Repair User Guide — Branch

Type 1: Under Warranty - RUG (Approved) — Full Flow

Source: Odoo Tour Recorder export — `Tour/2D. Repair User Guide - Branch [ Under Warranty - RUG ( Approved ) - Full Flow ].json`

Scenario: The product is still under warranty and has a serial number and a warranty card. It is repaired at the **branch repair centre**: diagnosis, parts quotation, **RUG approval by R&D**, delivery of the parts, task completion, the final invoice booked to the **RUG account**, and dispatch back to the customer. The customer pays nothing.

Every screenshot below is a real capture from a single, clean, passing automated run — taken *before* each step's action, with the element to use framed in red.

1. Overview

This manual explains how to register and complete a **branch** (Centre Repair) repair for a product that is **under warranty** and approved under the **RUG** facility, from the Helpdesk ticket through the repair task, RUG approval, delivery and invoicing to dispatch.

Ticket stages covered

New | Diagnosis | Estimation Sent to Customer | Estimation Approval Received | Repair Started | Repair Completed | Handed Over to Customer

Before you start

- You have access to the Helpdesk, Field Service, Sales, Accounting and Inventory apps (the RUG approval is done by a user with R&D rights).
- The active company (top bar) is **Jinasena Agricultural Machinery (Pvt) Ltd.**
- The customer, the finished product (with its serial number, already sold through a sales order) and the spare parts already exist in Odoo.

- The customer has brought the item to the branch and a photo of the warranty card is available.

Example data used in this manual

Field	Value
Type	Repair - Under Warranty - RUG
Return Receipt Location	BR-AM/Stock (Jinasena Ampara Branch)
Repair Reason	Difficult to start the engine
Job Location	Centre Repair
Customer	KURUNEGALA CASH CUSTOMER
Serial Number	0630_009 (Product [JMC6] Multi Chopper 6Hp (Tractor Type) is filled automatically)
Warranty Card	Image of the customer's warranty card
Diagnosis	Burnt Part / Base Plate / Internal / Hi Voltage / Reject / 1-REP-REC
Spare part quoted	[02BB 023] BALL BEARING 6202-2RS
Approval / payment	RUG approved by R&D — final invoice on the RUG account, no customer payment

How to read each step

Navigation	Where you are in Odoo (app › menu › screen / dialog).
Action	What to click, select, or type.
Description	Why the step is needed and what happens.
Screenshot	The screen you are on *right before* performing the action, with the element to use framed in red.

Step summary

Section	Steps	Purpose

A	1–12	Open Helpdesk, create the ticket, classify it as Under Warranty - RUG, enter the serial number and attach the warranty card.
B	13–15	Return the item into stock and validate the receipt.
C	16–17	Create the Field Service task for the repair technician.
D	18–30	Record the diagnosis, attach a photo and add the spare part to be quoted.
E	31–34	Request RUG approval for the quotation, approve it, and confirm the order.
F	35–37	Validate the delivery transfer generated by the order.
G	38–40	Mark the repair task as done and close it.
H	41–46	Create the final invoice, switch it to the RUG account and confirm it.
I	47–49	Dispatch the repaired item back to the customer.

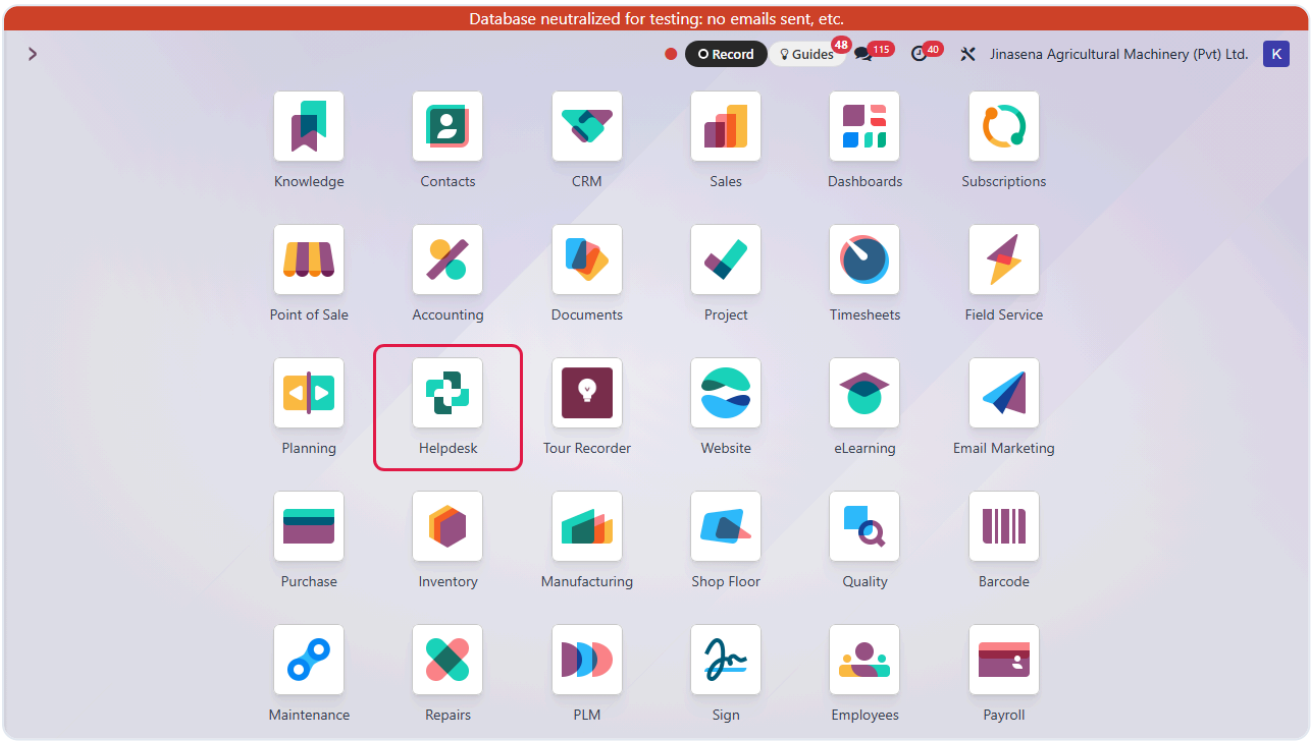

Section A — Create the Repair Ticket (Steps 1–12)

1 Open the HelpDesk app

Navigation Odoo Home → Apps

Action **Click the Helpdesk app icon on the home screen.**

Description Opens the Helpdesk Overview dashboard, showing every support team you have access to.

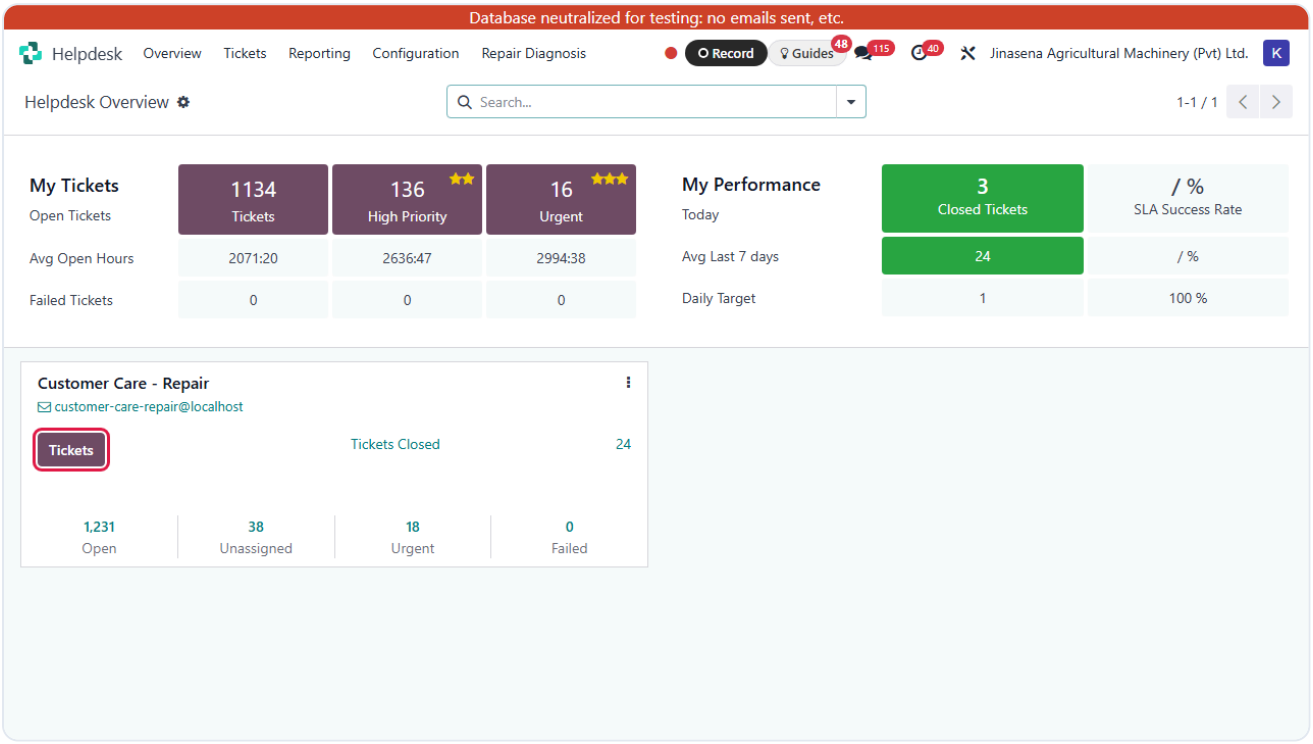

Odoo Apps home screen — Helpdesk app icon

2 Open the repair tickets

Navigation Helpdesk → Overview → Customer Care - Repair

Action **On the Customer Care - Repair team card, click Tickets.**

Description Displays the created tickets and their information.

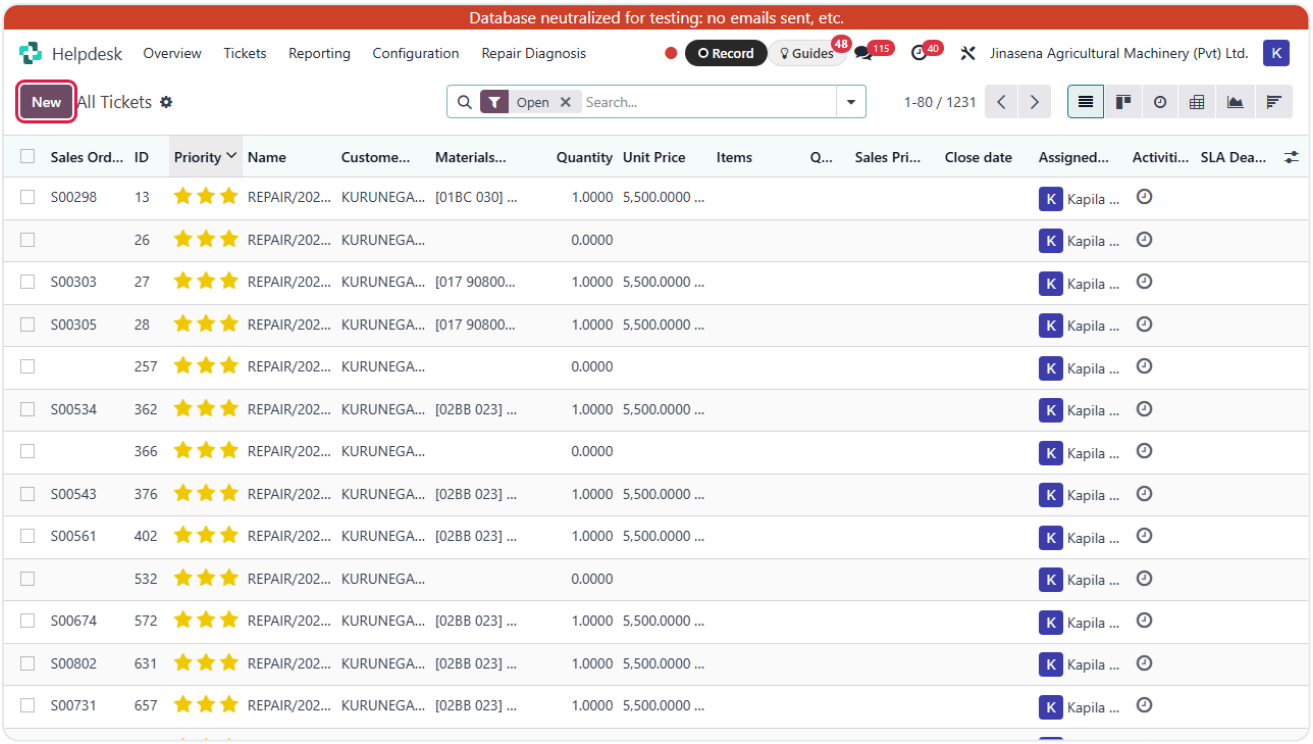

Helpdesk Overview — Tickets button on the Customer Care - Repair team card

3 Create a new ticket

Navigation Helpdesk → Customer Care - Repair (Tickets)

Action **Click New at the top-left of the ticket list.**

Description Opens a blank Helpdesk ticket form for the repair item received from the customer.

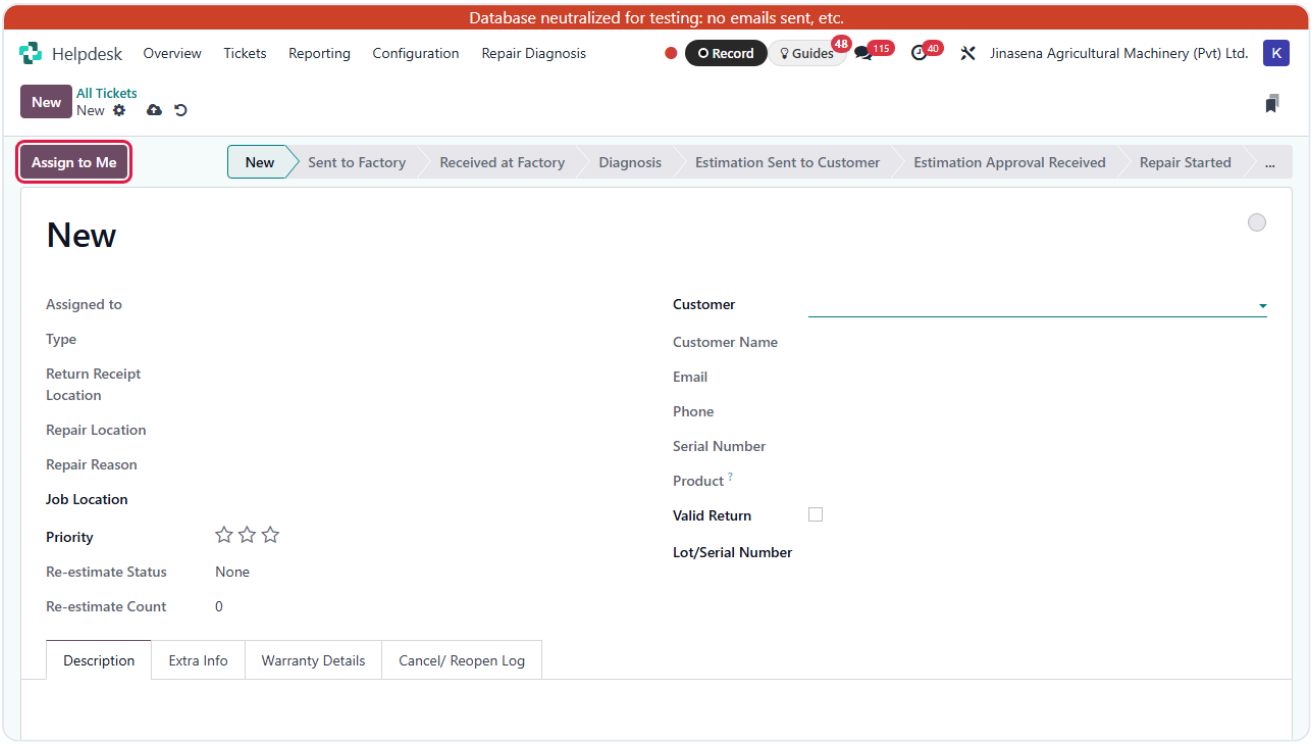

All Tickets list — New button

4 Assign the ticket to yourself

Navigation New ticket form

Action **Click Assign to Me in the status bar.**

Description Saves the ticket for the first time and assigns it to the current user. This also generates the ticket's sequence-based name (e.g. `REPAIR/2026/01645`) — the ticket has no user-editable title.

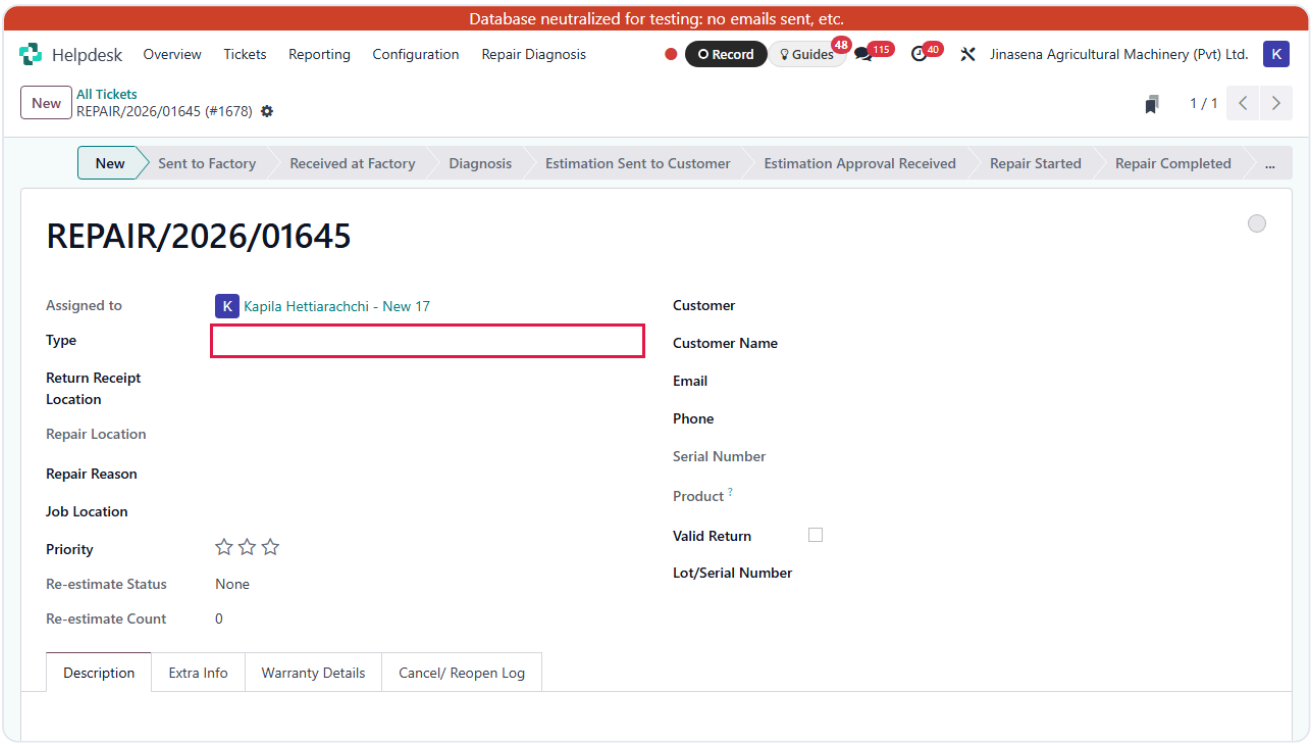

Blank new ticket form — Assign to Me button

5 Set the repair Type

Navigation Ticket form → Type field

Action **Click the Type field and select Repair - Under Warranty - RUG.**

Description Selects the *Under Warranty - RUG* flow: the product is still under warranty and the repair is carried out at the company's cost under the RUG facility, once R&D approves it. For this type a **Serial Number** and a photo of the **Warranty Card** are required (there is no *Create Serial No* button).

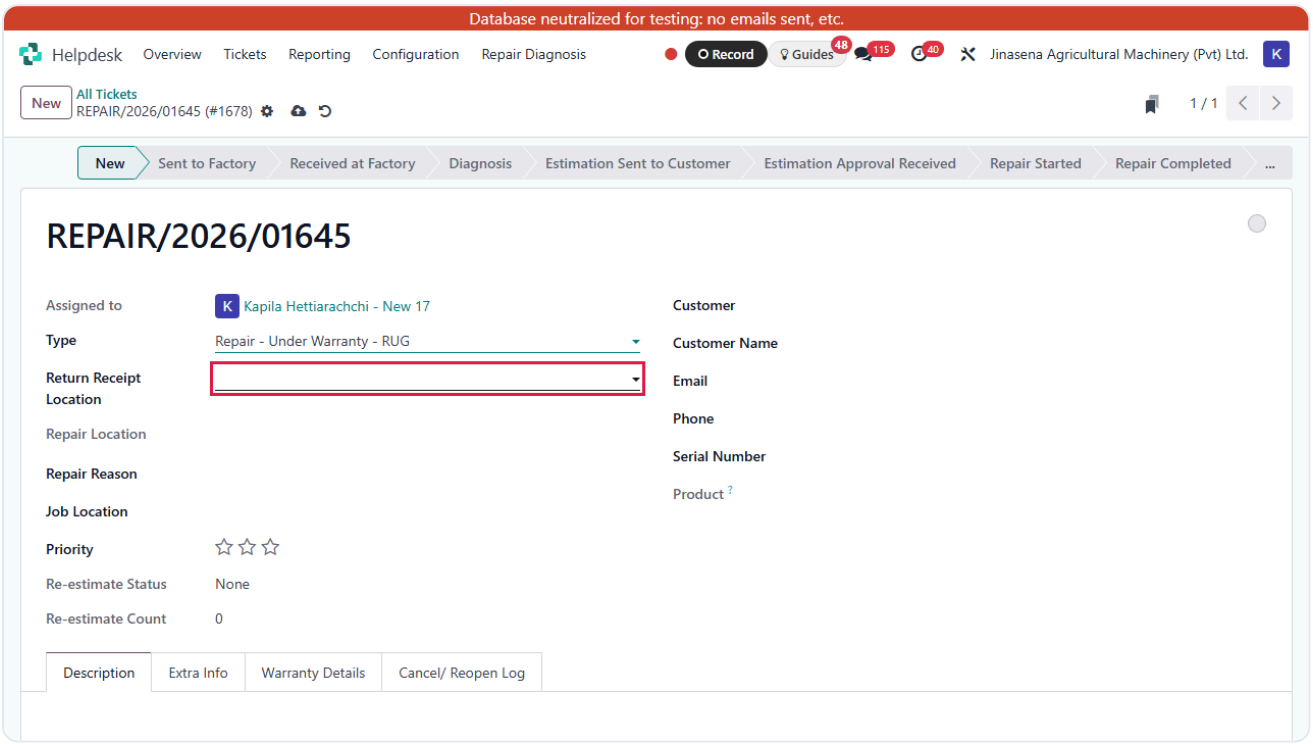

Ticket form — Type field

6 Set the Return Receipt Location

Navigation Ticket form → Return Receipt Location field

Action **Click Return Receipt Location and select the branch receiving the item (e.g. `BR-AM/Stock`, Jinasena Ampara Branch).**

Description The location where the item is received for repair.

