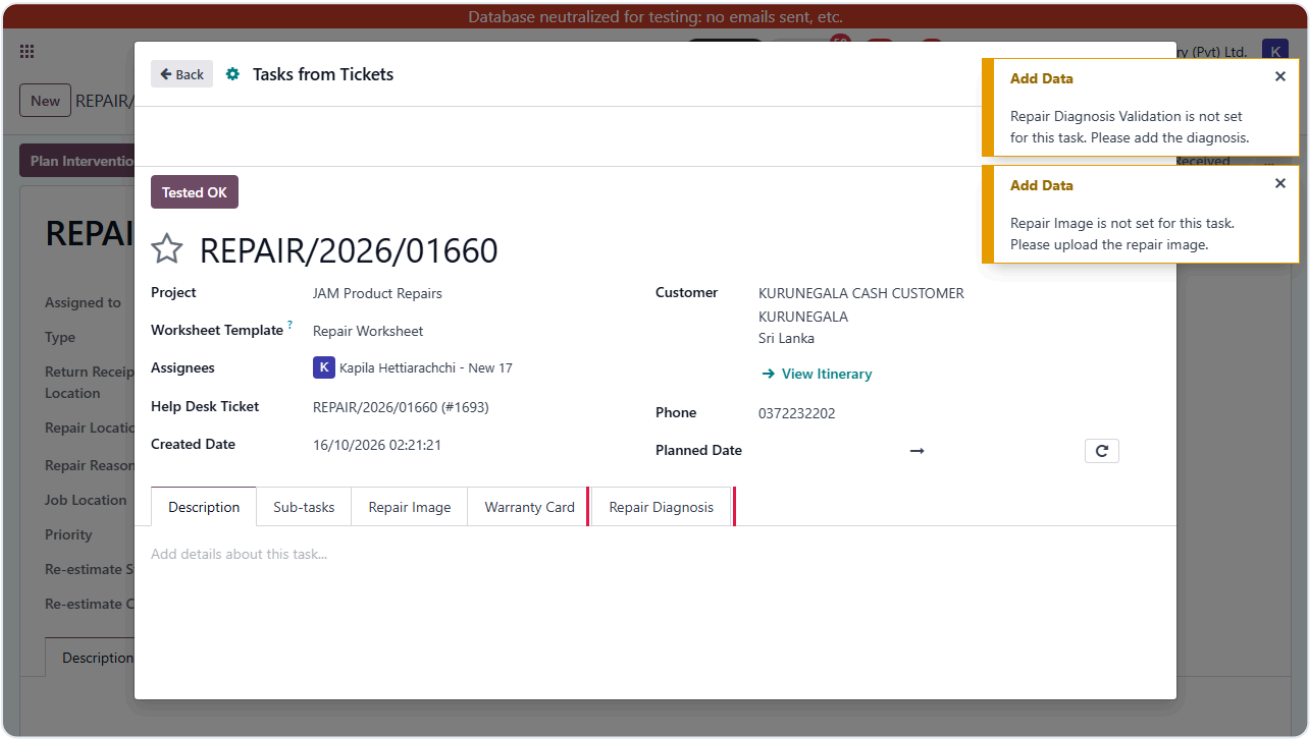

Section D — Diagnosis, Image and Parts (Steps 16–28)

16 Open the Repair Diagnosis tab

Navigation Task form → Repair Diagnosis tab

Action **Click the Repair Diagnosis tab.**

Description The technician checked the repair item and found the reason; record it in the diagnosis table.

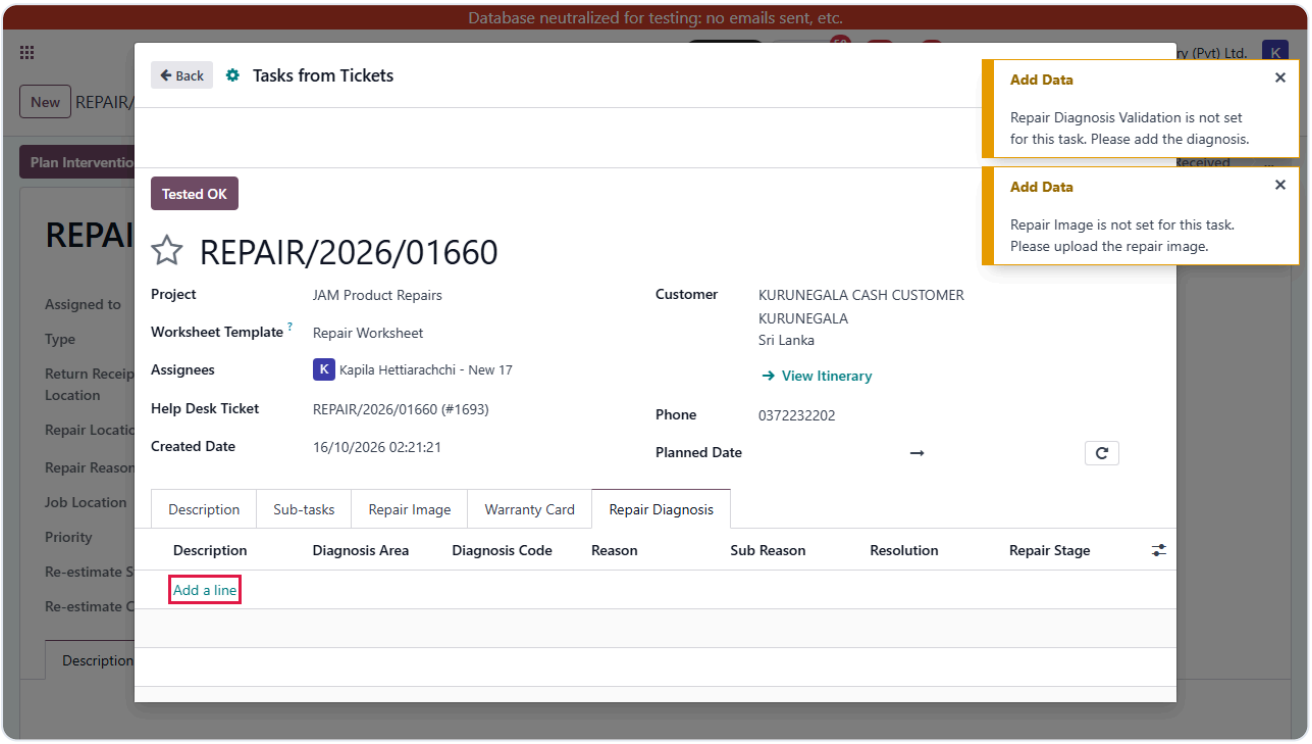

Task form — Repair Diagnosis tab

17 Add a line

Navigation Task form → Repair Diagnosis

Action **Click Add a line.**

Description Adds a new diagnosis line to fill in.

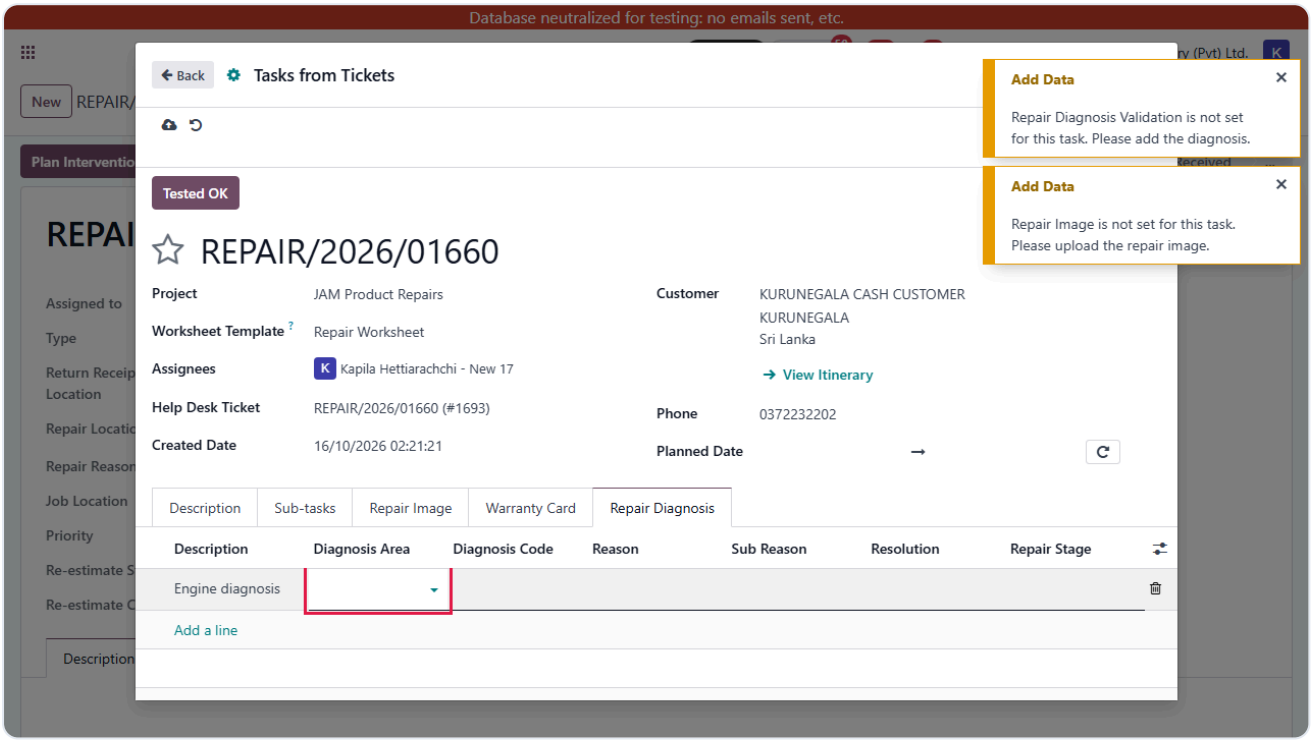

Repair Diagnosis tab — Add a line

18 Diagnosis Area

Navigation Repair Diagnosis → diagnosis line

Action **Click the Diagnosis Area cell and select `Burnt Part`.**

Description The area of the item where the fault was found.

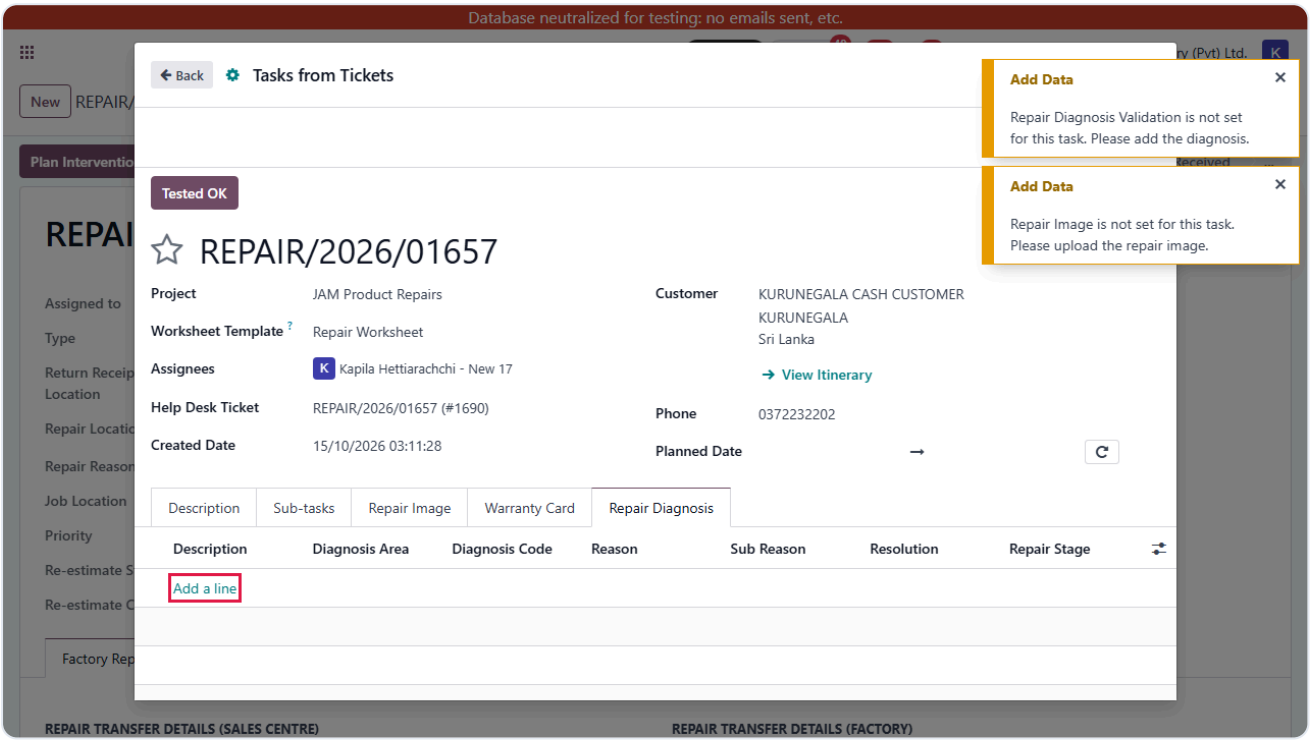

Diagnosis line — Diagnosis Area cell

19 Diagnosis Code

Navigation Repair Diagnosis → diagnosis line

Action **Click the Diagnosis Code cell and select `Base Plate`.**

Description The code of the faulty part.

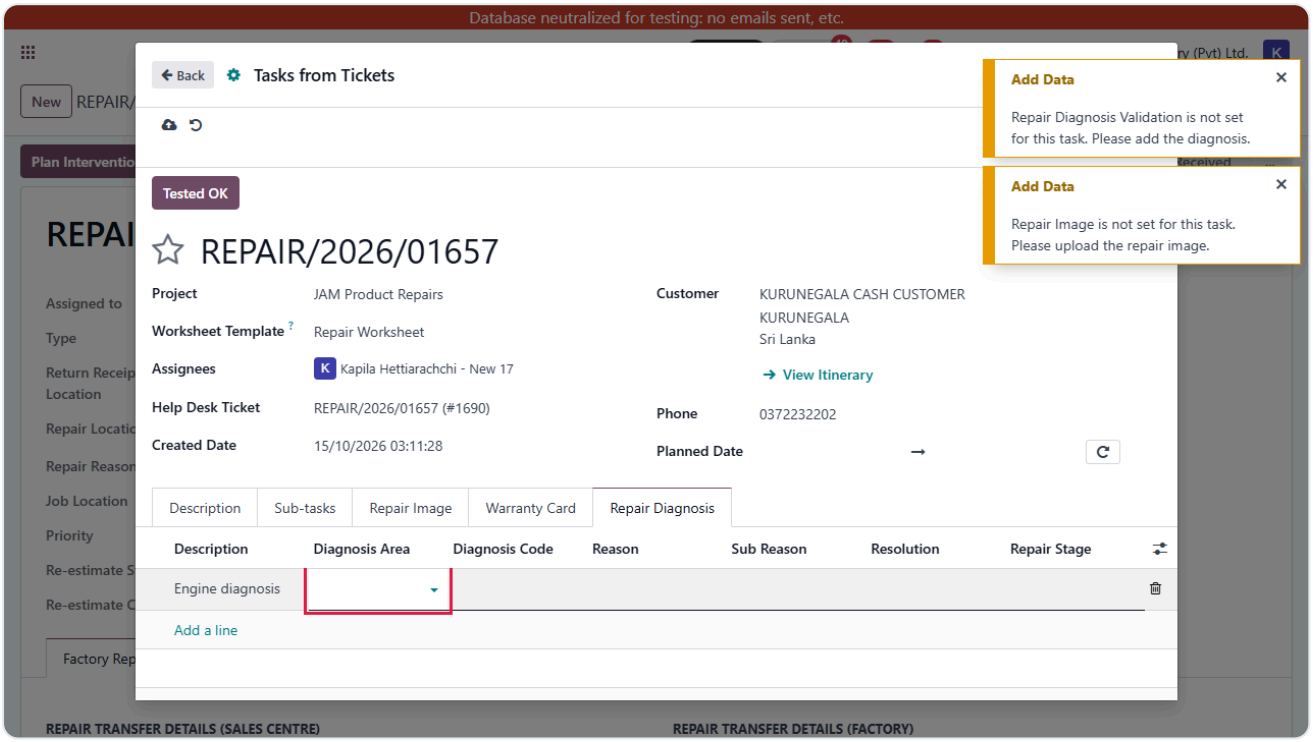

Diagnosis line — Diagnosis Code cell

20 Reason

Navigation Repair Diagnosis → diagnosis line

Action **Click the Reason cell and select `Internal`.**

Description The reason for the fault.

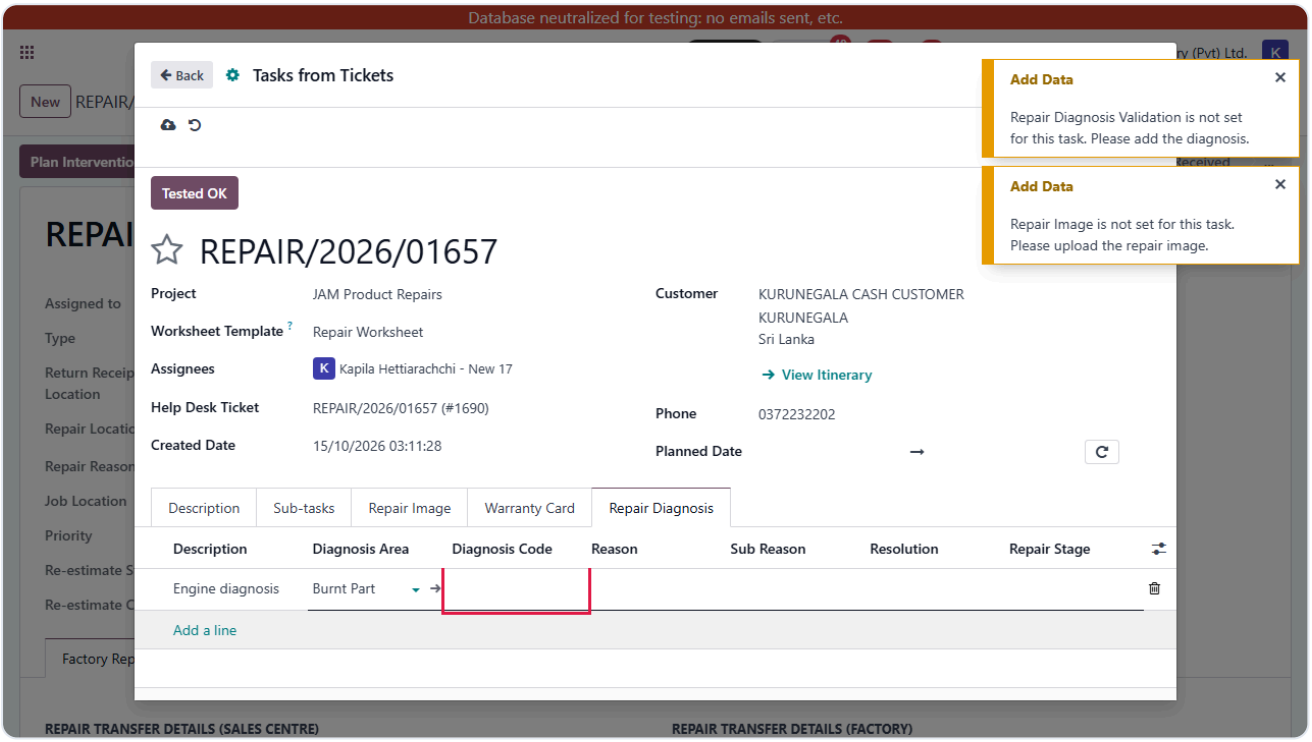

Diagnosis line — Reason cell

21 Sub Reason

Navigation Repair Diagnosis → diagnosis line

Action **Click the Sub Reason cell and select `Hi Voltage`.**

Description The detailed reason for the fault.