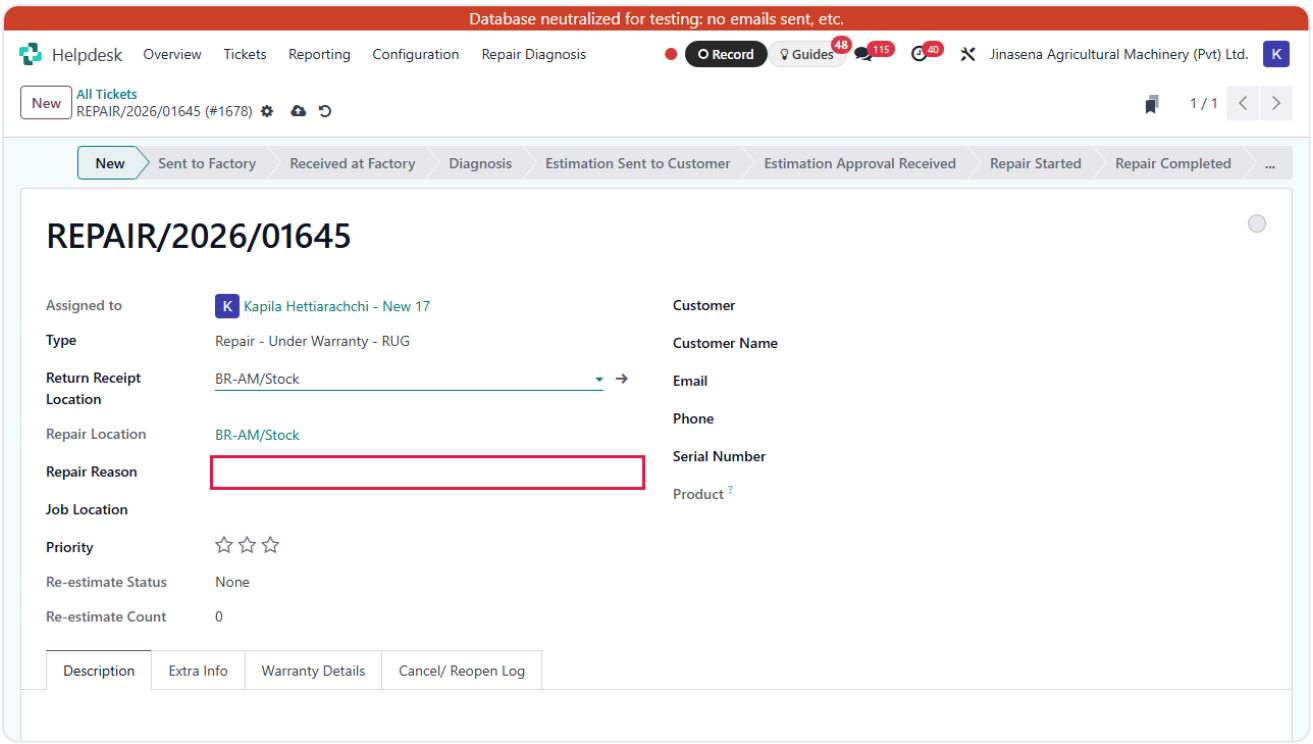

Ticket form — Return Receipt Location field

7 Select the Repair Reason

Navigation Ticket form → Repair Reason field

Action **Click Repair Reason and select the reported fault (e.g. `Difficult to start the engine`).**

Description A list of common errors is provided; select the ones that apply. This is a tags field.

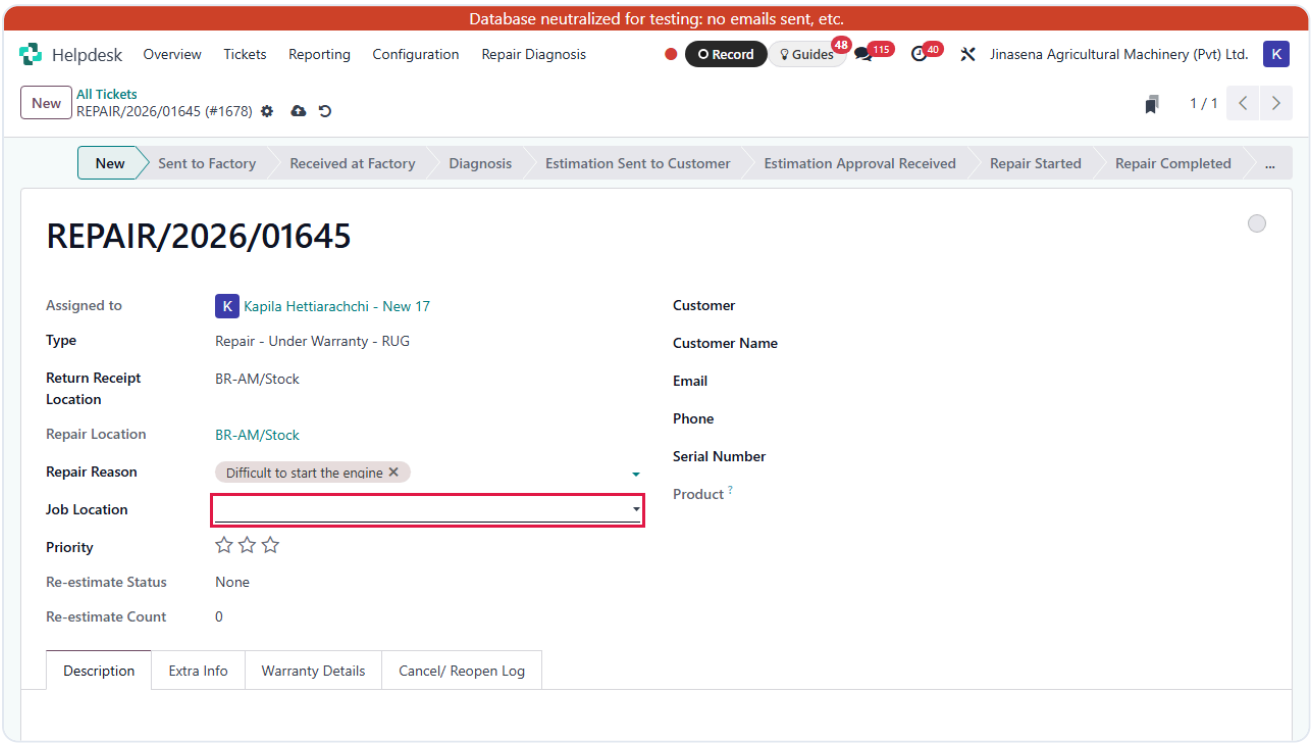

Ticket form — Repair Reason field

8 Select the Job Location

Navigation Ticket form → Job Location field

Action **In Job Location, select Centre Repair.**

Description Defines where the repair will be performed. **Centre Repair** means the repair is done at the branch repair centre itself.

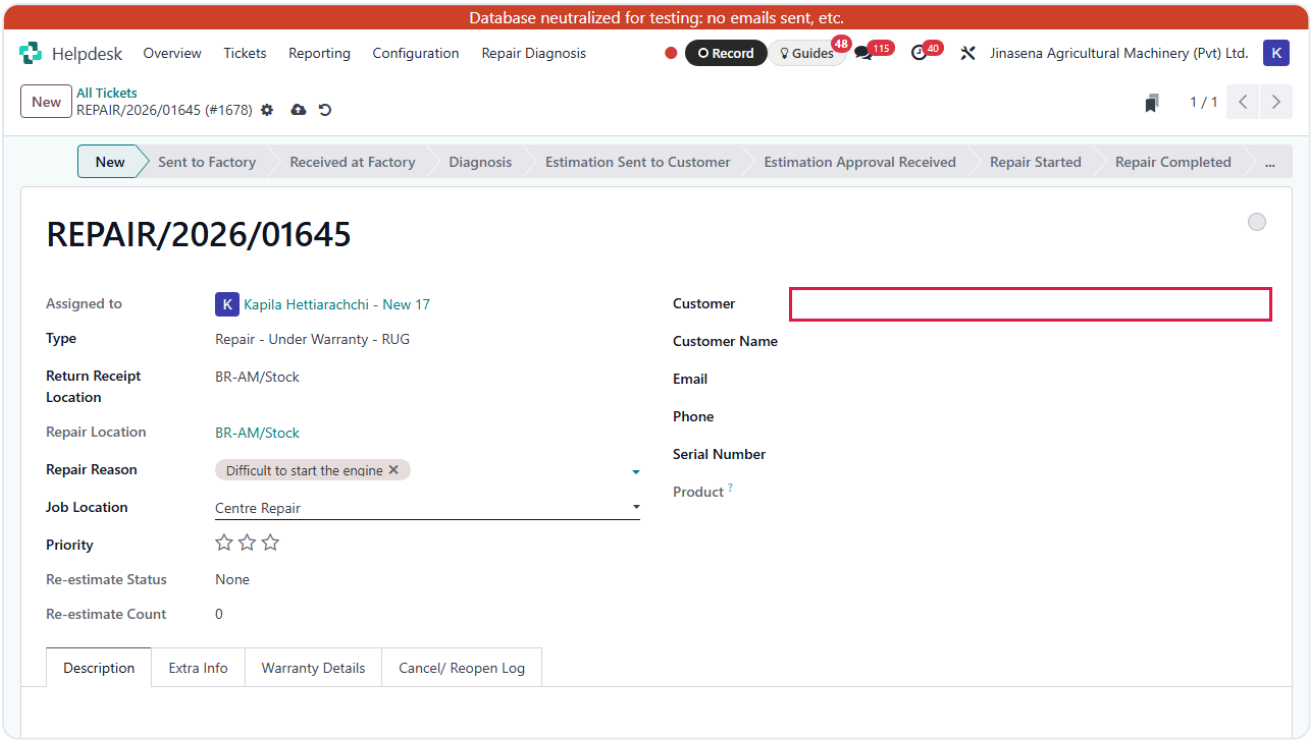

Ticket form — Job Location field

9 Select the Customer

Navigation Ticket form → Customer field

Action **Click Customer and select `KURUNEGALA CASH CUSTOMER`.**

Description Email and Phone are filled automatically from the customer record.

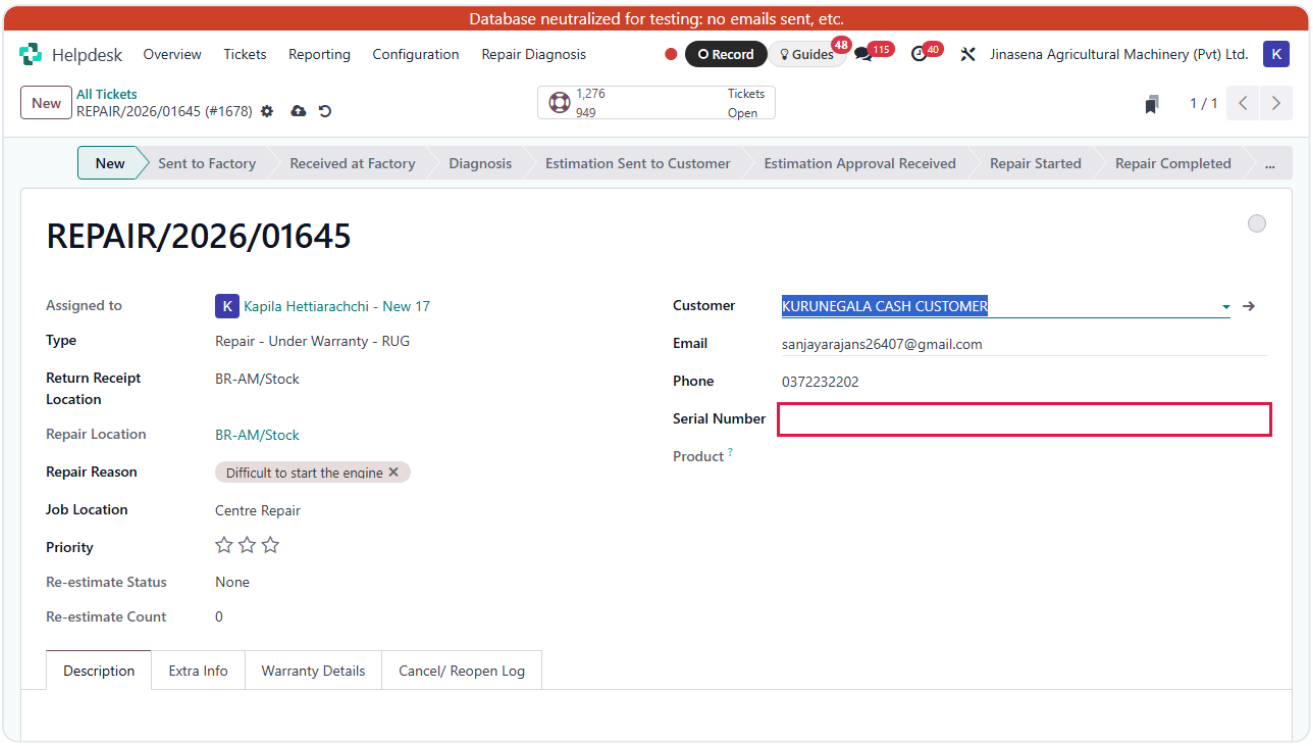

Ticket form — Customer field

10 Enter the Serial Number

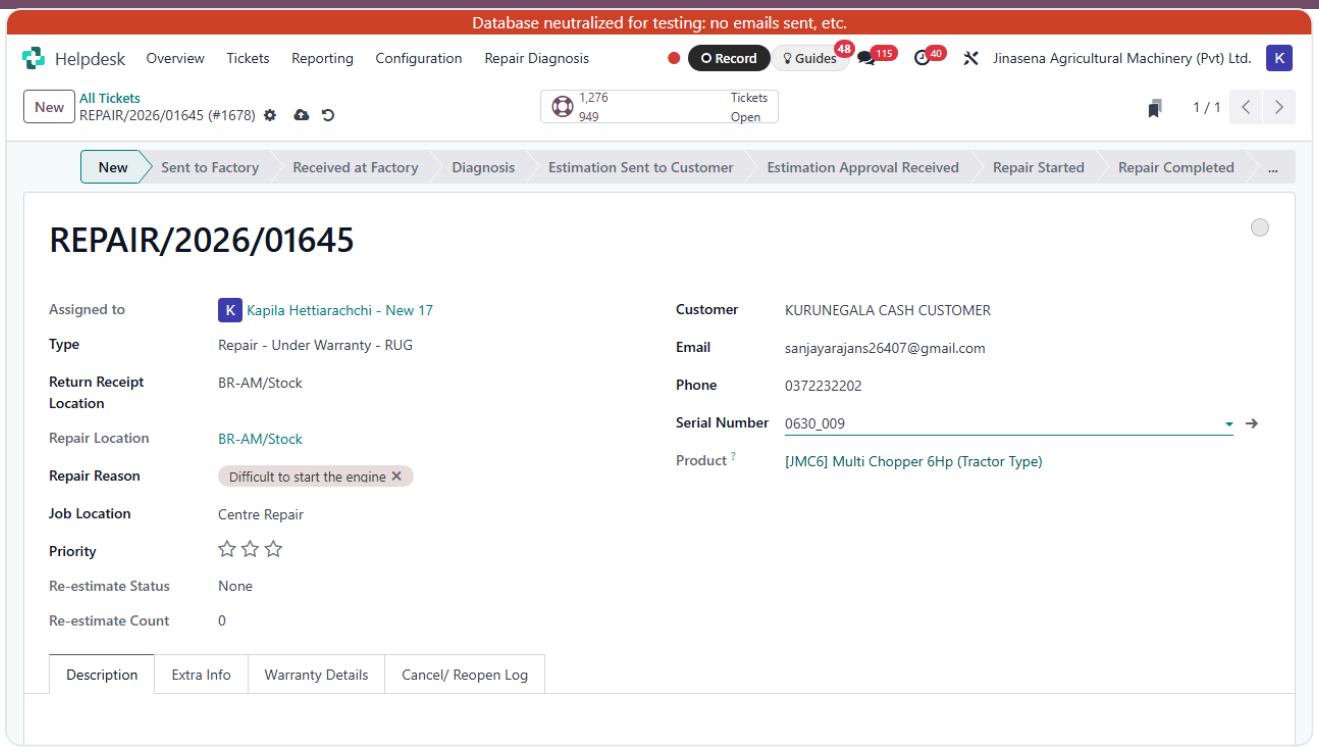

Navigation Ticket form → Serial Number field

Action **Click Serial Number, type the serial number of the finished product (e.g. `0630_009`) and select it from the list.**

Description Type the serial number of the finished product that was sold through a sales order; only serials already sold to a customer are offered. Selecting it fills in the **Product** automatically (here `[JMC6] Multi Chopper 6Hp (Tractor Type)`), so there is no separate Product step.

Ticket form — Serial Number field

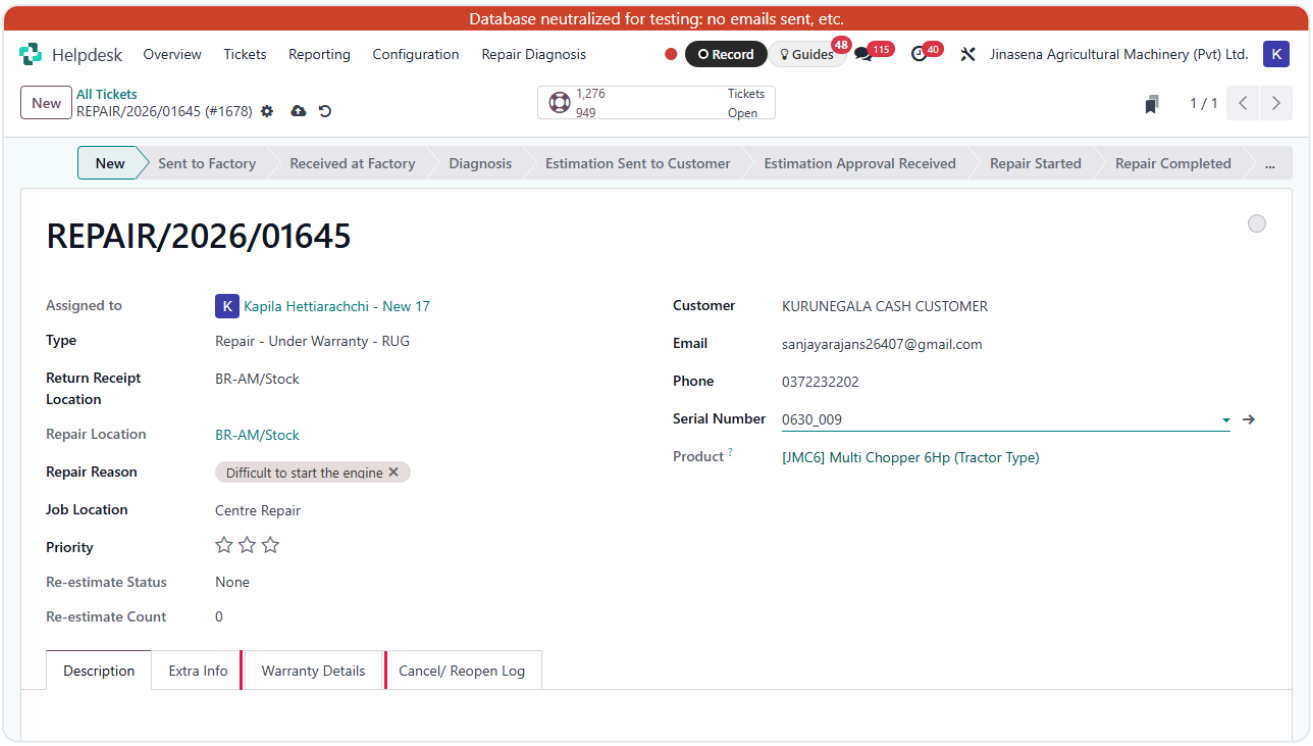

Ticket form — Serial Number entered, Product filled in

11 Open the Warranty Card tab

Navigation Ticket form → Warranty Details tab

Action **Click the Warranty Details tab.**

Description It is mandatory to attach one or two images of the warranty card; this tab holds the **Warranty Card** image.

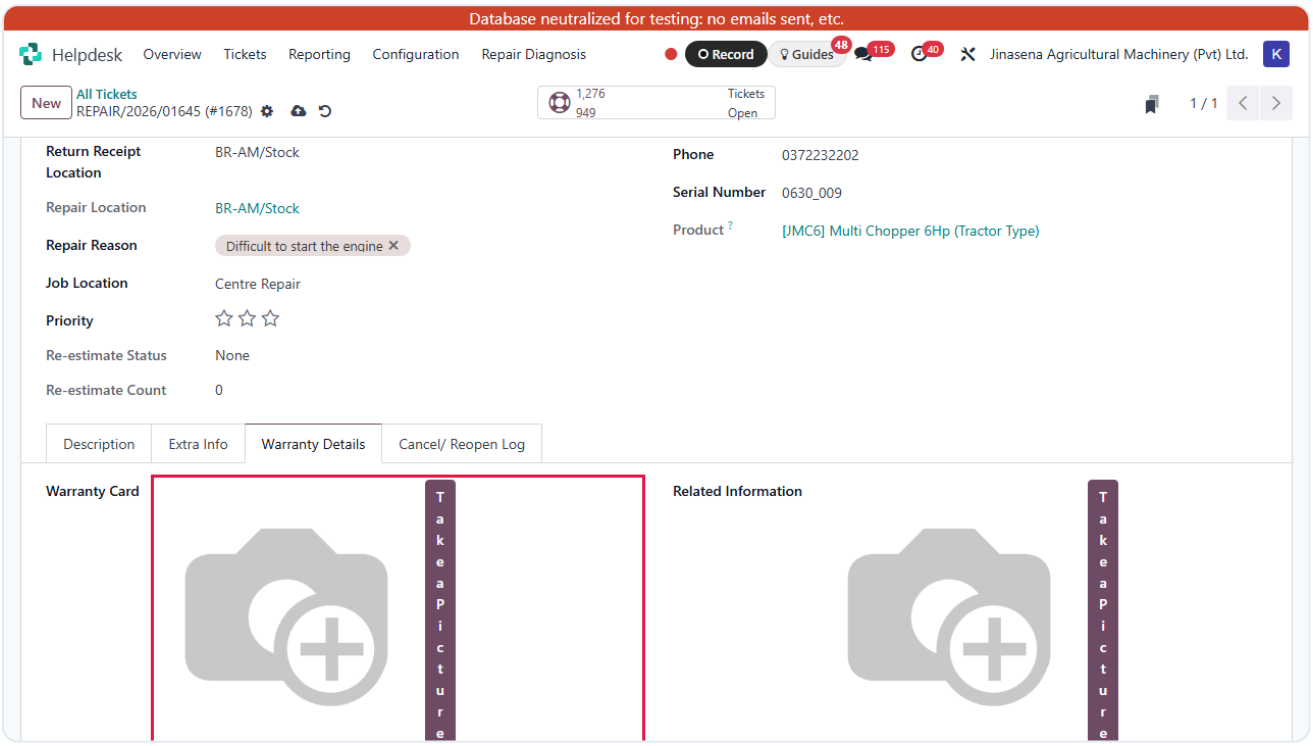

Ticket form — Warranty Details tab

12 Attach the warranty card image

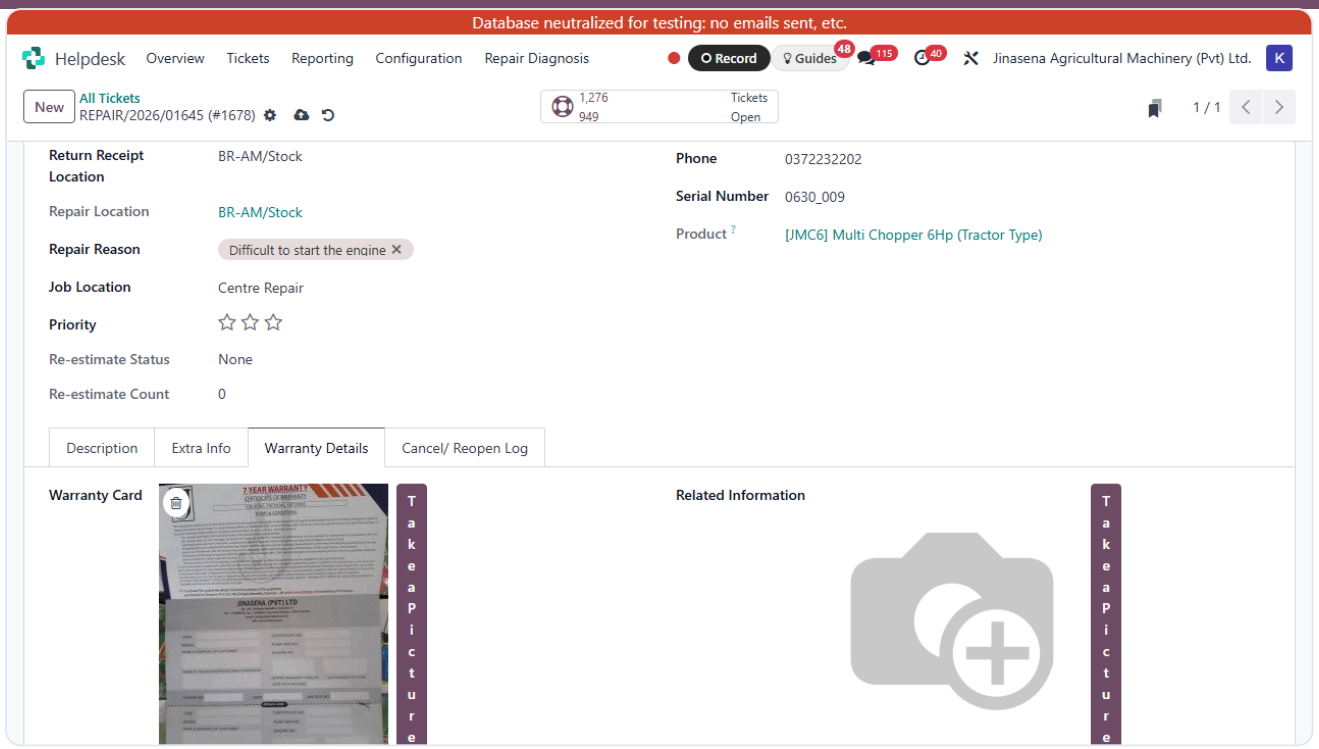

Navigation Ticket form → Warranty Details → Warranty Card

Action **Click the Warranty Card picture area, select the image file and click Open.**

Description Attaches the photo of the customer's warranty card to the ticket. The image is required for RUG approval.

Ticket form — Warranty Card image field

Ticket form — Warranty card attached

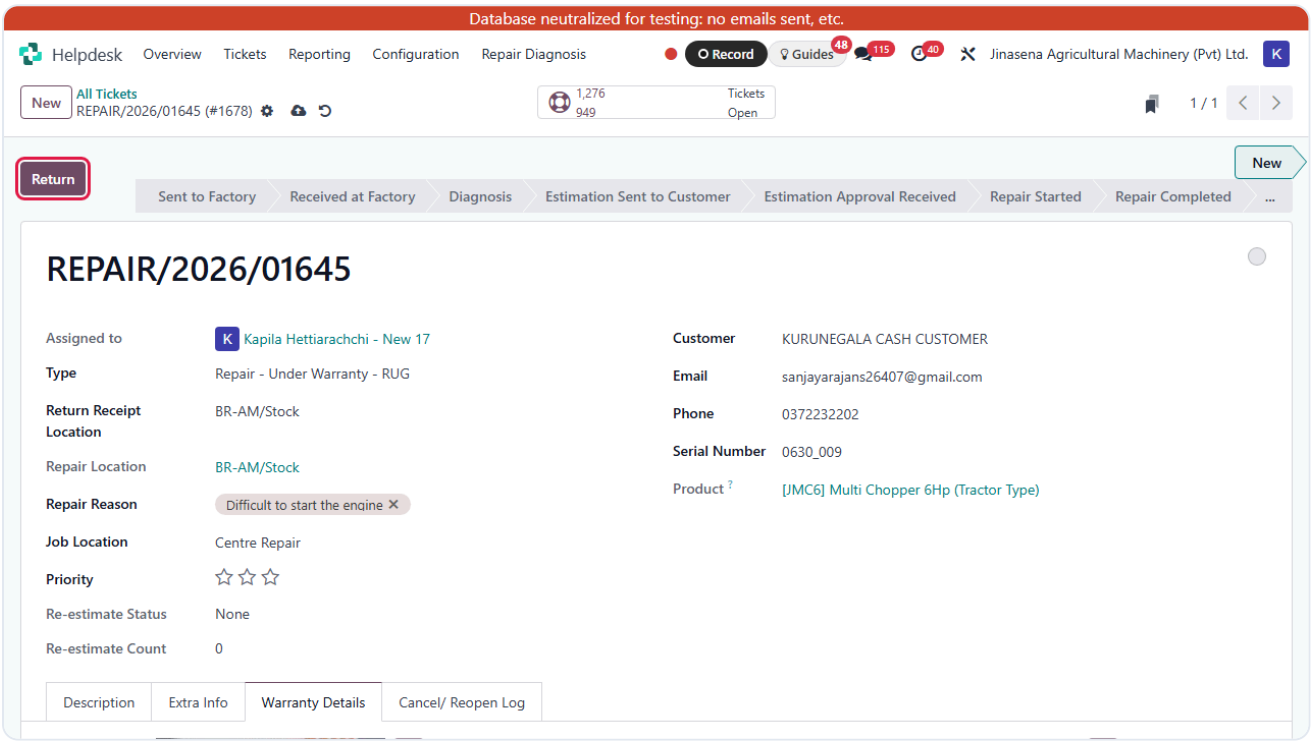

Section B — Receive the Item (Steps 13–15)

13 Return

Navigation Ticket form → status bar

Action **Click Return.**

Description Creates the return operation: the Returned Picking (receipt) for the item. (The server also raises "You may only return Done pickings" after creating it; see the QA notes.)

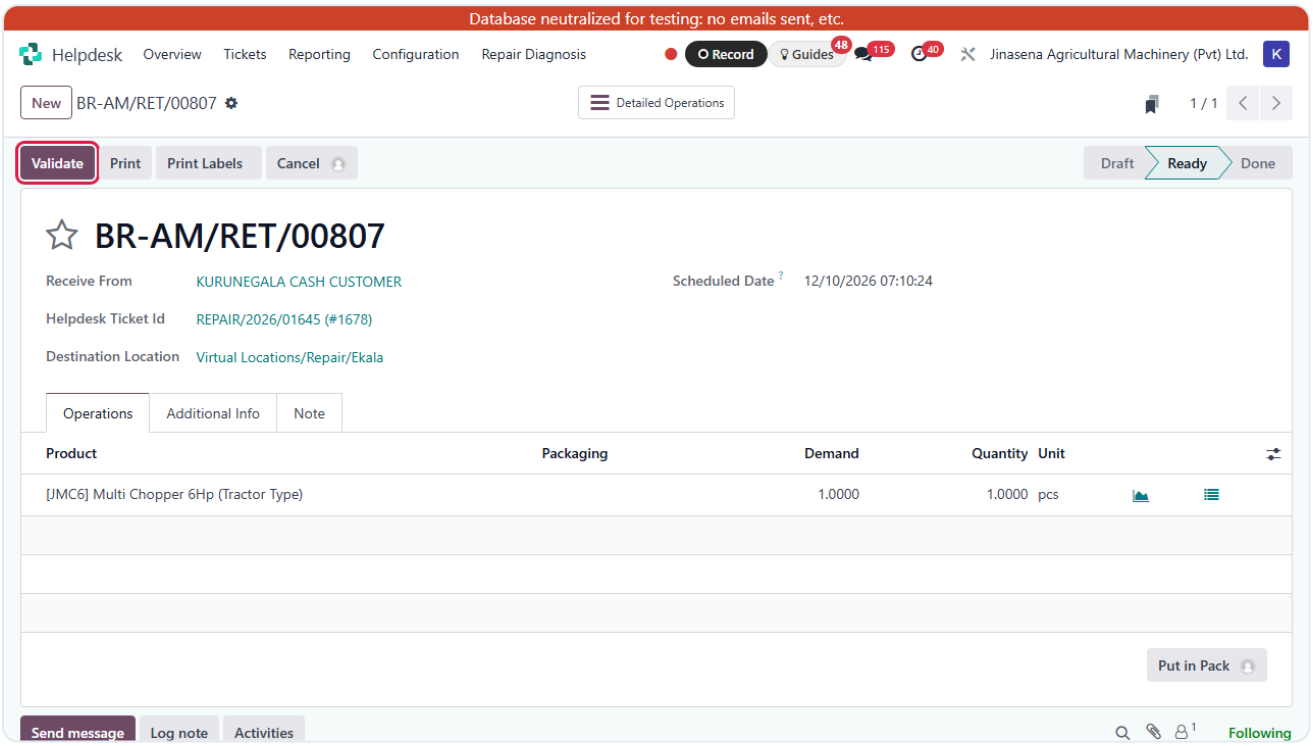

Ticket form — Return button

14 Validate the receipt

Navigation Transfer (Receipt) → header

Action **Click Validate.**

Description Validates the return operation: the item is received into stock and the transfer becomes *Done*.

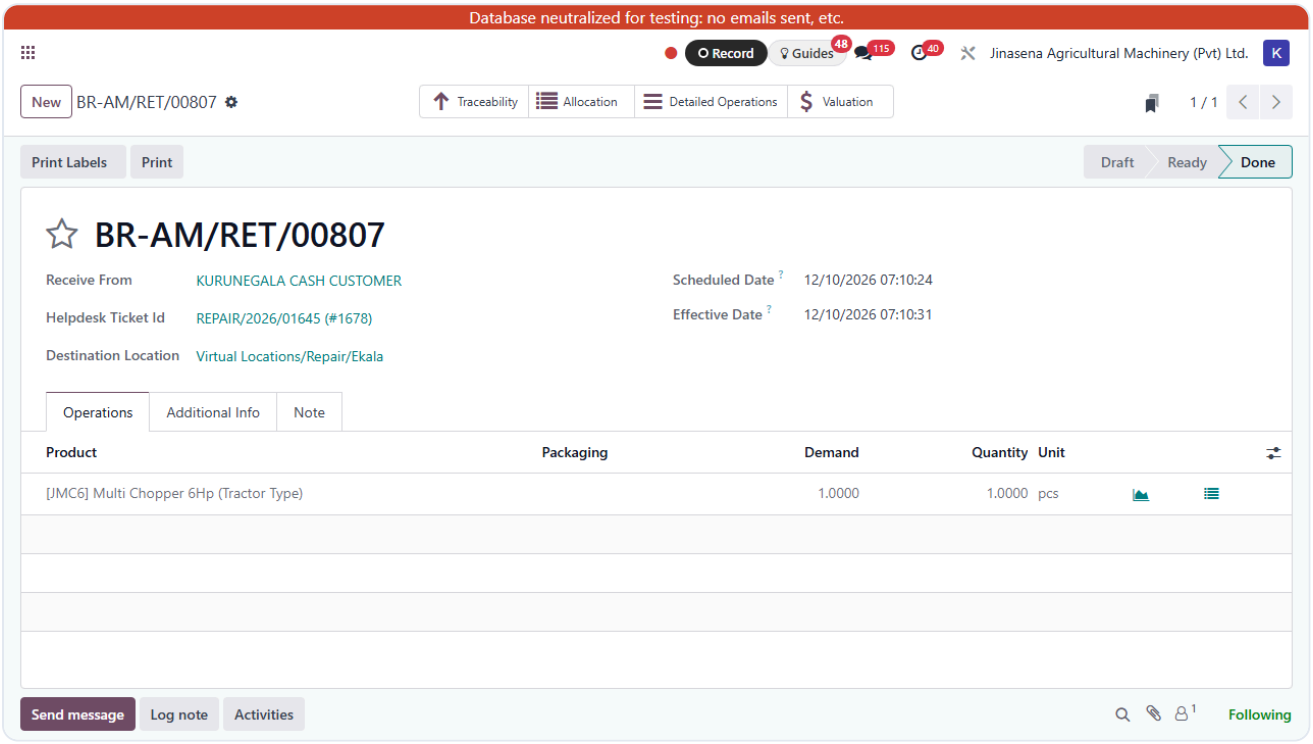

Transfer (Ready) — Validate button

15 Back

Navigation Transfer (Done)

Action **Click Back.**

Description Returns to the previous menu — the ticket view. The screenshot shows the receipt in the *Done* state; on this instance it opens as a full page, so there is no Back button to frame.

Transfer (Done)

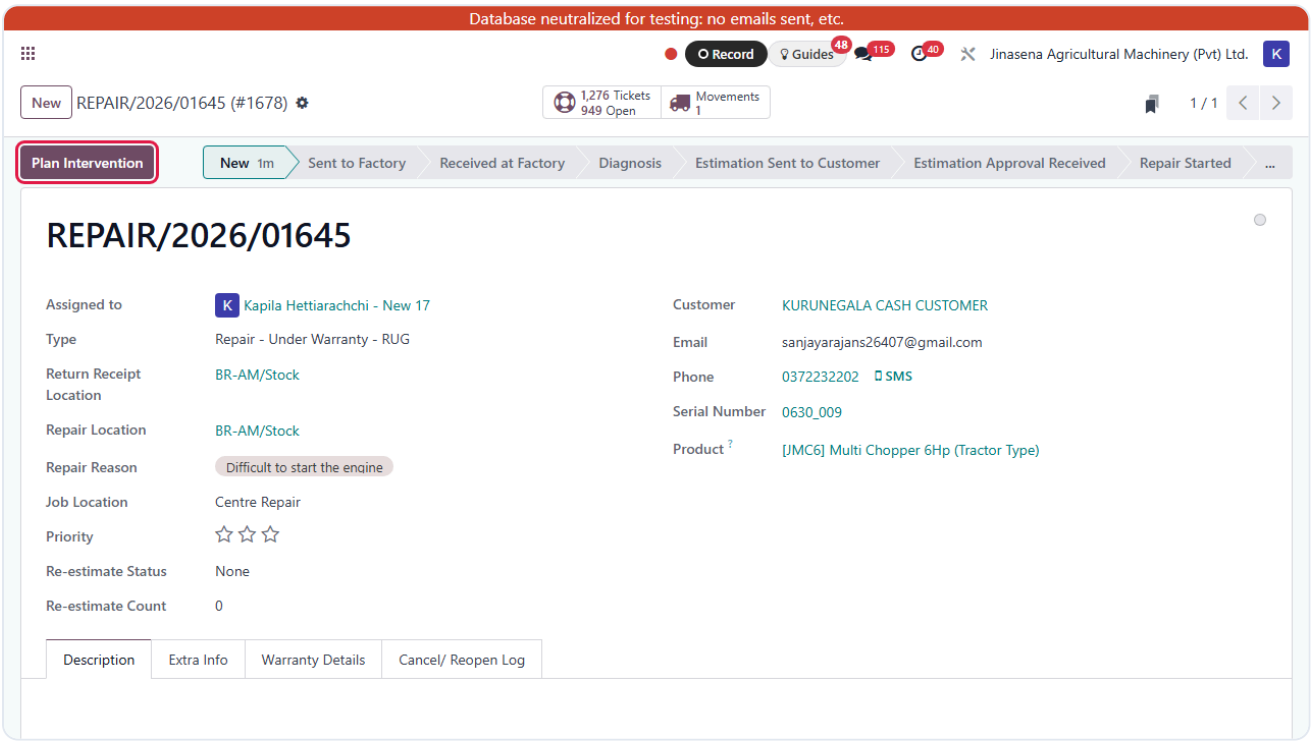

Section C — Plan the Task (Steps 16–17)

16 Plan Intervention

Navigation Ticket form → status bar

Action **Click Plan Intervention.**

Description To assign the job to a repair technician, create a Field Service task. Because the Job Location is *Centre Repair*, the ticket goes straight to this step once the item is received.

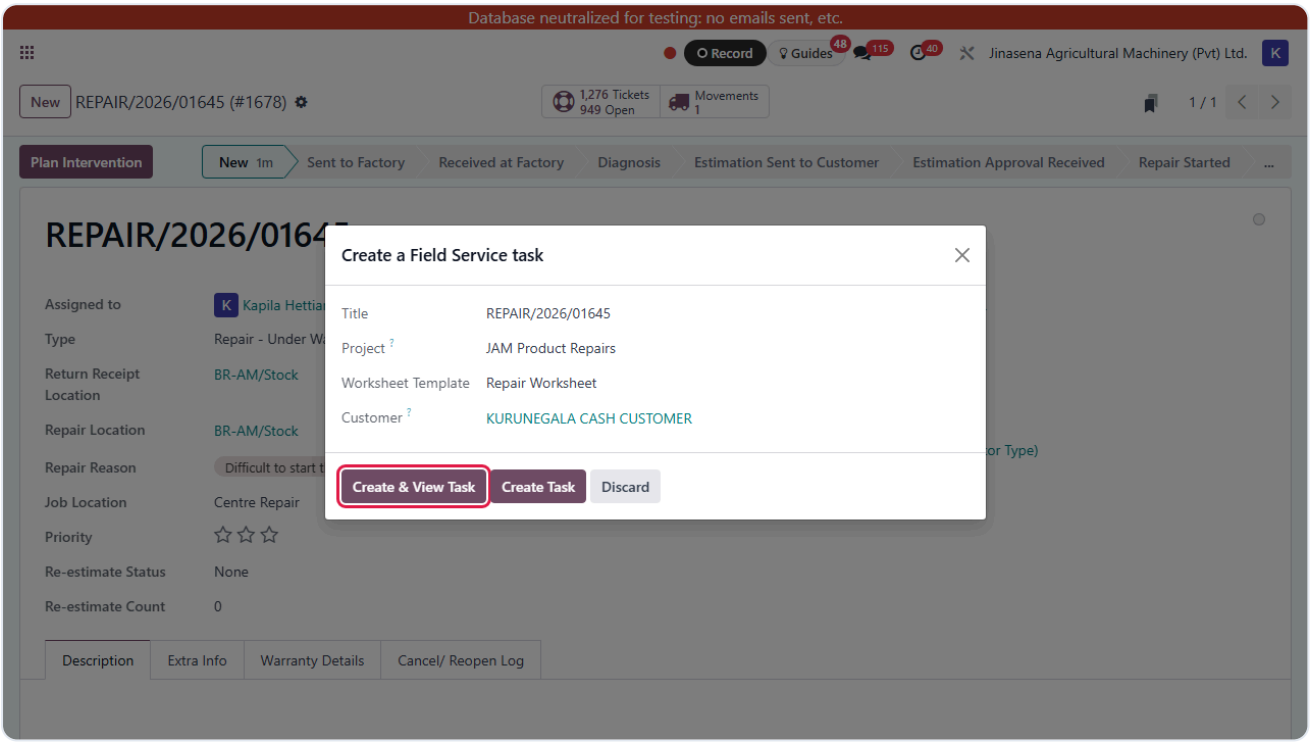

Ticket form — Plan Intervention button

17 Create & View Task

Navigation Create a Field Service task dialog

Action **Click Create & View Task.**

Description Creates the Field Service task and opens it so the technician can manage it.