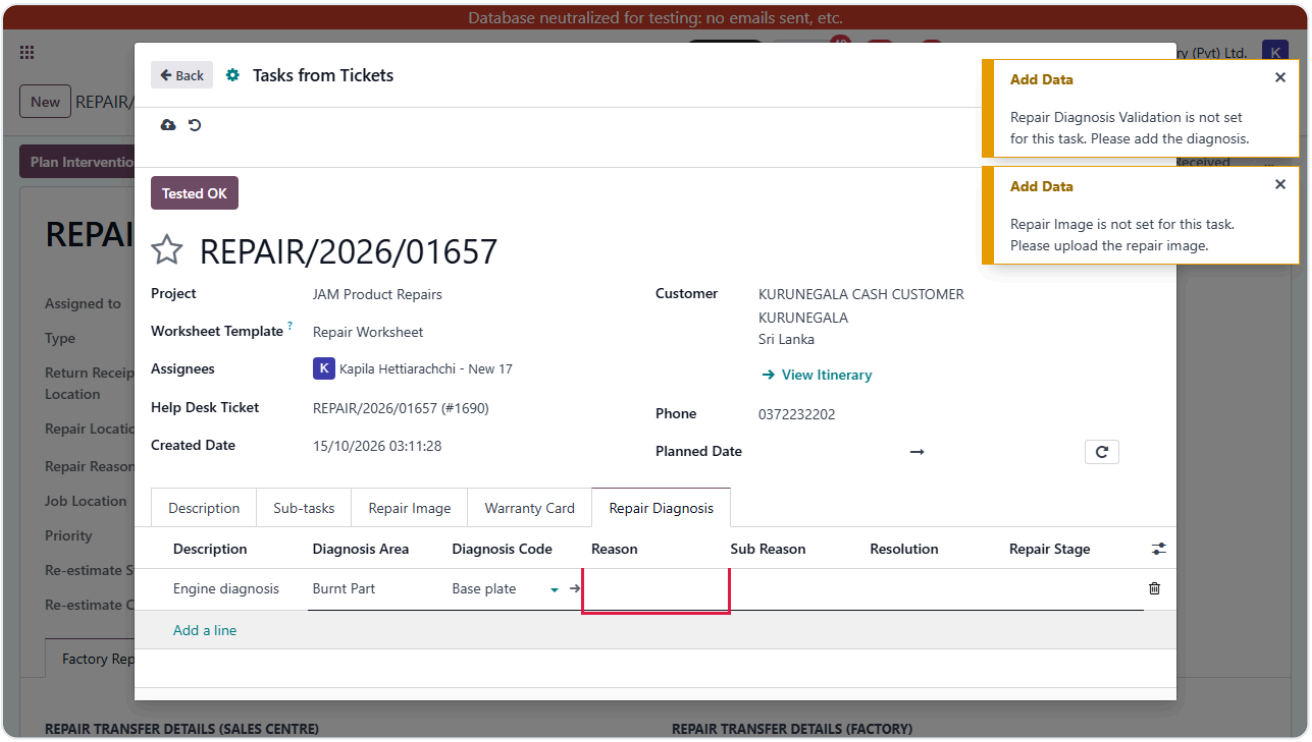

Diagnosis line — Sub Reason cell

22 Resolution

Navigation Repair Diagnosis → diagnosis line

Action **Click the Resolution cell and select `Reject`.**

Description The resolution decided by the technician.

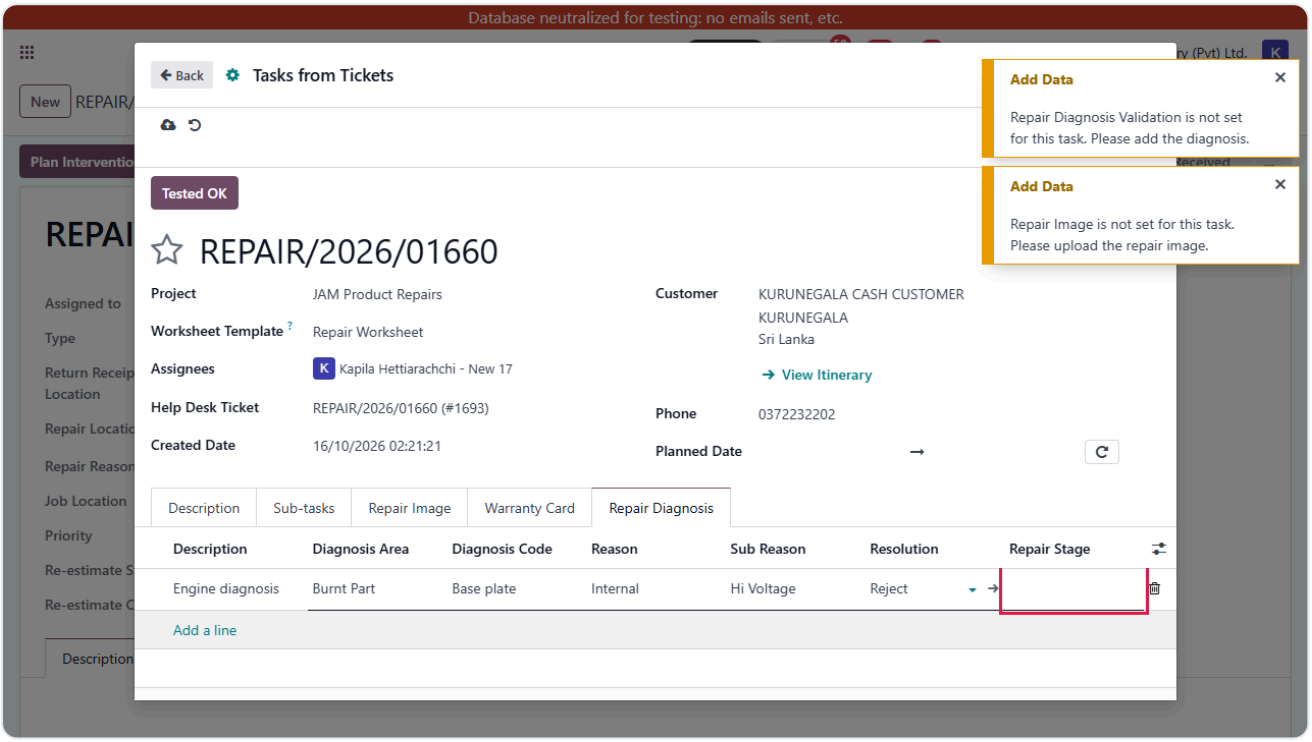

Diagnosis line — Resolution cell

23 Repair Stage

Navigation Repair Diagnosis → diagnosis line

Action **Click the Repair Stage cell and select `1-REP-REC`.**

Description The repair stage the item is at.

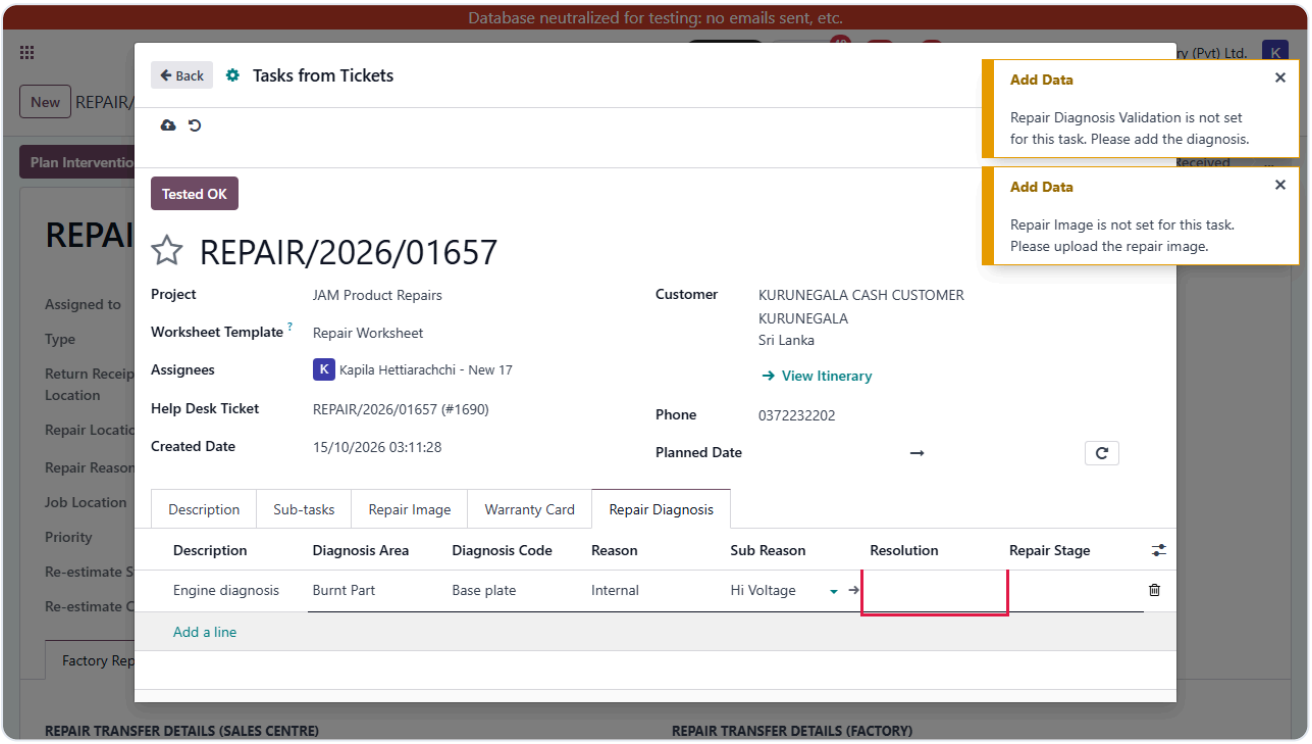

Diagnosis line — Repair Stage cell

24 Open the Repair Image tab

Navigation Task form → Repair Image tab

Action **Click the Repair Image tab.**

Description At least one image of the item being repaired must be included.

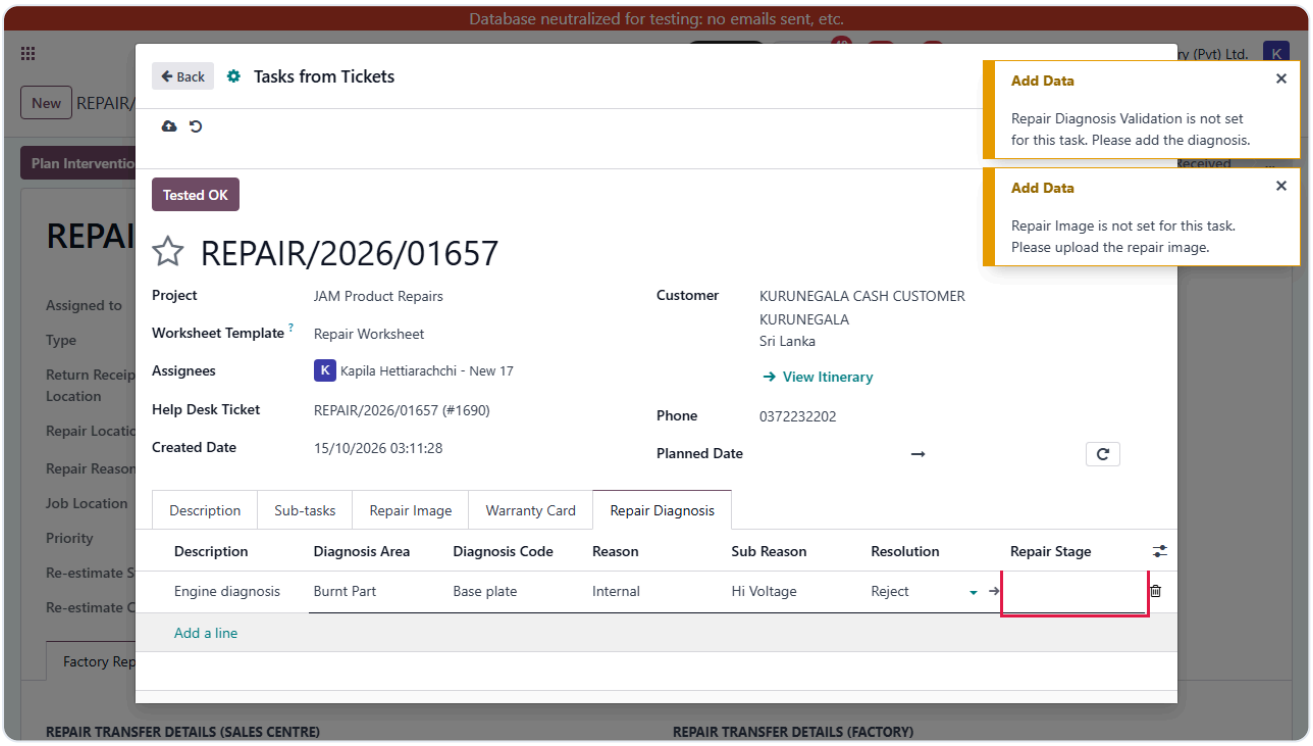

Task form — Repair Image tab

25 Take a Picture

Navigation Task form → Repair Image tab

Action **Click Take a Picture, then select the image file and click Open.**

Description Attaches the photo of the item to the task. Once Diagnosis and Image are both set, the **Products** button appears.

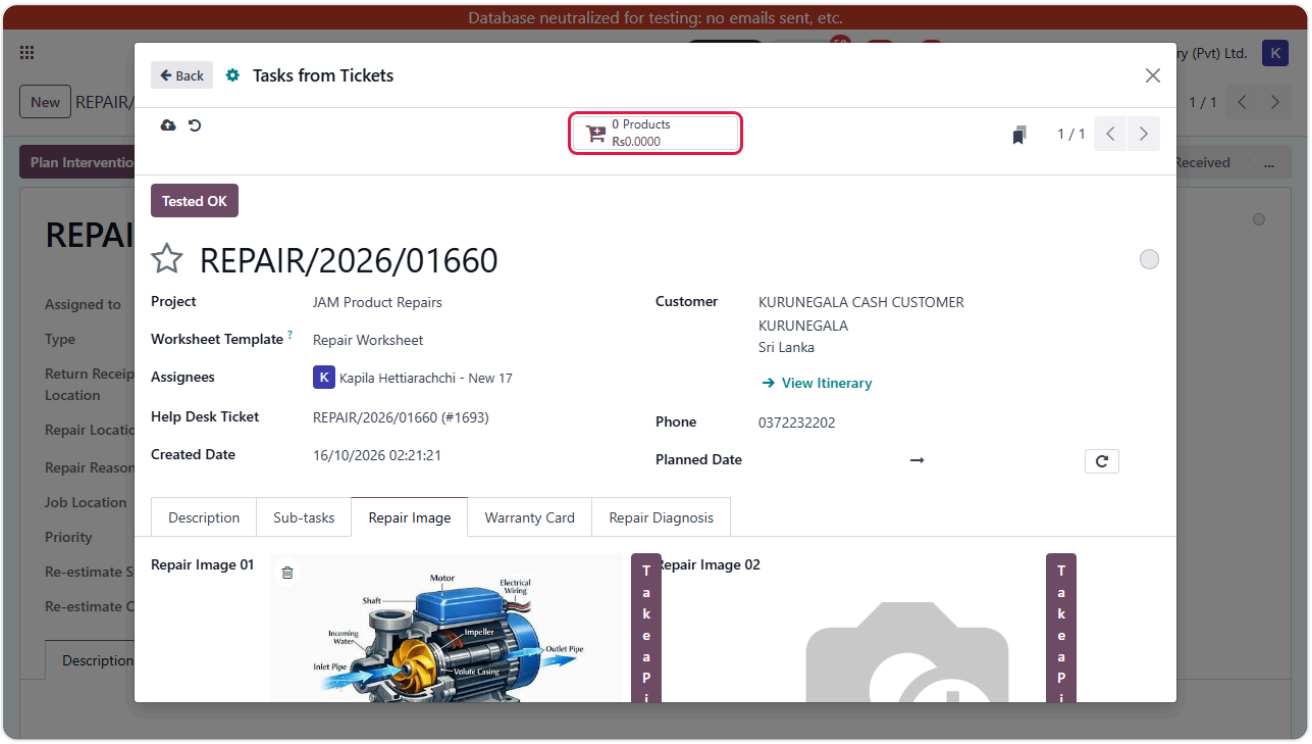

Repair Image tab — Take a Picture (Repair Image 01)

26 Products

Navigation Task form → button box

Action **Click Products.**

Description Opens the item master (product catalog) to select the items used to repair the product.

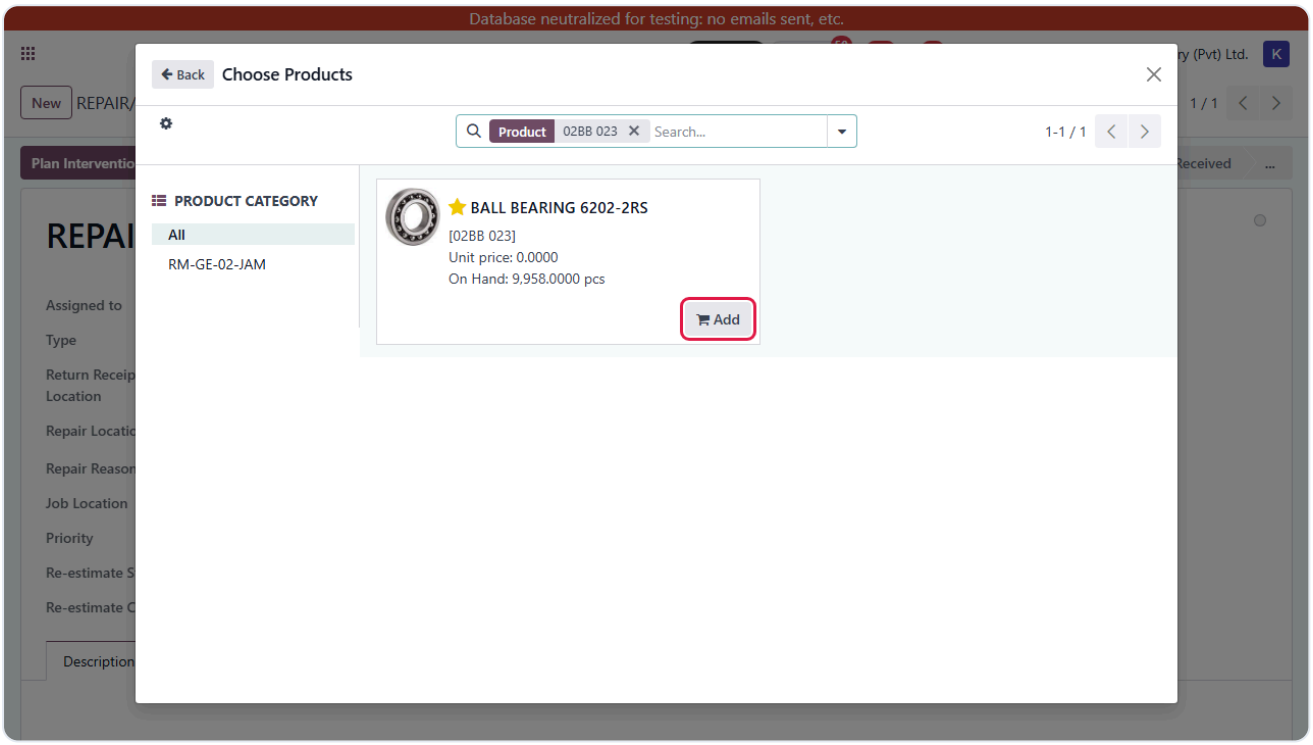

Task form — Products button

27 Add the spare part

Navigation Product catalog

Action **Find the part (e.g. `[02BB 023] BALL BEARING 6202-2RS`) and click Add.**

Description Adds the part with quantity 1 to the task; it becomes a line on the repair quotation. Select each required item and enter the quantity.

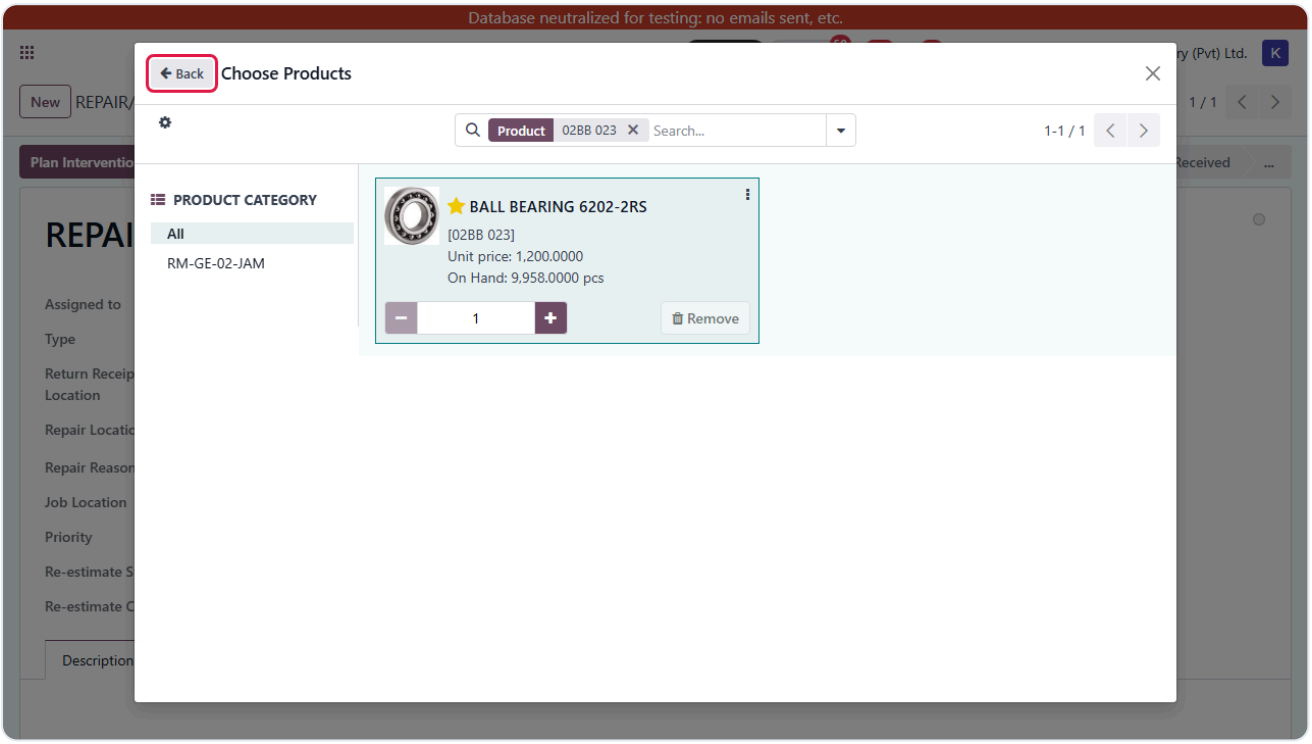

Product catalog — Add button

28 Back

Navigation Product catalog

Action **Click Back.**

Description Returns to the previous menu (the task).

Product catalog — Back button

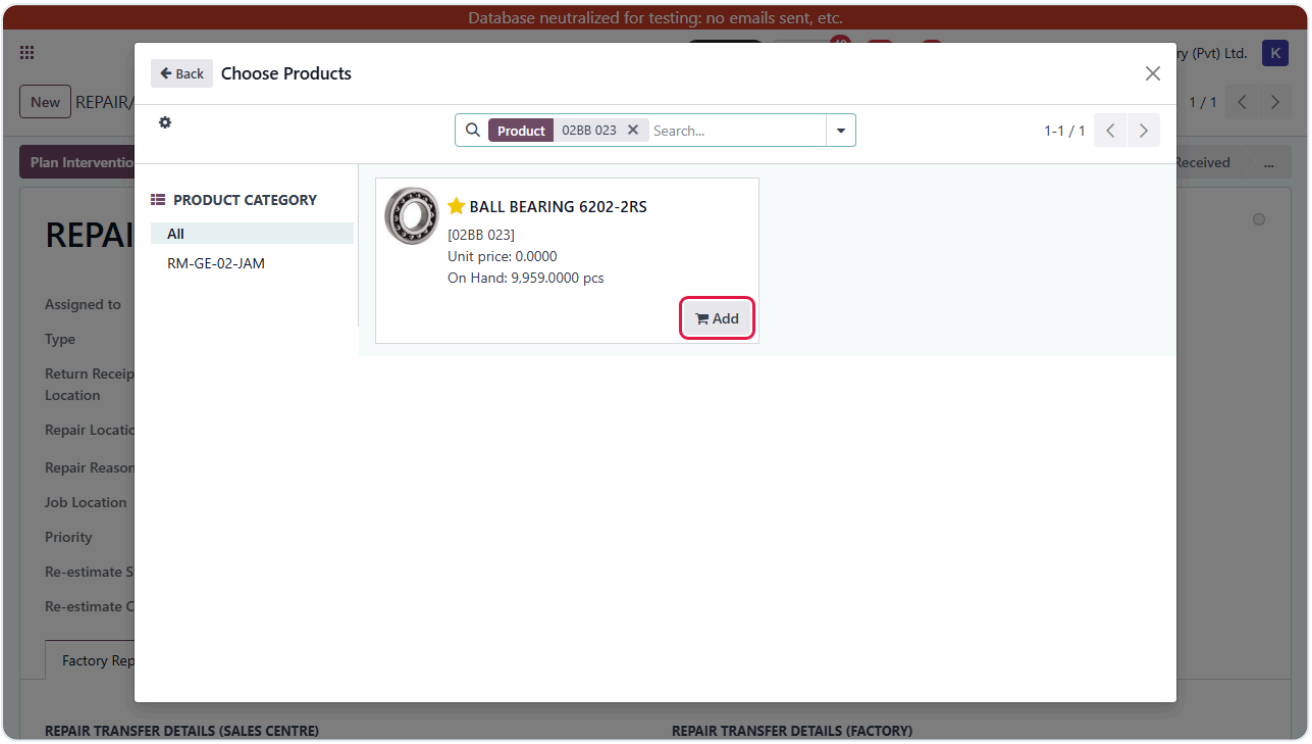

Section E — Quotation and Customer Confirmation (Steps 29–32)

29 Sales Order

Navigation Task form → button box

Action **Click the Sales Order button.**

Description Opens the quotation created from the parts added to the task.

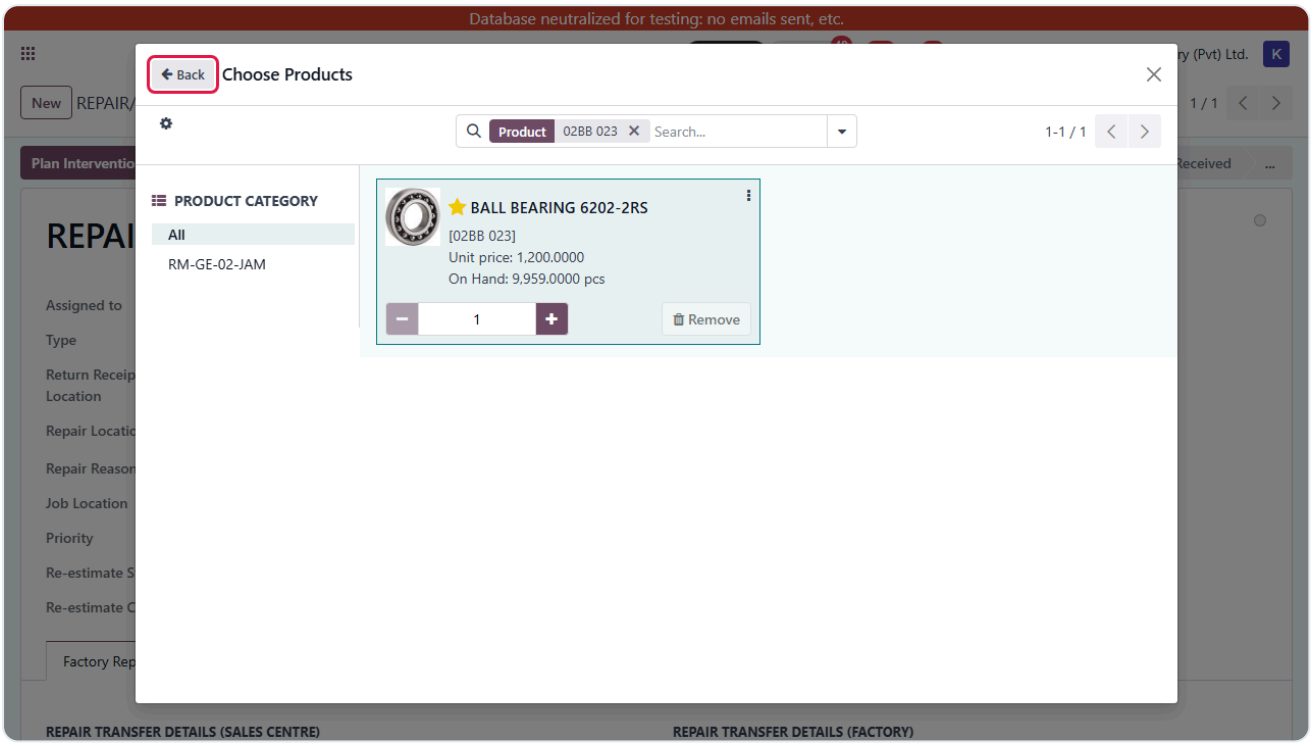

Task form — Sales Order button

30 Send by Email

Navigation Sales Order (Quotation)

Action **Click Send by Email.**

Description The quotation must be approved by the customer. This prepares the email containing the online quotation link.

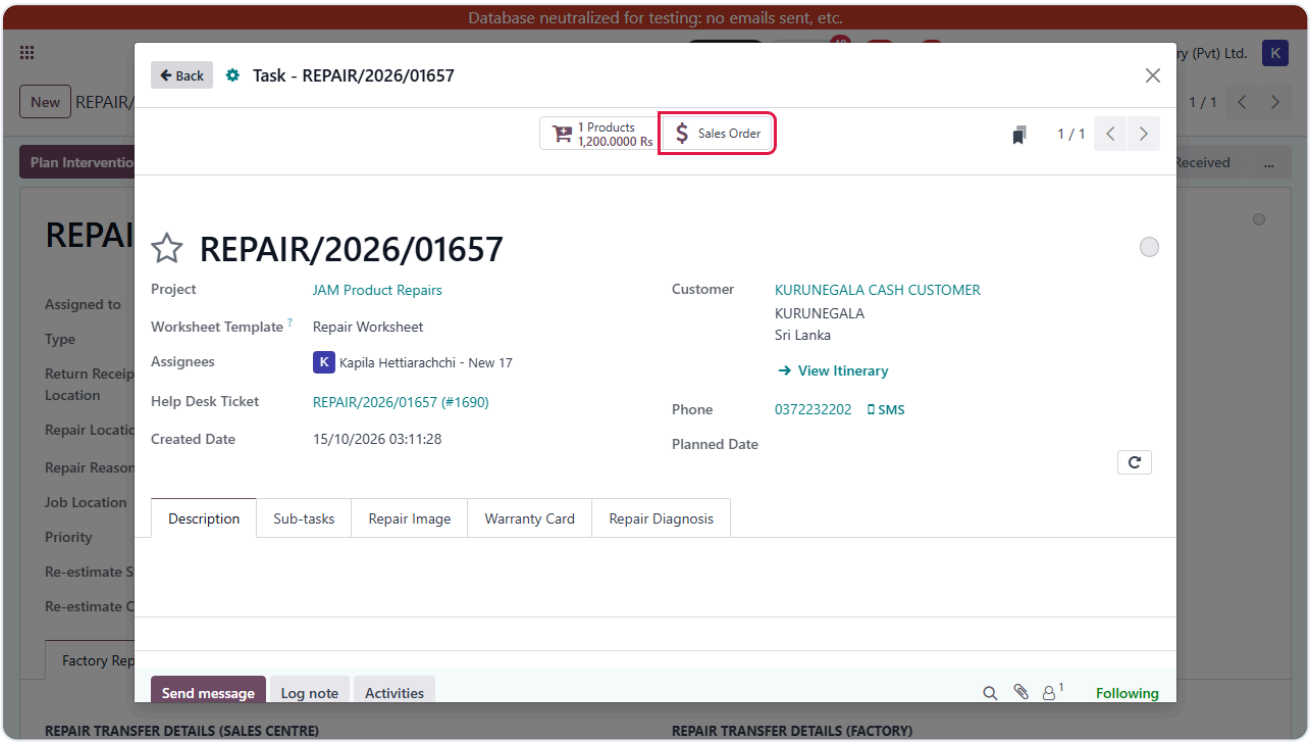

Quotation — Send by Email button

31 Send

Navigation Send email dialog

Action **Click Send.**

Description Sends the email and moves the quotation to *Quotation Sent*.

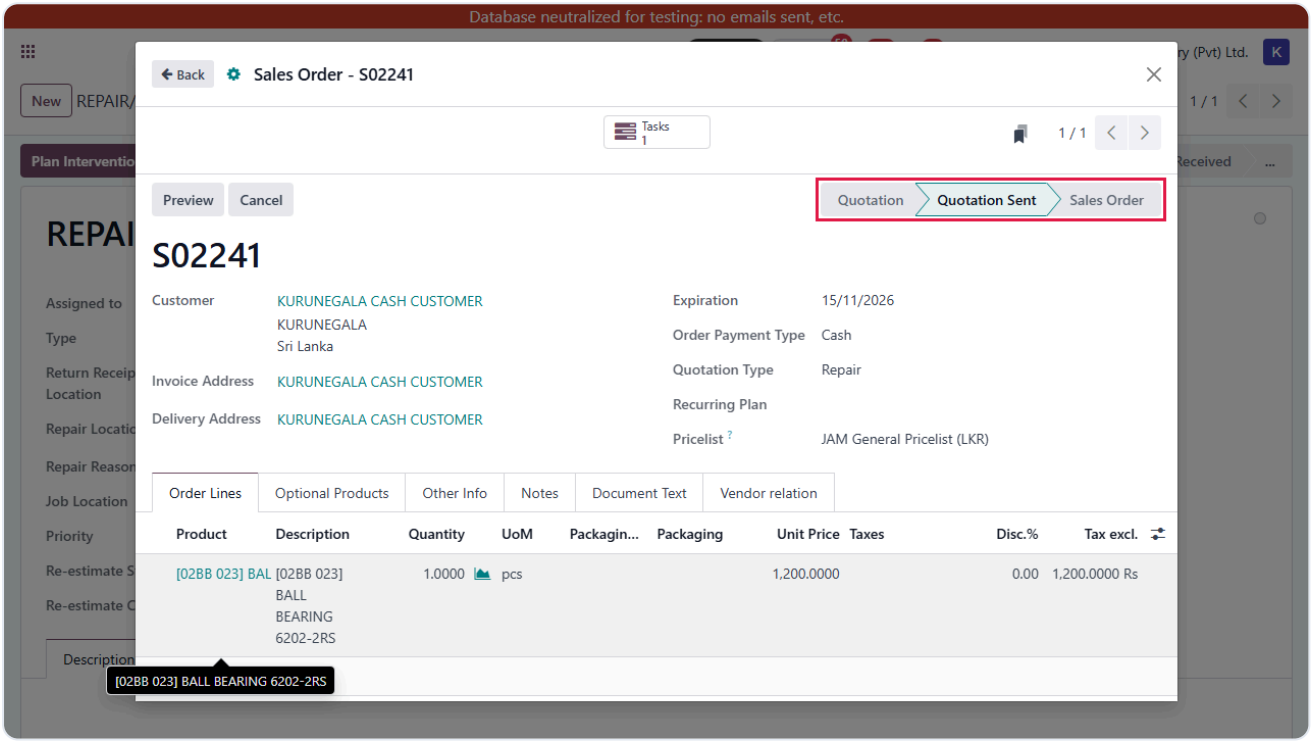

Send email dialog — Send button

32 Confirm the order

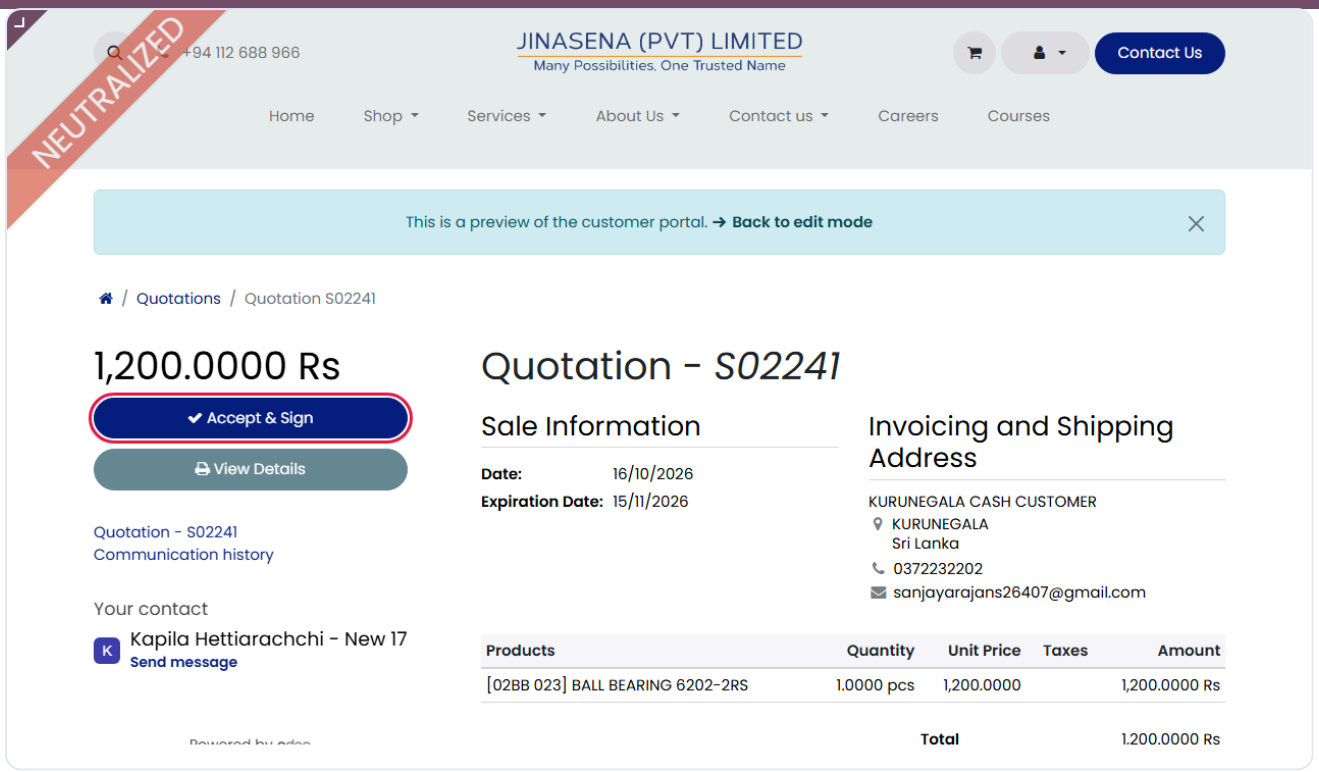

Navigation Sales Order (Quotation Sent) / customer portal

Action **The customer opens View Quotation from the email and clicks Accept & Sign, then Accept & Sign again in the signature pop-up.**