Create a Field Service task dialog — Create & View Task button

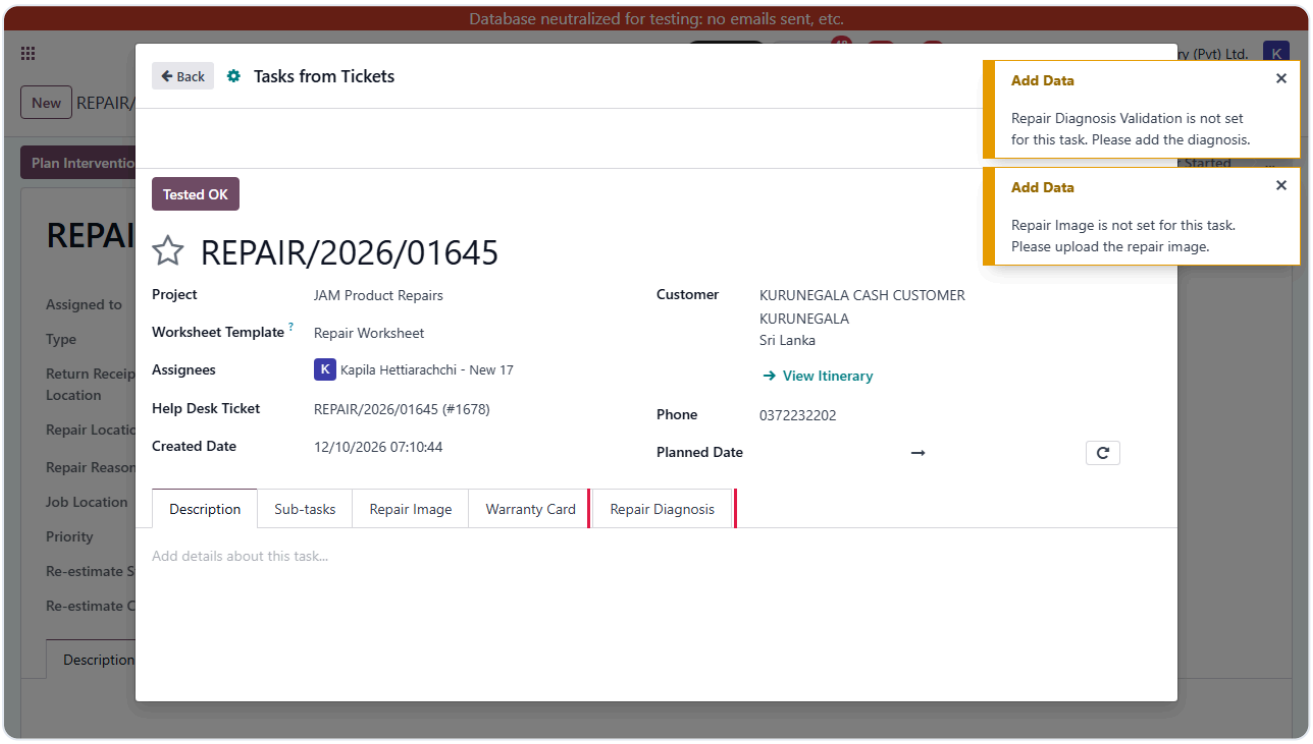

Section D — Diagnosis, Image and Parts (Steps 18–30)

18 Repair Diagnosis tab

Navigation Task form → Repair Diagnosis tab

Action **Click the Repair Diagnosis tab.**

Description The technician checked the repair item and found the reason. Select the correct one from the table that appears.

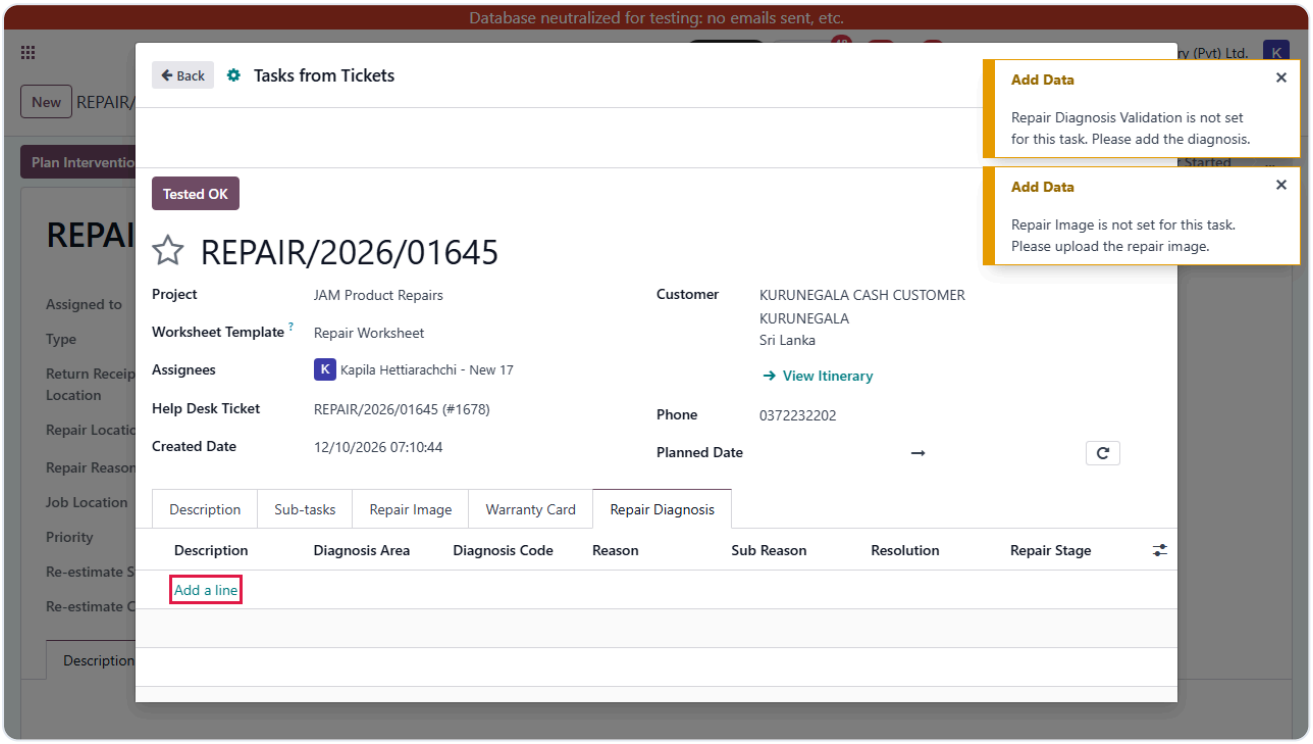

Task form — Repair Diagnosis tab

19 Add a line

Navigation Task form → Repair Diagnosis

Action **Click Add a line.**

Description Adds a diagnosis line to the table (enter a short description, e.g. *Engine diagnosis*).

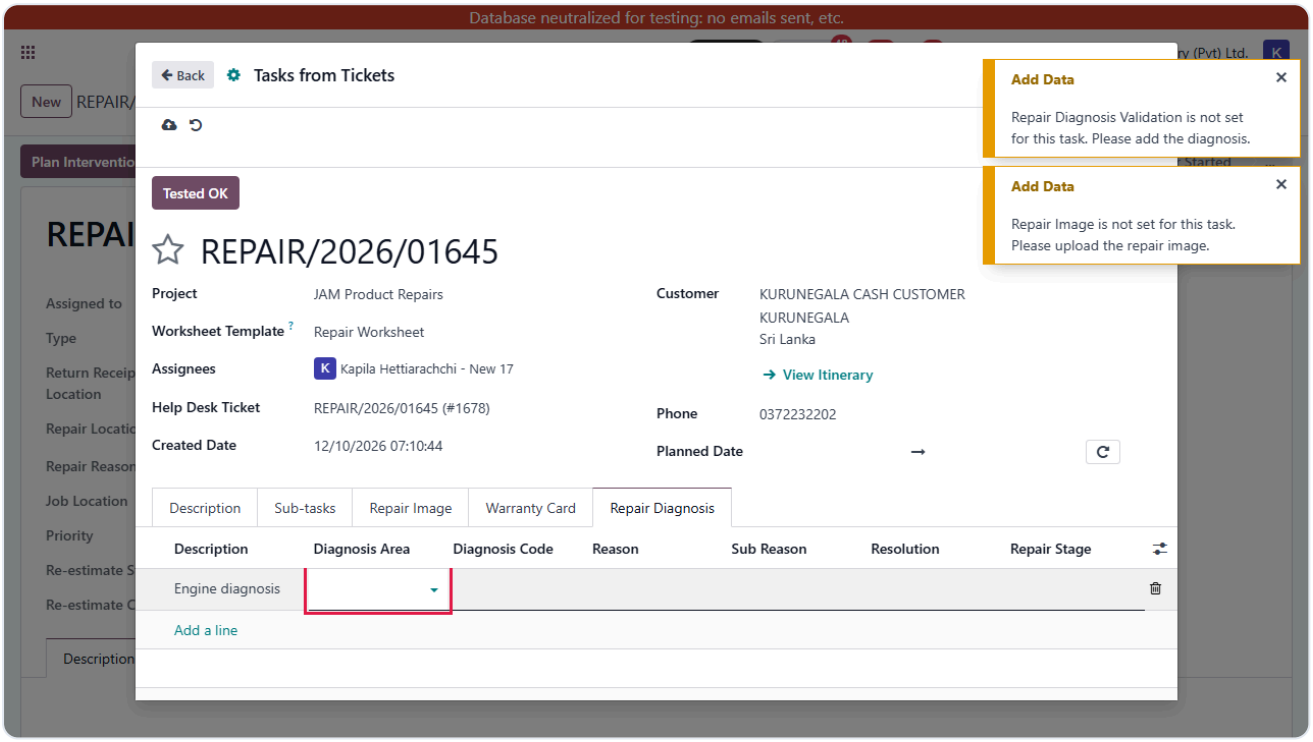

Repair Diagnosis tab — Add a line

20 Diagnosis Area

Navigation Repair Diagnosis table

Action **Click Diagnosis Area and select `Burnt Part`.**

Description The area of the item in which the fault was found.

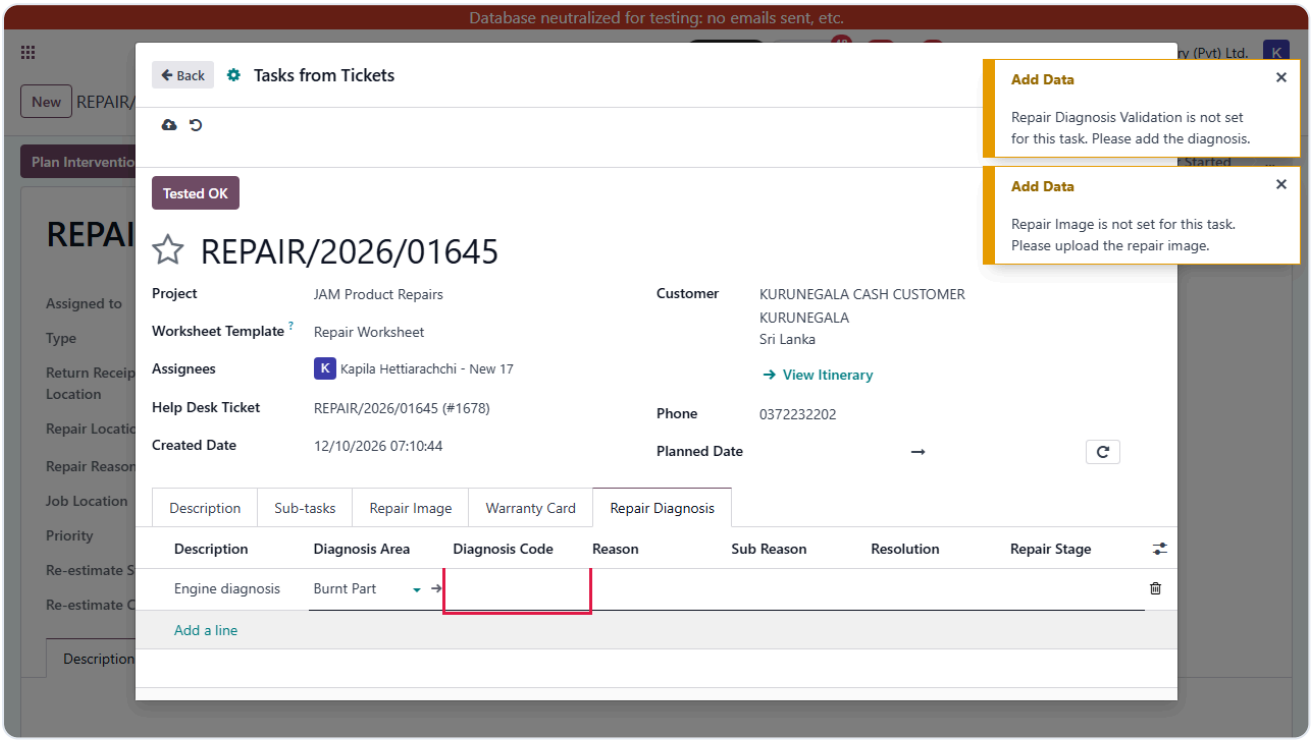

Repair Diagnosis line — Diagnosis Area

21 Diagnosis Code

Navigation Repair Diagnosis table

Action **Click Diagnosis Code and select `Base Plate`.**

Description The specific part/code of the fault.

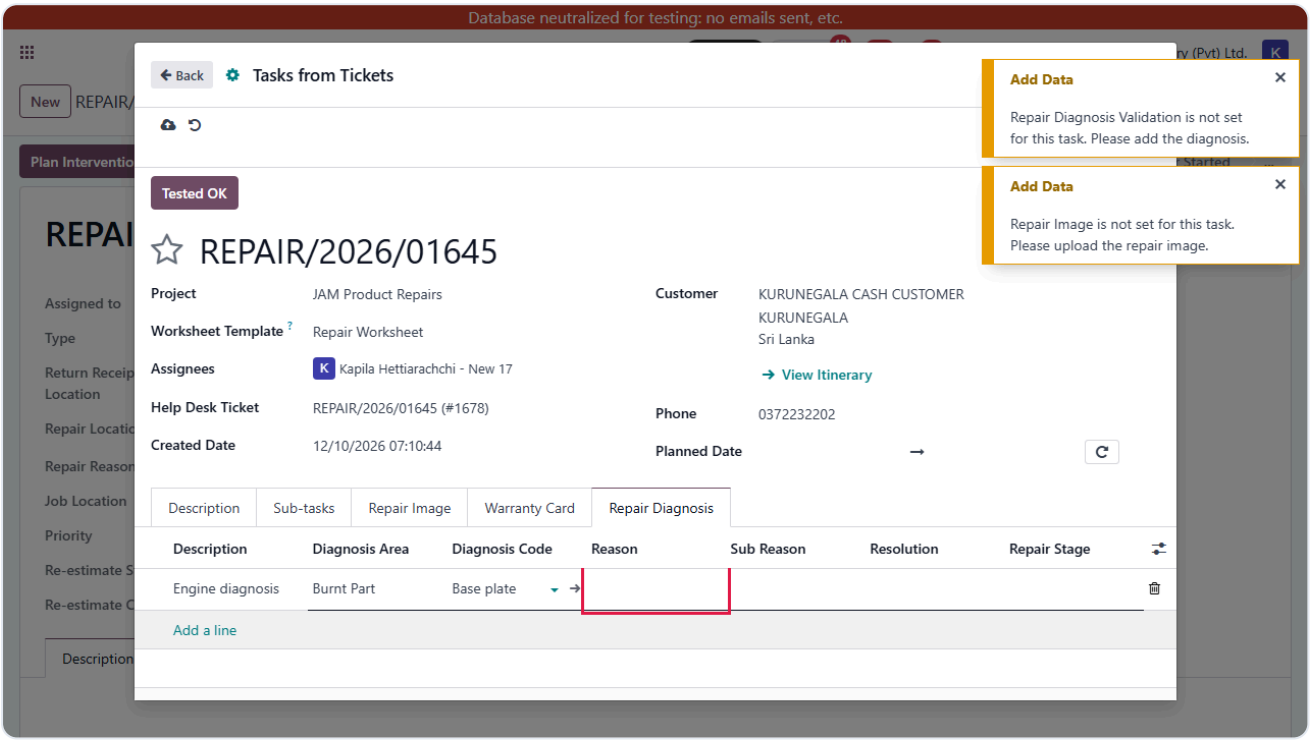

Repair Diagnosis line — Diagnosis Code

22 Reason

Navigation Repair Diagnosis table

Action **Click Reason and select `Internal`.**

Description Why the fault occurred (find the reason).

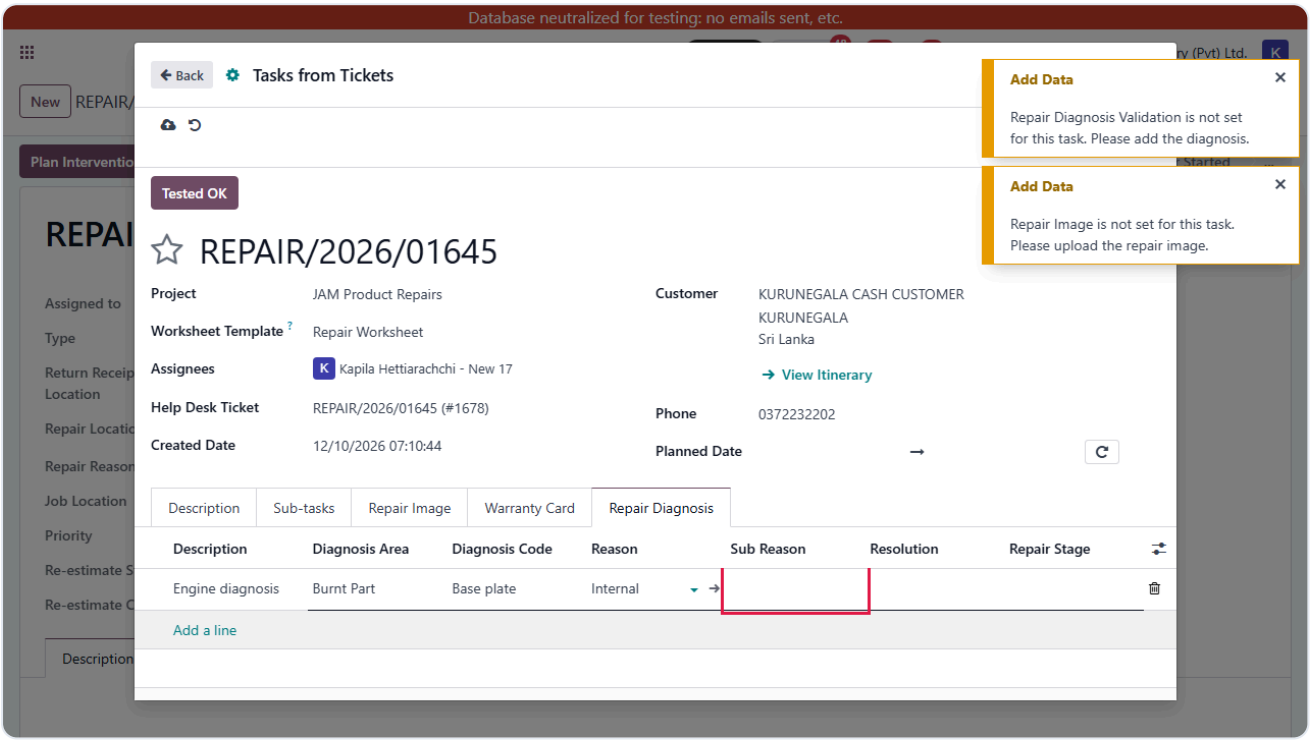

Repair Diagnosis line — Reason

23 Sub Reason

Navigation Repair Diagnosis table

Action **Click Sub Reason and select `Hi Voltage`.**

Description A more detailed reason (find the sub reason).

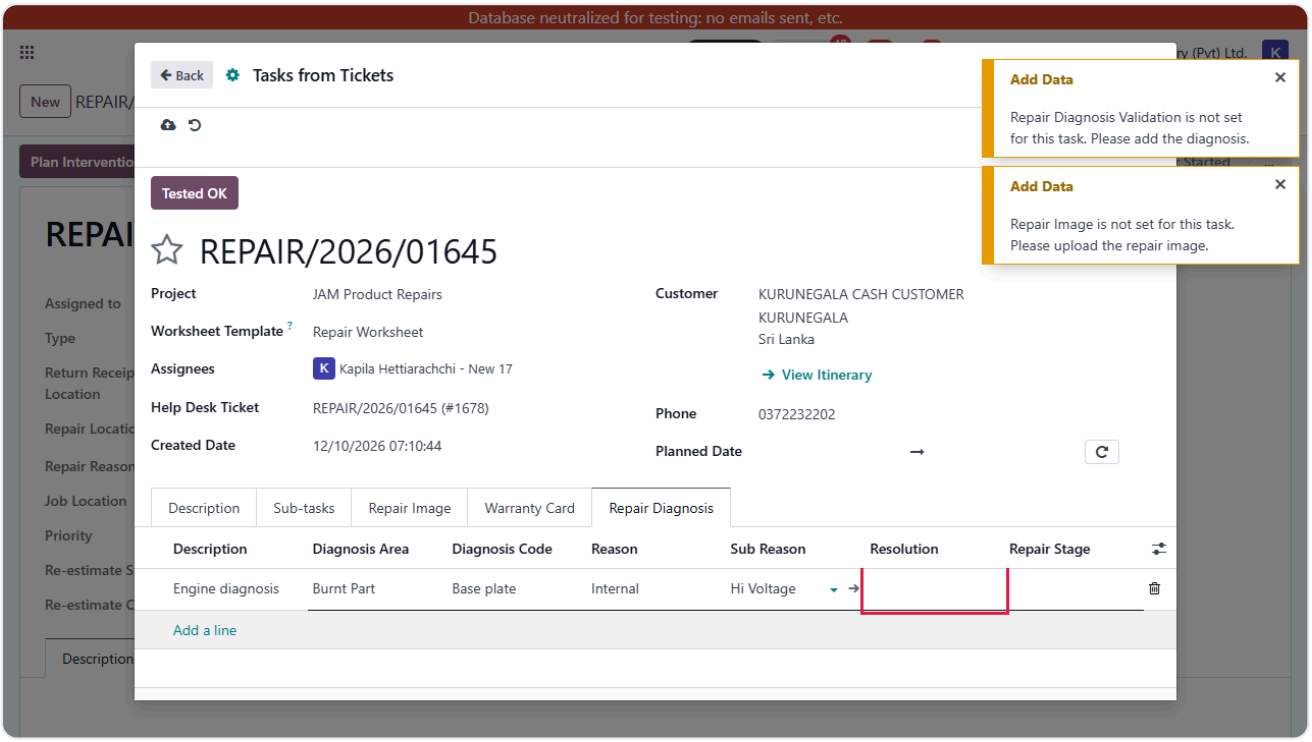

Repair Diagnosis line — Sub Reason

24 Resolution

Navigation Repair Diagnosis table

Action **Click Resolution and select `Reject`.**

Description The action taken to resolve the fault.