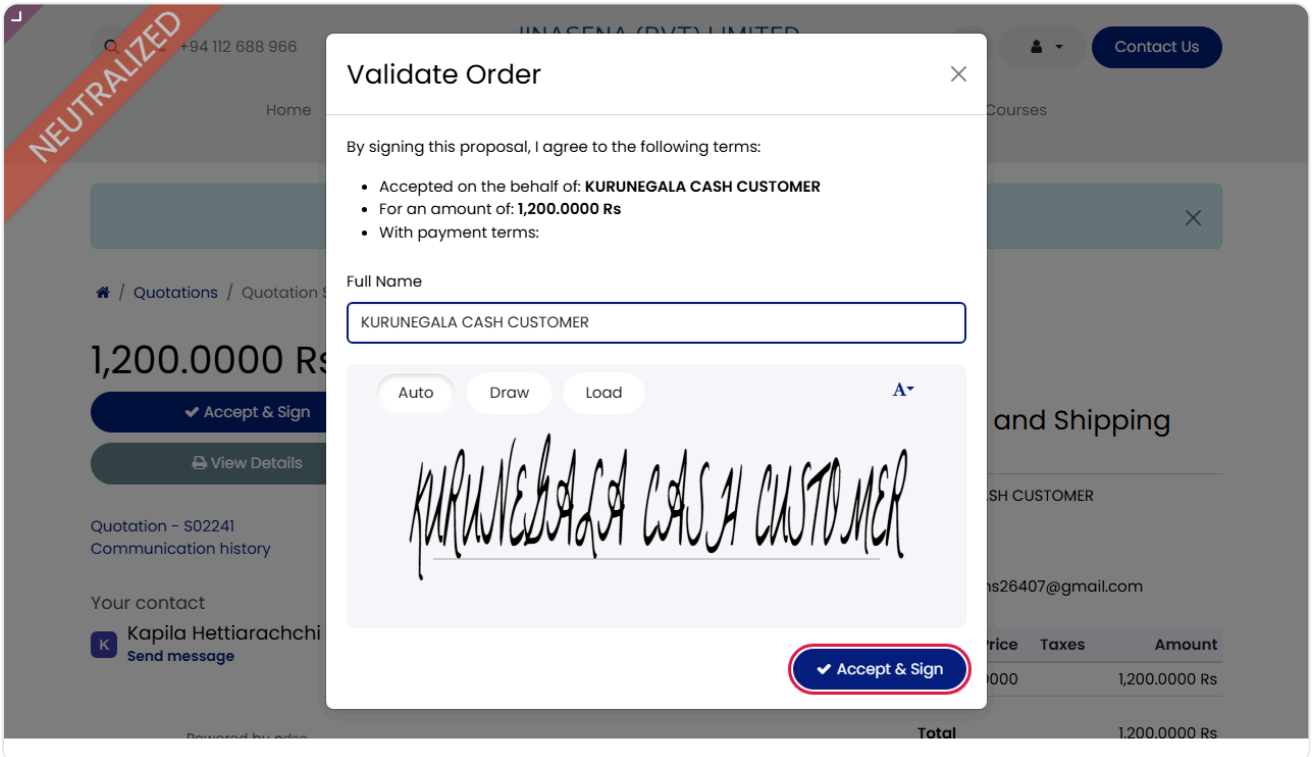

Description The order moves to *Sales Order* once the customer accepts; this activates the Confirm step of the quotation. On this instance the Confirm button itself is hidden in the back-office view once the email has been sent, so the customer's online acceptance (the real-world path) confirms the order.

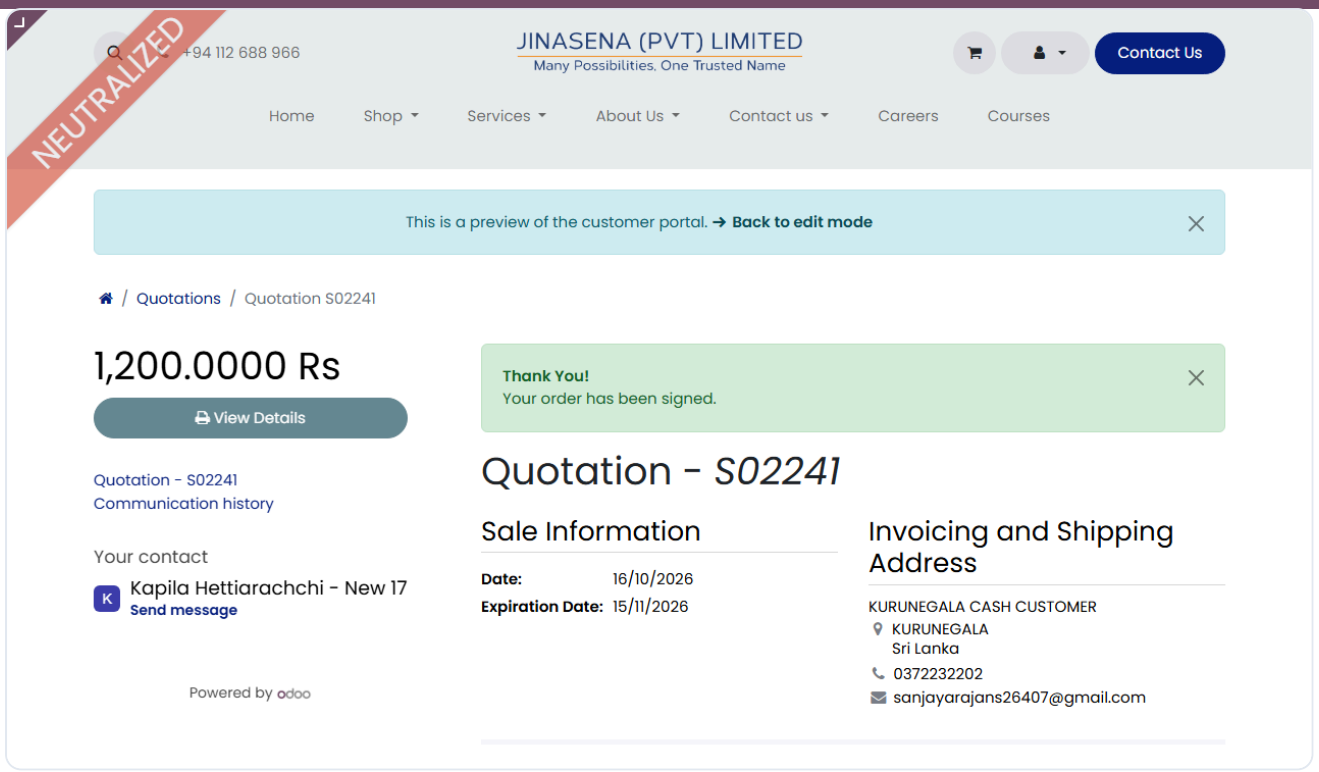

Quotation Sent — state before the customer accepts

Customer portal — quotation, Accept & Sign button

Customer portal — Validate Order signature pop-up, Accept & Sign button

Customer portal — order signed and confirmed

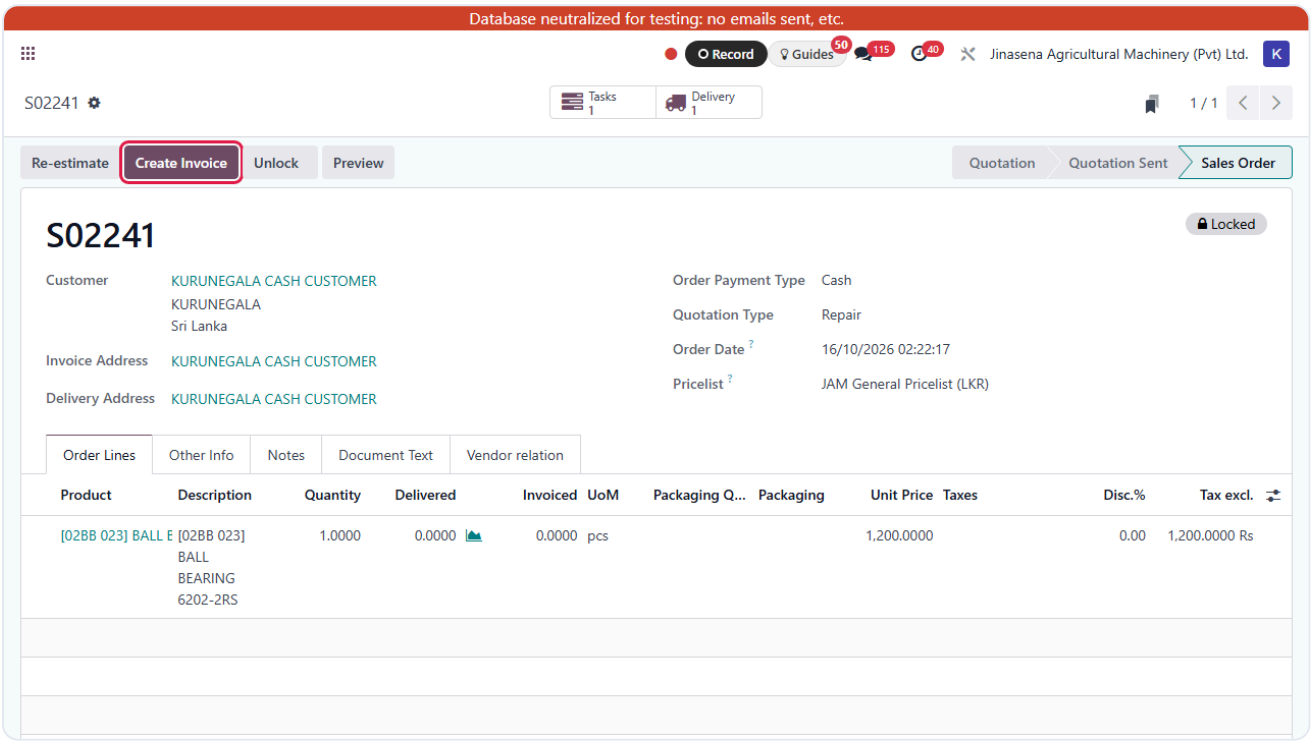

Section F — 50% Deposit (Steps 33–39)

33 Create Invoice

Navigation Sales Order (confirmed)

Action **Click Create Invoice.**

Description As per company policy, a 50% deposit must be paid in advance to proceed with the repair. This creates the draft invoice on which the deposit is registered.

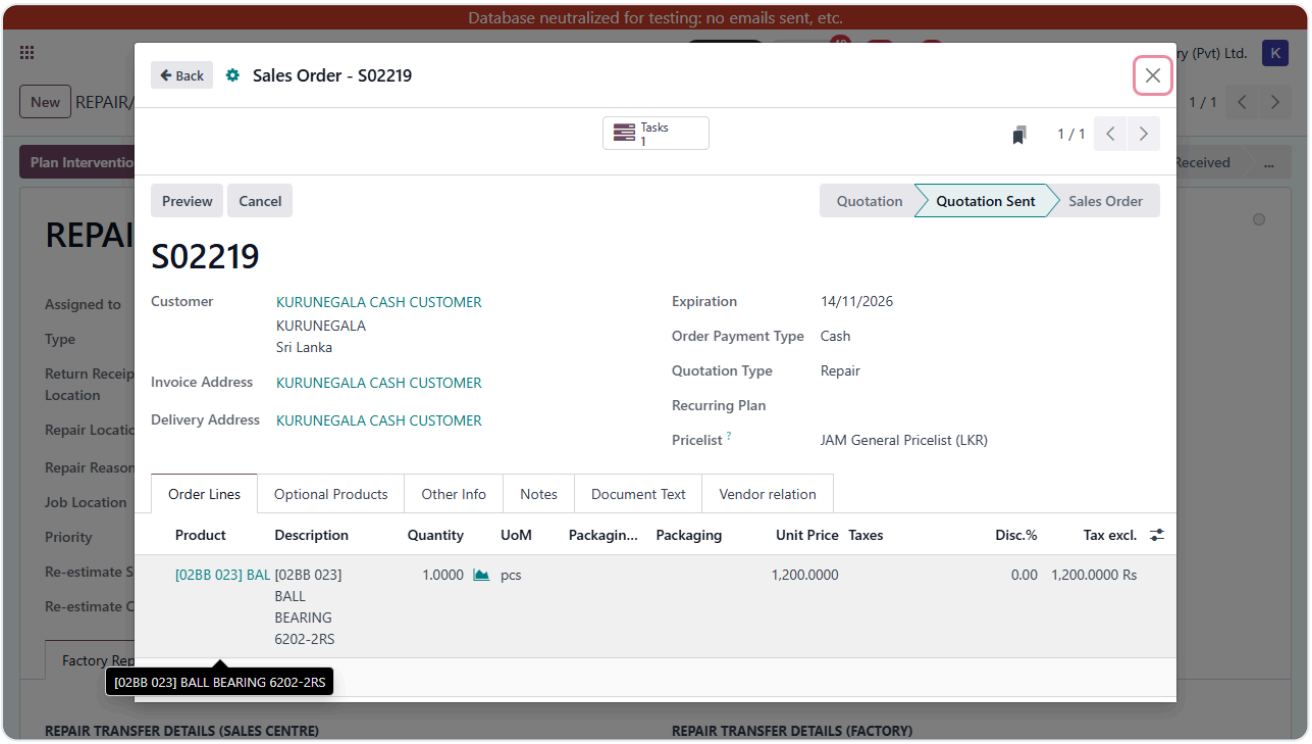

Sales Order — Create Invoice button

34 Confirm the invoice

Navigation Customer Invoice (Draft)

Action **Click Confirm.**

Description Posts the invoice so a payment can be registered against it.

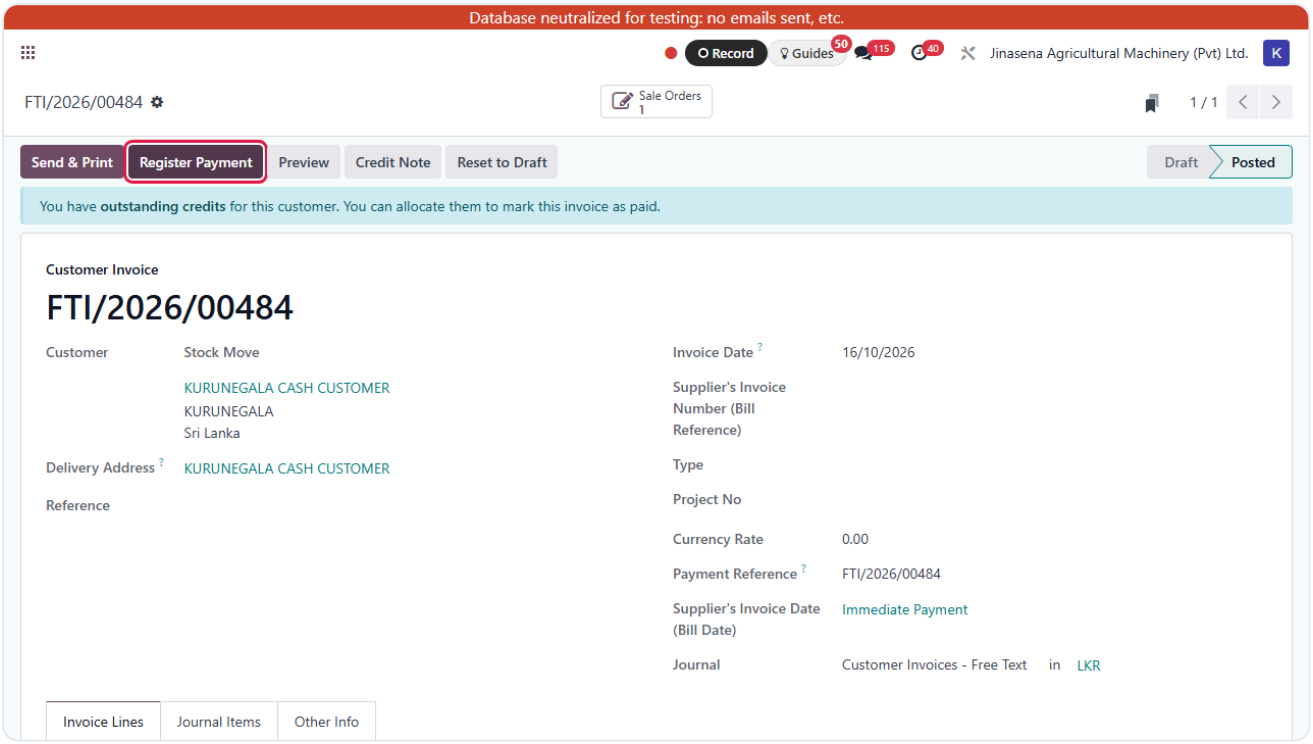

Draft invoice — Confirm button

35 Register Payment

Navigation Customer Invoice (Posted)

Action **Click Register Payment.**

Description Opens the payment wizard for the invoice.

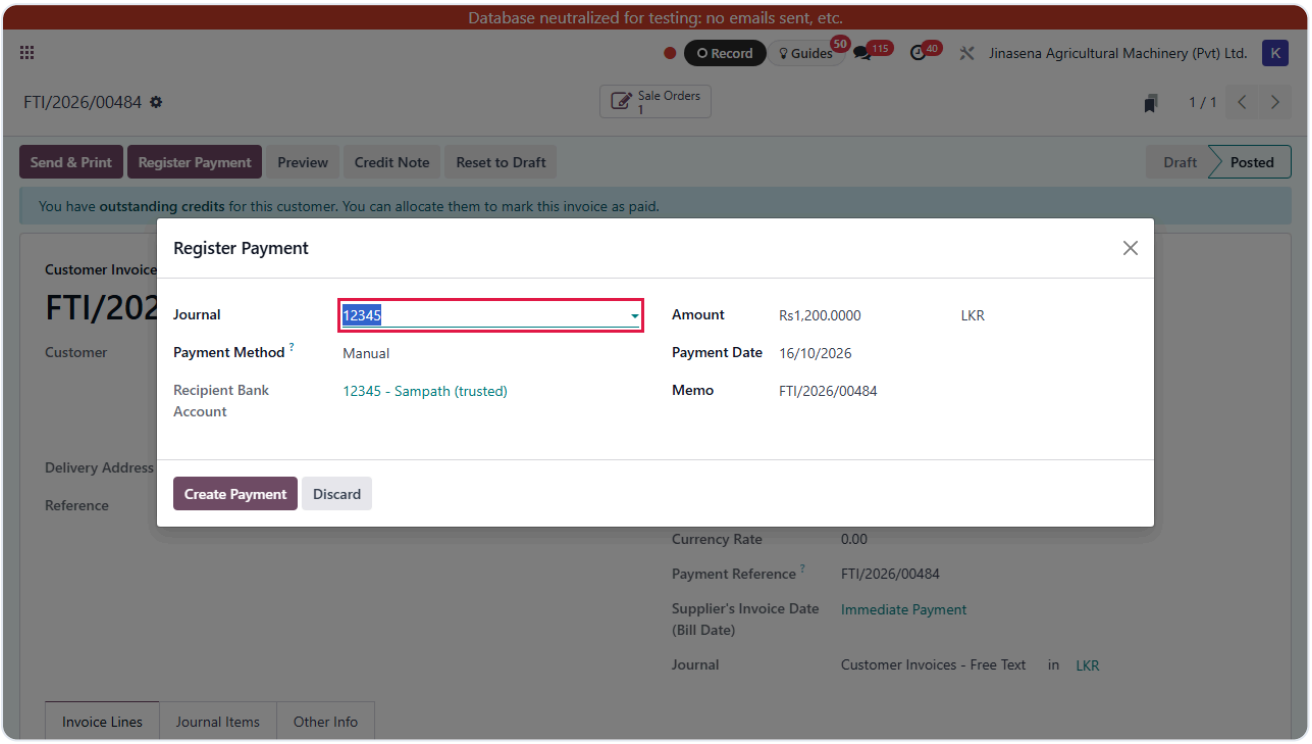

Posted invoice — Register Payment button

36 Select the Journal

Navigation Register Payment dialog

Action **Click the Journal field.**

Description Select the correct journal, i.e. how the money was received.

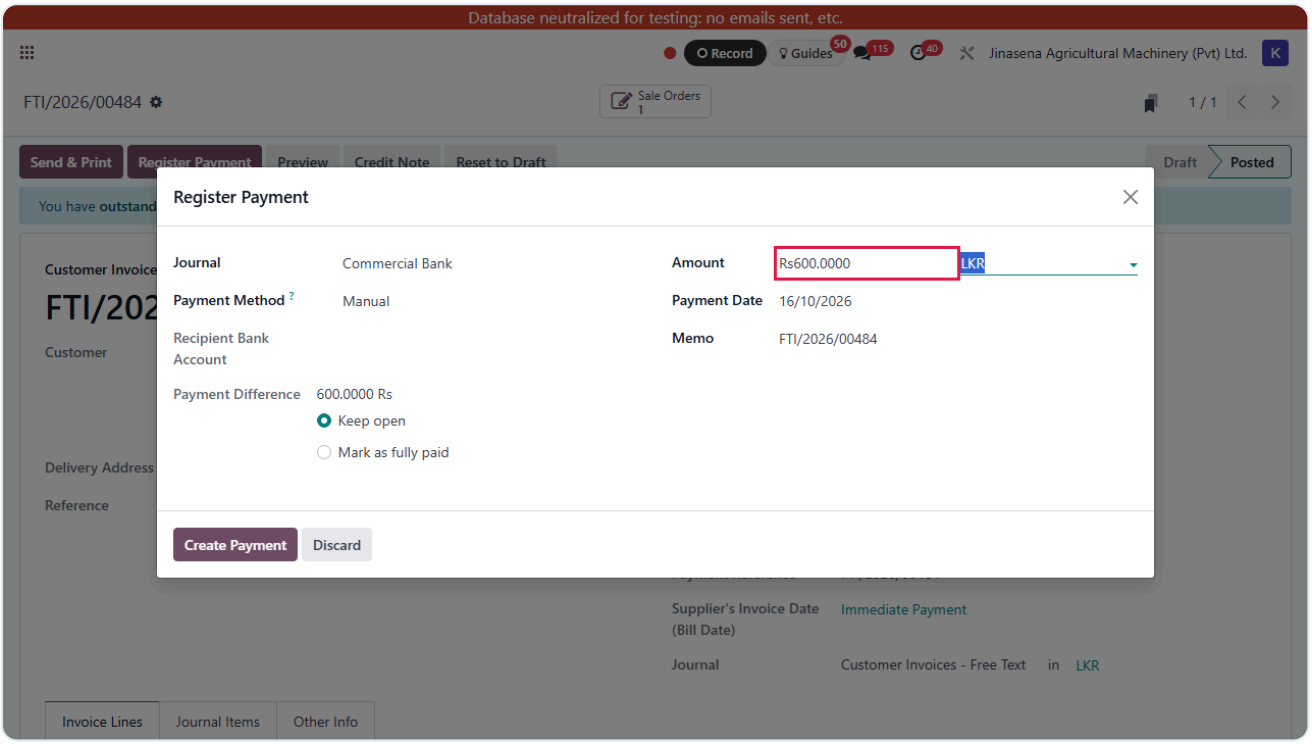

Register Payment dialog — Journal field

37 Journal and Amount

Navigation Register Payment dialog

Action **Select Commercial Bank and enter the deposit amount (50% of the invoice, e.g. `600` of `1,200`).**

Description Type the amount and press Enter. The Payment Difference shows what remains for the balance.

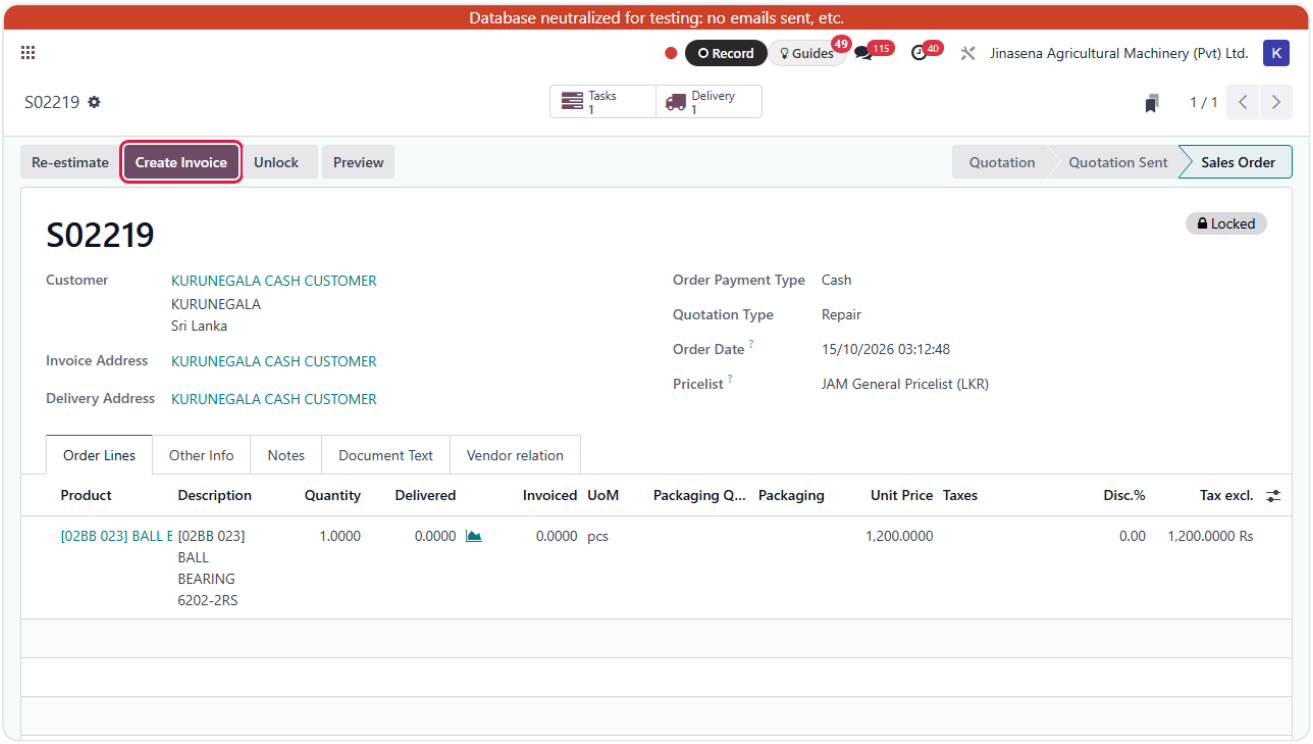

Register Payment dialog — Journal set to Commercial Bank, Amount set to 50%

38 Create Payment

Navigation Register Payment dialog

Action **Click Create Payment.**

Description Creates the deposit payment. The invoice becomes *Partial*.

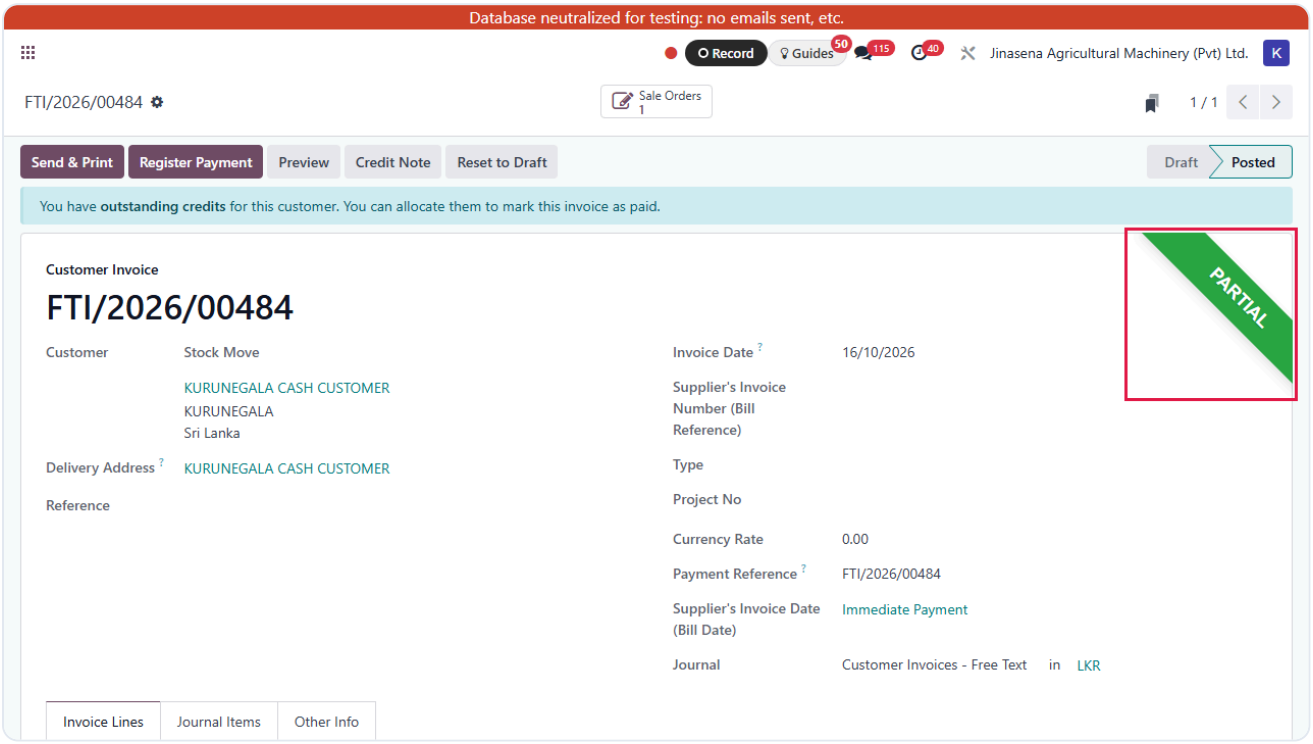

Register Payment dialog — Create Payment button

39 Close

Navigation Customer Invoice (Partial)

Action **Click Close.**

Description Returns to the previous menu. The invoice shows the **Partial** ribbon.

Invoice after the deposit — Partial ribbon

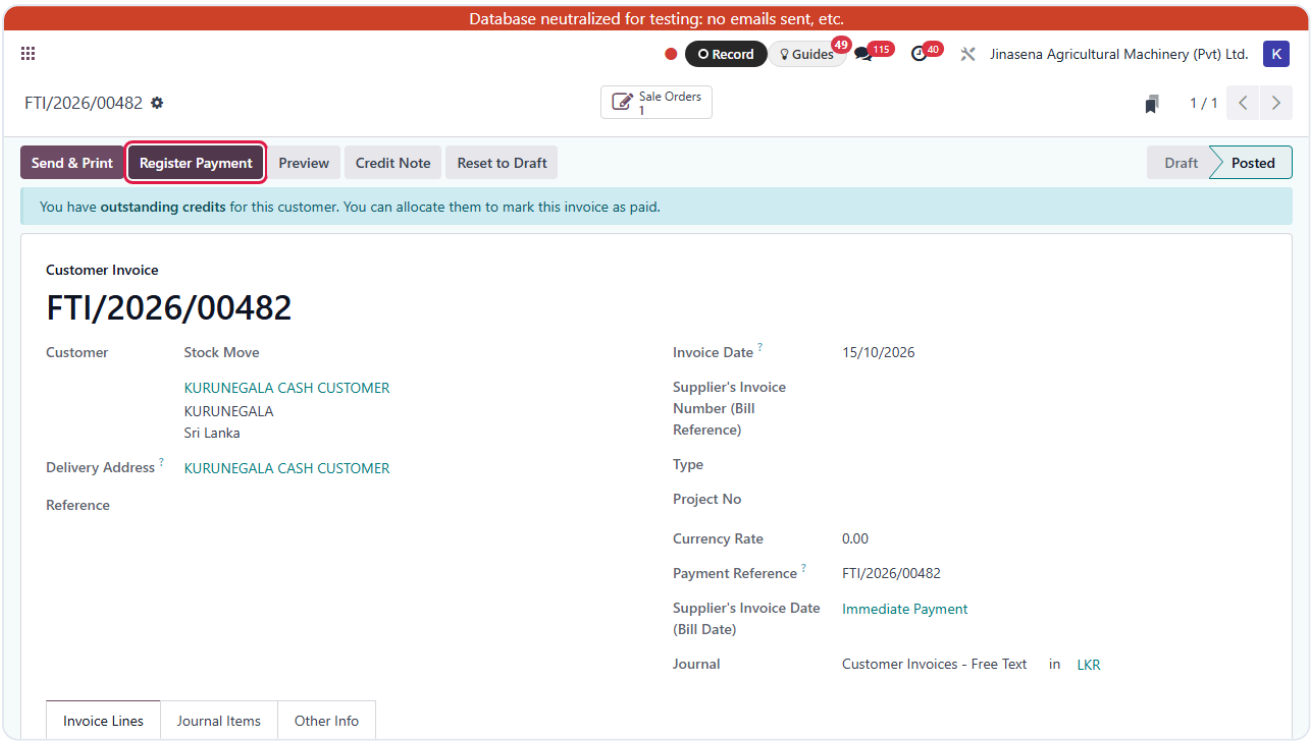

Section G — Delivery and Task Completion (Steps 40–47)

40 Tasks — back to the order

Navigation Ticket form → button box

Action **Click Tasks.**

Description Since the advance has been received, go back to the sales order to complete the repair process.

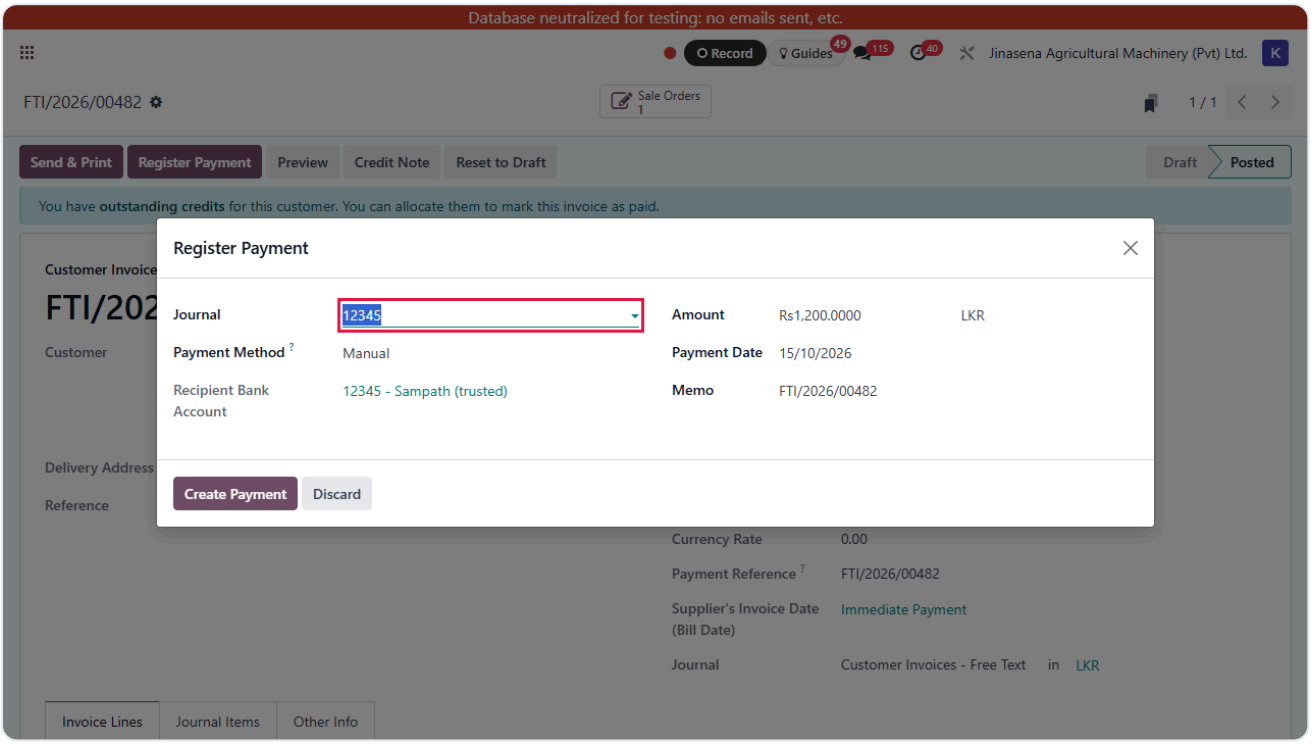

Ticket form — Tasks button

41 Sales Order

Navigation Task form → button box

Action **Click Sales Order.**

Description Opens the confirmed order.