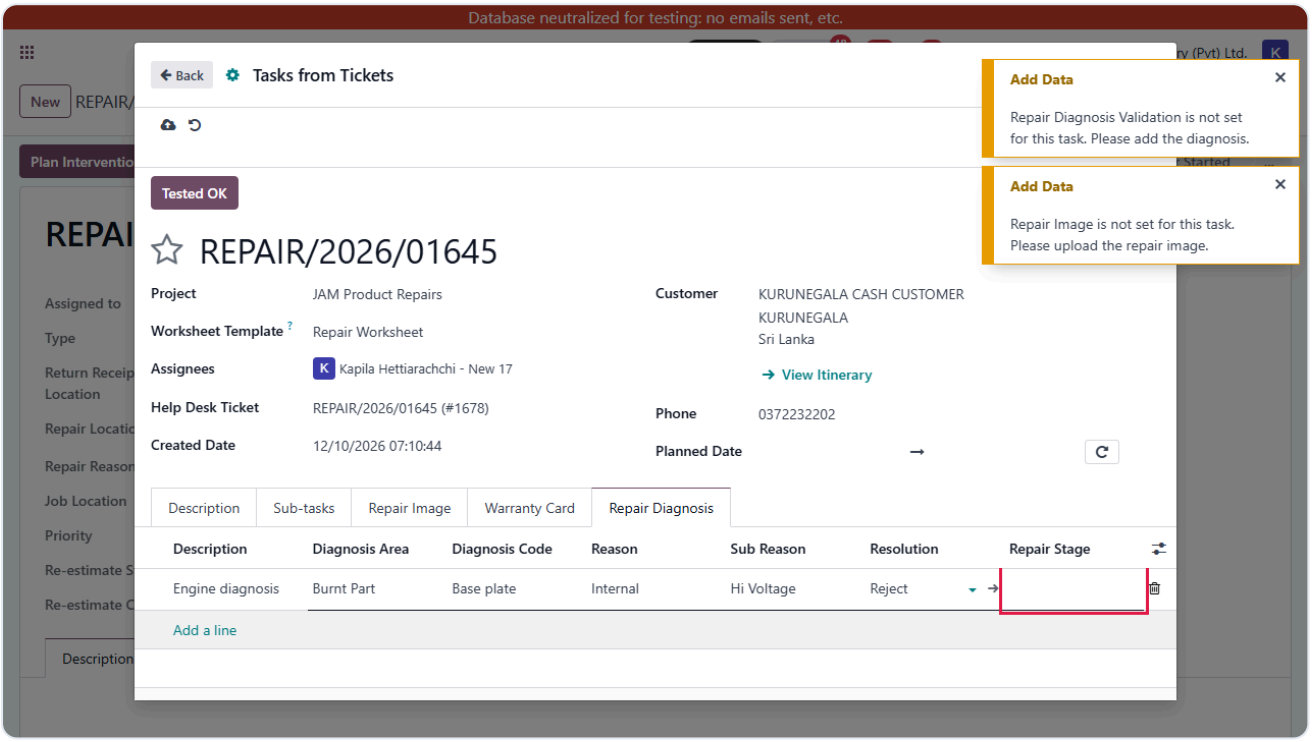

Repair Diagnosis line — Resolution

25 Repair Stage

Navigation Repair Diagnosis table

Action **Click Repair Stage and select `1-REP-REC` .**

Description The repair stage reached for this line.

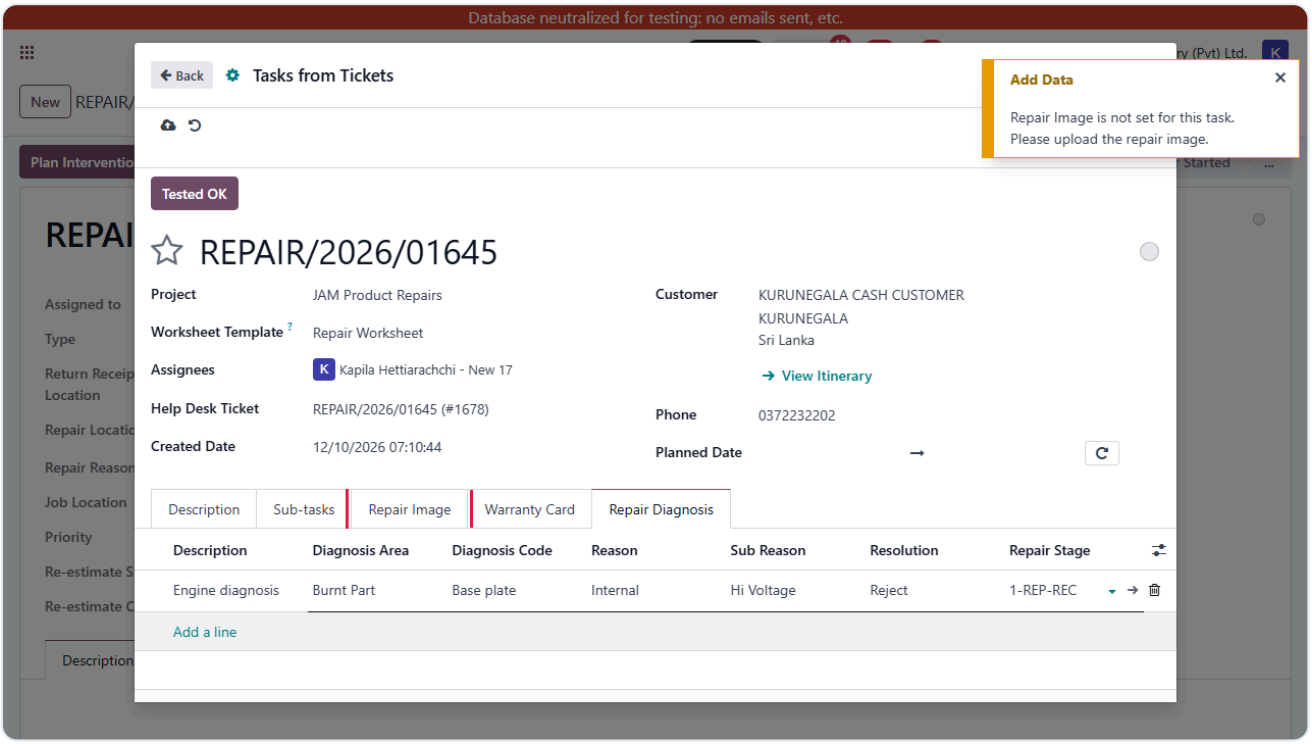

Repair Diagnosis line — Repair Stage

26 Repair Image tab

Navigation Task form → Repair Image tab

Action **Click the Repair Image tab.**

Description At least one image of the item being repaired must be included.

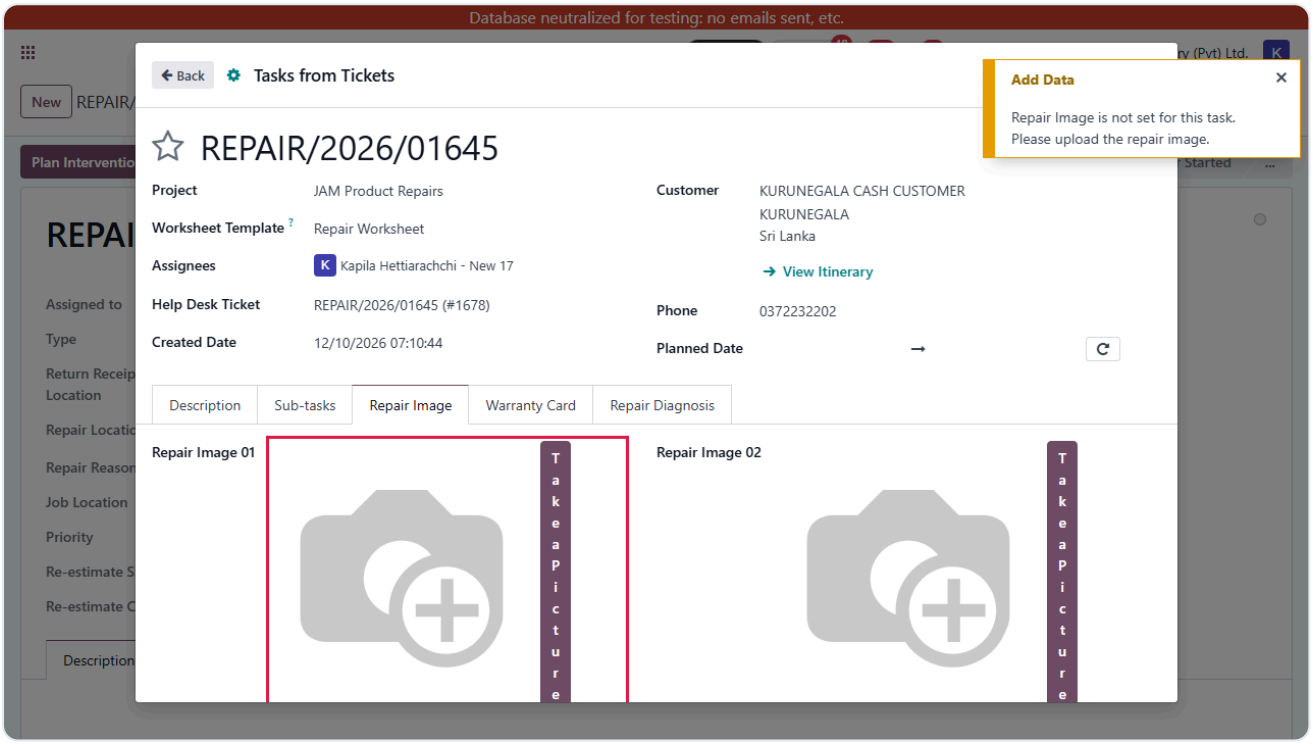

Task form — Repair Image tab

27 Take a Picture

Navigation Task form → Repair Image

Action **Click Take a Picture under *Repair Image 01*, go to the image, select it and click Open.**

Description Attaches the photo of the item being repaired to the task. The **Products** button appears once the diagnosis and image are set.

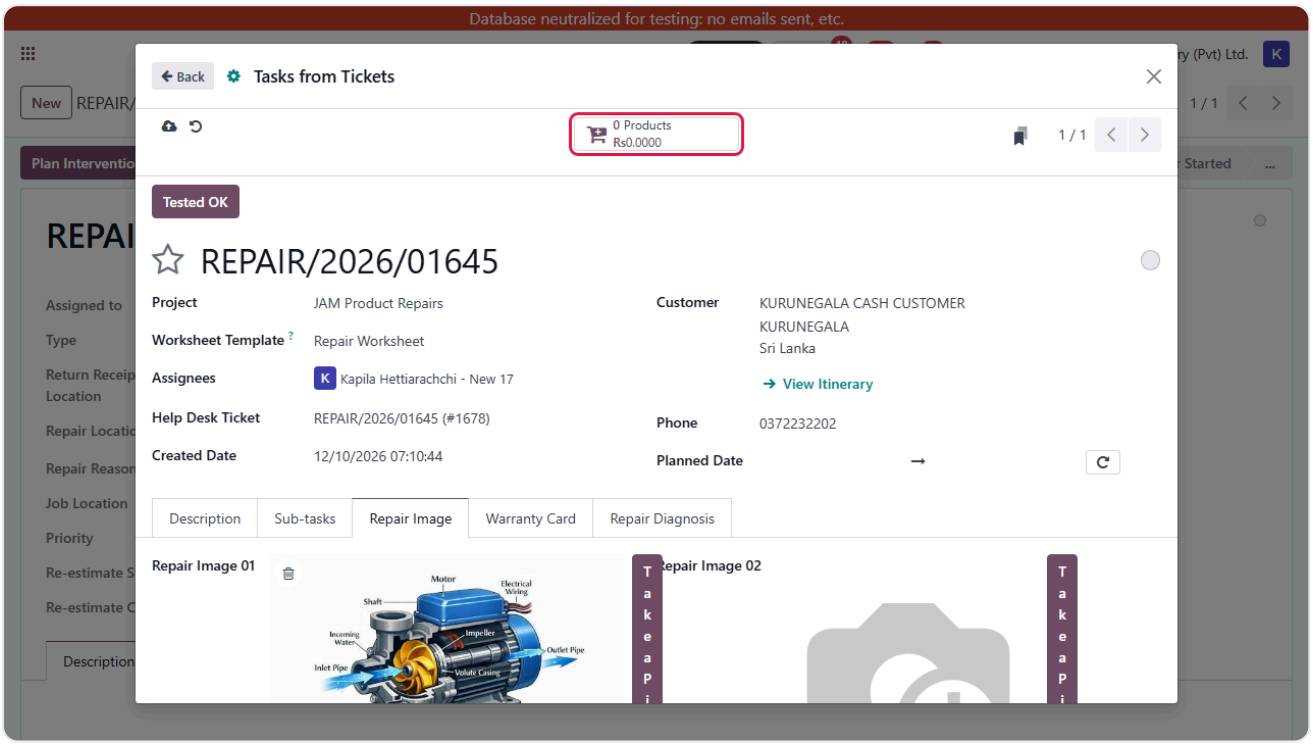

Repair Image tab — Take a Picture

28 Products

Navigation Task form → button box

Action **Click the Products button.**

Description Opens the item master (product catalog) so you can select the items needed to repair the product.

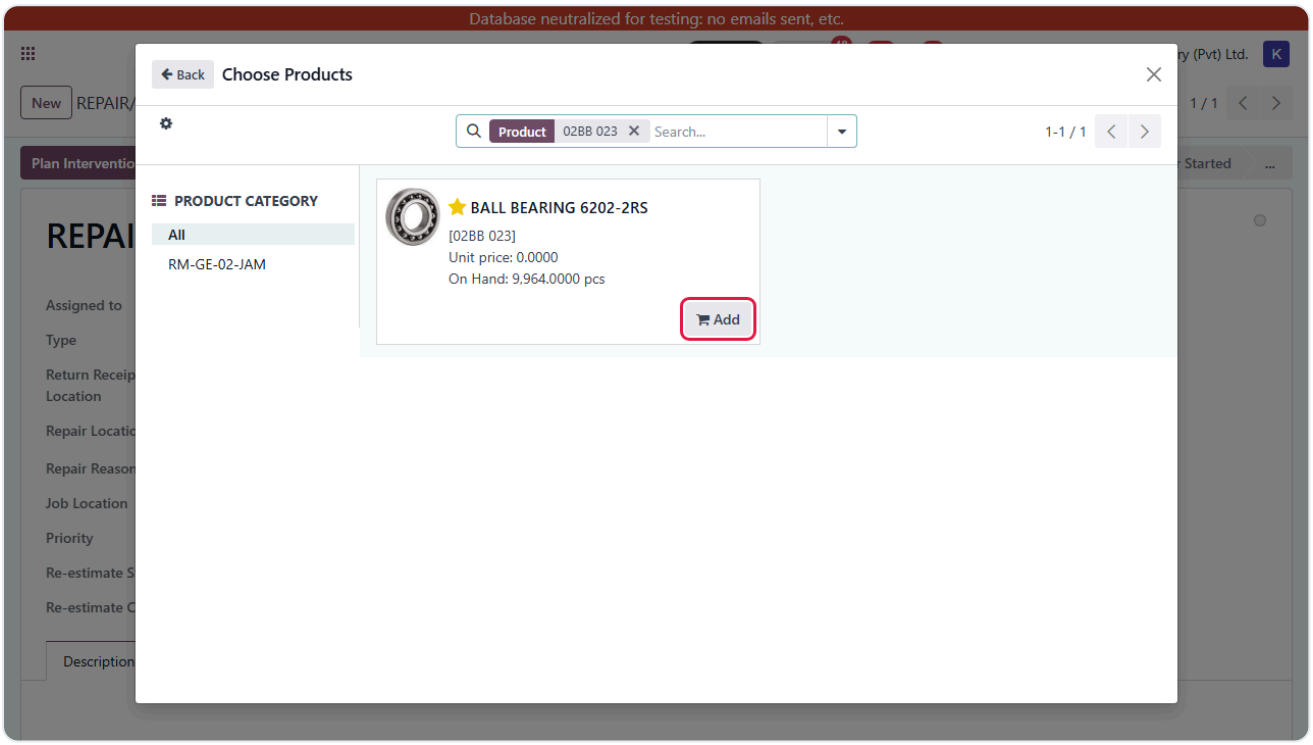

Task form — Products button

29 Add the spare part

Navigation Product catalog

Action **Find the part (e.g. `[02BB 023] BALL BEARING 6202-2RS`) and click Add.**

Description Adds the part with quantity 1 to the task; it becomes a line on the repair quotation. Adjust the quantity if needed and repeat for each item.

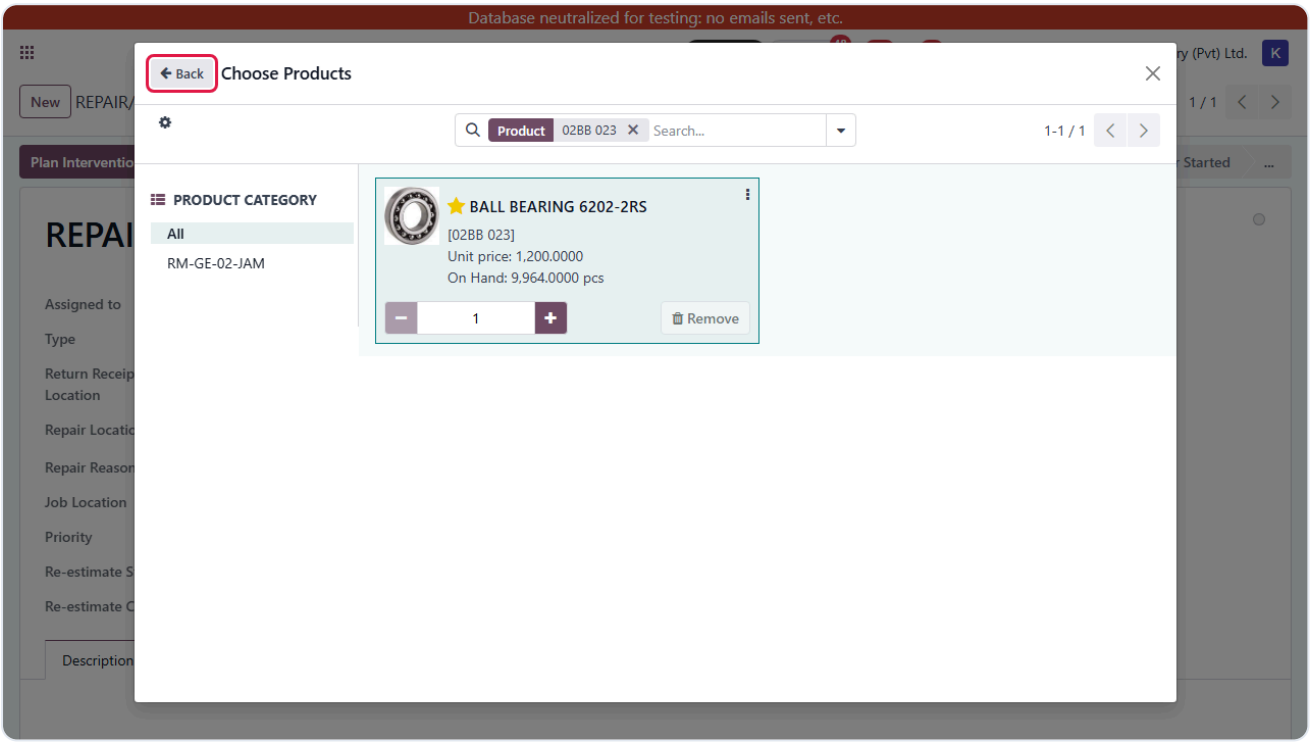

Product catalog — Add button

30 Back

Navigation Product catalog

Action **Click Back.**

Description Returns to the previous menu (the task).

Product catalog — Back button

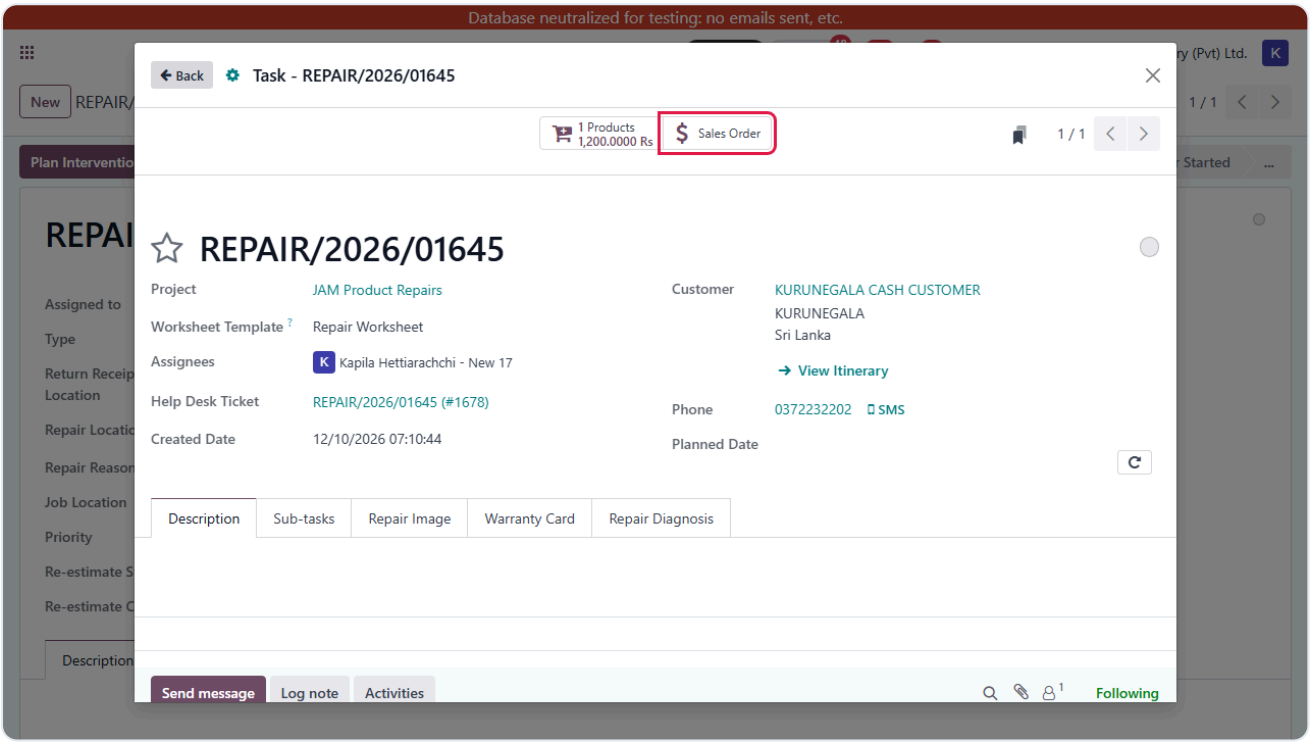

Section E — RUG Approval and Order Confirmation (Steps 31–34)

31 Open the quotation

Navigation Task form → button box

Action **Click the Sales Order button.**

Description Opens the quotation created from the parts added to the task.