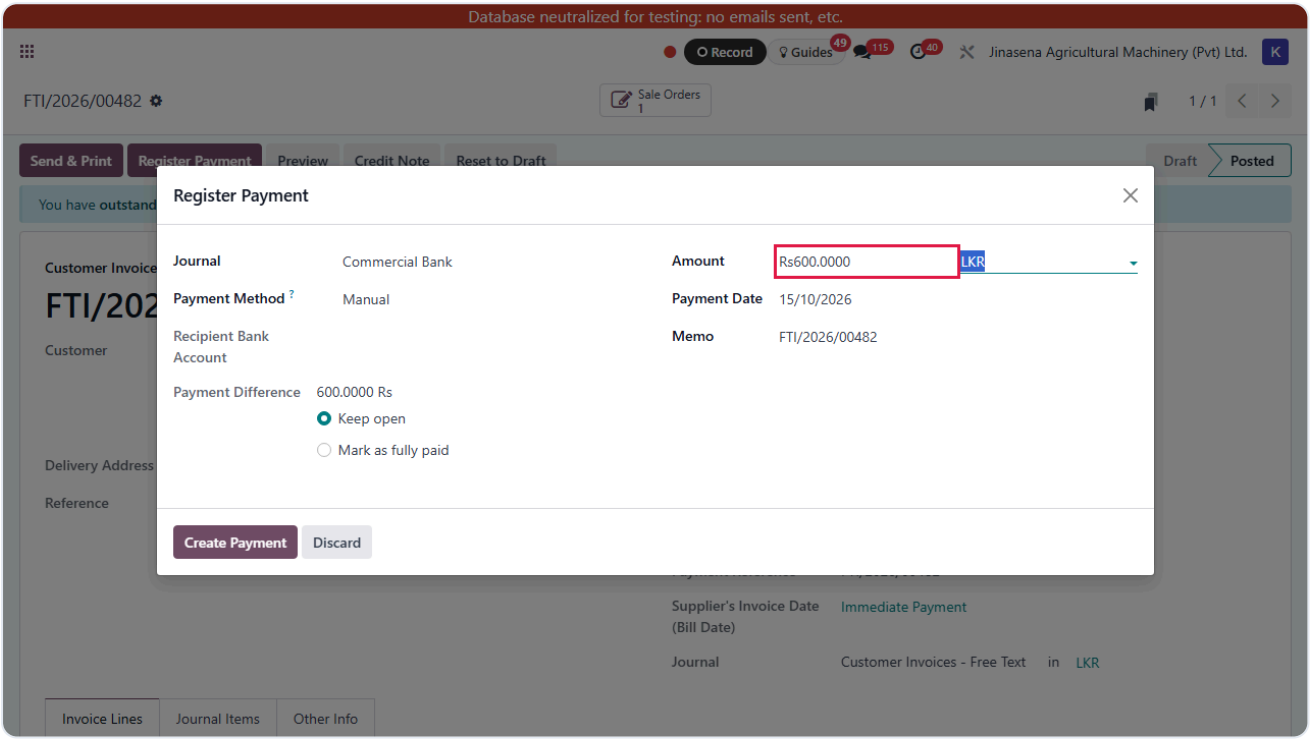

Task form — Sales Order button

42 Delivery

Navigation Sales Order → button box

Action **Click the Delivery button.**

Description Opens the delivery transfer of the order: the item used for the repair is consumed by the customer. On this run the order generated a single delivery transfer (`BR-AM/OUT/00777`) which opens directly; see the QA notes.

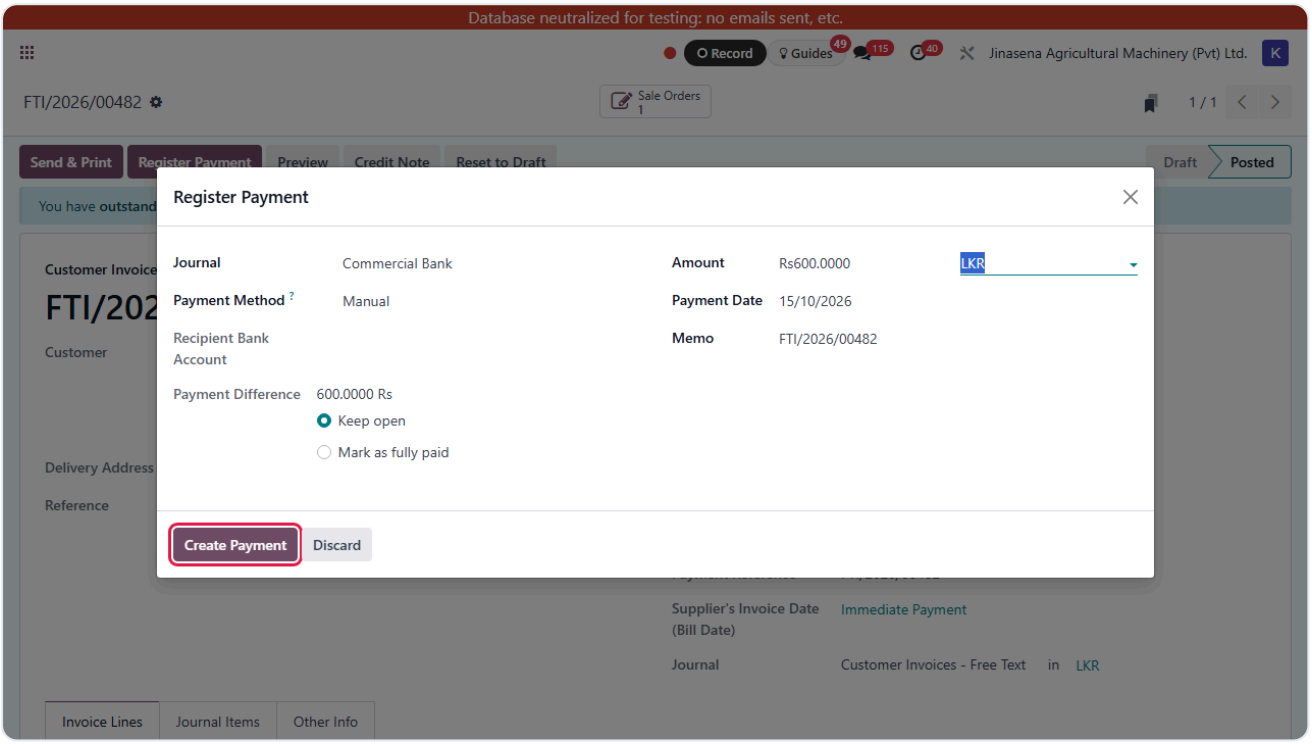

Sales Order — Delivery button

43 Validate

Navigation Transfer BR-AM/OUT/00777 (Ready)

Action **Click Validate.**

Description Completes the stock movement. The transfer becomes *Done*.

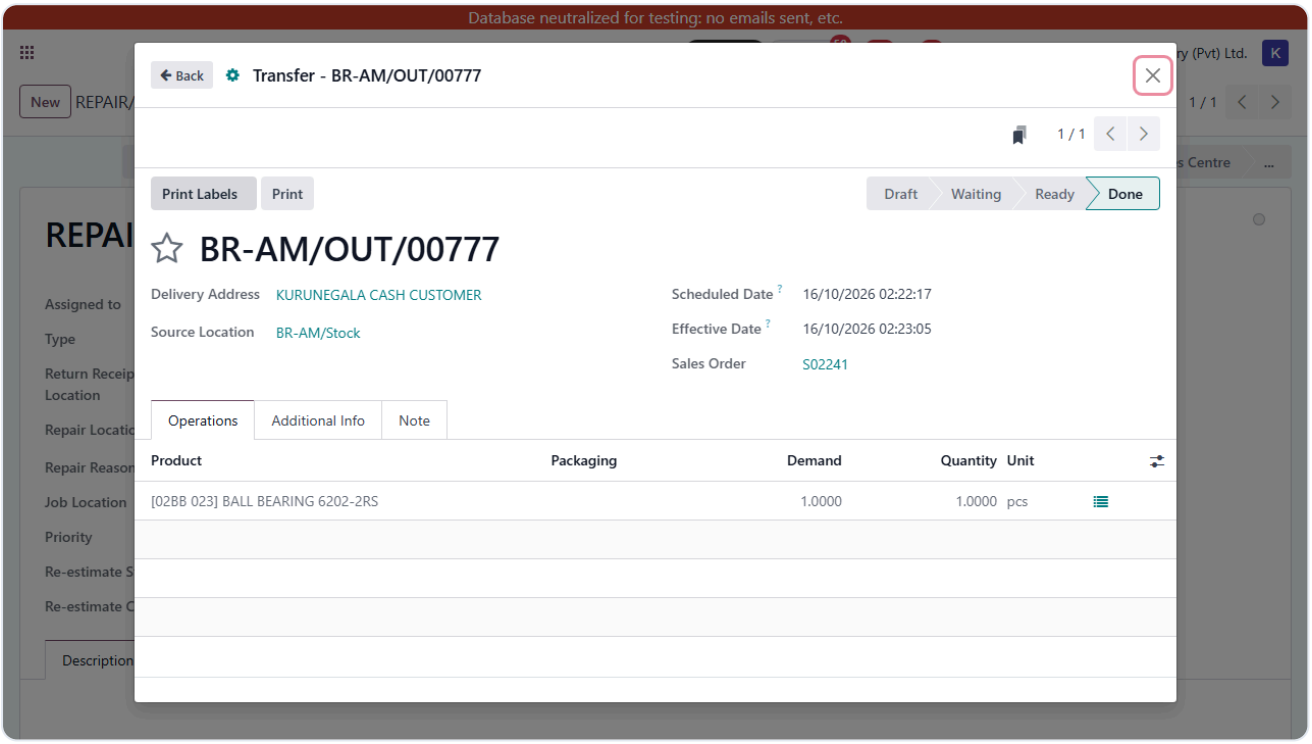

Transfer BR-AM/OUT/00777 (Ready) — Validate button

44 Close

Navigation Transfer BR-AM/OUT/00777 (Done)

Action **Click Close.**

Description Closes the transfer once it is *Done*.

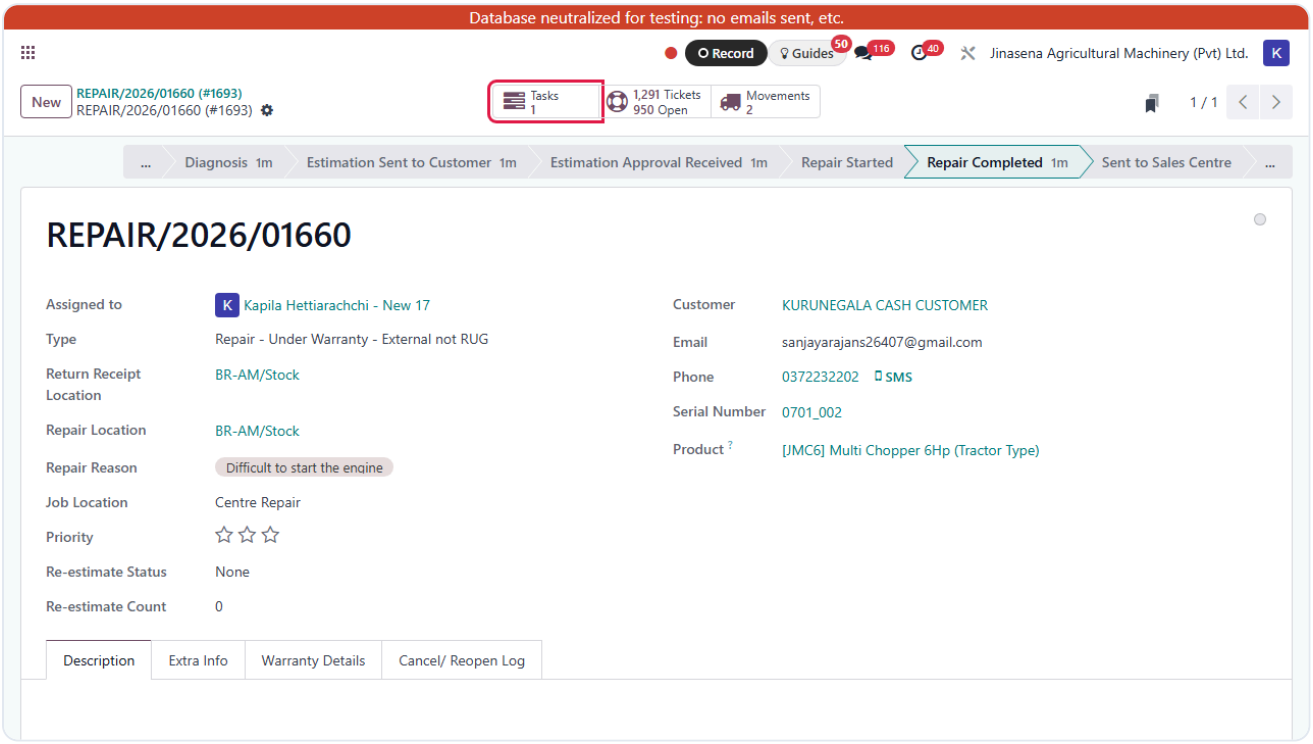

Transfer BR-AM/OUT/00777 (Done) — Close

45 Tasks

Navigation Ticket form → button box

Action **Click Tasks.**

Description Opens the task created for the repair.

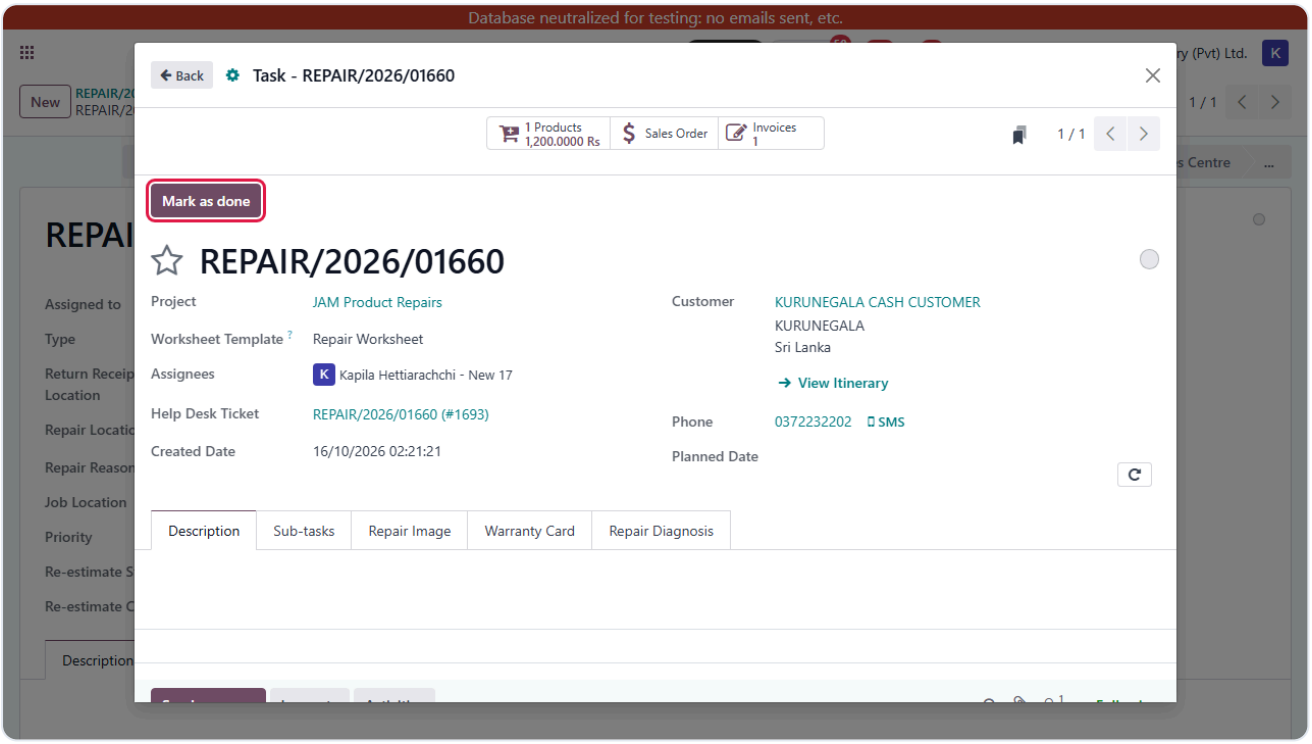

Ticket form — Tasks button

46 Mark as done

Navigation Task form → status bar

Action **Click Mark as done.**

Description The work on the originally created task has been completed; this ends the task.

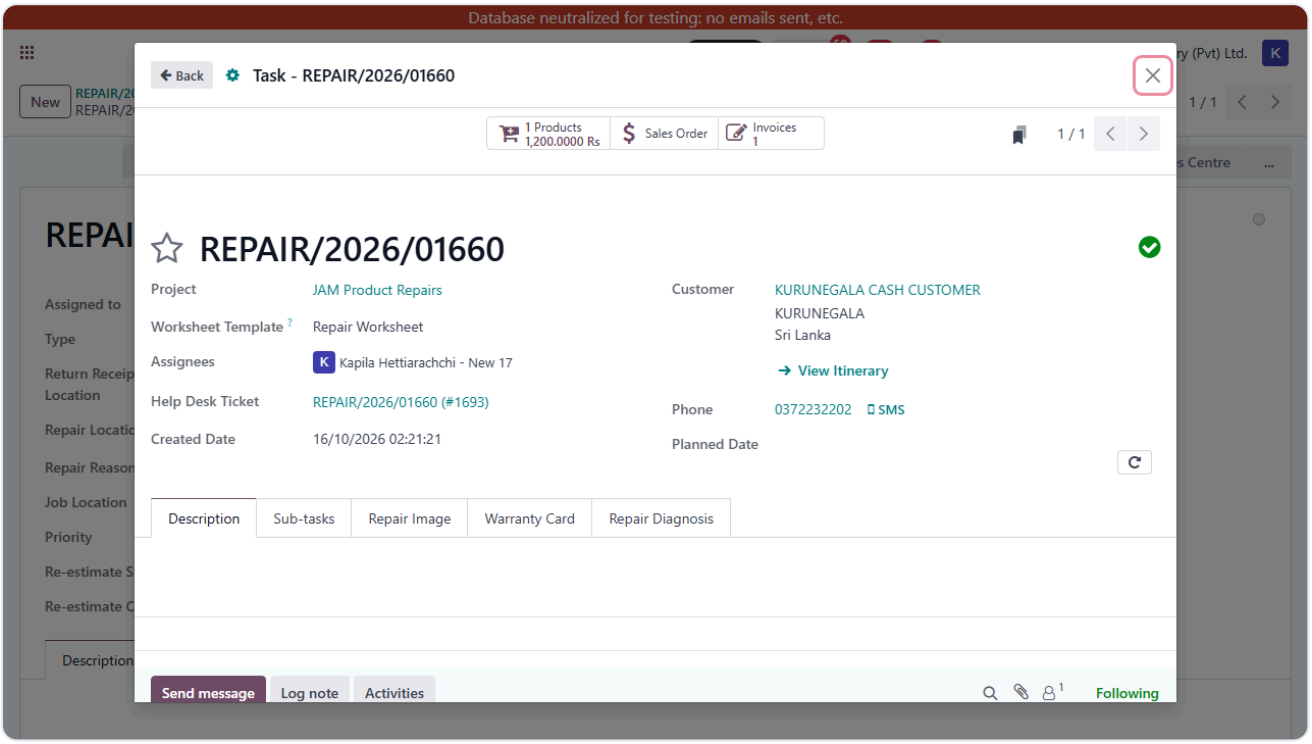

Task form — Mark as done button

47 Close

Navigation Task form (Done)

Action **Click Close.**

Description Returns to the ticket.