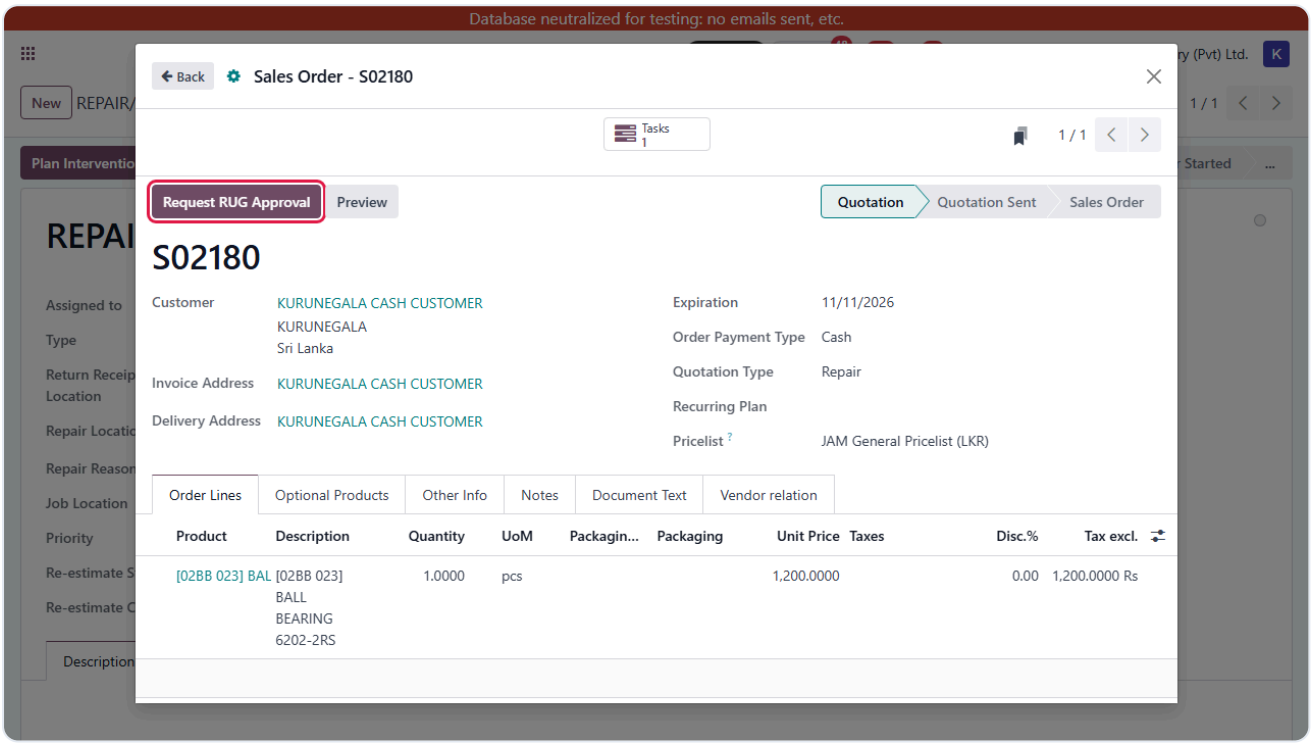

Task form — Sales Order button

32 Request RUG Approval

Navigation Sales Order (Quotation)

Action **Click Request RUG Approval.**

Description Because the product is under warranty, the repair must be approved under the RUG facility before the order can be confirmed. This sends the approval request to R&D.

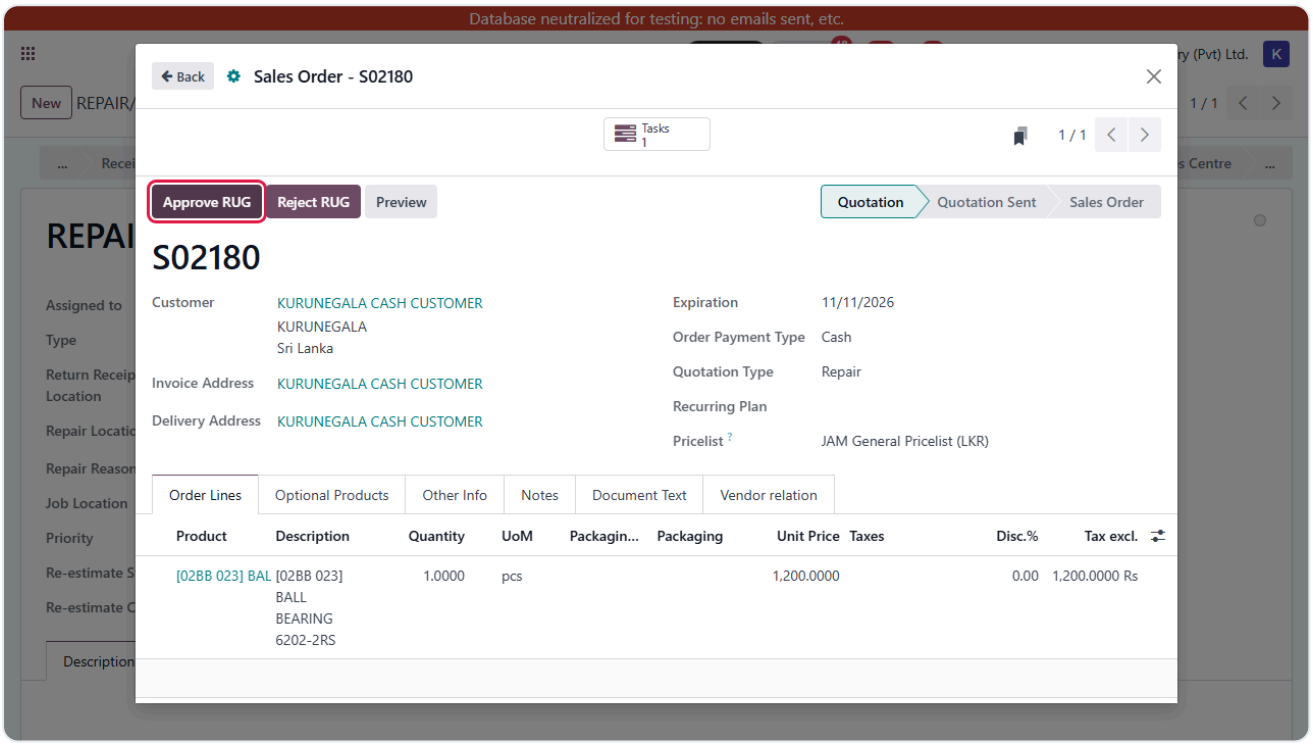

Quotation — Request RUG Approval button

33 Approve RUG

Navigation Sales Order (RUG requested)

Action **Click Approve RUG (done by R&D).**

Description If the repair can be carried out under the RUG facility, this button is clicked. The **RUG Approved** box is then ticked on the order (*Reject RUG* is the alternative).

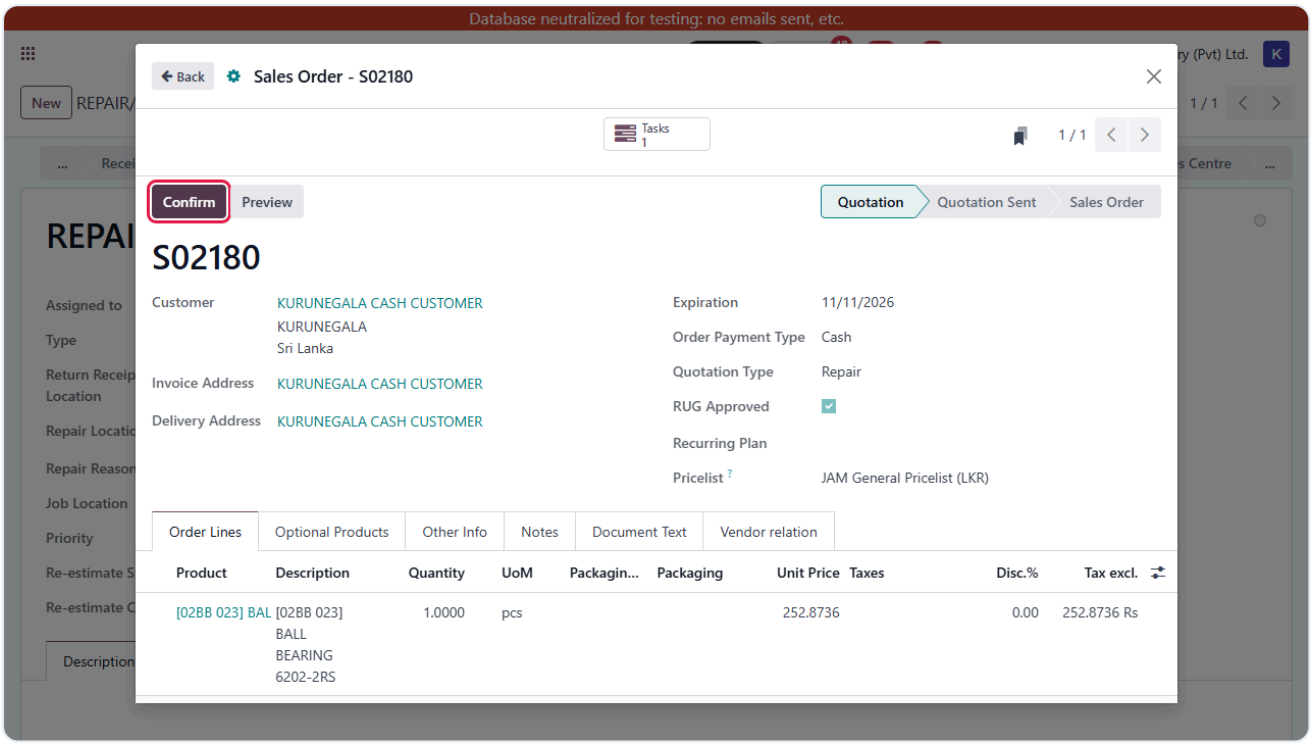

Quotation (RUG requested) — Approve RUG button

34 Confirm the Sales Order

Navigation Sales Order (RUG approved)

Action **Click Confirm.**

Description Confirms the order directly — unlike the paid flows there is no email, online signature or deposit. The order becomes a *Sales Order* and generates the delivery transfer.

Quotation (RUG approved) — Confirm button

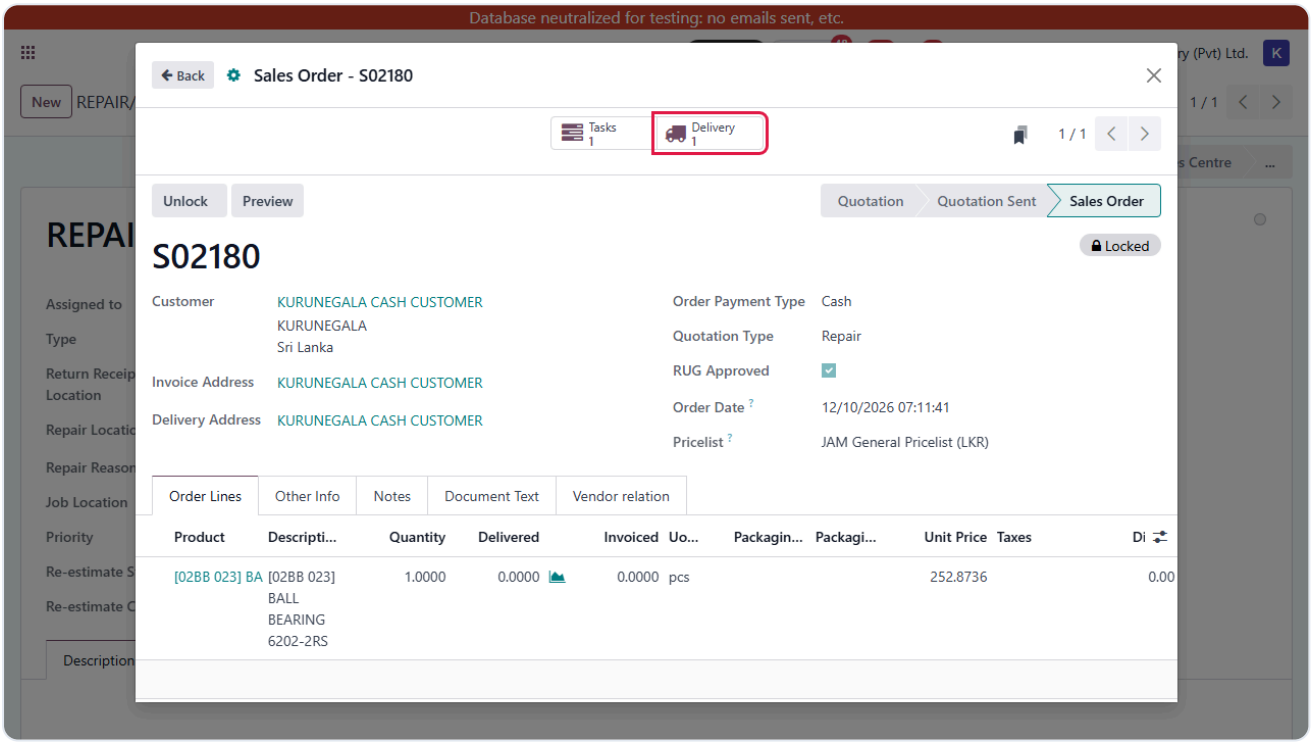

Section F — Delivery Transfer (Steps 35–37)

35 Delivery

Navigation Sales Order → button box

Action **Click the Delivery button.**

Description Now open and complete the delivery. (The item used for the repair is for the customer to consume.) On this branch route the order generates a single outbound transfer (e.g. `BR-AM/OUT/00742`), which opens directly.

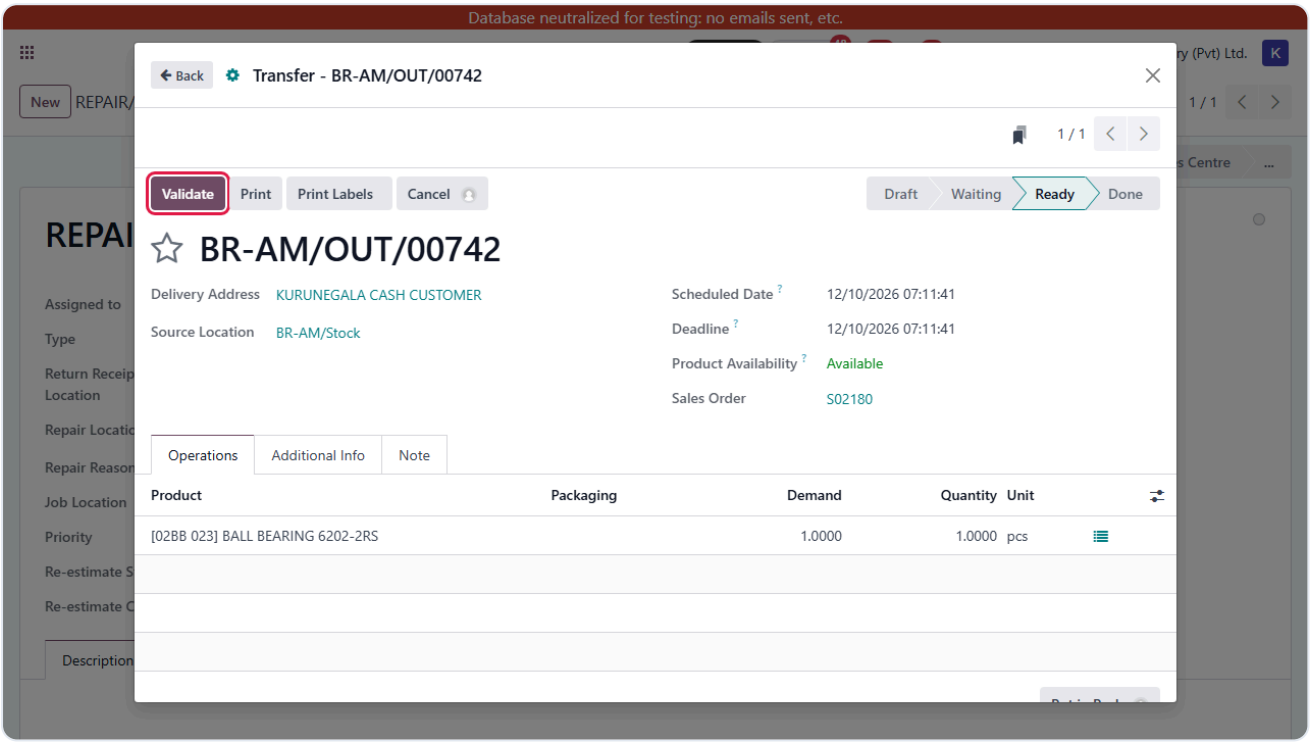

Sales Order — Delivery button

36 Validate

Navigation Transfer BR-AM/OUT/00742 (Ready)

Action **Click Validate.**

Description Completes the stock movement. The transfer becomes *Done*.

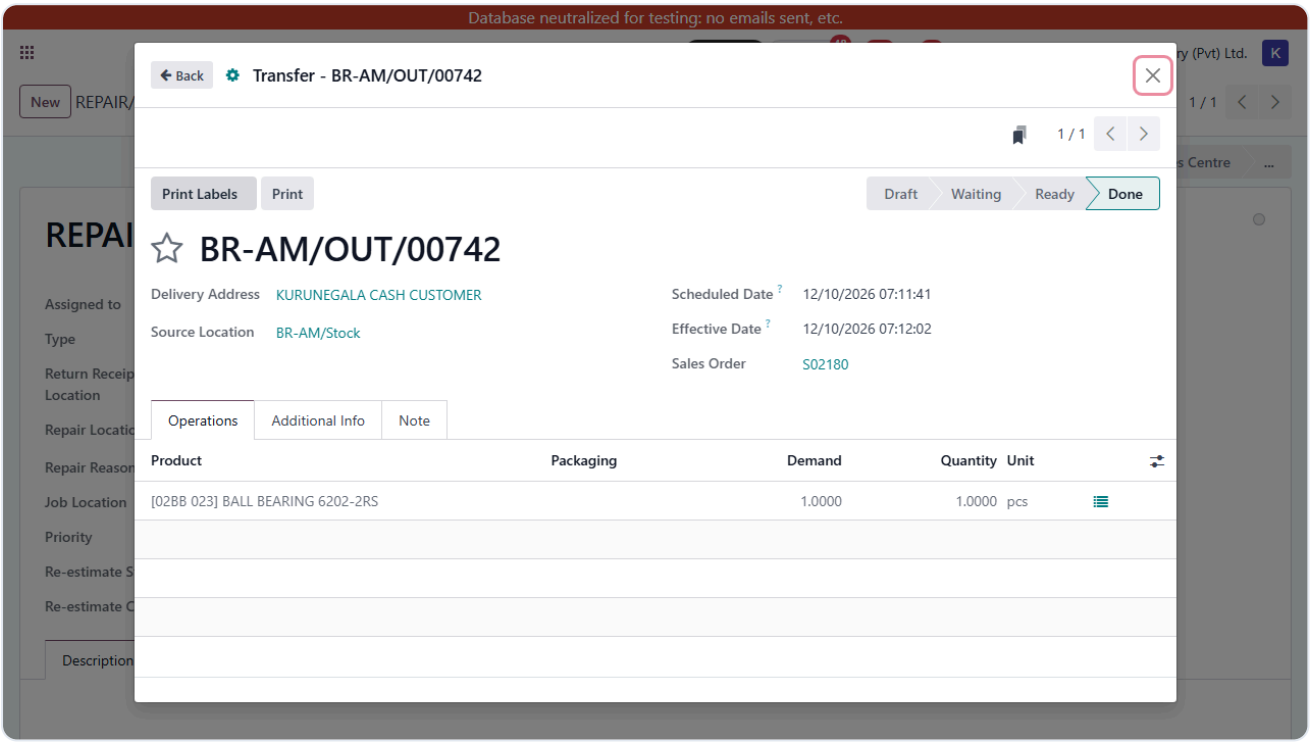

Transfer BR-AM/OUT/00742 (Ready) — Validate button

37 Close

Navigation Transfer BR-AM/OUT/00742 (Done)

Action **Click Close.**

Description Closes the transfer and returns to the ticket.