Task (Done) — Close

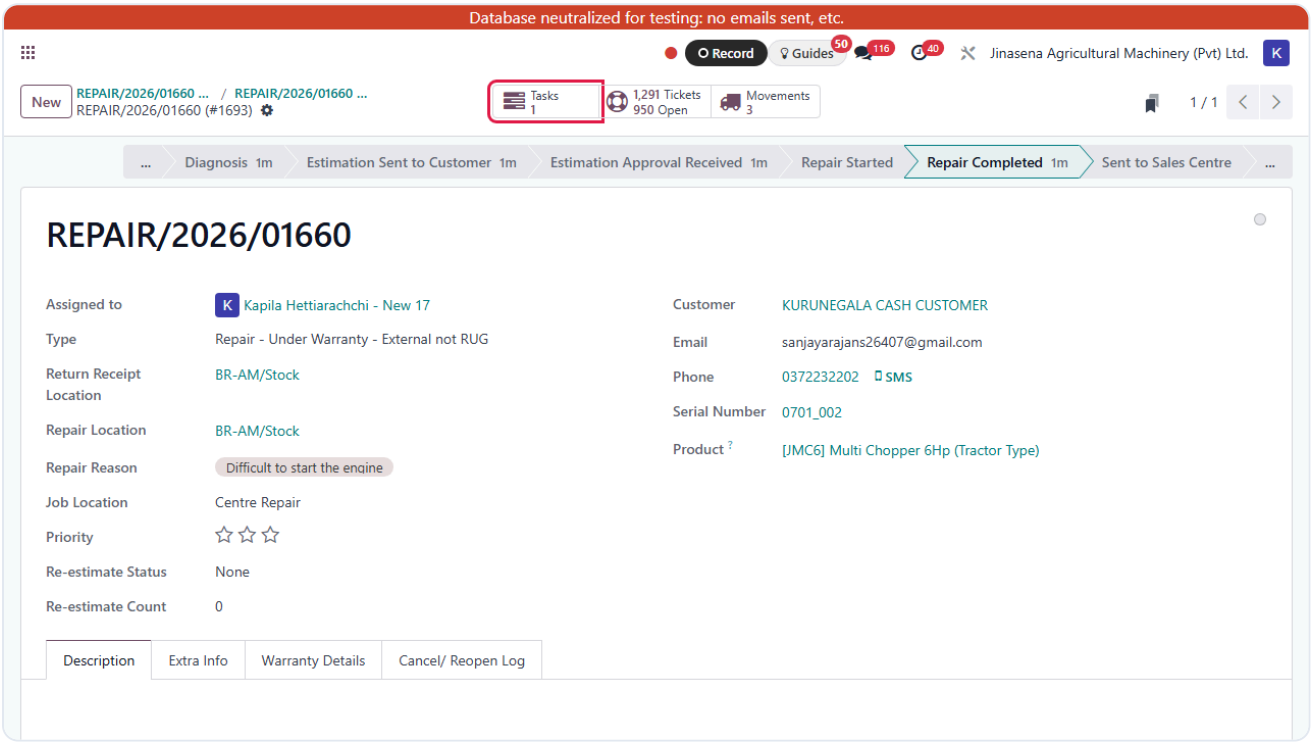

Section H — Balance Payment (Steps 48–54)

48 Tasks — back to the invoice

Navigation Ticket form → button box

Action **Click Tasks.**

Description Go back to the task to receive the balance payment.

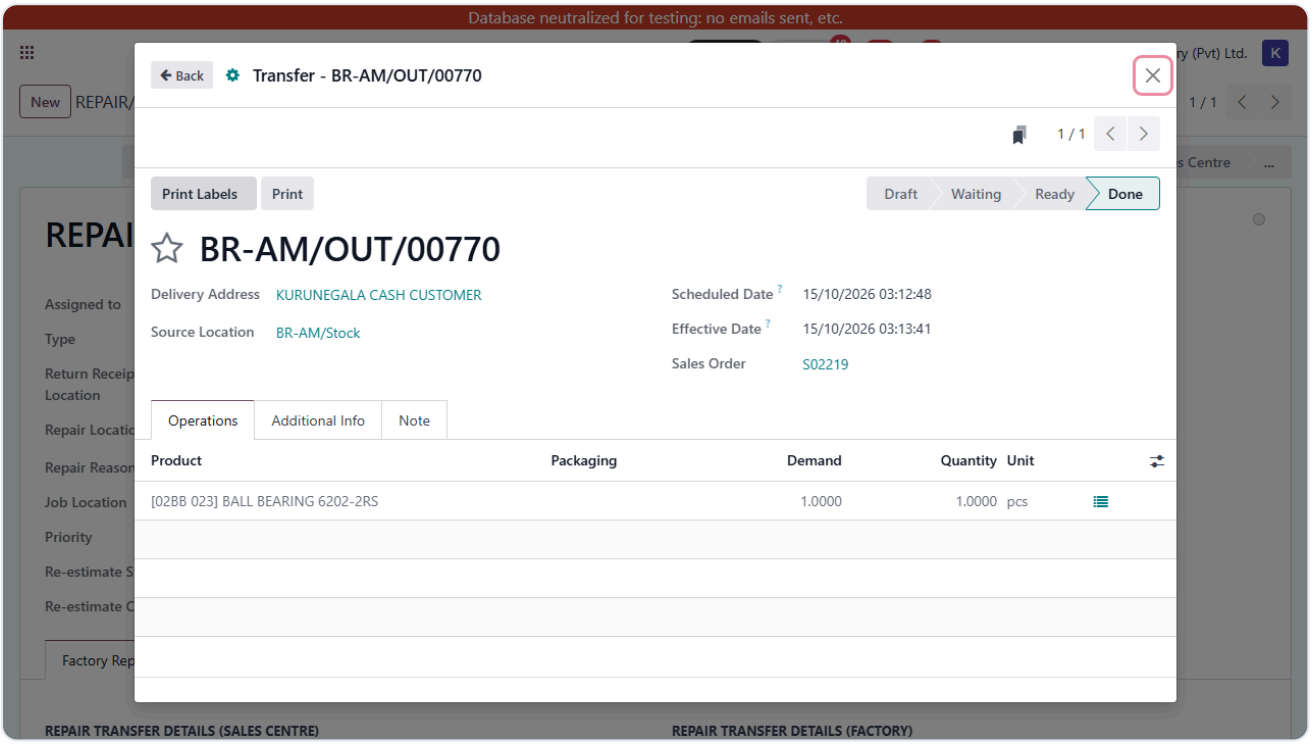

Ticket form — Tasks button

49 Invoices

Navigation Task form → button box

Action **Click the Invoices button.**

Description Opens the invoice so the balance payment can be registered.

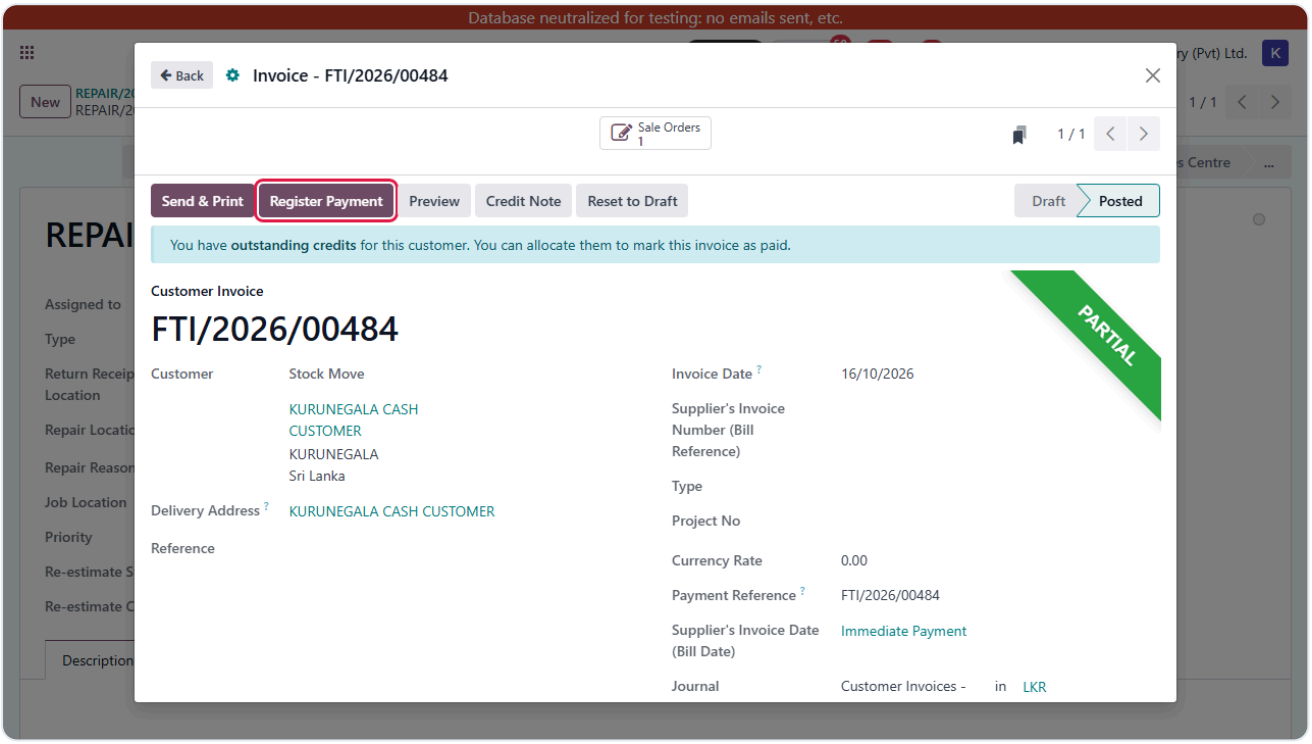

Task form — Invoices button

50 Register Payment

Navigation Customer Invoice (Partial)

Action **Click Register Payment.**

Description Opens the payment wizard; the amount is pre-filled with the remaining balance.

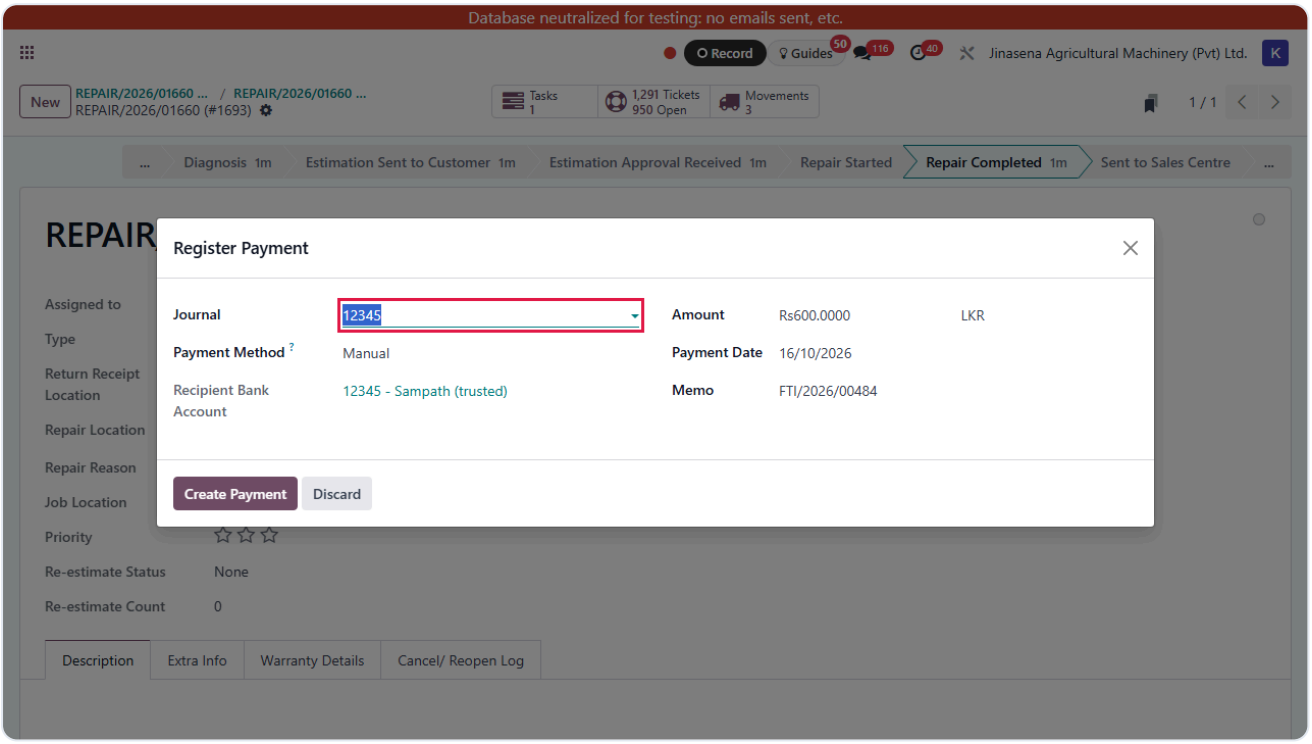

Partial invoice — Register Payment button

51 Select the Journal

Navigation Register Payment dialog

Action **Click the Journal field.**

Description Select the correct journal type.

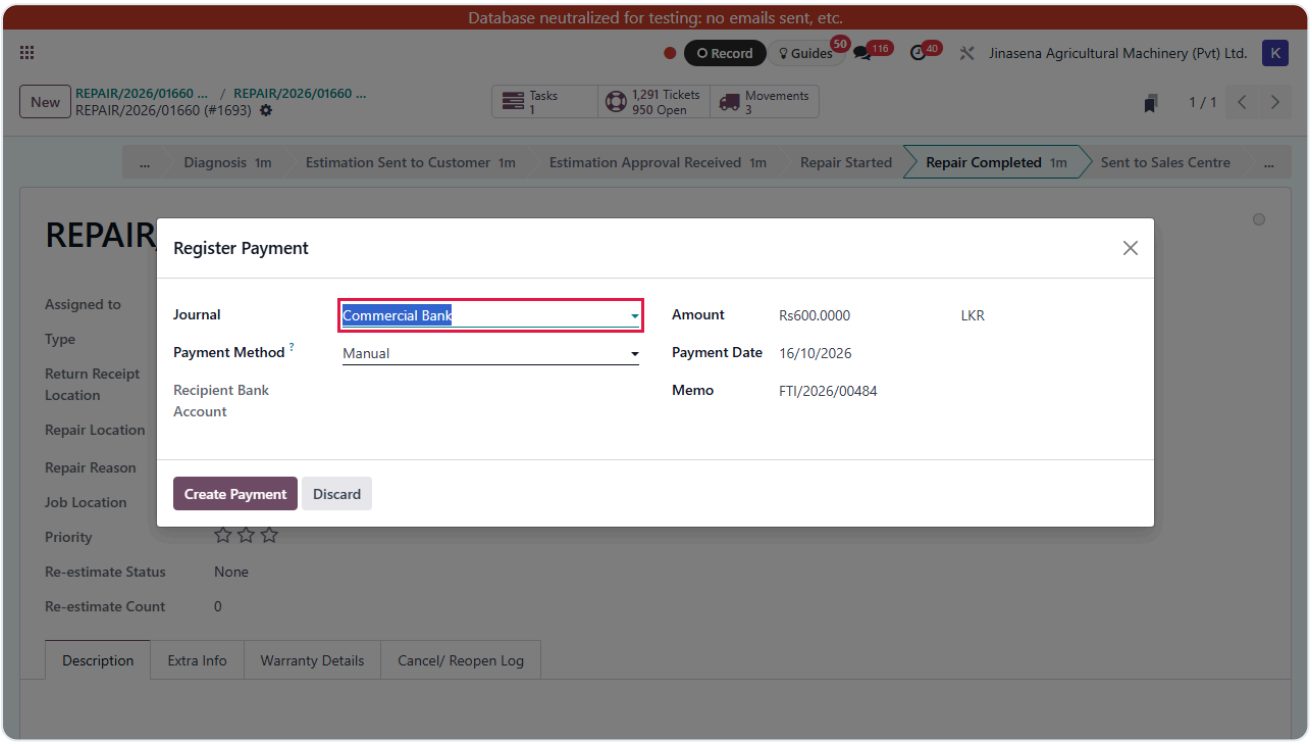

Register Payment dialog — Journal field

52 Commercial Bank

Navigation Register Payment dialog

Action **Select Commercial Bank.**

Description The balance amount stays as pre-filled.

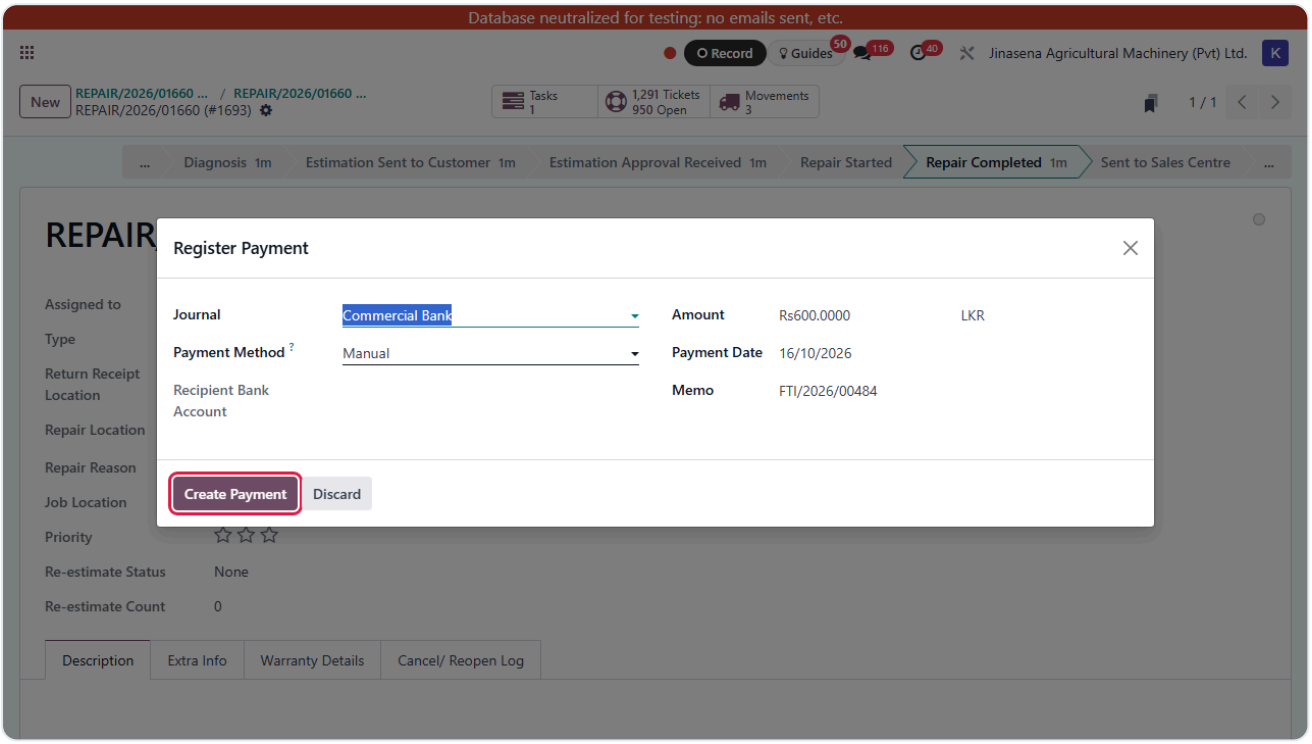

Register Payment dialog — Journal set to Commercial Bank

53 Create Payment

Navigation Register Payment dialog

Action **Click Create Payment.**

Description Creates the balance payment; the invoice becomes fully paid.