Transfer BR-AM/OUT/00742 (Done) — Close

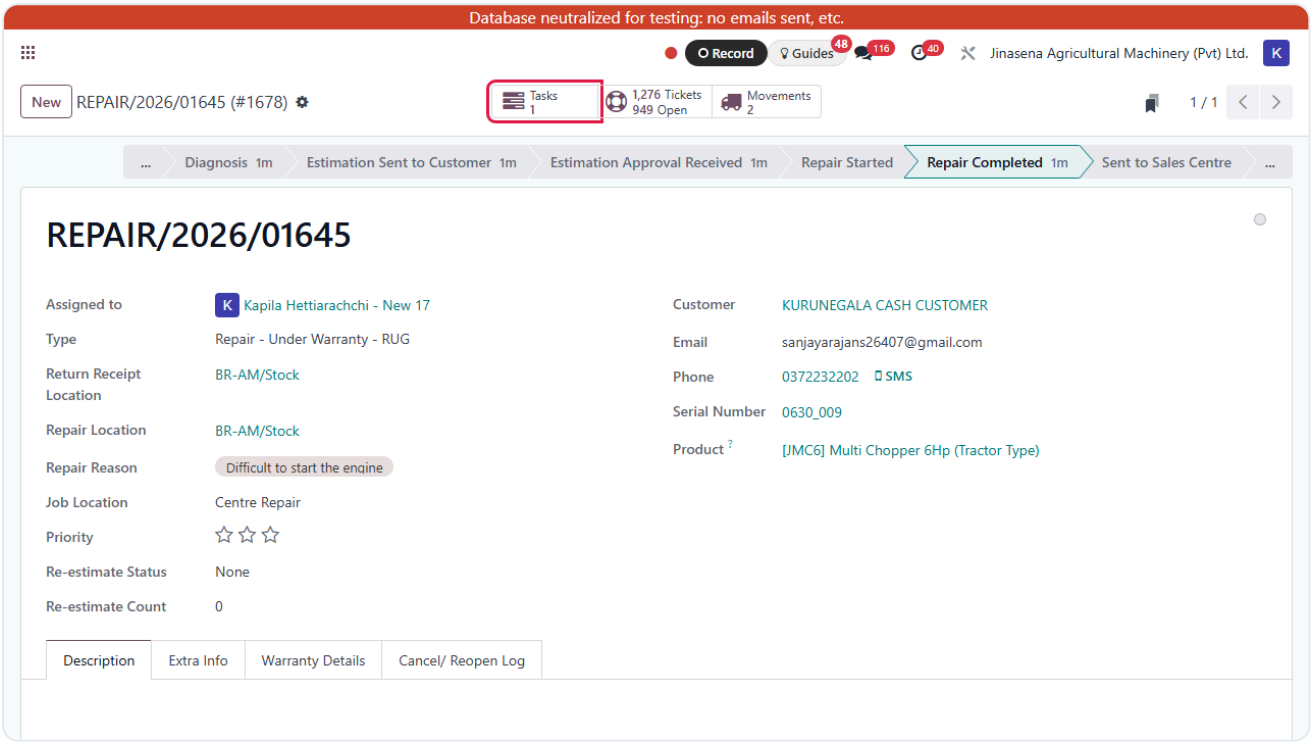

Section G — Task Completion (Steps 38–40)

38 Tasks

Navigation Ticket form → button box

Action **Click the Tasks button.**

Description Opens the repair task so that it can be closed.

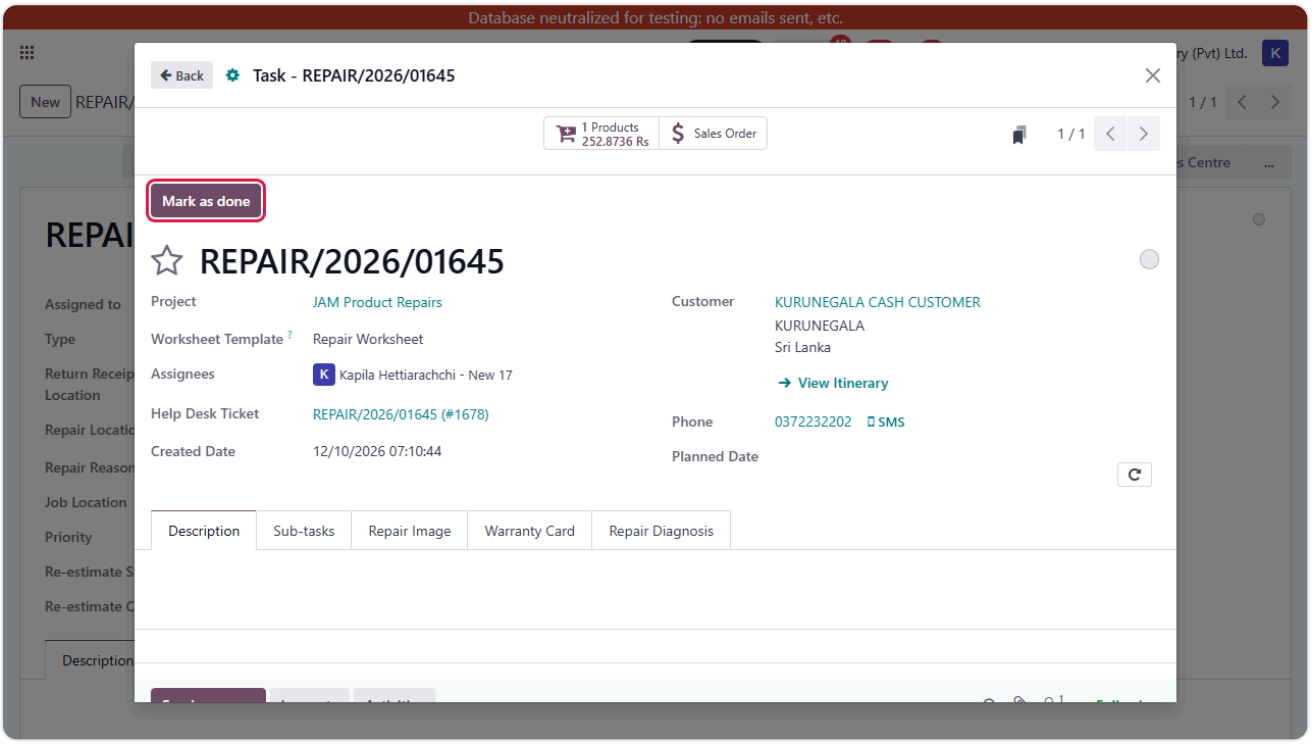

Ticket form — Tasks button

39 Mark as done

Navigation Task form → status bar

Action **Click Mark as done.**

Description The work on the originally created task has been completed; this ends the task.

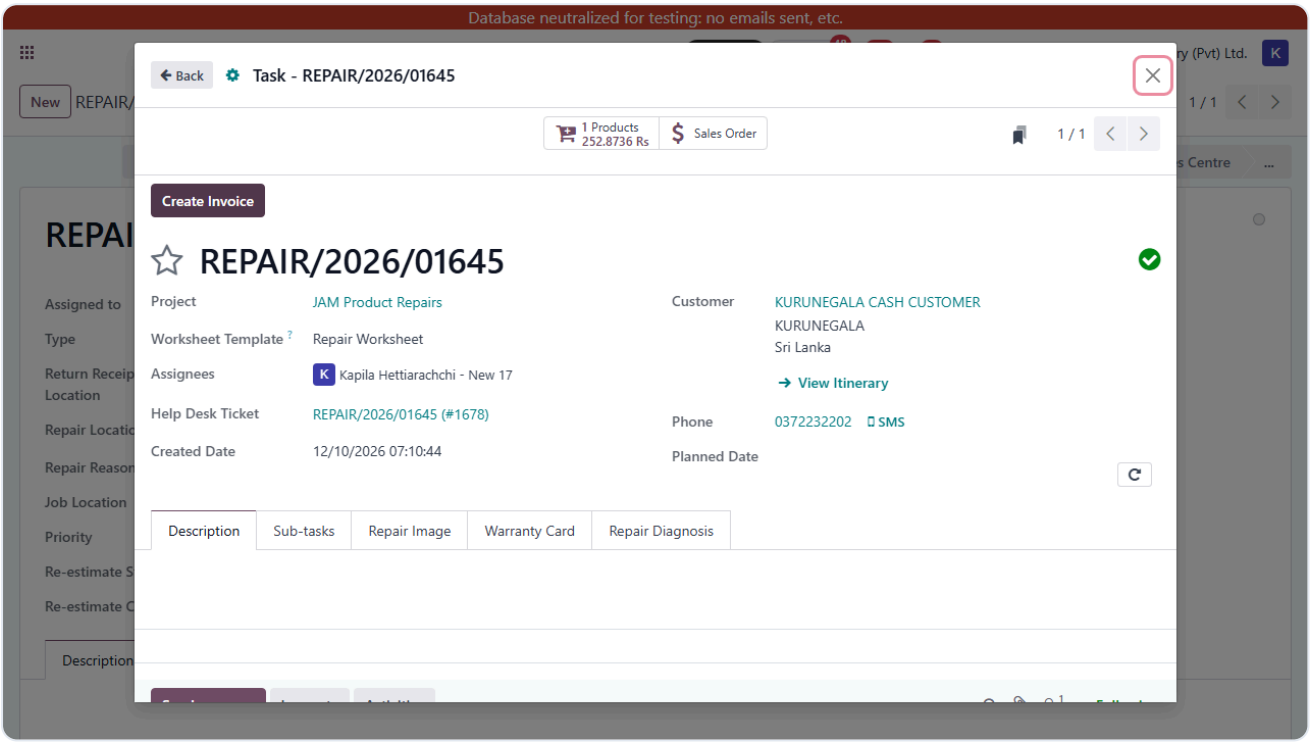

Task form — Mark as done button

40 Close

Navigation Task form (Done)

Action **Click Close.**

Description Returns to the ticket.

Task (Done) — Close

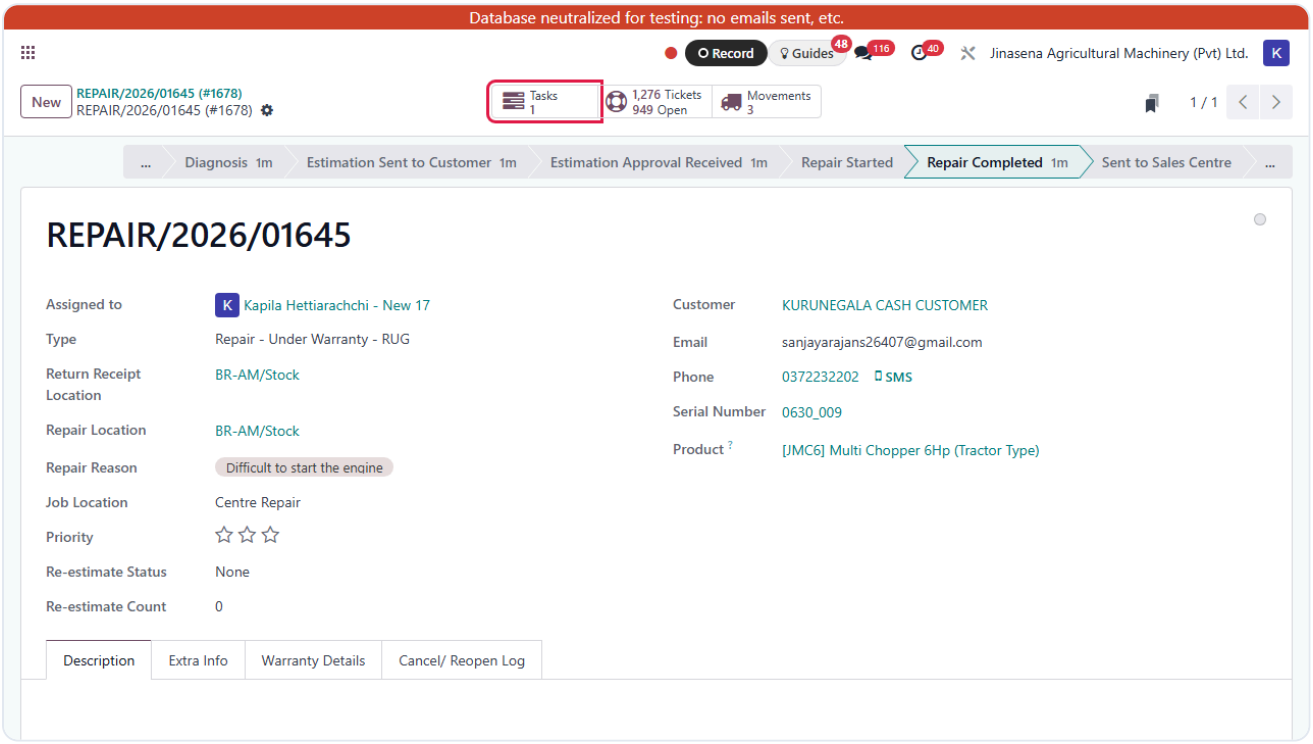

Section H — Final Invoice on the RUG Account (Steps 41–46)

41 Tasks — final invoice

Navigation Ticket form → button box

Action **Click the Tasks button.**

Description Opens the task used for the final invoice.

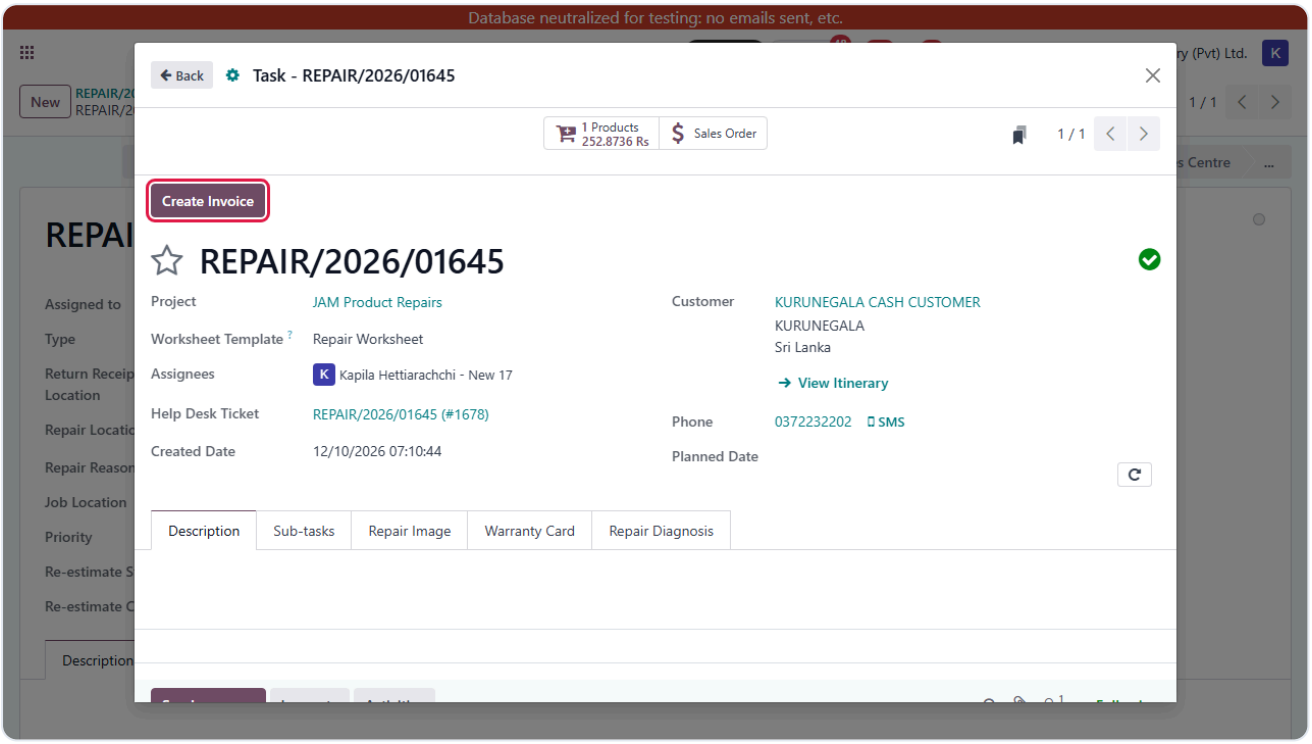

Ticket form — Tasks button

42 Create Invoice

Navigation Task form → header

Action **Click Create Invoice.**

Description Proceeds to the invoice for the repair.

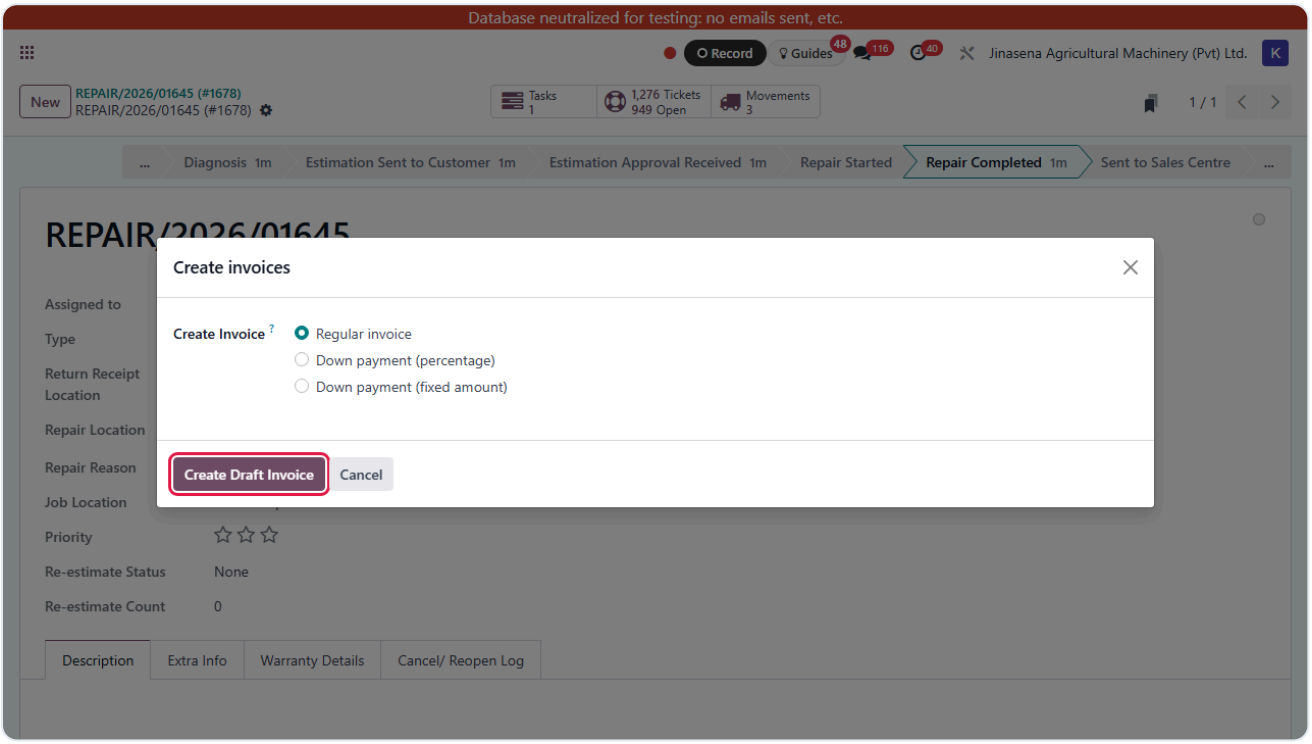

Task form — Create Invoice button

43 Create Draft Invoice

Navigation Create invoices dialog

Action **Keep Regular invoice and click Create Draft Invoice.**

Description Creates the invoice for the order as a draft.

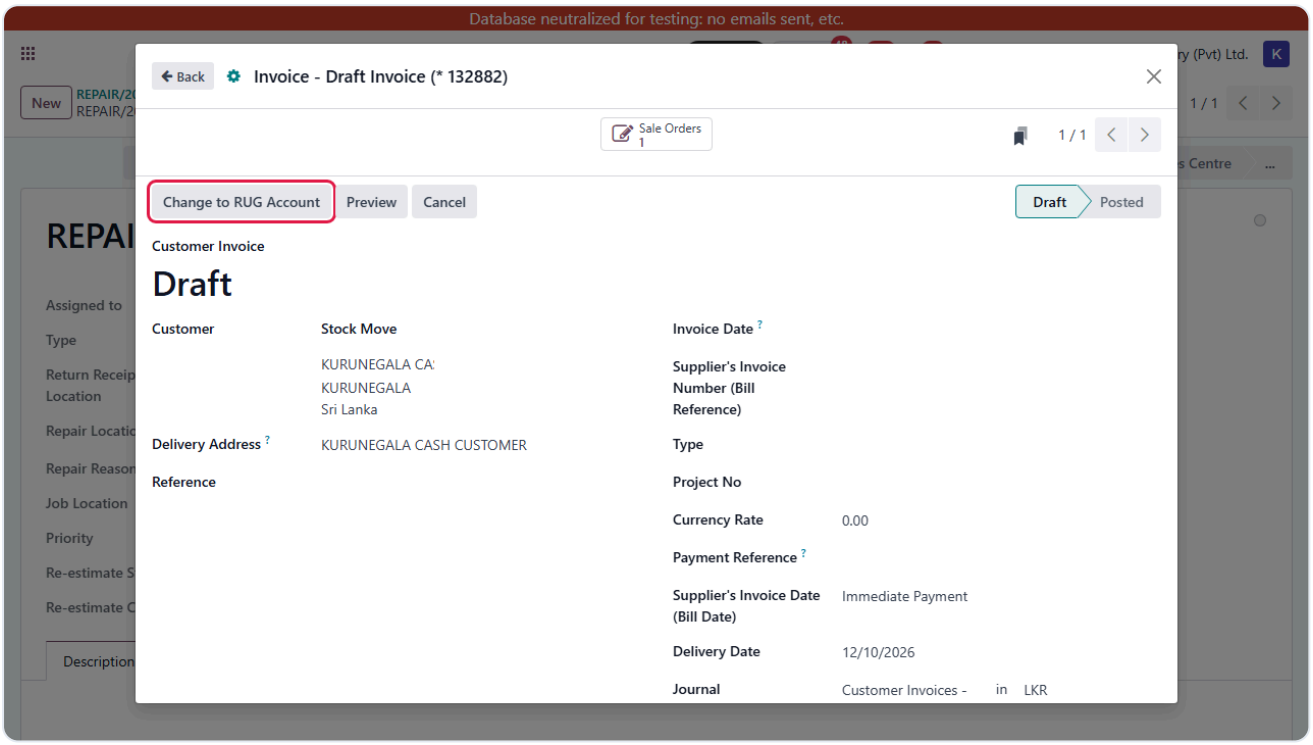

Create invoices dialog — Create Draft Invoice button

44 Change to RUG Account

Navigation Customer Invoice (Draft)

Action **Click Change to RUG Account.**

Description Updates the cost to the RUG account, so the repair is booked against the RUG facility instead of being charged to the customer.