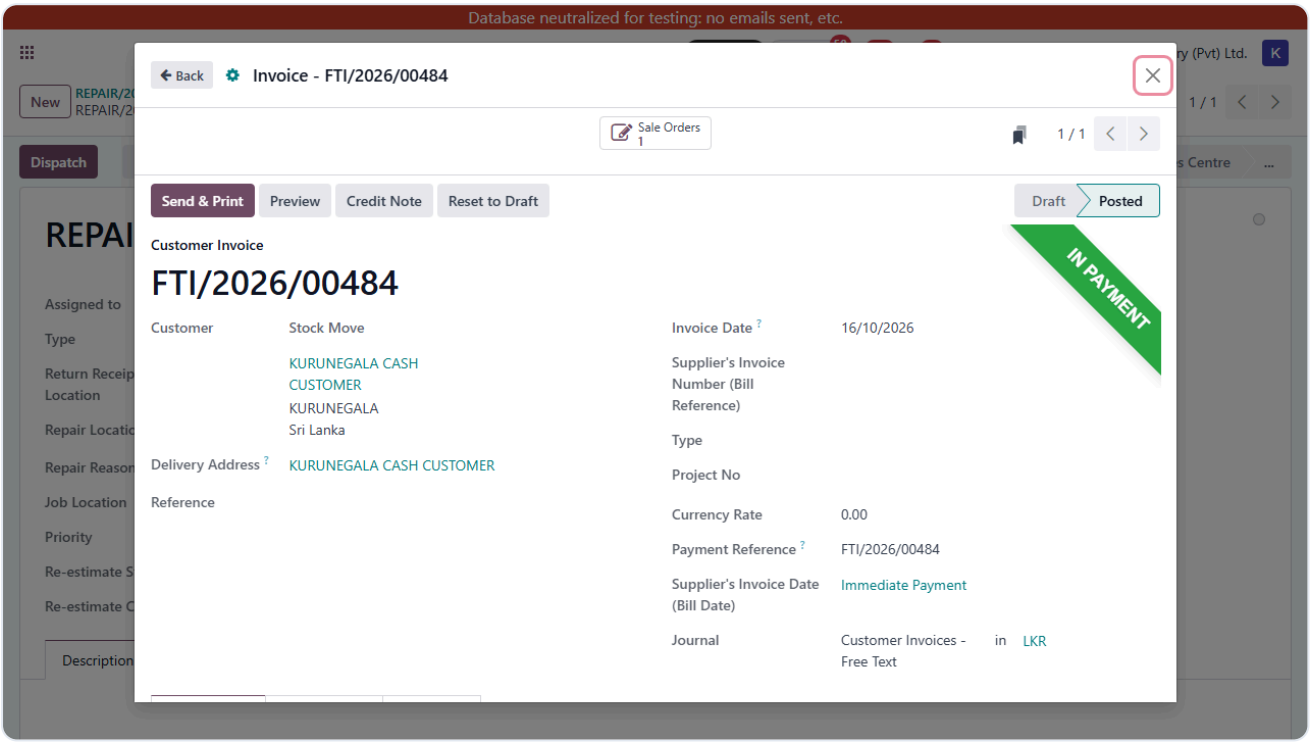

Register Payment dialog — Create Payment button

54 Close

Navigation Customer Invoice (Paid)

Action **Click Close.**

Description Returns to the ticket.

Invoice after the balance payment — Close

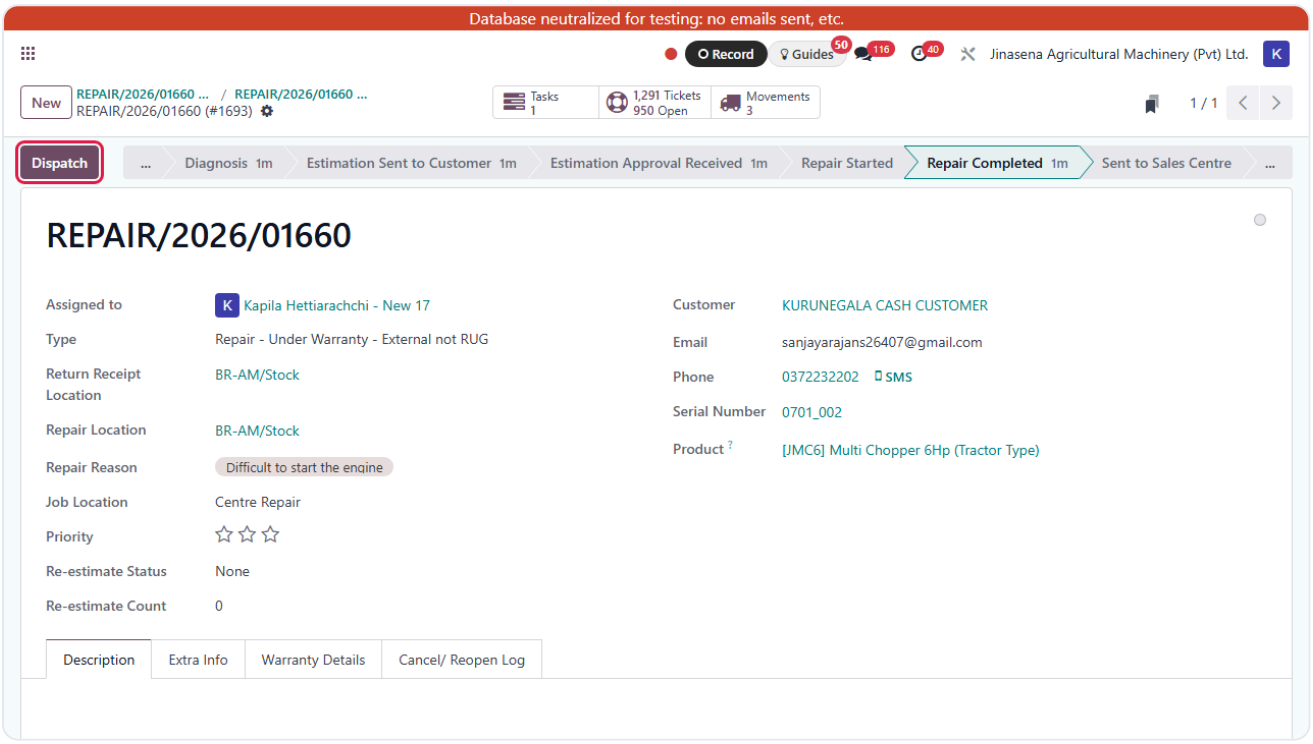

Section I — Dispatch (Steps 55–57)

55 Dispatch

Navigation Ticket form → status bar

Action **Click Dispatch.**

Description Processes the completed repair item back to the customer. The button appears once the balance is paid (you may need to refresh the page).

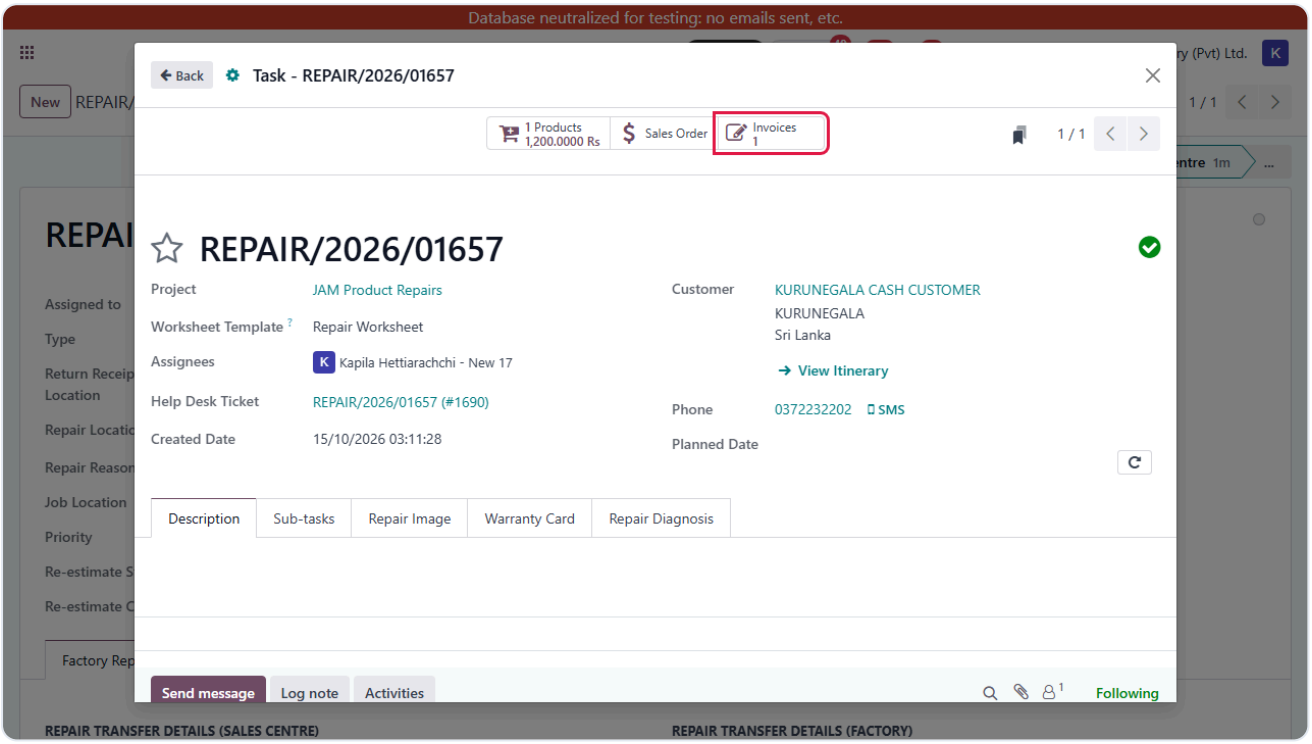

Ticket form — Dispatch button

56 Validate the dispatch

Navigation Returned Picking dialog → header

Action **Click Validate.**

Description Completes the outgoing transfer of the repaired item to the customer.

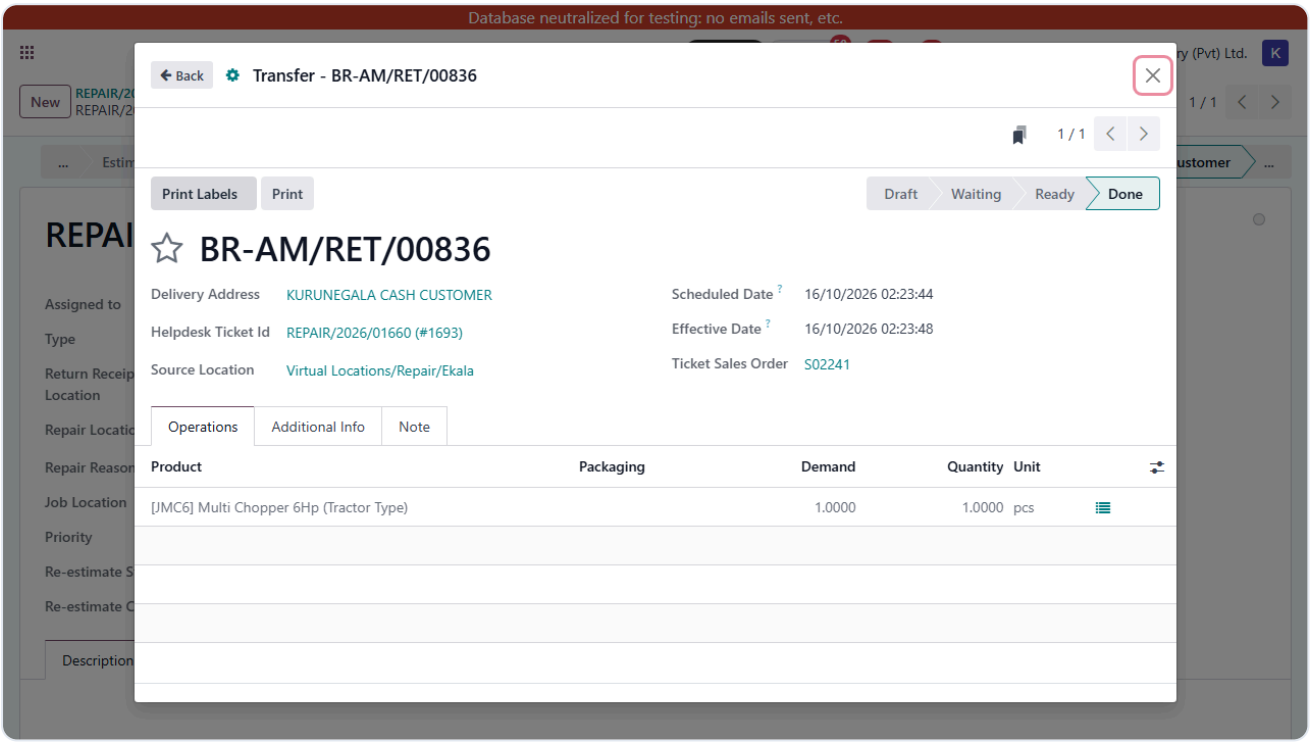

Returned Picking dialog (Ready) — Validate button

57 Close

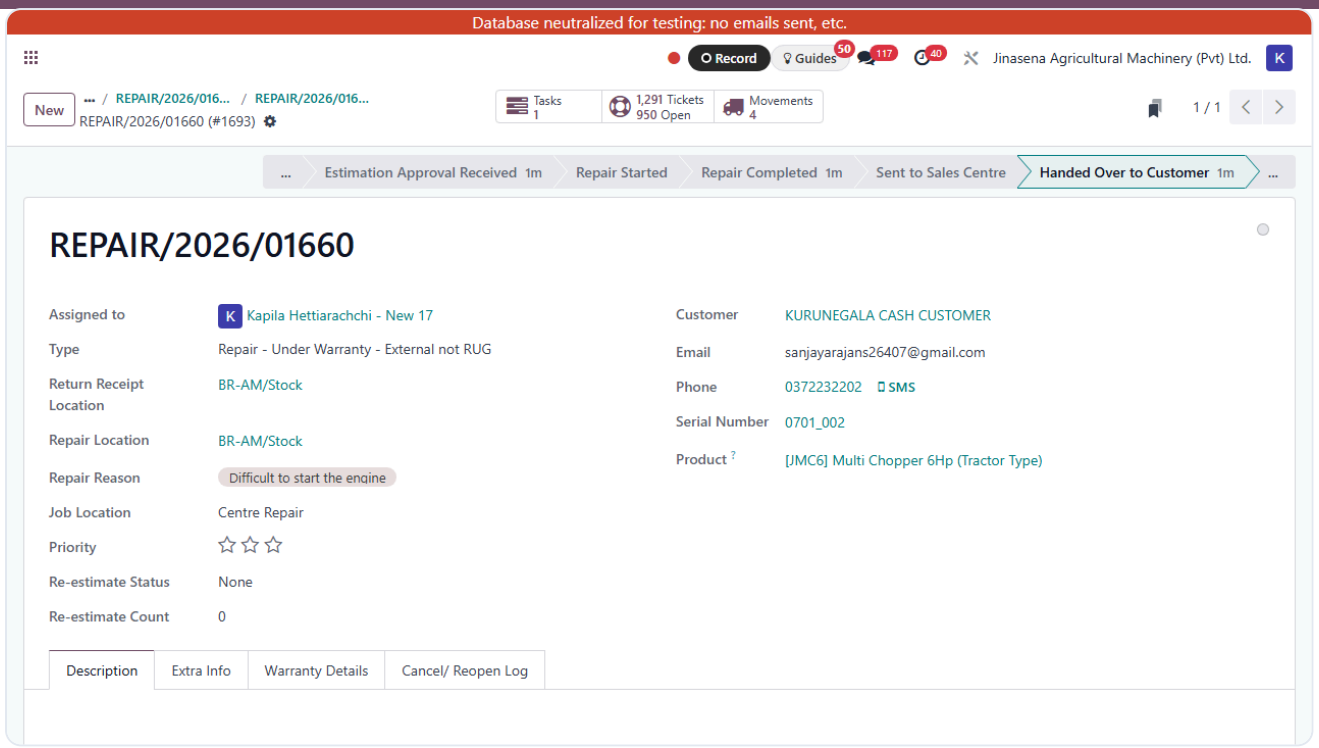

Navigation Returned Picking dialog (Done)

Action **Click Close to go to the ticket view.**

Description The ticket is now in *Handed Over to Customer* — the repair is complete.

Transfer dialog (Done) — Close

Result: ticket after the Close action

QA notes

- This manual covers the **Under Warranty (External not RUG)** flow for a **branch (Centre Repair)** repair. Compared with the *3A* factory flow there is no Send to / Received at Factory and no Send to / Received at Sales Centre: after the receipt is validated the ticket goes straight to Plan Intervention. Compared with the *Without Serial No* branch flow (1C) there is no Product selection and no **Create Serial No** step: the item is identified by an existing **Serial Number**, which fills in the Product. This tour has no warranty card step.
- The Serial Number field only offers serials already sold to a customer. The tour picked its own serial; as required by the test-data rules the automated run picks a serial of [JMC6] whose on-hand quantity is zero (this run used `0701_002`), skipping serials that still hold stock in a Repair location from earlier unfinished runs, which would make the receipt and the final Dispatch fail.
- The tour selects the Repair Reason *Low Pressue*; the test-data rules specify `Difficult to start the engine`, which the automated run and this manual use. The tour selects the Return Receipt Location "Jinasena Ampara Branch"; the automated run selects its stock location `BR-AM/Stock`. The tour's diagnosis steps are generic lookups (typed 1–7); the manual uses the test-data values.
- The **Return** button (`fix_repair_action_direct_return`) raises "You may only return Done pickings" server-side but still creates the Returned Picking first. The automated run clicks the real button, which created the picking on this run; the receipt is validated through `/web/dataset/call_kw` (its Validate button is hidden by the Studio views). The receipt opens as a full page, so the Back screenshot (step 13) shows the Done receipt without a framed button.

- On this instance the quotation's **Confirm** button is hidden once the email has been sent, so the guide shows the customer path (View Quotation → Accept & Sign → Accept & Sign on the online portal; step 32 shows the real portal pages). In the latest run the order still showed as *sent* after the portal flow, so the automated run then confirmed it with `action_confirm` over RPC (the spec verifies the order state via RPC and falls back when needed). The draft invoice is posted through RPC (screenshot 34 shows the Confirm button); the deposit and balance payments are registered through the real Register Payment wizard (50% deposit, then the pre-filled balance).
- The number of delivery transfers depends on branch stock. This run produced a single delivery transfer (`BR-AM/OUT/00777`), which the Delivery button opens directly and which was validated through the real Validate button (steps 42–44); a different run may produce the three-transfer chain (`JM-EK/OUT` → `RP-JM/IN` → `RP-JM/OUT`). The automated run handles both cases.
- After the task is closed the tour goes directly to the invoice (no Send to / Received at Sales Centre in the branch flow), and the balance is collected before **Dispatch**. The tour has no separate Close / Tasks / Sales Order navigation between sending the quotation and confirming it; the manual follows the tour.
- The tour also has an *Open Task* click after **Create & View Task**; on this instance the task is already open at that point, so there is no separate step for it. The **Dispatch** button appears in the status bar only after a full page reload once the balance is paid, so the automated flow reloads the ticket in a polling loop.
- Each screenshot is captured immediately before the step's action with the target element framed in red (a temporary CSS outline applied to the live element only for the capture); result screenshots (serial entered, portal order confirmed, final ticket) have no box. Screenshots come from one clean, fully-passing automated run (admin role): ticket `REPAIR/2026/01660` , quotation `S02241` .
- Every screenshot shows a red "Database neutralized for testing: no emails sent, etc." banner at the top. This is expected on the test database and is not part of the normal production screen.