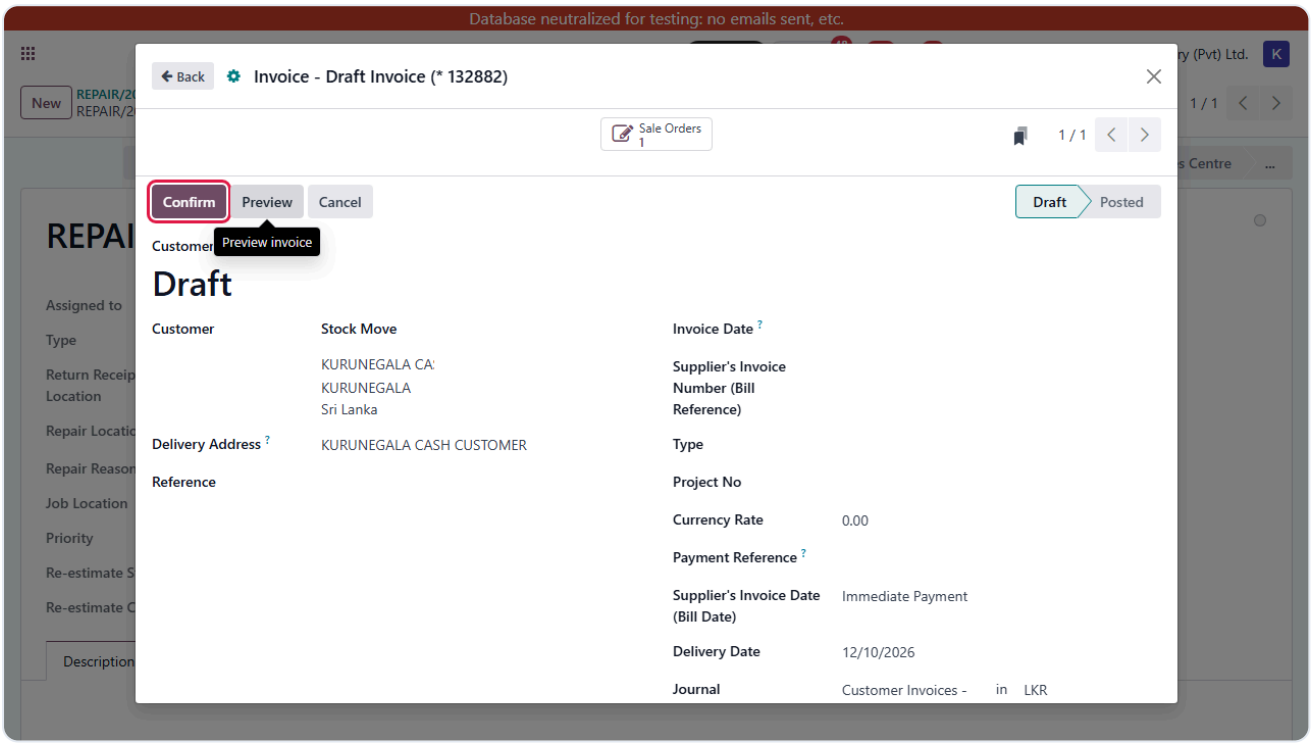

Draft invoice — Change to RUG Account button

45 Confirm the invoice

Navigation Customer Invoice (Draft)

Action **Click Confirm.**

Description Posts the invoice. No payment has to be registered because the cost is on the RUG account.

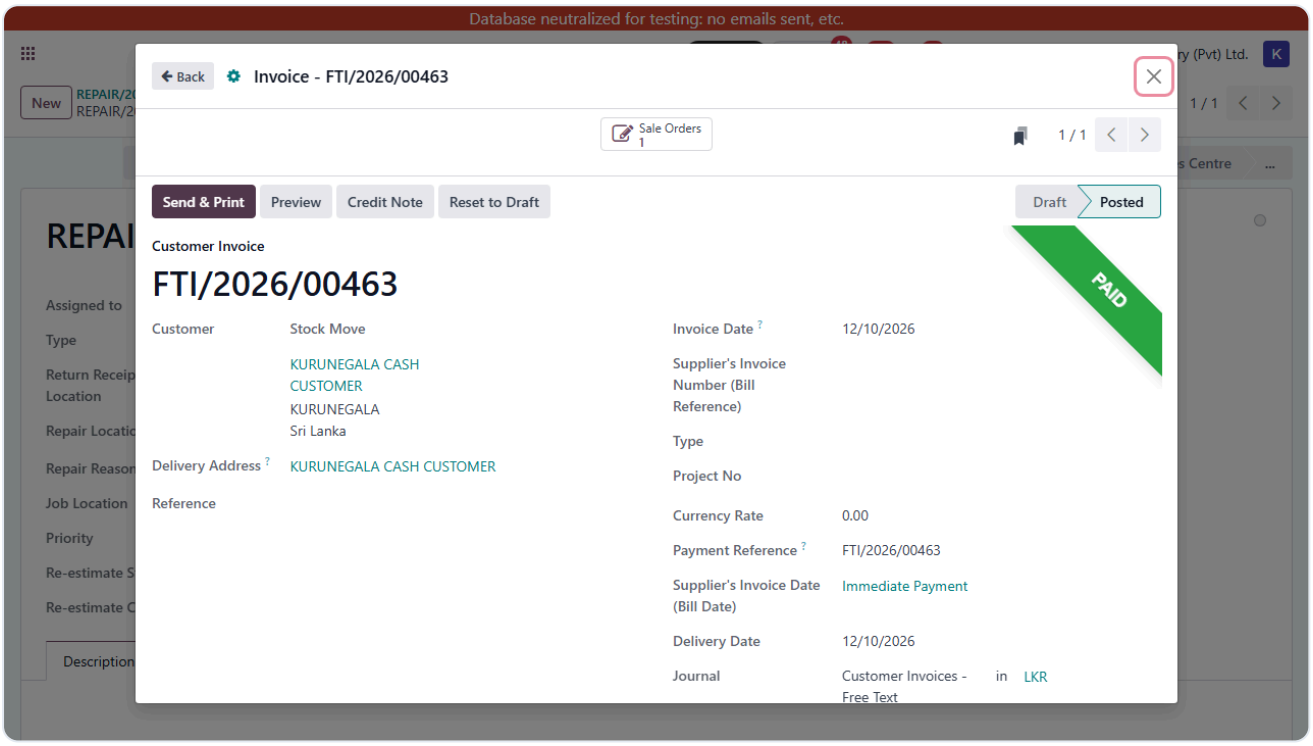

Draft invoice — Confirm button

46 Close

Navigation Customer Invoice (Posted)

Action **Click Close.**

Description Back to the main menu (the ticket). The invoice is *Posted* and already shows the **Paid** ribbon, because it is settled on the RUG account.

Invoice (Posted, Paid) — Close

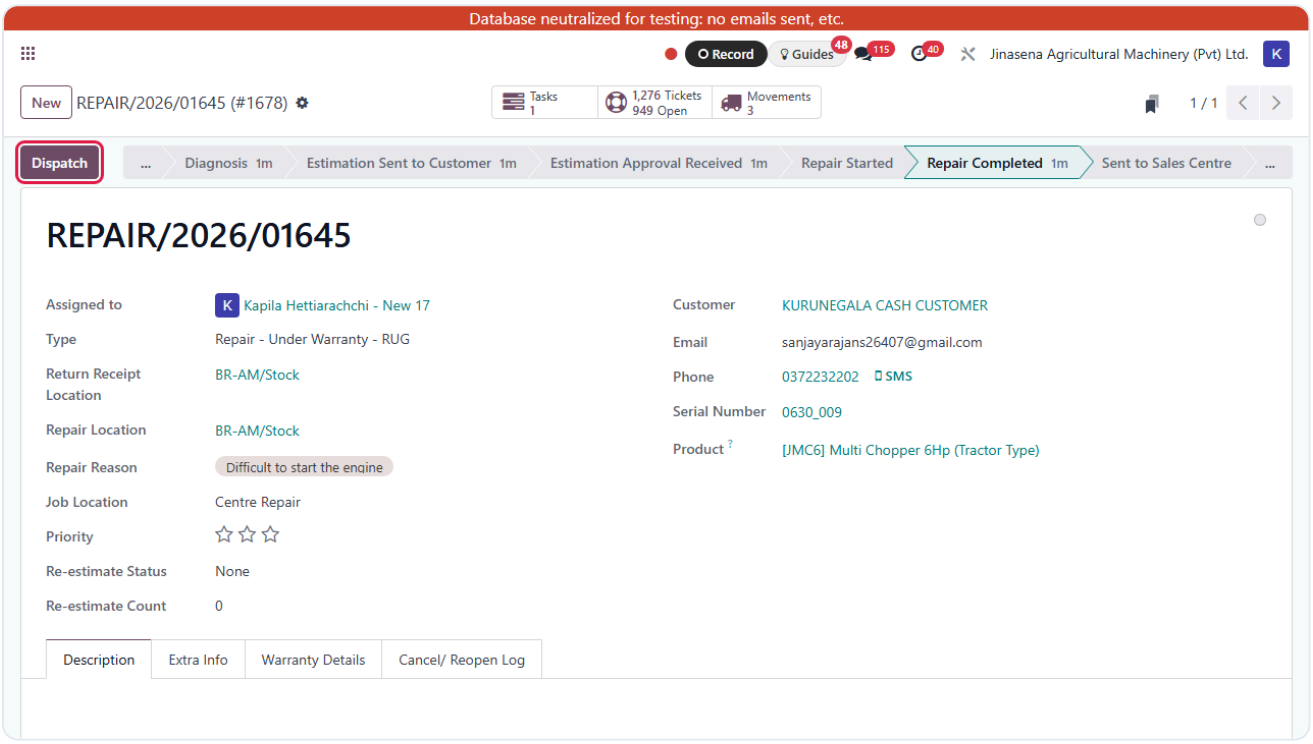

Section I — Dispatch (Steps 47–49)

47 Dispatch

Navigation Ticket form → status bar

Action **Click Dispatch.**

Description Processes the completed repair item back to the customer. The button appears once the task is done and the invoice is processed (you may need to refresh the page).

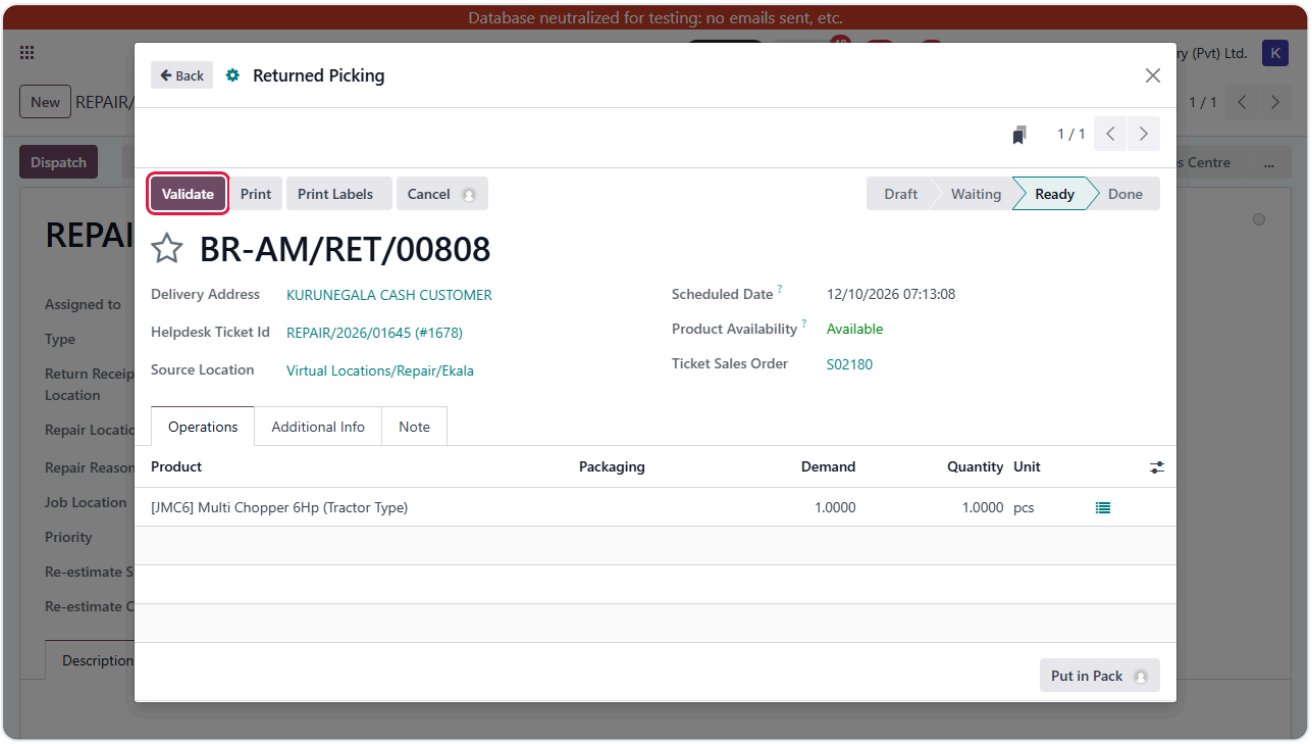

Ticket form — Dispatch button

48 Validate the dispatch

Navigation Returned Picking dialog → header

Action **Click Validate.**

Description Completes the return operation: the repaired item leaves for the customer.

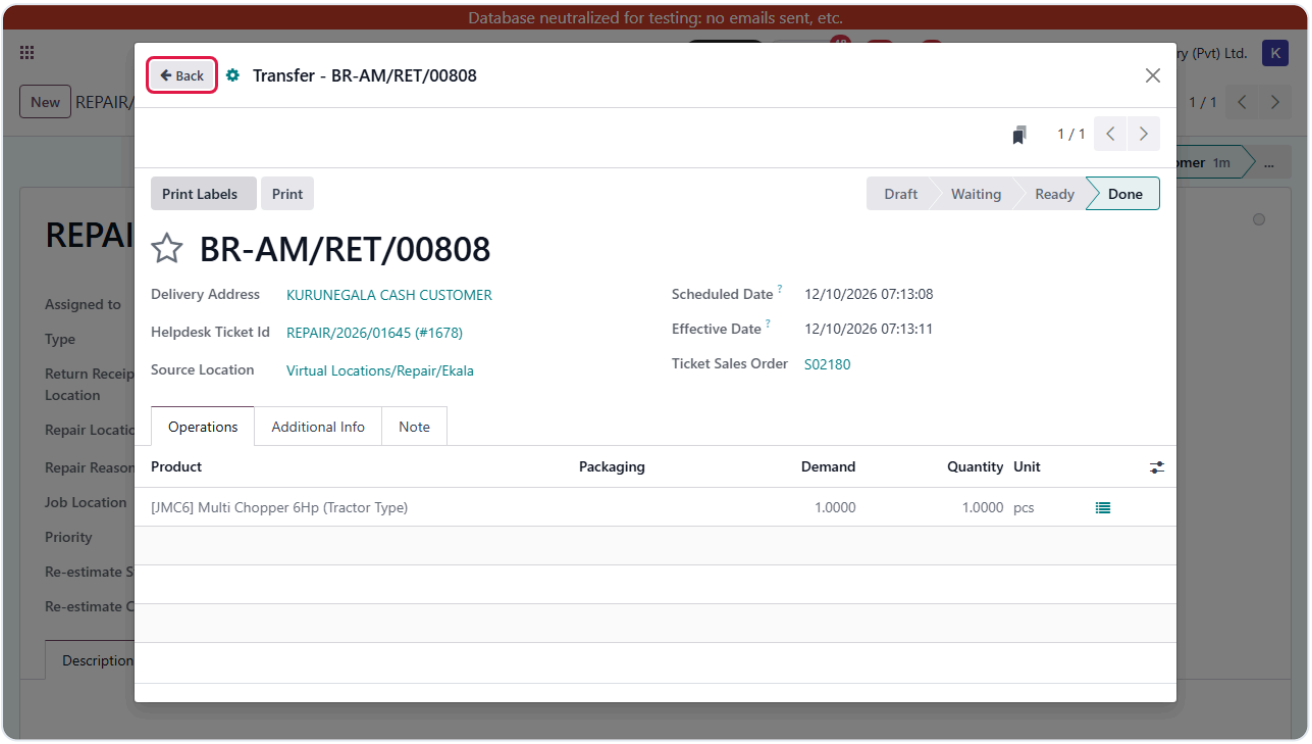

Returned Picking dialog (Ready) — Validate button

49 Back

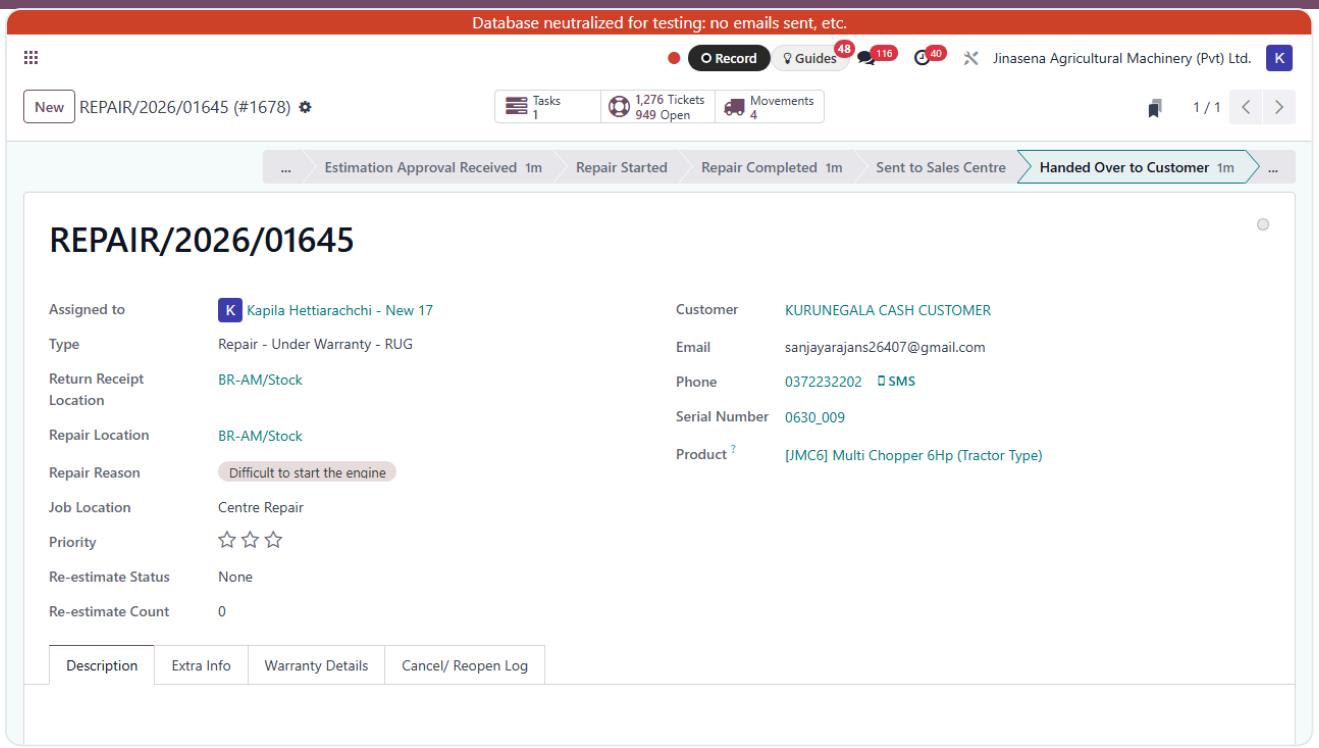

Navigation Returned Picking dialog (Done)

Action **Click Back to go to the ticket view.**

Description The ticket is now in *Handed Over to Customer* — the repair is complete.

Transfer dialog (Done) — Back button

Result: ticket after the Back action

QA notes

- This **Branch** variant of the Under Warranty - RUG (Approved) flow uses **Job Location = Centre Repair**. After the item is received the ticket goes straight to **Plan Intervention**; the order generates a single outbound delivery transfer; the final invoice is switched with **Change to RUG Account** before it is confirmed. The ticket needs a **Serial Number** and a **Warranty Card** image (instead of *Create Serial No*), the quotation goes through **Request RUG Approval → Approve RUG** and is then confirmed directly (no email, online signature or deposit), and there is no payment to collect.
- The Serial Number field only offers serials already sold to a customer (a lot filter of `is_issued = true`). The tour typed its own serial; as required by the test-data rules the automated run picks a serial of [JMC6] whose on-hand quantity is zero (this run used `0630_009`), skipping serials that still hold stock in a Repair location from earlier unfinished runs, which would make the final Dispatch fail. The Product field is filled from the serial, so there is no separate Product step.
- The tour and the test-data rules agree on the Repair Reason (`Difficult to start the engine`), the customer, the diagnosis values (`Burnt Part / Base Plate / Internal / Hi Voltage / Reject / 1-REP-REC`) and the quotation part (`02BB 023`). The Warranty Card and Repair Image files are uploaded from the project's `WarrantyCard.jpg` and `WaterPump.jpg`.
- The **Return** button (`fix_repair_action_direct_return`) raises "You may only return Done pickings" server-side but still creates the Returned Picking first. The automated run clicks the real button, falls back to the same call via `/web/dataset/call_kw` if no picking appears, and validates the receipt

through RPC (the receipt's Validate button is unreliable under the Studio views). The receipt opens as a full page, so the Back screenshot (step 15) shows the Done receipt without a framed button.

- **Approve RUG** is performed by R&D in the tour; the automated run uses the admin user, who sees both *Approve RUG* and *Reject RUG*. After approval the order line price is recalculated (the example part shows `252.87` instead of its list price). On this database the **Confirm** buttons of the order and of the invoice, and the delivery **Validate**, all worked through the real user interface.
- The order's Delivery button opens its single transfer (`BR-AM/OUT/…`) directly, so there is no transfers list to pick from. The automated run clicks **Validate** and checks the result; a transfer that did not complete would be validated via RPC.
- The tour opens the task from the ticket's **Tasks** button to close it, and again for the final invoice (*Task for Final Invoice*); the **Dispatch** button appears only after a full page reload once the task and invoice are done, so the automated flow reloads in a polling loop.
- Each screenshot is captured immediately before the step's action with the target element framed in red (a temporary CSS outline applied to the live element only for the capture); result screenshots (serial entered, warranty card attached, final ticket) have no box. Screenshots come from one clean, fully-passing automated run (admin role).
- Every screenshot shows a red "Database neutralized for testing: no emails sent, etc." banner at the top. This is expected on the test database and is not part of the normal production screen.
